Education to take you places

Academic Catalog

2024 - 2026

A photograph of three graduates in black academic regalia standing outdoors. On the left is a man with a beard, in the center is a woman wearing a hijab, and on the right is a man with a beard. They are all looking towards the camera. The background is a blurred outdoor setting with greenery.

Success is the sum of
small efforts repeated
day-in and day-out.

Chancellor

Ambassador Dennis Awori is a distinguished leader, seasoned diplomat, and accomplished business executive, with extensive experience across multiple sectors, including mobility, healthcare, renewable energy, agriculture, manufacturing, mining, banking, and technical education. His dynamic career spans over four decades, prominently across East Africa and the broader African continent, demonstrating a steadfast commitment to innovation, strategic leadership, and sustainable growth.

Ambassador Awori is currently the Chairman and Country Delegate of CFAO Mobility Kenya Limited and CFAO Kenya Limited and Executive Director of CFAO SAS (in Paris), subsidiaries of Toyota Tsusho Corporation of Japan. The CFAO Group has extensive operations across all 54 countries in Africa, in the key business domains of mobility, healthcare, consumer goods, agriculture, renewable energy, and infrastructure.

Previously, he served as the Ambassador of the Republic of Kenya to Japan and Korea (2003-2009), where he significantly strengthened Kenya's diplomatic and trade relations with Japan and played a pivotal role in establishing Kenya's mission to Korea. His diplomatic tenure emphasized economic diplomacy, promoting robust private sector partnerships that fostered bilateral investments and cultural exchanges in both countries.

In the private sector, Ambassador Awori has held influential leadership positions, including Managing Director and Chairman roles within prominent multinational and listed corporations, such as Toyota Uganda Ltd, Lonrho Motors East Africa PLC, Toyota East Africa Ltd, Carbacid Investments PLC, East African Cables PLC and Bank of Africa Kenya Ltd. His corporate leadership has been marked by substantial contributions to organizational restructuring, strategic market expansions, and impactful board development.

Ambassador Awori has consistently demonstrated deep engagement with educational advancement. He chaired the Governing Council of the Kenya Technical Trainers College (KTTC) as it evolved into the Kenya School of Technical, Industrial, Vocational, and Entrepreneurship Training (TIVET) and was instrumental in launching the Toyota Kenya Foundation, the Toyota Kenya Academy, and the David Wambuli Technical Training College. These institutions significantly advanced technical education and vocational training across Kenya, aligning with his commitment to empowering Africa's youth through quality education and skills development.

Ambassador Awori's leadership is complemented by his active involvement in various public and voluntary organizations. He has served as the founding Vice

Chairman of the Kenya Private

Sector Alliance (KEPSA), Chairman of KEPSA, founding Chairman of the KEPSA Foundation, Trustee of the Kenya National Chamber of Commerce and Industry, board member of the Communications Commission of Kenya (now Communications Authority of Kenya) and Kenya's Vision 2030 Delivery Board as well as in the Steering Committee of the New Partnership for Africa's Development (NEPAD).

A passionate advocate for community service, Ambassador Awori has held prominent roles in numerous civic organizations, including as President of the Rotary Club of Nairobi East, President of the Nairobi Club, and Chairman of both the Kenya and Uganda Rugby Unions in consecutive terms. His active engagement in these roles underscores his deep-seated belief in community impact and corporate social responsibility.

Ambassador Awori earned his Bachelor of Science degree in Aeronautical Engineering from the University of Manchester, followed by Management Development Courses at Ashridge University in the United Kingdom and Emory Business College in the United States of America.

Amb. Dennis Awori Chancellor, USIU-Africa

Message from the Vice Chancellor

As you all look through this catalogue, therefore, consider it a window into the multiple possibilities we are offering you as you plan how you will contribute to this world with the right tools.

**Prof. Mwenda
Ntarangwi**

Vice Chancellor,
USIU-Africa

Congratulations, you have joined one of the best private universities in Africa and the oldest in Kenya. We pride ourselves in preparing students like you to solve global problems. This catalogue is a window into the world of academics that will prepare you for solving unique problems in your world of influence.

USIU-Africa offers you an opportunity to select programs that are developed with industry in mind; providing you knowledge, skills and positioning to align with where the world is going. Our faculty, infrastructure, support, experiential learning and extracurricular opportunities combine with academic rigor to mould you into a leader for your chosen career.

USIU-Africa is recognized for its firm commitment to a combination of the liberal arts and professional programs, giving you a well-rounded education to prepare for an ever-evolving world. We offer a broad array of programs across humanities, arts, social sciences, business, and natural sciences as well as a flexible curriculum which allows you to explore your interests before deciding on a major. Our first-year foundational courses in General Education introduce you to both life and academic skills that are geared towards developing a well-rounded individual with transferable skills from one area to another. We introduce you to such key skills and experiences as public speaking for effective communication, writing and reading, critical thinking, and wellness that are sought after by most employers and Graduate Schools.

Beyond our General Education program, we also provide a wide variety of co-curricular engagements where you further hone your skills and also discover your talents in clubs, sports, and service to both internal and external communities of USIU-Africa. We work with you to develop your leadership skills and learn to work with diverse individuals on some of the most-pressing social-economic and technological needs of our world today. In all these opportunities you will be guided mentored and

supported by our expert faculty and staff who bring years of experience to what they do every day.

Part of USIU-Africa's distinctiveness is its first-rate facilities built with contemporary learning styles in mind. Whether you are looking for opportunities to brainstorm on a start-up idea with classmates, develop a business plan for a community-based organization, or prepare for a spoken word competition with other universities, we have a place for you. And let's not forget our world-class library that connects you with both physical and electronic resources to enable you learn and carry out your research on campus or at home.

For our parents who are entrusting us with your students, please be assured that you have made the right choice. USIU-Africa will provide your student with an education to take them places. We have seen this in our more than 25,000 alumni distributed in all corners of the world. They tell us that the education they received from USIU-Africa not only gave them knowledge skills and values in their chosen majors but also agility, flexibility and problem-solving skills in a constantly changing world.

As you all look through this catalogue, therefore, consider it a window into the multiple possibilities we are offering you as you plan how you will contribute to this world with the right tools. We are here to walk with you all the way to when you finish your course of study and cheer you on as you enter into the place where you will make a difference for the good of humanity. Come as you are because here at USIU-Africa, we uphold and celebrate diversity, inclusivity, equity and creativity. Congratulations once again and welcome to your university!

Our Vision

To be a premier institution of academic excellence with a global perspective.

Our Mission

Promote the discovery and application of knowledge, the acquisition of skills and the development of intellect and character in a manner which prepares students to contribute effectively and ethically as citizens of a changing and increasingly technological world.

This mission is achieved through selected high quality Undergraduate, Graduate and Doctoral academic programs which result in the following outcomes:

Higher order thinking

The ability to collect, analyze and evaluate information and formulate conclusions. Students develop and demonstrate the ability to think critically, analytically and creatively.

Literacy

Competence in oral, written, quantitative, and technological skills. Students develop and demonstrate competency in oral and written communication as well as demonstrate scientific, quantitative and technological literacy.

Global understanding and multicultural perspective

Awareness, knowledge and appreciation of both the diversity and commonality of cultures. Students acquire these perspectives through formal study of languages, history, literature and the arts and through working, studying and living cooperatively in a racially, ethnically, and culturally diverse environment. Further, students acquire an understanding of economic, historical, political, geographic and environmental relationships on a global basis.

Preparedness for career

Mastery of a field of knowledge and its multi-cultural and multinational application. Such mastery is accomplished through both formal study and various experiential forms of learning such as internships and field experiences.

Leadership and ethics

As part of their growth and development, students formulate and articulate the ethical standards and develop the leadership skills which will guide their professional and personal lives. This is accomplished through formal courses in

discipline areas and active engagement of students in leadership roles both inside and outside the classroom.

Community service and development

A sense of being part of a community and a desire to be of service to it. Students are given opportunities to participate in community service, citizenship, or social action projects or activities.

This mission is carried out in an environment which encourages intellectual and scholarly development; fosters openness to a wide range of ideas, cultures, and people; and enhances personal growth.

Core Values

Life-long learning

Developing a learning culture that continues throughout a person's life.

Integrity

Ensuring the pursuit of excellence by upholding professional and ethical standards and being accountable.

Innovativeness

Introducing new methods and strategies that ensure quality, efficiency, effectiveness and productivity.

Social responsibility

Providing leadership in responding to issues of national and global concern through collaborative efforts.

Academic freedom

Upholding the spirit of free and critical thought and enquiry, through open exchange of ideas and knowledge.

About USIU-Africa

USIU-Africa is the leading international university in East Africa, where students from all backgrounds are empowered with a globally recognized education, real-world skills, and a vibrant multicultural experience that prepares them to thrive and lead anywhere in the world.

What makes USIU-Africa different?

World-Class Academic Excellence: USIU-Africa delivers world-class education through a globally relevant curriculum and innovative teaching methods that prepare students for an interconnected world. Our academic programs combine rigorous standards with cutting-edge approaches to learning, ensuring graduates are ready for global challenges.

American-Accredited Degree: Earn an American-accredited degree recognized worldwide and learn from highly qualified professors with international experience opening doors to global career opportunities and advanced study programs.

Vibrant Campus Life: Join a diverse community with 50+ sports and clubs, and cultural events that match your interests and passions. Grow beyond the classroom through leadership opportunities, personal development programs and community service. Our state-of-the-art campus offers the necessary facilities and services to stimulate learning and support student interaction.

Personalized Support & Mentorship: We provide a personalized learning environment ensuring dedicated and meaningful faculty-student interactions. Students have access to experienced mentors who provide guidance throughout their academic journey, along with comprehensive support services to ensure everyone succeeds and thrives.

Multicultural Community: USIU-Africa's reputation has drawn students from over 60 countries, creating a truly multicultural community where they build cultural bridges and life-long friendships while taking part in rich cultural celebrations and events that enrich their university experience.

Career Development & Opportunities: Students gain real-world experience through strategic industry internship placements and receive career guidance tailored to their goals and aspirations, supported by comprehensive preparation for diverse industries and career advancement opportunities.

Global Alumni Network: Join a thriving alumni network of over 27,000 members, united by shared experiences and lasting bonds. This community offers meaningful ways to give back while staying connected. Active Alumni Chapters are already making an impact in Uganda, Tanzania, South Sudan, and Rwanda.

Disability Inclusion: Experience true inclusion at USIU-Africa through accessible facilities, support services, and equal opportunities that ensure every student thrives. The university fosters a disability-inclusive environment that upholds equity, dignity, and accessibility for all. Inclusivity means that everyone belongs — we embrace and support students of all abilities.

Innovation & Incubation Support: We are committed to nurturing student entrepreneurship through our Innovation & Incubation Hub, designed to support creativity, research, and business development.

Financial Aid Accessibility: We invest in potential and talent, making quality education accessible to all. Students have an opportunity to access over 30 financial aid programs including partial and full scholarships, sports scholarships, Vice Chancellor's grant, on-campus work-study opportunities etc.

ICT Support Services

ICT Support Services

The ICT Department has been mandated with the task of strategizing, planning and implementing a short, medium and long-term shared technology vision to support the University's overall education, research, and administrative activities. The Department provides support for systems in business applications, infrastructure, multimedia and telecommunications operations. In doing so, the Department seeks to empower our students, faculty and staff to use information technology to promote life-long learning for the benefit of humankind and apply that knowledge for the development of society. We recognize ICT as a tool that enables students, faculty and staff to create, learn, explore, teach, increase their curiosity and imagination may lead them.

ICT Services at USIU-Africa

The following is a list of the services that are available to students on campus;

1. Student Information Portal: Gives each student access to registration information, fee balance, class schedule, fee statement, grades, degree audit, information on clubs and news. its.usiu.ac.ke

2. Blackboard E-Learning Platform: This e-learning platform allows students to access course outlines, assignments, quizzes, announcements and gives them the ability to check their online submissions for plagiarism using an anti-plagiarism tool called Safe Assign. The University has put in place examination protocols through a combination of two solutions: Respondus Lockdown Browser and Respondus Monitor.

3. E-mail Account: At USIU-Africa, students have access to official communication via an automatic enrollment process upon registration. Each student could also benefit from an additional 1TB of free cloud storage on Microsoft's OneDrive platform and free copies of the Microsoft Office suite in as many as five (5) devices.

4. Printing & Photocopying: Printing, photocopying and scanning services are available to each student at designated areas as soon as they top up their printing accounts. Additional services include ability to check printing statement, check printing credit left, confirm top up and change password.

5. Online Learning Support: There is a dedicated team that supports staff and students in regards to online learning. This includes regular trainings and video uploads on how to perform specific tasks. During exams there is live support for students who have challenges accessing exams.

6. Internet Access: Internet connectivity on Wi-Fi is available via over 100 Access Points (APs) in designated areas outdoors and indoors, in classrooms, computer laboratories and the Library. Students are required to have a registered operating system and an up-to-date anti-virus.

Multimedia Services

Students at USIU-Africa benefit from access to a range of multimedia services such as video conferencing and audio-visual (AV) equipment in classrooms. USIU-Africa supports Zoom video conferencing that facilitates synchronous learning. Some of the ICT laboratory services accessible by

students include:

- Teaching Lab 1 to Lab 6 in the Lillian K. Beam Building;
- Lab 7 being the former Main lab.
- Teaching Lab 18 to 10 in Freida Brown Center.
- JRN Lab in the Lillian K. Beam Building and the School of Communication, Cinematic and Creative Arts;
- Software Lab and Hardware Lab in the Lillian K. Beam Building;
- Journalism Content Creation Room in the Lillian K. Beam Building;
- Journalism Editing Room 1 and 2 in the Lillian K. Beam Building;
- Language laboratory in the RSTU classroom block;
- Instruction Room in the Library;
- e-Resource Center in the Library;
- Audio Visual (AV) booths in the Library;
- Open Public Access Catalogue (OPAC) Area in the Library;
- General Lab in the Old Lab Building;
- Videoconferencing facilities.

Computer Laboratory Regulations

Students who have paid laboratory fees or those doing IST courses are permitted to enter the Computer Laboratories

Health Services

Health Services

University Health Centre

The University Health Center, located at the Freida Brown Student Center. It is a support department mandated to provide diagnostic, curative, preventive and promotional health services to the university staff, students and faculty throughout the semester.

These subsidized outpatient consultation, some laboratory tests and pharmacy services are offered at no extra charge beyond the paid medical fee. This plan does not cater for hospital admission and wider scope of laboratory services. Students are advised to acquire medical insurance to cover the additional services that may be required e.g. imaging, dental, optical etc.

The Health Center is open around the clock daily including public holidays and weekends. It is staffed with professionally trained and locally licensed medical staff.

There is a fully equipped standby ambulance service ready to respond to emergencies on campus.

All international and Kenyan students residing on campus are required upon admission to the University to purchase the school medical insurance or provide proof of ownership of comprehensive supplemental insurance that includes inpatient care. Such coverage may be purchased from a USIU-Africa recommended health insurance company. Hospitals in Kenya generally do not accept credit based medical schemes purchased internationally.

Additional information or inquiries on services provided at the clinic or medical insurance plans is available from the Health Center and queries may be directed to the Senior Insurance Officer on **Tel: +254 780 640 963**.

Division of Student Life

Division of Student Life

The Division of Student Life is responsible for recruitment and admissions of new students, financial aid programs, exchange and study abroad programs, student housing, student activities including sports and clubs, on-campus eatery services, student transport, counseling, disability inclusion, gender equity and protection programs, placement and career services, and internship programs. The Division is also responsible for the preparation and enforcement of the Student Handbook, including the student judicial system. It is made up of various Departments and is headed by the Deputy Vice Chancellor-Student Life.

Student Cabinet

The Student Cabinet (SC) is comprised of democratically-elected student leaders. It is the voice of the students that channels their concerns to the administration, in addition to providing leadership among students. The Cabinet plays a major role in the support and development of student life.

The Cabinet also manages all student clubs as well as other activities, organizations and help facilitate students' learning and community service beyond the classroom. Some of the student clubs under the Cabinet include Peer Counselling, Red Cross, Spoken Arts and Debate Society (SADS), Information Technology (IT), Business Association Club, the International Association of Students in Economics and Business Management (AIESEC), Enactus, the Environmental Society (ENSO) among others. All clubs and their contacts can be accessed through this link: <https://www.usiu.ac.ke/clubs-and-organizations/>. Students may join an existing club or create their own by contacting the Student Cabinet. SC offices are located on the ground floor of the Freida Brown Student Center and the representatives are available on phone (+254) 730 116 767 or on email: stuac@usiu.ac.ke

Co-Curricular Events

The university organizes a number of events throughout the year such as the Culture Week, the annual Students' Leadership Retreat, Graduation Dinner Dance and the Mr & Ms. USIU-Africa beauty pageant among others. Clubs and sports events allow students to have opportunities to travel around the world as participants in clubs or sports competitions and programs. For more information on club activities, contact the Student Activities Office through the coordinators: (+254) 730 116 792, or (+254) 730 116 747 or the Student Council (+254) 730 116 767.

International Students Office

USIU-Africa boasts of hosting over 62 nationalities on campus. A dedicated international students' office caters for the welfare of all international students. International students often take advantage of the opportunity to visit Kenya's famous game reserves or parks and any of the unique tourist spots found all over Africa. This office also assists in the university to organize the signature culture event on campus – the Culture Week - showcasing the unique cultural diversity found in USIU-Africa.

Housing and Residence Life

The University has limited accommodation on campus mainly to cater for international students. Housing for students is available in two campus hostels. All rooms are double occupancy and the Housing Office assists students in their transition to campus life and strives to provide a sense of community within a culturally diverse environment. The Housing Officer, with the help of resident student committees develops various activities, including adventure safaris that engage resident students during their free time. Common rooms on each floor provide residents with television, reading rooms and board games. Laundry services are also available at a reasonable fee and meals are sold within campus.

Counseling Services

Counseling is an integral part of student services, which is provided through the Counseling Center. The primary mission of the Center is to assist members of the university community to experience personal growth and promote mental health. Services are provided by professionally trained staff who ensure that the sessions are strictly confidential. Individual and group Voluntary Counseling and Testing (VCT) services are also available at the Center, and are offered through sessions conducted by qualified

USIU-Africa counselors. The Counseling Center is situated on the 2nd floor of the Freida Brown Student Center, and is also available on phone: (+254) 730 116 748/797/791/746.

Placement and Career Services (PACS)

The Placement and Career Services Department was established to assist students and alumni develop, evaluate and/or implement career, education and employment decisions and plans for future enterprise and employability in the global market. This is achieved through the Department's programs which include: Career advising, employability trainings, placement and recruitment, entrepreneurship trainings, networking workshops, volunteerism, career fairs and mentorship. The goal of volunteerism is to create a desire to be part of the community and be of service to it. Service-learning opportunities that are available throughout the year campus community life, orientation programs and committees. Such opportunities include provision for volunteer services during major campus events, preparation of student publications, leadership workshops and engagement in various community programs.

The only limit to our
realization of tomorrow
will be our doubts of
today.

Robert Collier

Division of Academics

Division of Academics – Transformative Teaching, Learning and Research

The Deputy Vice Chancellor Academics, Transformative Teaching, Learning and Research (DVC-A, TTLR) is the head of the Division. The Division comprises the following six Schools (Chandaria School of Business; School of Humanities and Social Sciences; School of Pharmacy & Health Sciences; School of Communication, Cinematic and Creative Arts; School of Science and Technology; School of Graduate Studies); USIU-Africa Online, Library, Registrar and Quality Assurance.

Mission

USIU-Africa's DVC-A, TTLR Division provides excellence, innovation and leadership in integrating quality teaching and student learning with applied academic research and scholarship and community service to a diverse clientele in line with USIU-Africa's mission and vision.

Vision

To be a premier Academic, TTLR division in Africa, discharging its responsibilities in a transparent and accountable manner, and with a distinction for its operating excellence.

Objectives

- Encourage interactive teaching and student learning; and close mentoring relationships;
- Provide a foundation for critical thinking, experiential learning and personal growth;
- Encourage research and scholarship among students and faculty and promotes an entrepreneurial approach to funding;
- Inspire and supports innovation and creativity among faculty and student body;
- Encourage strategic leadership and high emotional intelligence.

Library and Information Center

Library and Information Center

The University Library and Information Center is an ultra-modern facility which offers all the resources necessary to support teaching, learning and research, in one central location, making it the intellectual hub of the University.

It has a seating capacity of 1,200, can accommodate over 300,000 volumes of books and presents a vision for the 21st century through the integration of books and information technology as well as inviting spaces that encourage collaborative learning.

The Library and Information Center facilitates research, collaborative learning, individual learning, informal gatherings and multimedia instruction through a variety of services and technologies. It provides a wide array of print, non-print, and electronic resources.

Library users access more than 400,000 volumes of electronic resources on site as well as offsite through remote access. These collections are recognized for their strengths in focusing on the programs offered by the University.

The fully automated facility provides a range of services which include lending and receiving, reference and information, liaison services, a digital repository, an archive, a bindery, photocopying, multimedia access and information literacy instruction. The Library encourages use of its collection, and assistance is provided at the various information service desks.

Wired and wireless access points, available throughout the library building, provide high-speed network connections. Online research tools facilitate

easy access to digital resources.

There are 10 study carrels for graduate students, 6 for Doctoral students, and 4 for faculty members. These are intended for research and other scholarly activities. To support individual learning, the custom-designed study carrels are wired with power; some have multimedia stations for electronic access to audiovisual collections.

An open lounge at the exhibition area near the entrance including two beautiful courtyards, provide casual settings for individuals or groups to study. A multimedia instruction lab provides information literacy skills.

Resources & Services

Instructional sessions provide training on how to use the library, its online resources and the Online Public Access Catalog (OPAC). They also provide guidelines on how to retrieve materials from the shelves. Other topics covered include, Scholarly Research, Communication and Publishing, Online Database Searching and Retrieval, Citation and Referencing Styles and Copyright Ethics in the eLearning Environment. A training schedule is disseminated every semester through e-mail, Blackboard, the USIU-Africa website and the University's weekly newsletter known as Campus This Week.

The OPAC helps users identify items in the library's collection including both print and electronic books,

audio visual materials and journals. Library users can also access the OPAC on and off campus from the USIU-Africa website, renew items, review their accounts and change their addresses. It is through the OPAC that library users can now access e-newspapers, subject guides that provide a starting point for research and they can chat with a Librarian in real time by using the 'Ask-a-Librarian' feature.

Online databases such as EBSCOHOST, IEEE, EBook Central, JSTOR, Emerald, PsychArticles, Taylor and Francis, Grant's Dissection Videos and Medical Embryology Animations, provide access to full text articles and abstracts in over 100,000 journals, magazines and newspapers for research needs, over 400,000 electronic books as well as thousands of videos, talks and cases.

The Course Text Collection meets core reading needs in specific areas of study. These resources are loaned to students and faculty for an entire semester.

The Graduate Research Hub provides USIU-Africa graduate students and faculty with resources designed to support and inspire them in their academic endeavors. It also provides collaborative and individual spaces that foster inquiry and analysis. Located on the first floor of the Library.

The American Studies Collection promotes a thorough understanding of the United States of America. The collection covers, technology, architecture, art, business, cultural studies, drama, economics, education, geography, gender studies, history, international relations, politics, journalism, labor studies, law, linguistics, literature, music, philosophy, poetry, psychology, religion, science and sociology. The collection is open to the academic and research community in the East and Central Africa region.

The Africana Collection provides readership and research content and promotes both national and African authorship.

Inter-library Loan Service is normally used to obtain materials not available in the library from other local libraries. Requests are made through the Librarian.

Photocopying Services are provided through user-operated copiers.

The Archives Section supports the dual mission of education and research by striving to preserve and provide access to USIU-Africa's historical records; to gather and curate, authentic, and complete records of the life of the university; and to promote the highest standards of management for USIU-Africa's current records.

In the spirit of embracing open access and promoting readership, the library has an established up-to-date **Institutional Repository** where the USIU-Africa community showcases and shares its publications, research output, and other scholarly works with both the internal and external user world. The repository, which has been hyperlinked for direct access through the library portal and the university website, is available at <https://erepo.usiu.ac.ke/>. The collection is growing by the day and currently stands at over 7,600 publications from 2,000 in 2016. These items are fully searchable and retrievable through all search engines. Theses that were originally submitted in print format will be digitized to enable online access.

The well-established **Bindery Section** provides maintenance, repair and protection not only for library materials, but also completes binding orders for other departments within the University. The Bindery has the skills and equipment required to bind dissertations, theses and project.

Quality Assurance

Quality Assurance

The Quality Assurance Department assures quality in the Academics Division of the university.

Vision

To be a centre of excellence in the enhancement of quality assurance practices in higher education.

Mission

The mission of the Department is to initiate, enhance and support educational effectiveness processes in the university in order to ensure quality programs and thus quality graduates.

This mission is achieved through engagement in the following activities:

1. Provide technical support in the development, discussion and approval of new degree program proposals;
2. Coordinate assessment of student learning beyond the grade through program assessment and program review processes;
3. Faculty development for effective pedagogy so as to nurture teaching excellence through:

- Comprehensive orientation of new faculty into USIU-Africa's educational effectiveness culture;
- Conducting workshops and seminars on effective classroom practice;
- Coordinating training in the use of IT to support teaching and learning;
- Initiating, supporting and coordinating workshops and seminars for educational effectiveness;

- Coordinating training in research and supervision of research.

4. Organize annual symposia for faculty to share their experiences in the assessment of students' learning;
5. Develop and revise materials and instruments to support faculty, staff and students' engagement in educational effectiveness;
6. Coordinate and support accreditation activities;
7. Conduct surveys on educational effectiveness related matters;
8. Provide technical support for the assessment of co-curricular activities.

USIU-Africa Online

USIU-Africa Online Mandate

USIU-Africa is dedicated to shaping the future of education through USIU-Africa Online, the university's dynamic Online Education Directorate. USIU-Africa Online acts as the central administrative and coordinating body for all aspects of online learning, providing essential support to faculty and students in their pursuit of blended and online education. By leveraging innovative teaching methods and cutting-edge educational technology, USIU-Africa Online aims to create transformative, interactive, and engaging learning experiences that transcend traditional boundaries.

USIU-Africa Online is dedicated to:

- Developing and enhancing blended and online courses within the Learning Management System (LMS);
- Equipping instructors with the skills and tools necessary for effective and transformative online teaching;
- Ensuring that course materials are meticulously designed and reviewed to meet the highest standards of quality and relevance;
- Integrating new technologies into the teaching and learning processes at USIU-Africa;
- Offering comprehensive orientation to online learners, helping them to confidently navigate the online learning environment;
- Providing ongoing technical support to faculty

and students, ensuring a seamless and efficient teaching and learning experience;

USIU-Africa Online Mission

To empower and equip the USIU-Africa community with innovative and transformative online education, creating interactive and engaging learning experiences while offering dedicated support to both faculty and students.

USIU-Africa Online Vision

To be the premier hub of excellence in transformative online education, driving online pedagogy and student success within the USIU-Africa community and beyond.

The beautiful thing
about learning is that
no one can take it away
from you.

Admissions and Financial Aid

Admissions and Financial Aid

ADMISSIONS APPLICATION PROCEDURES

Applications for admission may be obtained from our website (www.usiu.ac.ke) or by contacting:

Admissions Office

United States International University-Africa

P.O. Box 14634-00800

Nairobi, Kenya

Telephone: +254 730 116 / 247 / 290 / 291 / 300 / 397 / 503 / 522

WhatsApp: +254 755 844 849

E-mail: admit@usiu.ac.ke

All applicants are expected to satisfy procedures and criteria for admissions to USIU-Africa and to submit acceptable certified documents that verify that they have satisfactorily completed all admission requirements. Students who meet all requirements will be considered for acceptance to the University.

Conditionally admitted students must present the required documents within their first semester of study. Failure to do so will prohibit further registration.

Deadline for Application

Application deadlines for each degree program are outlined on the respective application form.

The Admissions Office processes applications on a continuous basis throughout the year and the deadline for each semester are as follows:

Fall (September) semester- June 30

Spring (January) semester- September 30

Summer (May) semester- March 15

Application Processing Fee

All applicants must complete the application form and submit it to the Admissions Office. A non-refundable processing fee must accompany the application. Students from abroad are advised to transfer the non-refundable processing fee to:

Commercial Bank of Africa Ltd.

Upper Hill Branch, Ragati & Mara Roads,

P. O. Box 30437-00100, Nairobi, Kenya. Telephone:

+254(0)20-2884000 | +254(0)20-2734555

Current Account No: 6438840014

US Dollar Account No: 6462210014

Account Name: USIU-Africa or U. S. International University

Swift Code:CBAFKENX

Intermediary Bank: JP Morgan Chase Bank, New York

SWIFT Code: CHASUS33

Routing Number: 021000021

Admissions Requirement

UNDERGRADUATE ADMISSION REQUIREMENTS

Kenyan Applicants

Admission to Undergraduate degree programs is based on academic achievement at the secondary level. These include Kenya Certificate of Secondary Education (KCSE) scores of C+ and above or equivalent. Students who hold other international high school qualifications will be required to submit their certificates to the Commission for University Education or other recognized bodies for equation to the KCSE.

International Applicants

International applicants are considered for admission based on equivalent requirements but must also demonstrate English proficiency. All students for whom English is not a first language are required to show English proficiency before beginning an academic program.

English Language Proficiency

All international students whose studies were not in English language must provide evidence of English language proficiency.

Undergraduate applicants must have a score of 79 or higher in the Internet Based) on the Test of English as a Foreign Language (TOEFL). TOEFL scores must be current within the last two years.

English Proficiency may also be determined through the Cambridge Test of English Proficiency. A grade of C or better is required. Proficiency may also be based on International English Language Testing System (IELTS). A minimum score of 6 (competent user) is required. To fulfill the English proficiency requirement, applicants may also pass the USIU Africa's English Proficiency test with a grade of C or better.

Students from countries where English is the official language will be exempt from the USIU-Africa English proficiency requirement unless their academic performance at USIU-Africa reveals the need for additional English language study.

Academic performance at USIU-Africa may reveal the necessity for further English language study by a student. The University reserves the right to make the final determination of a student's English proficiency level in all cases.

FINANCIAL GUARANTEE FOR INTERNATIONAL APPLICANTS

Non-Kenyan applicants are required to apply for a Kenyan Pupil's Pass. The application form for a Pupil's Pass may be obtained from the Admissions Office or from our website at www.usiu.ac.ke. The application for a Pupil's Pass requires evidence of financial support certifying that sufficient funds are available for study at the University for at least one academic year; and, barring unforeseen circumstances, adequate funding will be available from the same or equally dependable sources for subsequent years for the full course of study. The evidence of financial support must be current within one year of the student's start date at the University. The applicants will be required to pay the pupils pass fee when applying for admission to the University. Although students from Tanzania, Uganda, Rwanda and Burundi are required to apply for the Kenyan Pupil's Pass, the application fee has been waived by the Kenyan government.

The University reserves the right to require advance payment of funds for students from selected countries where a past history of processing student funds has been unsatisfactory. Kenyan immigration law prohibits the waiver of the evidence of financial support.

TRANSFER ADMISSIONS

Transfer evaluation will be based on higher education work completed where grades of C or better were earned. Applicants with less than

12 semester units completed will have their secondary school record also evaluated. An overall minimum of a 2.5 (on a 4.0 scale) grade point average is recommended for applicants who have earned 16 or more quarter transferable units or 12 or more semester transferable units from another accredited or recognized institution. Records below 2.5 (on a 4.0 scale) will be reviewed by the Academic Deans.

Official evaluation of undergraduate transfer credit is under the authority of the dean or designee of a school in consultation with the Admissions Office. All degree-seeking undergraduate applicants must submit official high school records (showing date of graduation) and college records. The Academic & Student Affairs Division evaluates students' previous academic work completed at the undergraduate level for possible credits to be applied to their degree programs at USIU- Africa. Allowable transfer credits are identified and documented by both the Admissions Office and the appropriate Dean's Office. An official transcript must be received before final transfer work can be accepted. Course descriptions may also be provided if requested.

Degree requirements are determined by combining the transfer credits allowed and the required academic work to be successfully completed at USIU-Africa. Students can request a copy of the transfer evaluation from the Registrar's Office.

TRANSFER CREDIT LIMITS

A maximum of 49% of credit earned may be accepted for transfer from accredited undergraduate institutions. The 51% of all units toward a degree must be completed at USIU-Africa to comply with residency requirements. USIU-Africa reserves the right to waive this requirement for USIU-Africa students participating in the International Student Exchange programs.

Once a student has matriculated at USIU- Africa, all further transfer credits must have prior approval of the Dean or designee.

NB: For the Bachelor of Pharmacy Program, the National Policy on transfer of credit, as developed by the Pharmacy & Poisons Board, shall apply.

International students from government- recognized institutions must submit original or certified transcripts, translated into English, showing courses completed, grades obtained, and length of program. A syllabus or course description in English covering each course being considered for transfer credit should be submitted with the transcript to the Admissions Office.

Transcripts and syllabi documentation are evaluated for the minimum C grade equivalency requirement and subject matter content to determine the number of transfer credits allowable. During the transfer credit evaluation process, academic work from other colleges and universities is compared to USIU-Africa courses within the appropriate degree program, and transfer credits are awarded on the basis of similar syllabi. College and university courses completed elsewhere may be considered for transfer credits as electives even though the courses are not offered at USIU-Africa.

TRANSCRIPTS

All undergraduate applicants to USIU-Africa must submit their high school results (official transcripts or official test results).

Transcripts should include records of all work taken and a date of graduation. In addition, applicants should have any college(s) previously attended send official transcripts directly to the USIU-Africa Admissions Office. Student grade reports are not accepted in lieu of a transcript. Mailed or hand delivered sealed records that are addressed to the USIU- Africa Admissions Office should bear the official seal or certification and appropriate signature from the issuing institution. Transcripts (records of studies) issued in languages other than English must be accompanied by a certified English translation together with a copy of the record(s) from which the translation was made.

Academic records from non-American system institutions are evaluated according to the guidelines published by NAFSA (National Association of Foreign Student Advisors), AACRAO (American Association of Collegiate Registrars and Admissions

Officers) and other recognized organizations where research data is helpful toward objectively reviewing application documents from international applicants. Documents submitted to the University in support of a student's application become the property of the University, and the documents cannot be returned or forwarded. Applicants to USIU-Africa must submit official transcripts of credit from all previously attended institutions. All grades earned at other accredited institutions will be used to compute the grade point average for admission purposes. The computed transfer credit grade point average from the other institution does not appear on the USIU-Africa permanent record.

TRANSFER CREDITS

Undergraduate students transferring to USIU-Africa from approved institutions may meet some or all of the General Education requirements by presenting credits earned in accredited institutes with grades of C or better.

GRADES REQUIRED FOR TRANSFER CREDIT

Transfer credit is accepted from accredited institutions only if the grade received is C or better. Credit may be accepted where a D grade was received under one of two conditions:

- a next higher course in a sequence has been completed at another institution with a C grade or better (e.g., courses in mathematics, language);
- or a higher course in a sequence is completed at USIU-Africa with a C grade or better.

CORRESPONDENCE AND EXTENSION COURSES

USIU-Africa does not offer correspondence courses and does not accept credit for such courses. Undergraduate university-level extension courses completed at a regionally accredited institution of higher education can be accepted as transfer credits at USIU-Africa. The extension course must be similar in content to a regular course offered at the transferring institution and at USIU-Africa. The student must have received a grade of C or better

in the course. No more than 24 semester units of extension credits may be applied toward the undergraduate degree requirements at USIU- Africa.

U.S. MILITARY COURSE CREDIT

The University is guided by the recommendations of the ACE (American Council on Education) Guide to the Evaluation of Educational Experiences in the Armed Services regarding credit for U.S. Military Service toward the bachelor's degree. Transfer credit will be assessed on a course-by-course basis. To obtain credit for U.S. military service, the student must have matriculated, be enrolled at the University.

A maximum of 30 units of examination credit from all sources will be accepted by the University.

APPLICANTS FOR RE-ADMISSION

Students who are not in continuous enrolment must apply for re-admission through the Admissions Office, unless they have obtained an approved Leave of Absence. (See section on Leave of Absence). Students must submit a completed application for re-admission form accompanied by the required fee. Students who are re-admitted will be treated as new students and their transcripts will be evaluated by the dean or designee based on the current curriculum and admission requirements.

RETURNING USIU-AFRICA GRADUATES

Students who complete a degree, credential, or certificate program at USIU- Africa and wish to be considered for another program must submit an appropriate application to the Admissions Office and a non-refundable application-processing fee. All such applicants are expected to meet all admission requirements for the new degree program.

ADMISSION STATUS

Appeal Process

An undergraduate applicant who has been denied admission may appeal the decision by writing to the Admission Office requesting a review of

the application. However, the appeal will not be considered unless new academic information or supporting documents are submitted.

An application will automatically be rejected without further recourse if any altered or forged documents are submitted.

Conditional Admission

Conditionally admitted students must present the required documents within the first semester of study. Failure to do so will prohibit further registration. Conditionally admitted students are not eligible for financial aid..

Special Status/Non-Degree Applicants Students who do not intend to earn a degree at USIU-Africa may apply to be Special Status Non-Degree students.

A student who is classified as Special Status Non-Degree need not necessarily meet the admission requirements for a degree program, but may be requested to submit supporting documentation.

From this admission status a student may apply for full admission to the University through the regular admission process. If the student becomes a degree-seeking student, a maximum of 12 semester units (undergraduate) earned while in the Special Status Non-Degree category may be applied toward a degree program. Special Status Non-Degree students are not eligible for financial aid. In cases where there is limited class space, degree-seeking students will have enrolment priority.

In all cases, meeting minimum admissions requirements does not guarantee acceptance into the undergraduate programs at USIU-Africa.

PLACEMENT TESTS

Undergraduate students are required to sit for their placement tests in English, Computer Competency and Mathematics during their first semester of study. Students who fail to sit for these tests, or the remedial courses thereafter will be placed on academic hold

and will subsequently be unable to register for any other courses in their programs.

FORGED OR ALTERED DOCUMENTS

An application will automatically be refused without further recourse if any altered or forged documents are submitted.

GRADUATE ADMISSION REQUIREMENTS

Graduate admission requirements vary depending on the degree sought. In addition to the degree requirements for admission, the following are University-wide graduate admission requirements:

- Proof of graduation from secondary/high school or signed attestation on the USIU-Africa application form or its equivalent (including month and year);
- Official transcripts of all college work undertaken (degrees and dates awarded must be posted);
- Submission of a personal narrative; and,
- Two letters of recommendation
- Any other requirements as may be requested by the University

MEETING MINIMUM ADMISSIONS

Requirements do not guarantee acceptance into USIU-Africa graduate programs.

TRANSFER CREDITS

No transfer of credits may be applied towards graduate degree requirements.

ADMISSION STATUS

Appeal Process

A graduate applicant who has been refused admission may appeal the decision, in writing, to the academic dean or designee. The appeal, however, will not be considered unless new academic information or supporting documents are submitted. The decision at this level is final.

Special Status/Non-Degree Master's Applicants

Students who do not intend to earn a degree at USIU-Africa may apply to be Special Status Non-Degree students. A student who is classified as Special Status Non-Degree need not necessarily meet the admission requirements for a degree program, but may be requested to submit supporting documentation. From this admission status, a student may apply for full admission to the University through the regular admission process. If the student becomes a degree seeking student, a maximum of one semester of work earned while in the Special Status Non-Degree category may be applied toward a degree program.

Special Status Non-Degree students are not eligible for financial aid. In cases where there is limited class space, degree-seeking students will have enrolment priority.

Auditing Courses

Applicants who wish to take academic courses, but not receive credit, may audit courses. Students auditing courses are not required to take exams and complete assignments. They will not receive grades or credit. Students who wish to audit classes must:

- complete the "Audit or Special Status Non-Degree" Application for Admission.
- receive an acceptance notification from the Admissions Office before attending classes,
- complete regular registration procedures, pay audit fees and any additional fees.

Students who fail to maintain satisfactory attendance will receive a no credit grade.

APPLICANTS FOR RE-ADMISSION

Students who are not in continuous enrolment must apply for re-admission through the Admissions Office, unless they have obtained an approved Leave of Absence. See section on leave of absence. Students must apply a fresh and pay the stipulated application fee.

Students who are re-admitted will be treated as new students and their transcripts will be evaluated by the dean or designee based on current curriculum and admission requirements.

RETURNING USIU-AFRICA GRADUATES

Students who complete a degree or certificate program at USIU-Africa and wish to be considered for another program must submit an appropriate application to the Admissions Office and a non-refundable application processing fee. All such applicants are expected to meet all admission requirements for the new degree program.

CHANGE OF DEGREE PROGRAM

Graduate students who wish to change degree programs must re-apply to the new area of study and pay the applicable application fee. If accepted they must complete requirements for the new degree program.

FORGED OR ALTERED DOCUMENTS

An application will automatically be rejected without further recourse if any altered or forged documents are submitted.

Financial Aid

The USIU-Africa Financial Aid Office is designed to help a limited number of students meet their educational tuition costs when their own resources are not sufficient. Financial Aid is available in the form of scholarships, grants and Campus Work Opportunity programs.

Every financial aid applicant must complete an application form and, in most cases, go through an interview process conducted by the financial aid committee to assess eligibility based on a critical need for financial aid. Supporting documents are required as indicated in the Financial Aid Policy.

All of the Financial Aid programs require that a student is registered full time (9 – 12 units for

undergraduate and 6 – 9 units for graduate). Some of the Financial Aid programs require minimum incoming and/or cumulative GPAs. Students must adhere to the Financial Aid deadlines to be eligible for consideration.

NOTE: The completion of an application form for financial assistance, does not guarantee that a student will receive financial aid. Financial aid is limited and its receipt is contingent upon the availability of funds and the number of students that apply for the same in a given semester.

HIGHER EDUCATION LOANS BOARD (HELB)

Kenyan students are also encouraged to apply for a loan from the Higher Education Loans Board (HELB).

Students can email: helb@helb.co.ke or visit www.helb.co.ke for more information

For more information on Financial aid, please contact the Financial Aid Office on: (+254) 730 116 745/776 or by e-mail: finaid@usiu.ac.ke

Mastercard Foundation Scholars Program at USIU-Africa

Since July 2020, USIU-Africa has partnered with the Mastercard Foundation in the Mastercard Foundation Scholars Program, with the first cohort of Scholars enrolled in September of the same year. The Mastercard Foundation Scholars Program at USIU-Africa seeks to recruit, educate, prepare, and transition 1,100 youth into dignified work, higher education, or entrepreneurship. The partnership supports students at the Bachelor's level only. The Program recruits youth in the following categories:

- **Young Women - 70%;**
- **Refugee youth/Internally Displaced Youth - 25%;**
- **Youth with Disability - 10%.**

The Mastercard Foundation Scholars Program at USIU-Africa focuses on recruiting Scholars from these six countries: DR Congo; Burundi; Ethiopia; Kenya; Malawi; and South Sudan. However, the Program is open to all young people from the African continent who meet the eligibility criteria. The Program has recruited nine cohorts of 1,072 Scholars from 29 African countries, all 47 Counties in Kenya, and recruited Refugees from 13 host countries. This includes 64% young women, 20% refugee and displaced persons, 6% persons with disabilities, 62% international Mastercard Foundation Scholars, and 38% Kenyans.

The partnership between Mastercard Foundation and USIU-Africa focuses on 13 academic programs. 55% of the recruited Mastercard Foundation Scholars are enrolled in STEM-based disciplines while the other 45% are enrolled in other marketable programs.

The Program actively recruits Refugee/Displaced Youth and Youth with Disability during its regular call for applications. Additionally, it accepts their applications on a rolling basis as part of its affirmative action. This process remains open throughout the year, giving applicants ample time to obtain the necessary documents, including the Conventional Travel Document, which requires a lengthy processing period.

Contact the Mastercard Foundation Scholars Program team at on email at mcfsp-enquiries@usiu.ac.ke or on phone via +254 730 116 218 /500/521.

Policies and Procedures

Policies and Procedures

Policy on Non-Discrimination

It is the policy of United States International University-Africa to take all reasonable measures to provide equal education and employment opportunities without unlawful discrimination based on race, religion, gender, color, ethnicity, national origin, marital status, sexual orientation, age, medical condition, disability, status as a disabled war veteran.

The Deputy Vice Chancellor-Academics-Transformative Teaching, Learning and Research, is designated to coordinate the University's responsibilities under the laws of Kenya and to ensure compliance with the University's policy against discrimination of students.

Student-Initiated Grievance

It is University policy that all persons should enjoy freedom from unlawful discrimination of any kind, including harassment or retaliation for reporting a complaint. This policy applies to prohibit discrimination between members of the University community, including between students and between employees and students.

USIU-Africa encourages prompt reporting of complaints so that a rapid response can be made and appropriate action can be taken. Note that reporting a complaint need not be limited to someone who was the target of the discrimination.

The DVC Academics - Transformative Teaching, Learning and Research is available to help students

resolve problems informally. The University encourages discussion between the parties directly involved in a grievance, especially in the early stages of a dispute before the respective parties have assumed official or public positions which may polarize the dispute and render a solution more difficult. In any event, students have the right to file a formal written grievance – either initially or if informal resolution is not possible.

Filing a Formal Grievance

The entire procedure is available from the above officer and is published in the Student Handbook.

Any student who feels that he or she has been subjected to discrimination by the University through any of its employees, entities, policies, procedures, or programs may report the matter in writing to:

Deputy Vice Chancellor, Transformative Teaching, Learning and Research
Tel: (+254) 730 116 406/407
Email: amnjuguna@usiu.ac.ke

Sexual Harassment Policy

Sexual harassment, a form of discrimination on the basis of gender, is prohibited and is set forth in the University's "Policy on Non-Discrimination." The term "sexual harassment" means unwelcome sexual advances, requests for sexual favors, and other verbal, visual, or physical conduct of a sexual nature. This behavior is unacceptable in the academic environment and in other University-related settings such as University-sponsored activities or

University-related social events. The entire policy is published in the Student Handbook.

Disclosure or Release of Student Information

The university allows current and former students access to their education records. To protect the privacy of students, the Data Protection Act sets certain conditions on the disclosure of personal information kept by the University.

Name, date of birth, field of study, attendance dates, and degrees received, and other items designated as Directory Information are personal information and may not be disclosed without the student's prior consent. Students may request that personal information not be released by providing a written statement to the Registrar's Office. Non-Directory information may be released without consent of the student to:

- USIU-Africa officials with legitimate educational interest.
- Other institutions in which the student seeks to enroll.
- Persons or institutions authorized by the student to access their information.
- Accrediting agencies.

All student academic records may be obtained from the Registrar's Office.

Services for Persons with Disabilities

The University will provide reasonable accommodation, support and access to facilities

and services and to programs for which the student is otherwise qualified without unlawful discrimination based upon disability. The University will accommodate persons with disabilities.

Students with disabilities should fill a self-disclosure form at the Admissions Office and the same form can be obtained from the USIU-Africa website. They must provide documentation from a qualified professional to establish their disability, along with suggested reasonable and necessary accommodations. They should request accommodation from the disability inclusion office.

Students are encouraged to contact one of the following compliance officers who will coordinate USIU-Africa's efforts to provide needed services:

Principal Officer, Disability Inclusion, Freida Brown Student Centre
Tel: +254703180008
Email: inclusion@usiu.ac.ke

Principal Counselor Counseling Center
Tel: +254 730 116 797

While the University will strive to accommodate students with disabilities as fully as possible, reasonable accommodations do not include measures which fundamentally alter the academic program or which place an undue financial burden on the University.

Registrar's Policies and Procedures

REGISTRATION

Students may not register for any courses unless officially admitted to the University by the USIU-Africa Admissions Office.

Students will not receive credit for any course in which they are not officially registered. Except in unusual circumstances, registration after the second week of classes will not be permitted. Students may not attend any class for which they are not officially enrolled.

Registration must be completed by the student or his/her legal agent.

Registration procedures must be completed in order for students to be considered officially enrolled.

International Students

All international students must meet all Government of Kenya requirements for the purpose of acquiring a Kenyan Student Pass.

After obtaining financial clearance to enroll for classes, all international students must enroll for a full course load - minimum of 9 units at the undergraduate level and 6 units at the graduate and doctoral levels - each semester to be able to maintain their status and to retain the student's pass. International students are encouraged to visit the registrar's office for more information regarding their immigration status.

DATES

Registration dates are announced in the Academic Calendar published each year. Transfer and returning students are urged to schedule an appointment with an academic advisor to pre-register. New students are expected to attend orientation for registration procedures. The dates for orientation are published in the official Academic Calendar.

ENROLMENT STATUS

Full-time students are those students whose semester academic load (coursework or other required activity) is composed of at least 9 or more units at the Undergraduate level or six or more units at the Graduate and Doctoral levels. (See also section on student course loads).

Part-time students are those students whose semester academic load is less than 9 units at the Undergraduate level or fewer than six units at the Graduate and Doctorate levels.

ADDING AND DROPPING COURSES

Dates for adding and dropping courses are published in the official Academic Calendar.

If a student stops attending a course without going through the official drop procedure, an 'F' grade will be entered on the student's permanent record.

There is an administrative withdrawal fee charged for each course dropped or added.

Students who wish to drop all courses in which they originally enrolled for a semester must follow the withdrawal procedures described below.

WITHDRAWAL FROM ALL CLASSES

Students withdrawing from all courses after the day stated in the academic calendar, must complete the add and drop form and forward it to the Registrar's Office for processing. A grade of "W" for each course will be entered on the student's permanent record.

WITHDRAWAL FROM THE UNIVERSITY

Students withdrawing from the University must reach out to the Registrar's Office through registra@usiu.ac.ke for guidance.

The University reserves the right to cancel the registration of any student who does not comply with USIU-Africa rules, regulations or policies.

The University makes every reasonable effort to offer courses as announced. However, the University reserves the right to modify the class schedule or to cancel courses if necessary.

If a course requirement is waived, another course must be substituted. A course waiver does not reduce the unit requirements for the degree program. Applications for course substitutions and waivers must be processed using the appropriate substitution/waiver form that is initiated by the student with the academic advisor and approved by the Dean or Principal Academic Advisor of the school involved.

The Catalog takes effect on the first day of class of the Fall (September) semester of the academic year for which it is published. The Catalog of the date of original matriculation remains in effect. A leave of absence does not change the time limits for degree completion.

Students who register but do not attend class by the end of the 5th week will be no show cases (have courses withdrawn) and considered to be away without approved leave of absence.

Students are automatically placed on poor academic standing at the end of any semester in which their cumulative grade point average changes from satisfactory to unsatisfactory (i.e. below 2.0 at the undergraduate level and below 3.0 at graduate and doctoral level).

The student will be returned to a regular status automatically when their cumulative grade point average reaches 2.0 at the Undergraduate level and reaches 3.0 at Graduate and Doctoral levels.

Only information of an academic nature is entered into the Student Academic Record (transcript). Specifically, no statement regarding disciplinary action is entered. Disciplinary action and the disciplinary records fall within the purview of the Student Life.

The transcript bears the following entries regarding the completion of degree requirements and the awarding of degrees: degree awarded; area of concentration or major (as applicable); and date of completion, i.e., the last day of the last semester registered.

Students are responsible for becoming familiar with the information presented in this Catalog and for knowing and observing all policies, procedures and deadlines related to their participation in the University community. Regulations will not be waived nor exceptions granted based on a student's ignorance of USIU-Africa policies or procedures.

Not all courses listed in this Catalog are available each semester.

Students must satisfy degree and course requirements as outlined in the Catalog in effect at the time of first enrolling at the University as degree candidates, provided they do not interrupt their studies.

Once students interrupt their programs (i.e., without an approved leave of absence for two or more semesters), it will be necessary to satisfy the degree requirements as outlined in the USIU-Africa Catalog in effect at the time they re-enter as degree

Catalogs take effect on the first day of class of the Fall semester of the academic year for which they are published.

The academic year is divided into three semesters: each 14 weeks in duration (Fall, Spring and Summer). The academic year begins with the Fall (September) semester. Academic credit is given in credit Units.

Undergraduate lower division courses are numbered 1000-2999. Students are expected to complete all their 1000 and 2000 level courses in their freshman and sophomore years. Upper division courses are available to those students with junior standing and are numbered 3000- 4999. Certain courses may also have individual prerequisites.

Graduate courses are numbered 5000 and above, whereas Doctoral courses are numbered 7000 and above.

NB: The course codes for B. Pharmacy courses are unique to the program.

If students anticipate being absent from the University for a semester or more, a Leave of Absence form must be obtained from the Registrar's office and appropriate approvals sought. Graduate students enrolled in their thesis, project or dissertation must obtain approval from their Academic Dean or designate. Financial Aid recipients must also obtain approval from the Financial Aid Office and International Students must also secure approval from the immigrations representative. Thereafter, the completed Leave of Absence Form must be returned to the Registrar's Office. A leave of absence may be approved for a total of one academic year.

Students who receive an approved leave of absence may return to the University after the expiration

of the leave under the following condition: the degree requirements appearing in and who have not received an approved leave of absence, must reapply for admission, and, if readmitted, must enter a program offered at the time of readmission (i.e., may not enter the program in which they were previously enrolled if it is no longer offered).

Students who register but do not attend class by the end of the 3rd week will be no show cases (have courses withdrawn) and considered to be away without approved leave of absence.

A student's academic standing is considered unsatisfactory if the cumulative grade point average falls below 2.0 at the undergraduate level and 3.0 at graduate and doctoral levels. The academic standing of transfer students is determined by the grade point average of work completed at USIU-Africa.

Poor Academic Standing Students are automatically placed on poor academic standing at the end of any semester in which their cumulative grade point average changes from satisfactory to unsatisfactory (i.e. below 2.0 at the undergraduate level and below 3.0 at graduate and doctoral level). The first semester in which the cumulative grade point average (GPA) is unsatisfactory, the student is placed on “academic warning”, the second consecutive semester in which the grade point average is unsatisfactory, the student is placed on “academic probation” and the third consecutive semester in which the grade point average is unsatisfactory, the student must appeal their cases to the Dean or designee if there are extenuating circumstances. Students who are dismissed a second time need not appeal.

Appeals for reinstatement are governed strictly by the following conditions:

1. The reinstated student will be placed on academic warning, and the student must obtain the cumulative grade point average established by the University within the next two semesters of enrolment. If the student does not attain the required GPA in the time allowed, academic dismissal from the University will be automatic.

2. The student automatically will be returned to a regular status when his or her cumulative grade point average reaches 2.0 at the Undergraduate level and reaches 3.0 at Graduate and Doctoral levels.

Permanent Academic Record Only information of an academic nature is entered into the Student Academic Record (transcript). Specifically, no statement regarding disciplinary action is entered. Disciplinary action and the disciplinary records fall within the purview of the Student Life.

The transcript bears the following entries regarding the completion of degree requirements and the awarding of degrees: degree awarded; area of concentration or major (as applicable); and date of completion, i.e., the last day of the last semester registered

Official transcripts are issued by the Registrar's Office. Transcripts are issued only at the written request of the student. Exceptions to this rule are covered under the heading "Disclosure or Release of Student Information." Requests for transcripts may be submitted either in person, or by mail. A fee is charged for each official transcript.

Official transcripts bear the institutional seal and the signature of the University Registrar. Transcripts may be withheld if the student has an unresolved obligation to the University.

Marking System and Symbols Used on Transcripts

A Superior. The student has demonstrated a quality of work and accomplishment far beyond the formal requirements and shows originality of thought and mastery of material.

B Above Average. The student's achievement exceeds the usual accomplishment, showing a clear indication of initiative and grasp of the subject.

C Average. The student has met the formal requirements and has demonstrated good comprehension of the subject and reasonable ability

90% -100%	Grade A	4.0 quality points
87%-89%	Grade A-	3.7 quality points
84%-86%	Grade B+	3.3 quality points
80%-83%	Grade B	3.0 quality points
77%-79%	Grade B-	2.7 quality points
74%-76%	Grade C+	2.3 quality points
70%-73%	Grade C	2.0 quality points
67%-69%	Grade C-	1.7 quality points
64%-66%	Grade D+	1.3 quality points
62%-63%	Grade D	1.0 quality points
60%-61%	Grade D-	0.7 quality points
0%-59%	Grade F	0.0 quality points

to handle ideas.

D Below Average. The student's accomplishment (while still passing) leaves much to be desired. Minimum requirements have been met but without distinction.

F Failure. The student has not met the minimum requirements.

Credit (CR). Used upon completion of thesis, dissertation, project, internship, community service and other specified courses. It is not used in computing grade point averages.

No Credit (NC). The student has not achieved the minimum expectations of scholarship or credit in terms of the course objectives. The NC is not to be

used where a grade of F is justified. It is not used in computing grade point averages.

Incomplete (I). Awarded only in extenuating circumstances. Work must be completed by the end of the succeeding semester.

In Session (IS). No continuous enrolment required.

In Progress (IP). To be used for theses, projects, practicals, dissertations and internships that are yet to be completed in line with policies and procedures.

Audit (AU). Awarded to students seeking to gain general understanding of the subject matter.

Registration and payment of fees are required for audit courses charged at 50% of tuition fee.

Withdrawal (W). Grade awarded to those who drop classes after the scheduled drop period.

No Show (NS). Grades posted for courses in which the student did not attend any class by end of week 5.

Quality Points and Grade Point Average (GPA)

For each unit in which the student is enrolled quality points will be awarded as follows:

A student's grade point average is obtained by dividing the total number of points earned by the total number of units undertaken, excluding courses in which the grades CR, I, IS, IP, NC, NS, W, and, AU. Transfer units are not counted in calculating the GPA on the USIU-Africa transcript. All credits counted toward a degree are used in calculating the cumulative GPA.

Grade Reporting

Instructors report a grade for credit when all requirements for the course have been completed. The Registrar's Office must receive grades from instructors no later than 14 calendar days from the end of the semester.

After a grade has been reported to the University Registrar, the grade will not be changed unless a written grade change and an acceptable reason for the change are submitted to the university Registrar by the instructor with prior approval of the Chair of Department and School Dean.

Incomplete Grade

Students may receive an incomplete grade for a course when illness, family tragedy, or similar difficulty makes it impossible for them to complete course requirements on time. Students must arrange for an incomplete grade with their instructor and Chair of Department. Students do not re-register to finish incomplete coursework; however, they are required to finish incomplete coursework no later than the end of the following semester. Normally the course must be completed with the instructor who

assigned the incomplete grade. Incomplete grades, which are not received by the end of the following semester, will be converted automatically to an F grade for graded courses and to an NC for credit/no credit courses.

Grade Appeals Process

Students have the right to ask an instructor for an explanation of any grade received. Grade appeals are used in instances where students perceive that a final grade is unfair, arbitrary, or capricious. Appeals must be filed within six weeks of the date the grade was posted.

Students are encouraged to talk to their instructors before beginning the grade appeals process to attempt to resolve the matter informally. Information about the grade appeals process is available in the Chair of Departments' offices.

Repeated Courses

Students may repeat courses in order to improve their academic record. All grades earned at USIU-Africa will remain on the student's transcript and the highest grade earned will be used to compute the grade point average.

The record for any repeated course will show the original grade accompanied by a notation, signifying that the repeated course is shown elsewhere on the transcript. In all instances, the same structured class must be completed.

Repeated courses may not be taken by Independent Study or be taken on a Credit/ No Credit basis.

Courses failed must be repeated at USIU-Africa. If a transferred course is repeated at USIU- Africa, only the USIU-Africa grade appears on the transcript.

At the undergraduate level, a maximum of four courses may be repeated to replace a prior grade. Any other repeats after that will not replace a previous grade.

No course may be taken more than twice (the original registration and one subsequent registration) without approval from the School Dean.

At the Graduate and Doctoral levels, a maximum of two courses may be repeated to replace a prior grade. Any other repeats after that will not replace a previous grade. No course may be taken more than twice (the original registration and subsequent registration) without approval from the School Dean.

Class Attendance

USIU-Africa shall closely monitor class attendance through consistent roll call during class time. All instructors will take attendance for all classes and the components of the instruction taught through the Blackboard platform shall be monitored electronically. Each student is responsible for all academic work missed during absences. To get a grade in a course, a student must attend at least 75% of the classes in that course.

At the Undergraduate, Graduate and Doctoral levels the maximum allowable absences is seven (7) for twice a week classes, and three (3) for once a week classes. This translates to missing 25% of class contact hours. Any absences in excess of these limits, whether excused or unexcused, will automatically lead to an F grade.

No Show

Students who register but do not attend class by the end of the fifth week will be considered No Shows Grade "NS" will be posted to their transcripts at the end of that semester.

Academic Residency Requirements

Undergraduate students must attend the University for at least the last six semesters preceding graduation. The last 51% of the units applicable toward the degree must be earned while attending the University and may not be fulfilled by examination. However, in some circumstances exchange students may be exempted from this requirement. Master's degree students must complete all units of their

degree requirements at the University. Transfer credits are not awarded to Master's students. Students should consult their Academic Advisor for details. Doctoral degree students must complete all units of their degree requirements at the University. Transfer credits are not awarded to Doctorate students. Students should consult their Academic Advisors for details.

Exceptions to Academic Regulations

A request for an exception to a published University academic policy or a request for any special academic privilege must be made in writing initiated through an Academic Advisor.

All documentary evidence in support of each application for academic exception or academic privilege should be submitted with the written request. Each case will be decided on its own merits. All exceptions, waivers, and special privileges are subject to review by the School Dean for a final decision.

Transfer Students

The University shall admit prospective students from institutions approved by the Commission for University Education.

Academic Code of Conduct and Ethics

The University is committed to principles of scholastic honesty. Its members are expected to abide by ethical standards both in their conduct and in their exercise of responsibility towards other members of the community.

This Code of Conduct and Ethics is established to lend greater definition and meaning to the principles of scholastic honesty and to outline standards which will guide the actions of the academic community. Any student who violates the Code of Conduct and Ethics will be subject to sanctions up to and including dismissal from the University. A student accused of a violation is guaranteed an impartial hearing and

the right to an appeal. Procedures and guidelines for the hearings and the appeals are described in this section.

Students

As it is with other members of the academic community, each student's conduct is expected to be in accordance with the standards of the University. Students bear the responsibility not only for their own academic integrity, but also for bringing instances of suspected violations of the Academic Code of Conduct to the attention of the proper authorities. Any evidence that the student has failed to report instances of suspected misconduct will lead to sanctions.

Faculty and Administration

Faculty and administration are obligated to the University and to the students they teach and serve to uphold ethical standards. They must deal fully and fairly with instances of academic misconduct. Any evidence that a faculty member has intentionally acted in a manner not consistent with this policy (including failures to report instances of suspected misconduct) will be subject to a referral to the faculty member's Dean for appropriate action.

Students' Academic Grievance Process

Student(s) may have complaints and grievances relating to course quality / standards, course materials, an instructor's teaching approach. A student who feels aggrieved by an instructor or has serious concerns about the manner in which a course is being conducted is encouraged to first raise the issues or grievances verbally with the instructor within five (5) days of the incident. If this is not possible or if a satisfactory solution is not reached, the student(s) shall consult, in writing, with the respective Departmental Chair, School Dean and thereafter the DVC - TTL&R. Should the instructor be the Departmental Chair or the Dean, the student should report to the next level of office.

The Departmental Chair or Dean/ designee takes immediate action in response to the complaint, and

may impose appropriate action on interim basis when there is reasonable cause to believe that such action is needed to meet the students' learning outcomes, for the welfare of the student(s) or to avoid disruption of the academic process.

After investigation, the Departmental Chair or Dean communicates his/ her decision in writing to the affected student(s) and instructor within five (5) working days.

Appeal Process

Either party has a right to appeal the Departmental Chair's decision to the School Dean. Where the decision emanates from the office of the School Dean either party can appeal to the DVC Academics- TTL&R within 10 working days. However, this procedure provides for internal resolution of complaints and is not a legal forum. Consequently, representation of parties by legal counsel is not permitted. The DVC Academics-TTLR will appoint an appeals board to hear the appeal. An appeals board shall consist of one faculty member, the Departmental Chair of the respective Department, representative of Faculty Council, representative of Student Affairs Cabinet and representative of Human Resource. The DVC Academics-TTLR will appoint one member of the appeals board to chair the hearing and ensure that proper procedures are followed.

The appeals board shall submit a report of its findings to the DVC-TTLR within five (5) working days of the end of the deliberations. The DVC-TTLR shall communicate in writing to the affected student(s) and instructor of his/her determination within two (2) working days. The decision of the DVC-TTLR and sanctions (if any) imposed is final. The record of the final determination of the grievance will be maintained in the office of the DVC-TTLR for a period of five (5) years unless new circumstances dictate that the record should be kept for a longer period.

Acts of Misconduct

The Code of Conduct prohibits certain acts of misconduct by students enrolled at the University. Other University policies and procedures may also apply. Depending on the circumstances, the following acts of misconduct described below may be considered as either a violation or an infraction.

Violations

The following acts are examples of violations.

CHEATING IN EXAMS: This refers to the use of any prohibited materials during exam and collusion with other persons within or without the exam room.

EXAMINATION MISBEHAVIOUR: Any intentional giving or use of external assistance during an examination without the express permission of the faculty member giving the examination.

FABRICATION: Any falsification or invention of data, citation or other authority in an academic exercise.

PLAGIARISM: Any passing off of another's ideas, words, or work as one's own. The following are some examples:

- Submitting someone else's work as your own.
- Copying or paraphrasing chunks of text from sources with obvious disregard of conventional citation procedures.
- Failing to indicate the sources of some ideas or data.
- Cyber plagiarism.

UNAUTHORIZED COLLABORATION:

The engagement of unauthorized support of others within or without the University in the preparation of assignments, projects, theses and dissertations.

THEFT OF RESOURCE MATERIALS:

Any unauthorized taking of resource materials such as course materials, library materials, computer software, media equipment.

PREVIOUSLY SUBMITTED WORK:

Presenting work prepared for and submitted to another course.

UNAUTHORIZED ACCESS: Any unauthorized access to any person's files or computer account or unauthorized access into the system, generally.

UNAUTHORIZED RESEARCH: Failure to obtain approval of the Institutional Scientific Ethics and Review Committee (ISERC) for research involving human subjects.

ALTERATION OR MISUSE OF UNIVERSITY DOCUMENTS: Any alteration or misuse of University documents or records, including acts of forgery and/ or furnishing false information whether in hard copy or soft copy.

DISRUPTION OF ACADEMIC ACTIVITY:

Disruptive behavior, willful disobedience, profanity or vulgarity, or the abuse of University personnel which continues after a warning has been given.

ACTS OR THREATS OF PHYSICAL HARM:

Any act or threat of physical abuse, assault, and/ or battery upon any member of the University community, including faculty, students and staff.

ACTS OR THREATS OF DAMAGE TO PROPERTY: Acts or threats of abuse, misuse, damage, or destruction of property belonging to or located on University controlled property or facilities.

VIOLATIONS DEFINED BY FACULTY MEMBER: Any other intentional violation of rules or policies established by a course faculty member/academic supervisor. Assisting Other Students in Acts of Misconduct.

Infractions

The following acts are examples of infractions. Students found to have committed these acts are subject to sanctions described, as applicable, to

infractions in the Sanctions section.

1. Any unintentional act that, if it were intentional, would be a serious violation.
2. Any violation of the rules or policies established for a course or academic exercise which has not been effectively communicated to the student, or which in the judgment of the faculty member/ academic supervisor has not been determined to constitute a serious violation.

Note: Repeated infractions may be considered for treatment as serious violations.

* Under certain exceptional circumstances involving serious violations listed above which pose a threat to the health and safety of the

University community, disciplinary procedures administered by the DVC for Academic and Student Affairs may replace the procedures outlined below when referred by the Departmental Chair or the Dean. In the case of a violent act, the faculty member immediately contacts University Security.

Procedures

The following procedures apply to suspected instances and allegations of academic misconduct. Pending resolution of the matter and any permitted appeal regarding the matter, the student's status as a student remains unaltered except in cases where there are reasons relating to the physical or emotional welfare of the student or of others, or reasons involving the safety of persons or property.

Violation Determination Phase

1. **INVESTIGATION:** When a faculty member/ academic supervisor directly observes or otherwise determines (based on other evidence) that an act of misconduct may have been committed by a student, it is the responsibility of that faculty member/ academic supervisor to undertake as thorough and reasonable an investigation as possible under the circumstances and in any case

within 10 working days of the discovery of the misconduct.

2. COMMUNICATION WITH THE STUDENT OF POTENTIAL VIOLATION:

If this investigation suggests to the faculty member/ academic supervisor that there may have been misconduct, the faculty member/academic supervisor must promptly (and no later than three (3) working days after conclusion of the investigations) contact the student suspected of the misconduct in order to provide an opportunity for the student to discuss the matter directly with the faculty member/ academic supervisor. The faculty member/ academic supervisor may call upon the Departmental Chair to be involved in a discussion with the student. Following this contact between the faculty member/ academic supervisor and the student, the faculty member/academic supervisor must determine, within three (3) working days of the contact with the student, whether no action of misconduct has occurred, an infraction has occurred, or a serious violation has occurred.

3. REPORT TO THE DEPARTMENTAL CHAIR:

In all cases in which an act of misconduct has been determined by the faculty member/ academic supervisor to have occurred, the faculty member/ academic supervisor shall report this determination to the Departmental Chair in a timely manner (within 3 working days of the contact with the student) so that the Departmental Chair may determine appropriate action under the terms of this policy.

The faculty member/academic supervisor must include in the report to the Departmental Chair the following:

description of suspected misconduct (including the date, time, and circumstances).

- A summary of the investigation conducted.
- The finding and evidentiary support.
- A summary of the faculty member's/academic supervisor's communication with the student.

- A recommendation as to whether the act of misconduct should be considered as an infraction or a serious violation.
- And a recommendation as to the sanction to be imposed.
- Pending a final determination, the faculty member gives a grade of Incomplete if the semester ends before the matter is resolved.

4. DETERMINATION BY DEPARTMENTAL CHAIR:

After making a review and recommendation, the Departmental Chair shall notify the student in writing (personal delivery or delivery requiring a signature) within 5 working days from receipt of the report whether the circumstances warrant the imposition of a sanction or that a sanction is determined to be unnecessary or inappropriate.

If a sanction is determined by the Departmental Chair to be necessary and appropriate under the circumstances, the notice to the student must include:

- Specific allegations of misconduct,
- The sanction proposed to be imposed,
- A copy of the report by the faculty member/ academic supervisor, and
- Recommendation of the Departmental Chair. The student must be informed that he or she has 10 working days from receipt of the notice:

1. to respond in writing to the allegations and report, or
2. to request in writing for meeting with the Departmental Chair.

After considering the material and information presented by the student or, after the lapse of

10 working days without a student response, the Departmental Chair shall make a final determination as to whether an act of misconduct has occurred, and if so, whether that act of misconduct is considered an infraction or a serious violation and the sanction. The student will be reminded of the right to appeal.

The Departmental Chair's decision is final unless it is

appealed as provided below, except in the case of an expulsion. In the case of an expulsion, the case is automatically referred to the Deputy Vice Chancellor for Transformative Teaching, Learning & Research (DVC-TTLR) for mediation, appeal, or both.

Appeals Phase

All requests for appeals must be made in writing to the Dean within 10 working days of receipt of the final determination of the Departmental Chair. Similarly, all requests for appeals against a decision made by the Dean must be made in writing to the DVC-TTLR within 10 working days of receipt of the final determination of the Dean.

Mediation

A student wishing to appeal the determination of the Departmental Chair may request a mediation session with the Departmental Chair, faculty member or academic supervisor. In the same vein, a student wishing to appeal the determination of the Dean may request a mediation session with the DVC-TTLR and the Dean, faculty member or academic supervisor. The student may bring a friend or family member to the mediation session. If the session does not result in a resolution acceptable to all parties, the DVC, Transformative Teaching, Learning & Research shall, upon request from the student, appoint an appeal board to hear the appeal within ten (10) working days.

Appeal Board

The appeal board shall be appointed by DVC, Transformative Teaching, Learning & Research and shall be composed of two faculty members, an administrator, and two students. The DVC Transformative Teaching, Learning & Research will choose one member of the board to act as chair. The chair of the appeal board shall be responsible for assuring compliance with the terms of this policy during the course of the appeals process. The appeal board will establish the time and place of the hearing and will be responsible for notifying the student about all aspects of the appeal process.

No person who has a conflict of interest may participate as a member of the appeal board. Any individual who discovers a conflict of interest must withdraw immediately. Upon withdrawal, the DVC Academics, Transformative Teaching, Learning & Research shall appoint a substitute board member.

The appeal board is advisory to the DVC Academics, Transformative Teaching, Learning & Research and recommends actions on an appeal.

Appeal Process

The appeal board will review the entire record of the case preliminarily, including the report prepared by the faculty member/academic supervisor, Departmental Chair, Dean, and any response prepared by the student. If necessary, the appeal board may request that the faculty member/ academic supervisor and the student provide clarification with respect to the record of the case. Following its preliminary review, the appeal board shall determine how the procedures specified below will be utilized during their review of the case. The student shall be afforded the right to ask questions of the faculty member/ academic supervisor and other witnesses in the presence of the appeal board.

The appeal board shall:

1. Schedule the date and time for the hearing and provide written notice to the student (in person or via delivery requiring a signature) of the hearing procedures and the time and date of the hearing.
2. Hold a hearing and determine whether the alleged misconduct occurred. The hearing and deliberations will be closed to the public.
3. Be entitled to ask questions of the student, the faculty member/ academic supervisor, and any other witness during the hearing.
4. In the event a finding of misconduct is reached, affirm the sanction recommended by the Dean or recommend a different sanction to be imposed under the circumstances.
5. Submit a written report of its finding to the DVC Academics—TTL&R, the Dean, the faculty member or academic supervisor, and the

Undergraduate Academic Policies

student within five business days following the conclusion of its deliberations.

Sanctions

The University shall suspend any student found guilty of academic misconduct for up to one academic year. Any repeat of the same shall lead to expulsion.

Educational Records

The record of the final determination in all cases will be maintained in the educational record of the student in the office of the DVC Academics-TTLR for a period of five years. A request for removal of transcript notation of "Academic Misconduct Dismissal" may be submitted by the student to the office of the DVC Academics-TTLR after three (3) years. The decision of the DVC Academics-TTLR with respect to such removal shall be final.

CLASS LEVELS

Class levels for all undergraduates (except for B. Pharmacy, B.Sc. Applied Computer Technology, B. Sc. Epidemiology & Biostatistics and B.Sc. Information Systems & Technology, Software Engineering & Data Science & Analytics) are as follows:

Freshmen: Students admitted to a bachelor's degree program after completion of secondary school (or its equivalent) or students who are entering the University with fewer than 30 units.

Sophomores: Students with at least 30 units but fewer than 60 semester units.

Juniors: Students with 60 units but fewer than 90 units.

Seniors: Students with 90 or more units. A minimum of 120 units are required to graduate.

Class levels for Bachelor of Pharmacy undergraduates are as follows:

Freshmen: Students who admitted to the B. Pharmacy degree program after completion of secondary school (or its equivalent) or students joining the University with fewer than 84 semester units.

Sophomores: Students with at least 84 units but fewer than 171 units.

Juniors: Students with at least 171 units but fewer than 257 units.

Seniors: Students with 257 or more units. A minimum of 350 units are required to graduate.

Class levels for Bachelor of Science in Applied Computer Technology, Bachelor of Science in Information Systems & Technology, Bachelor of

Science in Software Engineering and Bachelor of Science in Data Science and Analytics undergraduates are as follows:

Freshmen: Students who are admitted to the School of Science and Technology degree programs after completion of secondary school (or its equivalent) or students who are joining the University with fewer than 37 units.

Sophomores: Students with at least 37 units but fewer than 75 units.

Juniors: Students with at least 75 units but fewer than 112 units.

Seniors: Students with 112 or more units. A minimum of 150 units are required to graduate.

Class levels for Bachelor of Science in Epidemiology & Biostatistics undergraduates are as follows:

Freshmen: Students who are entering the B.Sc. Epidemiology & Biostatistics degree program after completion of secondary school (or its equivalent) or students who are entering the University with fewer than 47 units.

Sophomores: Students with at least 47 units but fewer than 96 semester units.

Juniors: Students with at least 96 but fewer than 144 units.

Seniors: Students with 144 or more units. A minimum of 194 units are required to graduate.

STUDENT COURSE LOAD

The minimum course load for an undergraduate to be considered full-time is 9 units. However, at the undergraduate level (except for the Bachelor of Pharmacy program), the normal full-time course load during a regular academic semester is 12

units. Students who attempt less than the normal load risk a delay in the completion of their degree requirements.

Students with a 3.0 cumulative (undergraduate) grade point average and above may take a course load of 15 units to accelerate their studies for programs whose total degree requirements are 120 units and 18 units for programs whose total degree requirements are 150 units.

CREDIT/NO CREDIT GRADING

Classes listed in the University Catalog normally indicate which courses are offered only for credit rather than letter grade.

DEAN'S LIST

The names of full-time undergraduate students whose semester GPA's are 3.5 and above will be included on the Dean's List. The minimum number of semester units required for undergraduate students to be considered in the Dean's list are as follows: -

- Minimum of 9 semester units for 120-unit programs excluding credit / no credit courses
- Minimum of 12 semester units for 150-unit programs excluding credit / no credit courses
- Minimum of 22.5 semester units for the Bachelor of Pharmacy program excluding credit / no credit courses
- Minimum of 16.5 semester units for the Bachelor of Science in Epidemiology and Biostatistics AND Applied Biochemistry programs excluding credit / no credit courses

Honors

Graduating seniors who achieve the requisite cumulative grade point average during their undergraduate program will be entitled to graduate with honors, and the honors certification will be designated on their diplomas. The following honors

categories are recognized by the University:

- Cum Laude 3.50-3.69 GPA;
- Magna Cum Laude 3.70-3.89 GPA; and
- Summa Cum Laude 3.90-4.00 GPA.

The cumulative grade point average is computed considering all coursework attempted at USIU-Africa except those completed through credit-by examination. To be eligible for Cum Laude or Magna Cum Laude recognition a student must have completed at least 60 units at USIU-Africa for 120-unit programs, 75 units for 150-unit programs, 175 units for Bachelor of Pharmacy program, 97 units for Bachelor of Science in Epidemiology and Biostatistics and 94 units for Bachelor of Science in Applied Biochemistry. To be eligible for the distinction of Summa Cum Laude, a student must have completed at least 74 units for 120 unit programs, 93 units for 150 unit programs, 216 units for Bachelor of Pharmacy, 120 units for Bachelor of Science in Epidemiology and Biostatistics and 116 units for Bachelor of Science in Applied Biochemistry programs.

GRADUATION

Application for Graduation

All undergraduate students must make a formal application for graduation by the deadline date indicated in the Academic Calendar. Degrees are conferred once a year. Applications for graduation may be obtained from the Office of the Registrar. A nonrefundable graduation fee must be paid to Finance Office by all degree candidates at the time of application.

Degree Completion

Only the University Registrar is authorized to issue confirmation documentation attesting to matters pertaining to a student's academic work at the University. All degrees will be posted to the permanent record at the end of the semester in which the degree requirements are completed. Requirements are considered complete when relevant documents are received in the Office of the

Registrar.

Undergraduate Degree Requirements

University policies regarding degree completion are as follows.

- A. Students must complete all courses and credit unit requirements with satisfactory grades. The bachelor's degree requires a minimum 2.0 overall GPA.
- B. Students must file a completed Application for Graduation with the Registrar's office no later than the deadline specified in the Academic Calendar to participate in the commencement.
- C. Undergraduate students must have completed all degree requirements. If degree requirements are not completed on time, a graduation application for the next awarding of degrees must be filed.
- D. In order to receive degree certificates, students must clear with the relevant Departments.
- E. USIU-Africa offers degree certificates both as physical documents and electronically

MAJORS AND SPECIALIZATIONS

Students must formally declare their major area of study before beginning their junior year of coursework at USIU-Africa. Forms for this purpose are available from the Office of the Registrar.

DOUBLE MAJOR

Students may pursue two majors by completing the total requirement for one degree plus the prerequisite and major requirements of a second. Only one major may be designated on the degree certificate, and the official transcript will be the only documentation confirming the double major.

DOUBLE MINOR

Students may pursue two majors by completing the total requirement for one degree plus the prerequisite and major requirements of a second. Only one major may be designated on the degree certificate, and

the official transcript will be the only documentation confirming the double major.

CHANGE OF MAJOR

All undergraduate students are allowed to change their major if they so wish. Students with cumulative GPAs of below 2.0 will be allowed to carry forth their grades for General Education and completed courses that may apply to the new major. Such students will be required to fill in course drop forms and have them approved by the releasing School Dean so as to withdraw courses not required in the new major.

TIME LIMITS FOR DEGREE COMPLETION

All requirements for the bachelor's degree must be completed within six calendar years except for Bachelor of Pharmacy, Bachelor of Science in Epidemiology and Biostatistics and Bachelor of Science in Applied Biochemistry which allow 8 calendar years from the date on which the student begins undergraduate work at USIU-Africa. An approved leave of absence does not change the time limits.

If the time limits elapse from the time of initial enrolment, the student must meet the requirements of a Catalog dated no earlier than the allowed number of years prior to the anticipated date of graduation.

POLICY FOR OBTAINING A SECOND DEGREE

Second Undergraduate Degree

Students who already hold an undergraduate degree from USIU-Africa who wish to earn a second undergraduate degree must complete:

- Any General Education requirements that were not part of the previous major
- All major and pre-requisite requirements of the degree sought; and
- A minimum of 30 units in residence at USIU-Africa after admission to the second-degree program.

- Each School will determine its own requirements, if any exist, beyond the minimum of 30 units in residence.

POLICY ON AWARDING OF POSTHUMOUS DEGREES

USIU- Africa will award degrees posthumously in the following circumstances and conditions:

Conditions:

The student must have been in good academic, disciplinary and financial standing with the university.

Circumstances:

- A. When a student death occurs after ALL requirements for the awarding of the degree have been completed.
- B. When a student death occurs in the final semester of the senior year upon the recommendation of the DVC Academics-TTLR and / or the School Dean.
- C. When, in the final year of attendance, a student death occurs when less than 24 units of coursework remain to be completed.

Procedure:

- A. Upon the knowledge that a student has passed on, the DVC Academics-TTLR and / or the School Deans will be notified if death occurs in the final semester of the senior year.
- B. Or when less than 24 units of coursework remain to be completed.
- C. Upon approval the family of the deceased will be notified of the impending award. This is to ensure that they agree.
- D. The degree shall be awarded at the next scheduled graduation ceremony.
- E. The degree / certificate shall have the notation "Awarded Posthumously".

Graduate Academic Policies

GRADUATE STUDENTS

Definition: Students who have completed an undergraduate degree and who have been admitted by the University to work toward a graduate degree.

STUDENT COURSE LOAD

The minimum course load for a graduate student to be considered full-time is 6 Units. However, at the graduate level, the normal load during a regular academic semester is 9 Units. The thesis and project for graduate students is considered a full-time course load for one year. For Psychology Graduate students the practicum will be considered full-time for two semesters. Acceleration and/or a course load in excess of the normal load must be approved by the appropriate Chair of Department. Except for unusual circumstances, a 3.5 (graduate) cumulative grade point average will be required before a student will be permitted to enroll for units of credit which exceed the normal load. A maximum of 12 units are allowed for a graduate student in any one semester.

CREDIT/NO CREDIT GRADING

Classes listed in the University Catalog normally indicate which courses are offered only for credit rather than letter grade.

ACADEMIC STANDING

A student's academic standing is considered unsatisfactory if the cumulative grade point average falls below 3.0 in graduate programs.

POOR ACADEMIC STANDING

Students are automatically placed on Academic Warning at the end of any semester in which their grade point average changes from satisfactory to unsatisfactory (i.e. below 3.0 for all graduate programs). Students will be placed on academic probation at the end of the second successive

semester in which their cumulative grade point average remains unsatisfactory. Students will be dismissed from the University at the end of the third successive semester in which their cumulative grade point average remains unsatisfactory. Students who are academically dismissed may appeal their case to the Departmental Chair if there are extenuating circumstances. A final appeal may be submitted in writing to the DVC Academics-TTLR who may establish a committee to review such appeals. The decision at this level is final.

Appeals for reinstatement are governed strictly by the following conditions:

- The reinstated student will be placed on academic warning, and the student must obtain the cumulative grade point average established by the University within the next two semesters of enrollment. If the student does not attain the required GPA in the time allowed, academic dismissal from the University will be automatic.
- The student automatically will be returned to a regular status when his or her cumulative grade point average reaches 3.0 in any graduate program.

Graduation

Application for Graduation

- All graduate students must make a formal application for graduation by the deadline date indicated in the Academic Calendar. Degrees are conferred once a year.
- Applications for graduation may be obtained from the Registrar's Office. A nonrefundable graduation fee must be paid to Finance Office by all degree candidates at the time of application.

Degree Completion

Only the University Registrar is authorized to issue confirmation documentation attesting to matters pertaining to a student's academic work at the University. All degrees will be posted to the permanent record at the end of the semester in which the degree requirements are completed. Requirements are considered complete when relevant documents are received in the Registrar's Office and, in the case of projects and theses, the date filed in the library.

Graduate Degree Requirements

University policies regarding degree completion are as follows:

- A. Students must complete all courses and credit unit requirements with satisfactory grades

All degrees at the graduate level require a minimum GPA of 3.0.

- B. Graduate students must submit a project or thesis as required which is accepted and approved by the student's supervisor, Chair of Department and School Dean.
- C. Students must file their thesis by the dates established each year for Commencement. Proof and approval of a timely filing must have been submitted to the university. Failure to meet this deadline will require the degree certificate to be awarded the following year. All degrees will be posted to the permanent record at the end of the semester in which the degree requirements are completed.
- D. Students must file a completed application for Graduation with the university no later than the deadline specified in the academic calendar. If degree requirements are not completed on time, a graduation application for the next year must be filed
- E. In order to receive degree certificate, students must complete the Final Clearance process.

SECOND GRADUATE DEGREE

If a student already holds a Graduate degree from USIU-Africa, the basic guidelines for earning a second Graduate degree are as follows.

- A minimum of 10 additional graduate level courses (30 units) must be completed at USIU-Africa.
- Each School will determine its own requirements, if any exist, beyond the minimum of 10 additional courses (30 units).

For all degrees, course recommendations will be made on an individual basis in consultation with the dean or designee.

TIME LIMITS FOR DEGREE COMPLETION

The maximum amount of time for completing a Graduate degree is four years. An approved leave of absence does not change the time limits.

If the degree is not obtained within the time allotted, the student must meet the requirements of a Catalog dated no earlier than the allowed number of years prior to the anticipated date of graduation.

POLICY ON AWARDING OF POSTHUMOUS DEGREES

USIU-Africa will award degrees posthumously in the following circumstances and conditions:

Conditions:

The student must have been in good academic, disciplinary and financial standing with the university.

Circumstances:

- A. When a student death occurs after ALL requirements for the awarding of the degree have been completed.

- B. When a student death occurs in the final semester when all but six units are completed and upon the recommendation of the DVC Academics-TTLR and / or the School Deans.
- C. USIU-Africa offers degree certificates both as a physical document and electronically.

Procedure:

- Upon the knowledge that a student has passed on, the DVC Academics-TTLR and / or the School Deans will be notified if the death occurs in the final semester, seeking permission for the award of the degree.
- Upon approval, the family of the deceased will be notified of the impending award. This is to ensure that they agree.
- The degree shall be awarded at the next scheduled graduation ceremony.
- The degree / certificate shall have the notation "Awarded Posthumously"

Doctoral Academic Policies

STUDENT COURSE LOAD

The course load for a doctoral student to be considered full-time is 9 units per semester.

ACADEMIC STANDING

A student's academic standing is considered unsatisfactory if the cumulative grade point average falls below the GPA of 3.0

POOR ACADEMIC STANDING

Students are automatically placed on Academic Warning at the end of any semester in which their grade point average changes from satisfactory to unsatisfactory (i.e. below 3.0 for all Doctoral programs). Students will be placed on academic probation at the end of the second successive semester in which their cumulative grade point average remains unsatisfactory. Students will be dismissed from the University at the end of the third successive semester in which their cumulative grade point average remains unsatisfactory. Students who are academically dismissed may appeal their cases to the Departmental Chair if there are extenuating circumstances.

A final appeal may be submitted in writing to the DVC Academics-TTLR who may establish a committee to review such appeals. The decision at this level will be final.

Appeals for reinstatement are governed strictly by the following conditions:

- The reinstated student will be placed on academic warning, and the student must obtain the cumulative grade point average established by the University within the next two semesters of enrolment. If the student does not attain the required GPA in the time allowed, academic dismissal from the University will be automatic.

- The student automatically will be returned to a regular status when his or her cumulative grade point average reaches 3.0 in any doctoral program.

GRADUATION

Application for Graduation

- All doctoral students must make a formal application for graduation by the deadline date listed in the Academic Calendar.
- Degrees are conferred once a year.
- Applications for graduation may be obtained from the Registrar's Office. A non - refundable graduation fee must be paid to the Finance Office by all degree candidates at the time of application.

DEGREE COMPLETION

Only the University Registrar is authorized to issue confirmation documentation attesting to matters pertaining to a student's academic work at the University. All degrees will be posted to the permanent record at the end of the semester in which the degree requirements are completed. Requirements are considered complete when relevant documents are received in the Registrar's Office.

TIME LIMITS FOR DEGREE COMPLETION

The maximum amount of time for completing a Doctoral degree is six years. An approved leave of absence does not change the time limits.

If the degree is not obtained within the time allotted, then a student may appeal for an extension to a committee composed of the Departmental Chair and the dissertation supervisor (s). Extension will be granted only under the most compelling circumstances.

POLICY ON AWARDING OF POSTHUMOUS DOCTORAL DEGREES

USIU- Africa will award degrees posthumously in the following circumstances and conditions:

Conditions:

The student must have been in good academic, disciplinary and financial standing with the university.

Circumstances:

When a student death occurs after ALL requirements for the awarding of the degree have been completed.

Procedure:

1. Upon the knowledge that a student has passed on, the DVC Academics-TTLR and / or the School Deans will be notified.
2. Upon approval the family of the deceased will be notified of the impending award. This is to ensure that they agree.
3. The degree shall be awarded at the next scheduled graduation ceremony.
4. The degree / certificate shall have the notation "Awarded Posthumously".

THESIS/PROJECT POLICY

(Continuous Enrolment)

Once enrolment in the thesis or project course sequence has begun, a student must register each semester until the project or thesis is completed failure to which they will be required to register for semesters supervised and in which registration was not done hence settle the resulting finances unless a leave of absence has been approved.

DEGREE REQUIREMENTS

University policies regarding degree completion are as follows:

- Students must complete all courses and credit unit requirements with satisfactory grades, and the grades must be certified by an instructor upon submission to the registrar. All degrees at the graduate level require a minimum GPA of 3.0
- Doctoral degree students must submit a thesis as required, which is accepted and approved by the student's supervisor, Departmental Chair and Dean of Graduate Studies.
- Students must file their thesis by the dates established each year for Commencement. Proof and approval of a timely filing must have been submitted to the Registrar. Failure to meet this deadline will require the diploma to be awarded the following year. The date of degree completion will be the date on which a project or thesis is filed in the library if all other degree requirements have been met.
- Students must file a completed Application for Graduation with the registrar no later than the deadline specified in the academic calendar. If degree requirements are not completed on time, a graduation application for the next year must be filed and a new graduation fee paid to the Finance Office.
- In order to receive diplomas, students must complete the Final Clearance Form.
- DBA degree shall not be classified into various categories on the basis of GPA.

Doctor of Philosophy in International Relations

DEGREE REQUIREMENTS

Coursework

- Students will devote their first two years to coursework (three years for part-time students). This will involve a successful completion of the taught courses and 2 seminars in which they are required to achieve a minimum grade of 80% (B grade) in each of their assessed works.
- Most courses will be examined in a classroom setup with the exception of more practical/ seminar courses, such as PhD Research Seminar and Ph.D. Project Development & Fieldwork.
- A successful completion of the course work will be followed by a comprehensive written and oral examination as a prerequisite for progressing to Doctoral research work. The pass mark of 80% (B grade) will apply to the comprehensive examination.

Doctor of Psychology (PsyD.), Clinical Psychology

Degree Requirements Personal Therapy

Students are required to complete a minimum of 50 hours of personal therapy.

NOTE: In compliance with APA ethics code, a student's personal therapy is not permitted with USIU-Africa Psychology faculty.

Clinical Practicum Course

- Doctoral Practicum requirements include 600 hours of training over 3 consecutive semesters.

- At least 25 of the required 50 hours of personal therapy must be completed before registration for PSY 7721.

Advancement to Candidacy for the Doctoral Degree

Passing both a written and an oral comprehensive exam is required before the student can be advanced to candidacy for the Doctoral degree. Upon successful completion of both exams, the student will be notified to register for PSY 7731, Dissertation I.

Dissertation Chair and Committee

The student will identify a Dissertation Chairperson and committee members upon advancement to candidacy for the Doctoral degree, and after registration for PSY 7731 Dissertation I.

Doctoral Dissertation

Three dissertation courses are required during three sequential semesters.

Students will concurrently work with their Dissertation Chairperson and Dissertation Committee, while engaged in the dissertation course work with faculty.

Students requiring an additional semester (s) to complete the dissertation may apply for approval with the student's Dissertation Chairperson.

Note: Students must continue to register for PSY 7734 Dissertation in Progress, for each semester until the final dissertation is completed and signed by the Dissertation Chairperson.

Doctoral Internship

Internship requirements include 1500 hours training, over 3 semesters at 500 hours per semester.

The completion of 50 hours of personal therapy must be completed before registration for PSY 7741.

Students requiring an additional semester(s) to complete 1500 hours of internship training may apply for approval with the Clinical Training Coordinator and will register for continuation of PSY 7743 until 1500 hours are completed.

Doctor of Philosophy in Information Systems & Technology

PhD (IST) Degree Requirements

The Ph.D. (IST) is a three-year program which requires students to complete 72 credit units comprising 42 core units of coursework, a comprehensive examination and 30 units of Ph.D. thesis. This will be carried out in four semesters of course work and four semesters of research work. Students will be required to register and sit for comprehensive examination, during the fifth semester, after completing the course work and before embarking on their thesis research. Each core course (3 units) will be offered for 3hrs 20 minutes per week for 14 weeks per semester. The candidates admitted to the program will be governed by the following rules and requirements:

- All candidates admitted to the program are required to pass the coursework prescribed within a minimum period of four semesters from the date of admission. Initial admission is provisional and subject to candidate passing the coursework.
- In case a student is unable to pass the coursework within four semesters (which may be extended for a maximum of four semesters in exceptional cases), his/her admission stands automatically cancelled.

- Passing the coursework means passing each of the papers with a minimum of 80% and a cumulative GPA of a minimum of 3.0 on a 4.0 scale.
- Students must publish 2 papers in peer refereed journals to graduate.
- Students have a maximum of nine (9) years to complete the program.

Thesis Research Project

The PhD (IST) thesis shall be delivered in 4 semesters. The first semester shall involve the writing and defense of a proposal. After successful proposal defense, the student shall be allowed to embark on research work. The PhD thesis shall be presented in a pre-submission presentation and a final public defense. Upon the student's successful completion of the oral examination, the thesis shall be evaluated by three examiners; two internal examiners and one external examiner. External Examiners should be of recognized eminence in the subject matter of the thesis. The supervisor cannot be an internal examiner.

Financial Policies and Procedures

Tuition Fees

Tuition fees are determined annually by the university Management Board (MB) and approved by the University Council (UC) and are subject to an annual review through the annual budgeting process or during the year for the new academic programs.

Mandatory Charges

Mandatory charges payable every semester include, library, medical, student activity, Alumni services fee, technology fee, and insurance (non-Kenyan students and hostel residents) fees. Caution money and quality assurance fees are payable once on admission, however caution money is refundable upon graduation/leaving the University). Other mandatory charges include lab fees and charges specific to programs as provided in the approved fee structure.

Fees Payment

All fees are due for payment on or before the first day of every semester. Pre-registration is only available to students with zero balances and those with approved deferred payment plans. Financial holds will be administered to all students whose fees is owing at the time of pre-registration.

Failure to pay fees by the first day of semester, will attract an 1.5% interest on the balance per month calculated on a daily basis. Interest is prorated where student pays within the month. Interest is also applicable to accounts / students on payment plan.

Interest on outstanding debt is charged each month for a maximum of ten (10) months, after which it is stopped until the student resumes payments.

New students must pay fees before course registration. Any amounts paid into the University's bank accounts will be deemed as payment towards tuition fees unless otherwise specified.

Currencies & Exchange Rates

- All university payment are received in two currencies i.e. either in Kenya Shillings (KES) or US Dollars (USD);
- The exchange rate used for East African Students is dependent on the daily exchange rate set by our bankers (NCBA);
- Non-East African students have a fixed exchange rate that is set every beginning of the semester.

Personal and Bankers Cheques

All cheques **MUST** be presented to USIU-Africa for receipting and cheques should NOT be deposited directly to the bank account

Ensure that **all cheques are duly signed by the signatories on both sides** to authenticate the beneficiary student details.

A 10% charge (up to a maximum of Kes. 5,000.00) is charged on any returned/bounced cheques. Personal cheques will **NOT** be accepted from students with history of bad/returned cheques.

Note: *Cheques that don't meet these requirements shall be returned to the affected student for compliance.*

Instalment Payments

The deferred payment plan is available to **Kenyan students**. Access to the payment plan for international students is at the discretion of the University. Continuing students and freshmen are allowed a maximum of three (3) and two (2) equal installments respectively.

Freshmen on deferred payment plan will be allowed to register for classes after payment of 50% of fees, and will get financial clearance after registration and approval of the instalment plan by the Credit Control Office. The final 50% instalment plus any interest

charged will be due the 7th day of the second month of the semester.

Financial clearance for continuing students is conditional upon payment of the 1st instalment, registration and approval of deferred payment plan by the Credit Control Office. The 2nd and the 3rd instalments are due for payment on the 7th day of the second and the third months of the semester respectively.

Students who do not adhere to the payment plan dates and regulations will be deemed as defaulters and may be denied future payment plan applications, and denied access to university's facilities and sitting for final exams.

Application for the payment plan should be submitted by the second week of every semester through <https://www.usiu.ac.ke/webapp/defer-payment/>

Financial Clearance

Financial clearance is done for students whose accounts are in good standing after having fully paid-up accounts or have been successfully enrolled in a deferred payment plan.

The University reserves the right to withhold a grade report, academic transcript, and diploma from any student who has outstanding financial obligations, either to the University or to student's organizations.

Students who plan to participate in the Commencement Ceremony must have paid their fees in full including the purpose code.

Tuition Waivers/Rebates on Project II /Thesis II

Tuition waiver/ refund policy apply when a course is officially recorded by the Registrar as being dropped, the charge waiver schedule is as follows:

- 100% charge waiver if officially recorded before the first day of the semester;
- 90% charge waiver if officially dropped within 1st week of the semester;

- 75% charge waiver if dropped within 2nd week of the semester;
- Courses dropped after 2nd week of the semester will be charged full fee.

Masters' students are required to be continuously enrolled every semester while their Thesis II/project II remains incomplete. In the first registration of Thesis II, the Thesis II is charged as a full 3-unit Graduate course, while the 2nd and 3rd registration of Thesis II, is charged at 50% of the tuition. Other charges remain the same. If the Project II/Thesis II extends beyond the 3rd registration, then tuition reverts to full charge.

Any course registered as an audit course will be charged at 50%.

Add/Drop/Withdrawal

Add/drop fee is KES 600 per course charged from the second week of the semester.

Procedure for Withdrawing/Requesting a charge Waiver

A student must complete the following steps in order to receive a fee waiver:

- The student should contact the University Registrar to officially withdraw the course (s);
- The student must fill an add/drop form which must be approved and signed by the School Dean;
- The student will present their case and give details to the School Dean as to why the student is withdrawing the course (s);
- Guided by the University's policies, the Dean will advise finance on the fee waiver/reversal giving detailed reasons as to why the financial policy should not apply;
- The approved add/drop form must be submitted to the Registrar's office for processing and copy forwarded to the Finance Department for reversal of the tuition charges.

Note: Late registration fee is a fixed charge which begins from second week of the semester.

Room & Board

A room key deposit of Kes. 4,778 (refundable on leaving the hostel). A room deposit fee of KES 14,000/= is payable by the 13th week of the semester, enabling student to book a room for the next semester.

University's hostel residents and non-Kenyan citizens are charged a comprehensive medical insurance cover, unless the student already has an existing cover acceptable in Kenya (subject to authentication by the Insurance Office every semester).

Debt Collection

Students are required to clear their fee balance in good time. Any student debtors over one year will be forwarded to external debt collectors for recovery of the pending fees at the student's cost. The University reserves the right to blacklist students with a Credit Reference Bureau for non-payment of fees and charges.

Final Clearance

Final clearance is granted to students who have graduated or those leaving the University for other reasons. The student will be cleared by Finance Department, once they meet the below requirements;

- Has no pending fee balances;
- Has been charged graduation fee (for graduating students);
- Has been cleared by other Departments other than Registrar's office.

Tuition Refund of Overpaid Fees/Caution Money

Refunds of any overpaid fees and caution money are due upon students' graduation or exit from the University. To qualify for refund, the students must apply and obtain full final clearance as provided in the refund procedure. All applications received by 24th day of the month shall be processed and paid to the bank by 15th of the next month.

Students should claim their refunds immediately after doing their final clearance. Excess/ overpaid fees, caution fee and graduation gown deposit fee will be submitted to Unclaimed Financial Asset Authority (UFAA) if they are not claimed by the students two (2) years after graduation/ leaving the university.

Student refund must be applied through <https://www.usiu.ac.ke/webapp/tuition-refund/> and shall be processed monthly.

MOBILE MONEY PAYMENTS (M-PESA)

To pay on M-PESA, please follow the prompts below:

- Go to M-PESA
- Select Lipa na M-PESA
- Click Pay bill

- Enter Business number: 516900
- Enter Account number: Student ID – (hyphen) then purpose code. (FOR EXAMPLE 664XXX-TUIT, or 664XXX-ADM)
- Enter the amount you wish to pay
- Enter your PIN and click send.

The following codes will apply when making different payments:

For Tuition Fee, Graduation fee, Diploma replacement and any other fee payment use the code – TUIT

ACCA - ACCA Payment

KSL - Kenya Sign Language Payment

ADM - Application Fee Payment

LAUN - Launchpad Payment

AFR - Alumni Fundraising

LNDR - Laundry Payments

AFFI - Affiliation Payment

LBB - Library Book Binding

ALF - Alumni Library Fee

LIBF - Library Fine

ALN - Alumni Payment

LMF - Library Membership Fee Payment

EYO - EYO Payments

LWB - Library Weeded Books

DINNER - AIESEC Dinner Payment

M&E - Monitoring and Evaluation Payment

CFM - Cafeteria Meals

MAIL - Mailing Fee Payment

CEH - Certified Ethical Hacker Payment

MUS - Mr. and Miss USIU-Africa Payment (Account Number 10-1231-6152)

CHINESE - Chinese Payment

PARF- Parking Fines

CISCO - Cisco Payment

PRNT - Printing Payments

CWK - Culture Week Payment

PPP - Pupil's Pass

ENGCERT - English Certificate Payment

PVAC - SPSHS Student Vaccination

ENT - Enterprenuership Payment

RSV - Room Reservation Payment

GYM - GYM Payment

TSPT - Transcript Payment

IRF - ID Card Replacement Fee Payment

TRN - Transport Payment

IMLD - International Mother Language Day Payment

IRB - Research Permit

KALEL - Kalel Payment

Note: Always include the student's full names and student ID number when making payments. All cash deposits made at the bank shall be receipted into the student accounts the next working day.

General Education

General Education

Mission Statement

The mission of General Education at USIU-Africa is to equip students with a broad base of knowledge, skills and attitudes that lay a solid foundation for successful progress in their programs and professional development in a global perspective.

The general education program comprises of undergraduate coursework which is a significant component of the baccalaureate program at USIU-Africa.

It intersects with the University's overall mission in providing students with grounding in higher order thinking, literacy, and development of global understanding and a multicultural perspective.

Learning Outcomes

1. **GATHER**, interpret and evaluate information through the skills of inquiry to formulate valid conclusions.
2. **APPLY** scientific research methods to collect, analyze and evaluate data in problem solving.
3. **COMMUNICATE** effectively in both speech and writing.
4. **INTEGRATE** multicultural and global perspectives in addressing issues in their field of knowledge.
5. **DEMONSTRATE/EXPRESS** commitment to social and environmental issues.
6. **ARTICULATE** and uphold civic and ethical values in their social and professional engagements.

GENERAL EDUCATION REQUIREMENTS (39 UNITS)

The GE program comprises 39 units divided into 33 core and 6 electives. The three main components, namely Signature courses, Language Studies and Disciplinary Courses are three unit courses unless otherwise indicated. Each undergraduate student is required to complete the 39 units of General Education. All courses taken must be applied towards fulfilling the requirements of one of the following areas: general education, the major, the minor, or electives. A course used to satisfy a requirement in one area may not be used to satisfy a requirement in another area.

CORE COURSES SIGNATURE COURSES (12 UNITS)

These comprise Strategies for University Success (SUS 1010), Introduction to Research Methods (GRM 2000), Community Service Learning (CMS 3700) Senior Experience Integrated Seminar (SEN 4800), and Fundamentals of Information Literacy (FIL1010). Whereas the Strategies for University Success course assists students to make the necessary transition from high school and/or the work environment to the university environment, Community Service Learning requirement provides students with opportunities to serve others and to develop a heightened sense of responsibility to the larger community.

Strategies for University Success (3 Units)

Strategies for University Success (SUS 1010) is taught as a combined lecture and small seminar course.

Transfer students with less than 36 credits may be required to take the course. The Strategies for University Success course may not be used for an elective and is open only to first year students.

Fundamentals of Information Literacy (3 Units)

This course empowers with critical skills to navigate and evaluate the vast sea of information available. From understanding database to honing research techniques, students develop the ability to discern

credible sources and utilize information effectively.

Introduction to Research Methods (3 Units)

Introduction to Research Methods (GRM 2000) introduces students to the basic concepts and principles of social research. It also familiarizes the student with the ethics governing research.

Community Service (3 Units)

CMS 3700: Community Service Learning constitutes three in class lecture/ seminar sessions of three (3) hours and twenty (20) minutes as well as a mandatory minimum of ninety(90) hours of service in an approved organisation for hands on students and a minimum of 10 hours of hands on service and a completed and officially handed over project in an approved needy organisation for project students.

The Senior Experience (3 Units)

SEN 4800: The Integrated Senior Experience Seminar is meant to serve as a “capstone” for the student’s college career and requires that the student demonstrates competence and skills in the intellectual enterprise. The course focuses on the interdisciplinary nature of knowledge and preparation for a career.

LANGUAGE STUDIES (12 UNITS)

These include Arabic, English, Chinese, French, Japanese, Spanish, Kenyan Sign Language, American Sign Language and Swahili courses. Such courses enhance the student’s exposure to a multicultural and global world.

English (6 Units)

ENG 1106: Composition I
ENG 2206: Composition II

Foreign Language (6 Units)

Foreign Language I
Foreign Language II

Students must have credit for a foreign language or must take up a two-course foreign language

sequence of one language. Students at USIU-Africa may meet the foreign language requirement in one of the following ways:

Successful completion of a two- course consecutive sequence of one language at USIU-Africa;

Transfer credit from another college or university for an academic year of study in one foreign language other than English or the student’s primary language(s);

Transfer credit by way of the Inter- segmental General Education Transfer Curriculum (IGETC); or

Successful completion of a CLEP test in a language other than the student’s primary language(s). Currently, CLEP tests are offered in French, German, and Spanish. No other testing options are currently offered.

MATH & IT STUDIES (6 UNITS)

MTH 1109: College Algebra
IST 1010: Introduction to Information Systems

DISCIPLINARY GENERAL EDUCATION ELECTIVES (School-Based Electives) (9 UNITS)

The GE Electives are drawn from a variety of disciplinary fields in the sciences to deepen and broaden the development of an international and global perspective.

School Based GE Electives (9 Units)

Students are required to pick 2 electives (6 Units) from the other schools.

One of the courses should be an upper level course and the other should be a lower level course.

Lower Level courses are coded 1000- 2999 while upper level courses are coded 3000 - 4999

CHANDARIA SCHOOL OF BUSINESS SCHOOL BASED ELECTIVES

School of Humanities and Social Sciences Electives - Lower Level Electives

CJS 1101	Introduction to Criminal Justice Studies
COM 1500	Intercultural Communication
GNS 2000	Introduction to Gender Studies
GNS 2001	Communication & Gender
IRL 2000	Foundations of IR
LIT 1106	African Fiction
LIT 2220	Literature & Culture
PHL 1104	Introduction to Philosophy
POL 2201	Introduction to Political Science
PSY 1101	Introduction to Psychology
PSY 2125	Human Sexuality
SOC 1101	Foundations of Sociology

School of Humanities and Social Sciences Electives - Upper Level Electives

FAR 3000	Music of the World
FAR 3001	Visual Arts of the World
GEO 3000	Geography and the Environment
HIS 3015	20th Century Eastern Africa
HIS 3021	History of Modern Asian Civilization
HIS 3025	History of Kenya
IRL 3015	Introduction to Peace & Conflict Studies
LIT 3330	Literature for Children & Adolescents
LIT 3340	Myths, Rituals & Archetypes
LIT 3351	Masterpieces of World Literature
LIT 4785	African Authors Seminar
LIT 4815	Oral Literature
PHL 3309	Major Figures in Philosophy
PHL 3310	Ethics and Value Theory
PSY 3135	Psychology of Communication
PSY 3150	Courtship & Marriage

SOC 3301	Social Problems
SOC 3305	Deviant Behavior
SOC 3310	Family & Kinship in a Multicultural Context
SOC 3500	Social Conflict & Resolution

Bachelor of Global Leadership and Governance

School-Based General Education Electives (9 units)

Choose two courses – one from each level series – from the choices given below:-

PSY 110	Introduction to Psychology
CJS 1101	Introduction to Criminal Justice
IRL 3015	Introduction to Peace & Conflict Studies
SOC 3301	Social Problems
ENV 4000	Environmental Economics
ENV 4200	Environmental Law

School of Science and Technology Electives Lower Level Electives

MTH2210	Introduction to Applied Statistics
---------	------------------------------------

Upper Level Electives

ENV 3200	Water Use & Management
ENV 3288	Field Studies
ENV 3300	Energy Use and Management
ENV 3500	Regional Environment
ENV 4000	Environmental Economics
ENV 4200	Environmental Law
IST 3005	Application of Social Media for Business
IST 3015	Business Data Analytics
JRN 3015	Media Management
NSC 3304	Biology and the Environment

SCHOOL OF COMMUNICATION, CINEMATIC & CREATIVE ARTS

School of Humanities and Social Sciences - Lower Level Electives

COM 1500	Intercultural Communication
GNS 2000	Introduction to Gender Studies

Chandaria School of Business - Lower Level Electives

BUS 1010	Introduction to Business Organisations
ECO 1010	Principles of Microeconomics
ENT1010	Introduction to Entrepreneurship
HRT 1010	Introduction to Hospitality & Tourism Management

School of Humanities and Social Sciences - Upper Level Electives

GEO 3000	Geography and the Environment (Option for FLM students)
LIT 4785	African Authors Seminar (Option for all SCCCA students)
PHL 3310	Ethics and Value Theory (Option for all SCCCA students)
PSY 3135	Psychology of Communication (Option for all SCCCA students)
SOC 3301	Social Problems (Options for FLM, JRN students)
SOC 3305	Deviant Behavior (Options for FLM, JRN students)

Chandaria School of Business Electives - Upper Level Electives

MGT 3010	Overview of Management Practice
MKT 3010	Principles of Marketing

SCHOOL OF HUMANITIES & SOCIAL SCIENCES

Chandaria School of Business List of Electives - Lower Level

BUS 1010	Introduction to Business
ECO 1010	Principles of Microeconomics
ENT 1010	Introduction to Entrepreneurship
HRT 1010	Introduction to Hospitality & Tourism Management

Chandaria School of Business List of Electives - Upper Level

MGT 3010	Overview of Management Practice
MKT 3010	Principles of Marketing

School of Science & Technology & School of Pharmacy - Lower Level Electives

ENV 2000	Introduction to Environmental Sciences
ENV 2001	Sustainable Resource Management
JRN 1109	Introduction to Mass Communication
JRN 2103	Fundamentals of Photography
MTH 2210	Introduction to Applied Statistics
MTH 2010	Probability and Statistics

NSC 2215	Introduction to Physical Mechanics
NSC 2205	Human Physiology
NSC 2212	Life, Environment & Society
NSC 2216	Introduction to Earth Sciences

School of Science & Technology & School of Pharmacy - Upper Level Electives

ENV 3200	Water Use & Management
ENV 3288	Field Studies
ENV 3300	Energy Use and Management
ENV 3500	Regional Environment
ENV 4000	Environmental Economics
ENV 4200	Environmental Law

REQUIREMENTS FOR INFORMATION LITERACY INTENSIVE (ILI) COURSES

Gaining skills in information literacy helps students become engaged in using a wide variety of information sources to expand their knowledge, ask informed questions, and sharpen their critical thinking and thus increases the opportunities for student self- directed learning. A course that is designed as

Information Literacy Intensive (ILI) should engage students in the acquisition of knowledge, information seeking skills, attitude to exploit information, and competencies for academic pursuits and lifelong learning. Such course should display the following characteristics:

1. Provide opportunity for every student to identify their information needs, formulate successful search strategies and assess search results for quality and relevance.
2. Prepare tasks for students to critically evaluate information sources for reliability, validity, authority, and timeliness before making judgements.
3. Assign students work which will engage them in conducting research, organizing and synthesizing information from multiple sources.
4. Accord students opportunity to share their research through presentations and social platforms as appropriate.
5. Provide opportunity for students to demonstrate an understanding of intellectual property, copyright and fair use of information.

REQUIREMENTS FOR ORAL INTENSIVE (OI) COURSES

An Oral Communication Intensive (OI) course incorporates speaking and listening as part of learning in any discipline specific course. Its main goal is improve student's effectiveness as speakers and listeners. Such a course offers explicit instructions in effective oral communication throughout its instructional features (readings, lectures, class discussions etc).

An Oral Communication Intensive course should provide multiple opportunities for students to practice their oral presentation skills and display and display the following characteristics:

1. There will be instruction in and evaluation of Oral Communication Intensive assignments as they relate to the discipline in which the course is taught.
2. Every student in the class should make at least two oral presentations as part of the assessed and graded assignments, and at least one of

these should be an individual presentation.

3. At the start of the class learners should be made familiar with the standard rubric for assessing these presentations.
4. Part of the instructional modes should engage students in peer assessment of each other's work.
5. Presentation assignments should be discipline specific and cover a variety of modes: aural, oral, tactile, kinetic, visual and written.
6. There will be opportunities for feedback and revision throughout the course session.
7. The presentations to be graded on a 50% for presentation skills and 50% content.

REQUIREMENTS FOR WRITING INTENSIVE (WI) COURSES

Courses designated as writing Intensive expand students' knowledge by examining complex issues and they are to advance students' abilities to reason logically and to write clearly in prose.

A writing Intensive course (WI) should display the following characteristics:

1. At least 5,000 words;
2. At least four different pieces of writing, one of which must be in class;
3. Writing that demonstrates higher order thinking through collecting, analyzing, and evaluating data;
4. A variety of writing assignments, such as expository essays and research;
5. Writing evaluation based on 50 percent on content and 50 percent on form.
6. Timely feedback on written assignments.
7. Help students to reason logically, and write clearly and continuously in prose.

Course Descriptions

CMS: Community Service

CMS 3700 Community Service or Community Service project

Requires a minimum of 90 hours of service. Helps fulfill the USIU-Africa mission for community service. While students must do this course off campus, there are three mandatory induction class sessions that are taken on campus. Community Service learning will prepare students to become active civic participants in today's society. It can lead to reduction in negative stereotyping and an increasing tolerance for diversity. Student must complete his/her course work at end of each session.

(Grading is credit/no credit.) Credit: 3 Units

GRM: General Research

GRM 2000 Basic Concepts and Principles of Social Research

This course introduces students to basic concepts and principles of social research. It teaches them the meaning, purpose and characteristics of social research; the major ethical issues governing social research; the research process, including the identification of a research problem, literature search and review, study population and sample selection, and the methods of data collection. (ILI, WI)

Prerequisite: ENG 1106 & SUS 1010 Credits: 3 Units

SEN: Senior Experience

SEN 4800 Integrated Senior Seminar

This is a capstone course that helps students reflect on the meaning of their four years at USIU-AFRICA as they prepare to move on to graduate school, find jobs, get married, establish their businesses, serve in civic responsibilities, to name but a few. It is organized as a seminar where students analyze case studies, research on relevant topics to enhance their post-university lives so they can integrate appropriately into

society. Using critical-thinking based approaches to self-understanding, the course clarifies the expectations of the student pertaining to ethical issues that confront citizens on a daily basis. Students assess the extent to which they have fulfilled the mission and vision of the university as well as the specific mission outcomes from their specific schools. (WI, OI)

Credit: 3 Units

SUS: Strategies for University Success

SUS1010 Strategies for University Success

This course is for new students with no previous college or university experience and transfer students with 36 credits or more. It does not count as an elective. It helps students gain a clearer understanding of the USIU- AFRICA culture, mission and vision of the university and clarifies expectations regarding the appropriate approaches to accomplishing a university degree. It communicates the high academic expectations and help students recognize and take advantage of the various campus resources that enhance their academic lives. It is an orientation seminar that involves critical-thinking- based approaches to learning and self- understanding. (ILI, OI)

Credit: 3 Units

FIL: Fundamentals of Information Literacy

FIL 1010 Fundamentals of Information Literacy

This course is designed to introduce learners to basic concepts and skills of information literacy. Its aim is to help students to become lifelong learners and enable them to fully participate in the information society. The course aligns with Sustainable Development Goal 4, by ensuring inclusive and equitable quality education that stimulates lifelong learning opportunities for the learners. (ILI)

Electives (6 Units)

Students to select two courses:

FIN 4130	Financial Analysis and Reporting
FIN 4030	Investments
ACT 4130	Forensic Accounting

Bachelor of Global Leadership and Governance (On hold)

Mission Statement

The goal of the Bachelor of Global Leadership and Governance program is to equip students with appropriate knowledge, skills, attitudes, and values essential for functioning successfully and responsibly in public, private and not for profit organizations.

Program Learning Outcomes

Upon successful completion of the Bachelor of Global Leadership and Governance programme, the students will be able to:

1. Formulate, implement and evaluate institutional policies, leadership, and governance structures
2. Employ financial management principles in decision making
3. Develop business and social entrepreneurship systems
4. Apply theories in public and private sector administration and relate these to contemporary global leadership trends
5. Generate solutions for global leadership and governance challenges facing institutions
6. Utilize ethical and legal principles with regard to service delivery

Further, the programme has two specialization areas: Leadership and Governance in Government & Public Benefit Organizations and Corporate Leadership and Governance. The two specialization learning outcomes are as provided below.

Leadership and Governance in Government & Public Benefit Organizations

1. Generate solutions for leadership and governance challenges facing institutions
2. Evaluate financial policies in line with requirements of devolution and public finance management systems
3. Apply theories in politics for government & PBO administration and relate these to contemporary trends
4. Relate contemporary theories of leadership, democracy and change management to institutional performance
5. Develop plans for lobbying and advocacy

Corporate Leadership and Governance

1. Evaluate financial policies in line with requirements of financial rules
2. Appraise company governance policies in line with requirements of company law
3. Apply theories in corporate governance to leadership and governance challenges facing institutions and relate these to contemporary trends
4. Develop plans for risk management
5. Employ quality management principles to institutional performance management

Bachelor of Science in Hotel and Restaurant Management

Mission Statement

The mission of the Bachelor of Science in Hotel and Restaurant Management (HRM) program is to impart a range of attitudes, skills, knowledge and problem-solving abilities in Hotel and Restaurant Management, - Hospitality Planning and Development; with an emphasis on practical applications, case studies, simulation and research.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; and service to the community, whose foundation is laid by the General Education Program (see section on General Education), the following are the HRM program specific Learning Outcomes:

1. Make use of information and communication technology in hospitality operations.
2. Implement appropriate procedures for the delivery of hospitality services.
3. Apply basic research methods in hotel and restaurant management.
4. Explain the environmental, socio- cultural and global diversity of the modern hospitality industry.
5. Develop new hotel and restaurant products and services.

Bachelor of Science in International Business Administration

Mission Statement

The mission of the Bachelor of Science in International Business Administration (IBA) program is to provide a range of knowledge, skills and abilities in international business operations, international economics and trade, international finance, marketing and entrepreneurship with an emphasis on practical applications, case studies, and research.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; and service to the community, whose foundation is laid by General Education (see section on General Education), the following are the IBA program-specific learning outcomes:

1. Analyze and utilize business data in making decisions in international business
2. Develop viable international business plans
3. Apply marketing principles in designing strategies for international business
4. Prepare and interpret financial statements for international business
5. Demonstrate leadership skills and ethical behavior in international business environments
6. Interpret environmental factors in international business operations.

Bachelor of Science in Epidemiology & Biostatistics (On hold)

Mission Statement

The program's mission is to promote the discovery and application of epidemiology and biostatistics knowledge as well as the acquisition of competencies for designing and conducting studies in the public, health and medical research domains.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; and service to the community whose foundation is laid by the General Education Program (see section on General Education). The following are the Bachelor of Science in Epidemiology and Biostatistics Program- specific Learning Outcomes:

1. Use epidemiologic knowledge to respond to a variety of practical situations that impact on public health;
2. Employ biostatistical methods to conduct basic life science research;
3. Apply appropriate laws and ethics in assuring population public health;
4. Interpret research results of statistical analyses in public health;
5. Use relevant statistical software to organize, analyze, and report on life science research data;
6. Develop a plan for data management and analysis using appropriate statistical techniques.

Bachelor of Pharmacy

Mission Statement

The Bachelor of Pharmacy Program will equip graduates with knowledge, skills and values for professional success. The program will focus on the development, application and effective management of Pharmaceutical technology as a fundamental tool of modern society. It will contribute to the university mission outcomes which are higher order thinking; literacy; global understanding and multicultural perspective; preparedness for career; community service; and leadership and ethics.

The mode of delivery of the Bachelor of Pharmacy program will be face-to-face learning. Teaching strategies such as lectures, tutorials, case studies, demonstrations, guided student discussions; group work, practical work, seminars, projects and simulations will be employed. The Pharmacy program is designed for students who wish to pursue careers in pharmaceutical practice, research laboratories and hospital laboratories.

Program Learning Outcomes

By the end of their training the graduates should be able to:

1. Produce pharmaceutical products utilizing appropriate procedures and standards;
2. Manage a supply chain for pharmaceutical materials and products;
3. Apply regulatory and ethical instruments that govern the practice of pharmacy;
4. Design therapeutic management regimens for patients;
5. Disseminate knowledge on health-related issues;
6. Participate in health research.

Note: Students must complete and clear all Pre-clinical courses before they are allowed to proceed to the clinical years.

Bachelor of Science in Nursing

Mission Statement

The bachelor of science in Nursing will equip students to deliver ethical, culturally competent, and evidence-based nursing services; engage in critical inquiry and research; assume leadership roles in nursing education and administration; and actively contribute to global health initiatives. The program emphasizes the development of critical thinking skills, social responsibility, and a commitment to continuous professional growth, preparing graduates to adapt to evolving healthcare challenges and make meaningful contributions to their communities and the nursing profession worldwide.

Program Learning Outcomes

The goal of the program is to cultivate life-long learners and innovative healthcare professionals who will provide comprehensive nursing care across all levels of the health system. Graduates will be equipped to deliver ethical, culturally competent, and evidence-based nursing services; engage in critical inquiry and research; assume leadership roles in nursing education and administration; and actively contribute to global health initiatives. The program emphasizes the development of critical thinking skills, social responsibility, and a commitment to continuous professional growth, preparing graduates to adapt to evolving healthcare challenges and make meaningful contributions to their communities and the nursing profession worldwide.

Program Learning Outcomes

Upon successful completion of the program, the students will be able to:

1. Integrate knowledge, behavioral skills, and a compassionate attitude in delivering patient-centered nursing care across diverse healthcare settings.
2. Participate in decision making on health service delivery in varied global settings based on comprehensive health assessment.
3. Provide ethical and evidence-based nursing care to individuals, families, and communities.
4. Manage promotive, preventive, curative and rehabilitative health services in varied global settings.
5. Design and implement nursing training curricula within an acceptable professional, legal, and ethical framework.

NOTE: Students must complete and clear all pre-clinical courses before they are allowed to proceed to the clinical years.

Bachelor of Science in Applied Biochemistry (On hold)

Mission Statement

Applied Biochemistry focuses on knowledge and techniques in biochemistry that can be applied to solve challenges relating to improving health and nutrition, forensics, increasing agricultural and manufacturing productivity and sustaining the environment. The program focuses on three major areas: Industrial Biochemistry which focuses on application of biological molecules for medical, industrial, environmental, agricultural for analytical purposes; Medical Biochemistry which equips students with knowledge, skills, attitude and understanding of the fundamental importance of biochemistry, with particular reference to the ways in which this relates to health issues, molecular basis of disease, biochemical basis of drug based therapy and an understanding in development of new medical treatments, and; Forensic Biochemistry which equips students with knowledge and skills of how to obtain evidence from biological materials for use in law enforcement, criminal justice, homeland security and related fields. The program is aligned to:

- Analyze the cellular processes that govern life.
- Use integrated knowledge in biological chemistry to solve biochemical problems.
- Conduct biomedical research and communicate scientific information using set standards for reporting and citation.
- Apply biochemical knowledge and techniques in criminal justice, agriculture, manufacturing and business processes.
- Design innovative biochemical products and services using ethically-sound practices.

Program Learning Outcomes

Upon completion of the BSc in Applied Biochemistry program, students will be able to:

1. Analyze the cellular processes that govern life.
2. Use integrated knowledge in biological chemistry to solve biochemical problems.
3. Conduct biomedical research and communicate scientific information using set standards for reporting and citation.
4. Apply biochemical knowledge and techniques in criminal justice, agriculture, manufacturing and business processes.
5. Design innovative biochemical products and services using ethically-sound practices.

Bachelor of Technology in Analytical Chemistry (On hold)

Mission Statement

The goal of the Bachelor of Technology in Analytical Chemistry is to provide students with hands-on practical experiences in the laboratory in the core areas of analytical chemistry such as instrumentation, quality control and quality assurance of laboratory practices. Students will be able to demonstrate the ability to conceptualize, identify and collect relevant chemical data and present findings in a scientific context.

Program Learning Outcomes

Upon completion of the B.Tech Analytical Chemistry program, students will be able to:

1. Apply chemical concepts and theories in addressing current scientific problems
2. Design and carry out experiments using appropriate analytical methods and protocols
3. Evaluate experimental data with the appropriate statistical methods and communicate scientific reports with a high level of professionalism to chemists and non-chemists.
4. Conduct research to solve chemical problems and explore new areas of research.
5. Use proper procedures and regulations for safe handling, storage, and use of chemicals.
6. Undertake quality control in industrial, private, institutional or research laboratories.

CHE 4000	Industrial/Field Attachment

ELECTIVE I (Choose 1 of the following)

CHE 3044	Polymer Processing
CHE 3110	Surface and Colloid Chemistry
CHE 3092	Industrial Processes and Environment
CHE 3240	Chemical Processes and Equipment Design

The future belongs
to those who believe
in the beauty of their
dreams.

Eleanor Roosevelt

Bachelor of Science in Applied Computer Technology

Mission Statement

The mission of the Bachelor of Science in Applied Computer Technology is to prepare students for jobs which demand IT systems and skills.

Program Learning Outcomes

Today's industry technology interfaces with business tasks in every function and department. As such this program aims at preparing students for dynamic fields of mobile computing, networking, software engineering and forensic security.

Program Learning Outcomes

In addition to the university-wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; leadership and ethics; and service to the community, whose foundation is laid by the General Education Program, the following are the learning outcomes specific to Applied Computer Technology:

By the end of the program, the students should be able to:

1. Apply algorithmic, mathematical and scientific reasoning to a variety of computational problems;
2. Design integrated software for organisations;
3. Develop applications using modern tools and techniques;

4. Apply communication and collaboration skills in information technology projects;
5. Demonstrate professional standards, behavior and ethics.

SFE 4030	Software Testing & Quality Assurance
APP 4035	Web Application Development Frameworks
APP 4080	Collaborative (Team Work In) Software Development

Bachelor of Science in Software Engineering

Mission Statement

The Bachelor of Science in Software Engineering program prepares students for successful careers as software engineers by providing them with an experiential learning opportunity that enables them to apply knowledge that can solve real-world problems. The program strives to impart to students' knowledge and skills that enable them to design, code, test and manage quality-measured software systems. Graduates should be able to design and develop solutions that are dependable, secure, reliable, and that adhere to the user requirements.

Program Learning Outcomes

Upon completion of the BSc. in Software Engineering program, students will be expected to:

1. Apply Software Engineering concepts and principles to analyze real-world software problems;
2. Develop software programmes using modern software methodologies and processes;
3. Demonstrate team work through collaborative implementation of software using modern software engineering principles and techniques;
4. Apply software testing, quality assurance, security, and costing techniques to software development;
5. Develop software products in line with software engineering ethics and standards;
6. Conduct research in the field of software engineering;
7. Demonstrate preparedness for further studies in the area of software engineering

Bachelor of Science in Data Science and Analytics

Mission Statement

The objective of the Bachelor of Science in Data Science and Analytics program is to prepare professionals in the field of Data Science by equipping them with the core mathematical and computer science knowledge and skills needed to present, analyze and ultimately understand large, unstructured and complex data sets.

Program Learning Outcomes

Upon completion of the BSc. in Science in Data Science and Analytics program, students will be expected to:

1. Solve analytical problems based on sound data science principles;
2. Develop analytical models and demonstrate their power and limitations;
3. Apply programming and computational tools to analyze and visualize data sets;
4. Deploy machine algorithms to data mining;
5. Apply data science techniques to organisations' data management.

Bachelor of Science in Information Systems Technology

Mission Statement

The objective of the Bachelor of Technology in Analytical Chemistry program is to prepare skilled professionals in the field of chemical analysis by equipping them with in-depth theoretical knowledge and practical laboratory competencies in modern analytical techniques, instrumentation, and data interpretation—enabling them to accurately identify, quantify, and evaluate chemical substances across various industrial, environmental, pharmaceutical, and research settings.

Program Learning Outcomes

This program is anchored in the belief that graduates who are well equipped with appropriate knowledge, skills and values deliver excellent professional services. The program is thus designed to instill in students the requisite knowledge, skills and attitudes for designing, conducting and analyzing samples using analytical instrumentation and to write reports and even manage a laboratory. The program overall contributes to the university mission outcomes which are higher order thinking; literacy; global understanding and multicultural perspective; preparedness for career; community service; and leadership and ethics.

The goal of the Bachelor of Technology in Analytical Chemistry is to provide students with hands-on practical experiences in the laboratory in the core areas of analytical chemistry such as instrumentation, quality control and quality assurance of laboratory practices. Students will be able to demonstrate the ability to conceptualize,

identify and collect relevant chemical data and present findings in a scientific context.

Program learning outcomes

Upon completion of the BSc in Applied Biochemistry program, students will be able to:

1. Apply chemical concepts and theories in addressing current scientific problems
2. Design and carry out experiments using appropriate analytical methods and protocols
3. Evaluate experimental data with the appropriate statistical methods and communicate scientific reports with a high level of professionalism to chemists and non-chemists.
4. Conduct research to solve chemical problems and explore new areas of research.
5. Use proper procedures and regulations for safe handling, storage, and use of chemicals.
6. Undertake quality control in industrial, private, institutional or research laboratories.

Networking

DST 4010	Distributed Systems
NET 4020	Network Management & Security
NET 4030	Internet Architecture and Protocols
APP 4035	Web Application Development Frameworks
NET 4050	Sensor Networks & Internet of Things

Bachelor of Science in Artificial Intelligence (AI) and Robotics

Mission Statement

To develop innovative and ethically grounded professionals who are equipped with advanced knowledge and practical skills in artificial intelligence and robotics. The program aims to prepare learners to design intelligent systems, apply data driven insights, and create meaningful technological solutions that address real world challenges. Through a strong foundation in research, creativity, and critical thinking, the program seeks to inspire graduates who will lead transformative change in industry, academia, and society at large.

Program Learning Outcomes

The philosophy of the Bachelor of Science in Artificial Intelligence (AI) and Robotics is to equip students with advanced knowledge and skills in AI within an intellectually stimulating, culturally diverse, and growth-oriented environment. The program prepares graduates to design and operate a wide range of intelligent systems, including computer vision applications, speech and audio recognition, optical character recognition, computer-aided manufacturing, computer-assisted surgery, autonomous vehicles and drones, intelligent commerce, transport and logistics systems and smart energy solutions. It also offers a global perspective through an optional exchange program as an alternative to the local internship.

Program learning outcomes

Upon completion of the BSc in Applied Biochemistry program, students will be able to:

1. Apply the principles and mechanisms underlying various kinds of intelligent processes underlying Artificial Intelligence and Robotics systems.
2. Design systems that simulate natural intelligence using Artificial Intelligence and Robotics tools and techniques to solve problems in the society.
3. Develop systems that incorporate Artificial intelligence and Robotics techniques both individually and as a team to solve problems in the society.
4. Managing an AI/robotics project aligned with professional standards.
5. Conduct research on emerging AI/robotics trends, with clear methodology, analysis and conclusions.

Bachelor of Arts in Criminal Justice Studies

Mission Statement

The Criminal Justice program seeks to provide a general and specialized education in Criminal Justice that is grounded in theory, research and best professional practices. The program is committed to impart attitudes, skills, knowledge and problem solving abilities in areas related to justice for all citizens: victims, witnesses and offenders; and thus to produce professionals who have the ability to creatively envision changing relationships within the systems of criminal justice and are dedicated to honorable service in a diverse society.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; and service to the community, whose foundation is laid by General Education Program (see section on General Education), the following are the Criminal Justice program- specific learning outcomes:

1. Outline the components, procedures and the role of the criminal justice professionals in both local and international systems;
2. Apply relevant theories to analyze crime in society and the criminal justice system's response;
3. Appraise the role of ethics and diversity in criminal justice procedures in decision- making as a criminal justice professional;
4. Use ICT and emerging technological innovations in the analysis of crime and management of

Criminal Justice systems;
5. Conduct research in a criminal justice field.

MINOR (15 UNITS)

Students can minor in either Sociology or Security Studies.

Bachelor of Arts in International Relations

Mission Statement

To generate and disseminate knowledge and produce highly qualified graduates in International Relations. To be a leading International Relations program in research, dissemination and application of knowledge in the areas of Foreign Policy, Diplomacy, Development, Conflict, Peace, and Security Studies.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; leadership and ethics and service to the community whose foundation is laid by the General Education program, the following are the specific program learning outcomes:

1. Utilize concepts and theories of International Relations in addressing issues in their areas of specialization
2. Conduct research on issues in International Relations
3. Analyze dynamics of world politics.
4. Analyze threats and opportunities to states' strategic interests.
5. Analyze International Relations issues in a complex global, multicultural and interconnected world.
6. Formulate informed policy responses to threats and opportunities that face a state's strategic threats.

IRL 2100	Introduction to Human Rights
IRL 2220	Gender and IR
IRL3040	Politics in Africa
IRL 4035	Environmental Politics
IRL 4150	Area Studies
IRL 4220	Refugee Studies
IRL 4811	Critical Issues in Africa

Peace & Conflict Studies (18 Units)

All students taking this concentration must take:

IRL 3015	Introduction to Peace & Conflict Studies
----------	--

IRL 3200	Negotiation & Mediation
IRL 4001	Regional Conflicts in Africa
IRL 4151	Field Study (WI)

Electives (Choose two courses)

IRL 4010	Geopolitics
IRL 4045	Security Studies & Strategies
IRL 4035	Environmental Politics
IRL 4120	International Humanitarian Law
IRL 4220	Refugee Studies
IRL 4850	Studies in Contemporary International Crisis

Unrestricted Electives (9 units)

1 course must be lower level (1000- 2999) and 2 courses must be upper level (3000 - 4999) (6 units).

MINOR (15 UNITS) (5 Courses)

A minor consists of 1 lower level course and 4 upper level courses unless otherwise indicated.

Bachelor of Arts in Psychology

Mission Statement

The Psychology program at USIU-Africa is designed to provide students with the necessary background to pursue a variety of professional careers within and related to the field. Core and area related requirements have been designated to provide the integral background for further educational and professional growth. Electives and minors, both within and outside the Psychology program, allow students to concentrate on their individual career goals and needs.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; and service to the community, whose foundation is laid by the General Education Program (see section on General Education), the following are the Psychology program- specific Learning Outcomes:

1. Articulate the major concepts, theories, empirical findings, ethical standards and historical trends in psychology;
2. Conduct research in a variety of settings;
3. Demonstrate creative and critical thinking approach to psychological issues in diverse settings;
4. Communicate in multicultural settings;
5. Use psychological knowledge, skills, values and attitudes to aid in interventions.

MINOR (15 UNITS)

A minor consists of 1 lower level course and 4 upper level courses unless otherwise indicated.

Bachelor of Arts in Sociology (Double Major) (On hold)

Mission Statement

The goal of the BA in Sociology program is to provide students with conceptual and analytical skills necessary to understand the nature and dynamics of a changing society from the local and global perspectives. The world is faced with an ever increasingly complex and rapidly changing social milieu whose offshoot has been multiple social problems and challenges. These challenges include family problems, corruption, poverty, unemployment, social conflict and crime. Therefore, there is a great demand for graduates who not only have a range of personal and professional skills and the conceptual tools and methods but can also use the unique view and perspective of sociology (i.e., the sociological imagination) to study all forms of human behavior and interaction from the individual and small groups to institutions.

Program Learning Outcomes

Upon successful completion of the BA in Sociology programme, the students will be able to:

1. Assess social, economic, and political processes using divergent sociological perspectives/theories
2. Evaluate conceptual, theoretical and applied issues in community development and social welfare
3. Analyze conceptual, theoretical and applied issues in the sociological study of health and medicine
4. Analyze conceptual, theoretical and applied issues in sociological study of work and organizations.

5. Investigate a sociological problem using a range of sociological research strategies and methods of enquiry

FOREIGN LANGUAGE (6 UNITS)

Students must have credit for a foreign language or must take a two-course foreign language sequence of one language. USIU-Africa offers courses in Arabic (ARB1000), French (FRN1000), Japanese (JPN1000), Spanish (SPN1000), Swahili (SWA1000), Chinese (CHI1000), Kenya Sign Language (KSL1000), American Sign Language I (ASL 1000) and American Sign Language II (ASL 1001).

DISCIPLINARY GENERAL EDUCATION ELECTIVES (6 UNITS)

IST 1010 Introduction to Information Systems
MTH 1109 College Algebra

SCHOOL-BASED GENERAL EDUCATION ELECTIVES (6 UNITS)

Students are required to pick 2 from the other Schools. At least one of the courses should be an upper level course. Lower level courses are coded 1000-2999 while upper level coded 3000-4999.

CHANDARIA SCHOOL OF BUSINESS

LOWER LEVEL

BUS 1010	Introduction to Business
ECO 1010	Principles of Microeconomics
ENT 1010	Introduction to Entrepreneurship
HRT 1010	Introduction to Hospitality & Tourism Management

UPPER LEVEL

MGT 3010	Overview of Management Practice
MKT 3010	Principles of Marketing

SCHOOL OF SCIENCE & TECHNOLOGY AND SCHOOL OF PHARMACY AND HEALTH SCIENCES

LOWER LEVEL

ENV 2000	Introduction to Environmental Sciences
ENV 2001	Sustainable Resource Management
JRN 1109	Introduction to Mass Communication
JRN 2103	Fundamentals of Photography
MTH 2210	Introduction to Applied Statistics
MTH 2010	Probability and Statistics
NSC 2215	Introduction to Physical Mechanics
NSC 2205	Human Physiology
NSC 2212	Life, Environment & Society
NSC 2216	Introduction to Earth Sciences

UPPER LEVEL

ENV 4000	Environmental Economics
ENV 3200	Water Use & Management
ENV 3500	Regional Environment
ENV 3300	Energy Use and Management

ENV 3288	Field Studies
ENV 4200	Environmental Law
NSC 3304	Biology and the Environment
JRN 3015	Media Management

CORE COURSES

LOWER LEVEL CORE (15 UNITS)

SOC 1101	Foundations of Sociology
SOC 1102	The Social Structure of Society
PSY 2105	Social Psychology
SOC 2214	Social Change
SOC 2220	Writing in Sociology

UPPER LEVEL CORE (18 UNITS)

SOC 3302	Classical Sociological Theory
SOC 3303	Social Research Methods
SOC 4401	Modern Sociological Theory
SOC 4402	Micro Sociological Theories
SOC 4403	Data Analysis and Report Writing
SOC 4900	Research Project or
SOC 4910	Sociology Internship

CONCENTRATIONS (Choose one)

Community Development and Social Welfare (24 units – 8 courses)

SOC 2209	Social Problems
SOC 2217	Social Inequality
SOC 2218	Social Gerontology
SOC 3306	Community Development and Social Welfare
SOC 3307	Community Leadership
SOC 3317	Social Conflict and Resolution
SOC 3324	Sociology of Project Planning and Management
SOC 3325	Participatory Project Monitoring & Evaluation
SOC 4410	Child Protection and Welfare Practices
SOC 4414	Rural Sociology
SOC 4416	Public Policy and Administration
SOC 4421	Special Topics in Sociology

Health and Medicine (24 units – 8 courses)

SOC 2207	Concepts of Health and Illness
SOC 2208	Bioethics
SOC 2209	Social Problems
PSY 3171	Social Psychology of Health and Care
SOC 3309	Sociology of Health and Medicine
SOC 3311	Lifestyle Diseases and Illnesses
SOC 3312	Sociology of Mental Health and Illness
SOC 3318	Healthcare Systems in Developing Countries
HSC 4010	Sociology of Health Sciences
SOC 4406	Traditional and Alternative Medical Systems
SOC 4421	Special Topics in Sociology

Work and Organizations (24 units – 8 courses)

SOC 2209	Social Problems
SOC 2213	Sociology of the Family
SOC 2217	Social Inequality
SOC 3308	Formal Organizations
SOC 3319	Sociology of Work
SOC 3320	Urban Sociology
SOC 3322	Industrial Sociology
MGT 4040	Human Resource Management
SOC 4407	Sociology of Occupations and Professions
SOC 4418	Labor Relations and Collective Bargaining
SOC 4421	Special Topics in Sociology

ELECTIVE COURSES (9 Units – 3 courses)

Sociology

SOC 2212	Sociology of Gender
SOC 2215	Sociology of Religion
SOC 2216	Sociology of Education
SOC 3305	Deviant Behavior
SOC 3313	Political Sociology
SOC 3314	Environmental Sociology
SOC 3316	Sociology of Development
SOC 3321	Race and Ethnic Relations
SOC 3323	Social Demography

SOC 4412	Collective Behavior and Social Movements
SOC 4415	Sociology of Law
SOC 4419	Sociology of Mass Communication

Other Disciplines

BUS 1010	Introduction to Business Organizations
CJS 2211	Community and Social Justice
PSY 1171	Introduction to Health Psychology
PSY 2125	Human Sexuality
COM 3000	Organizational Communication
CJS3301	Crime and Public Policy
CJS3312	Community Policing
GNS3001	Women and Men in Cross-cultural Perspective
IRL3000	Comparative Political Systems
IRL 3010	Development Issues in Africa
IRL3030	Patterns of Development
JRN3018	PR and Organizational Communication
POL3110	Public Policy Formulation
POL3120	Public Personnel Administration
PSY3115	Abnormal Psychology
IRL4811	Critical Issues in Africa
BUS4090	Strategic Management
MGT4020	Organizations and Organizational Behavior

MINOR (15 UNITS)

A student can select 1 lower level course and 4 upper level courses from other Schools.

SOCIOLOGY MINOR FOR NON-SOCIOLOGY STUDENTS 27 UNITS (Major-Minor)

CORE COURSES (15 UNITS)

SOC 1101	Basic Sociological Concepts and Principles
SOC 1102	The Social Structure of Society
SOC 3302	Classical Sociological Theory
SOC 3303	Social Research Method
SOC 4401	Modern Sociological Theory

ELECTIVE COURSES (12 UNITS)

Lower Level [Choose two (2) courses]

SOC 2207	The Concepts of Health and Illness
SOC 2209	Social Problems
SOC 2212	Sociology of Gender
SOC 2213	Sociology of the Family
SOC 2217	Social Inequality

Upper Division [Choose two (2) courses]

SOC 3305	Deviant Behavior
SOC 3317	Social Conflict and Resolution
SOC 3319	Sociology of Work and Occupations
SOC 3320	Urban Sociology
SOC 4412	Collective Behavior and Social Movements
SOC 4414	Rural Sociology
SOC 4415	Sociology of Law
SOC 4419	Sociology of Mass Communication

The Minors

In addition to the minors listed below, minors are available in every major (program) in all Schools.

A minor at USIU-Africa consists of 15 units, at least 12 of which must be upper level (unless indicated otherwise).

In addition, the School of Humanities and Social Sciences offers minors for which there are no majors available. These minors and their course requirements follow. Courses are three units unless otherwise indicated.

African Studies

Choose five courses from at least two of the disciplines listed below:

History

HIS 3015	20th Century Eastern Africa
HIS 3025	History of Kenya (WI, OI)
HIS 4120	African Economic History Since 1900
IRL 3010	Development Issues in Africa
IRL 3021	Hunger and Development in Africa
IRL 3060	African International Relations
IRL 4001	Regional Conflict in Africa
IRL 4050	U.S. – Africa Relations
IRL 3040	Politics in Africa
IRL 4065	U.S. – East Africa Relations
IRL 4281	East Africa and the Indian Sub-Continent
IRL 4811	Critical Issues in Africa Literature
LIT 4785	African Authors Seminar Philosophy
PHL 4230	African Philosophy

Arabic

Students who wish to take a minor in Arabic must take one required lower level elective (ARB 2000), one required upper level elective (ARB 3000) and any three other upper level electives on the 3000 and 4000 levels.

ARB 2000	Intermediate Arabic I
ARB 3000	Advanced Grammar and Composition
ARB 3001	Arabic Culture and Civilization
ARB 3002	Contemporary History of the Arabic World
ARB 3003	Arabic Literature 1 (Pre-Islamic)
ARB 3004	Arabic Literature II (Islamic/Andalucia)
ARB 3005	Arabic Literature III (Contemporary/20th Century)
ARB 4000	Arabic-Islamic Thought I
ARB 4001	Arabic-Islamic Thought II

Windows to the World participants must complete ARB 3000 and ARB 3001 as a prerequisite.

Chemical Dependency

To earn the chemical dependency certificate, a student must enroll in all seven of the following courses (courses are three units unless otherwise indicated):

PSY 1185	Introduction to Chemical Dependency
PSY 2181	Psychopharmacology and Addiction
PSY 2182	Treatment Methods and Modalities of Chemical Dependency
PSY 2183	Theories and Techniques of Chemical Dependency Counseling
PSY 3181	Trends and Issues in Chemical Dependency
PSY 3182	Group and Family Counseling with the Chemically Dependent
PSY 4181	Field work in Chemical Dependency Chinese

Students wishing to take a minor in Chinese must take one required lower level elective (CHI 2000), one required upper elective (CHI 3000) and any 3 upper electives on the 3000 and 4000 levels.

CHI 2000	Intermediate Chinese I
CHI 3000	Advanced Grammar & Composition I
CHI 3001	Advanced Grammar & Composition II
CHI 3002	Ancient China: Culture & Civilization
CHI 3003	Modern China: Culture & Civilization
CHI 3004	Advanced Business Chinese
CHI 4000	Advanced Chinese Reading & Writing I
CHI 4001	Advanced Chinese Reading & Writing II

Windows to the World participants must complete CHI 3000 and CHI 3003 as prerequisites.

Comparative Philosophy

Choose four courses in addition to:

PHL 1104	Introduction to Philosophy (WI, OI)
PHL 3306	Comparative Philosophy
PHL 3307	Major Movements in U.S. Philosophy
PHL 3309	Major Figures in Philosophy
PHL 3310	Ethics and Value Theory (WI, OI)
PHL 3500	Epistemology and Gender
PHL 4220	Asian Philosophy

For the minor, PHL 3306 is a prerequisite for PHL 3307, 3500, or 4220.

Criminal Justice

CJS 1101	Introduction to Criminal Justice Systems (compulsory)
----------	---

Choose two courses

CJS 1103	Juvenile Justice
CJS 2201	Criminal Law
CJS 2202	Criminal Procedure
CJS 2204	Corrections and Punishment

Choose two courses

CJS 3303	Victimology
CJS 3307	Comparative Criminal Justice Systems
CJS 3309	Terrorism and International Security
CJS 4120	Criminal Evidence

Family Studies

SOC 2205	The Family in the United States
SOC 3310	Family and kinship in a multicultural Content
PSY 3150	Courtship and Marriage
PSY 3160	Introduction to Marriage and Family Therapy
PSY 3182	Group and Family Counseling with the Chemically Dependent

French

Students who wish to take a minor in French must take one required lower level elective (FRN 2000), one required upper level elective (FRN 3000) and any three other upper level electives on the 3000 and 4000 levels.

FRN 2000	Intermediate French I
FRN 3000	Advanced Grammar & Composition
FRN 3001	French Culture and Civilization
FRN 3002	Contemporary French History
FRN 3003	Literature in France I (France)
FRN 3004	Literature in France II (French-African Literature and Film)
FRN 3005	Literature in French III (French-Caribbean)
FRN 4000	Francophone Culture and Civilization
FRN 4001	Contemporary Francophone History
FRN 4002	Literature in Francophone Nations I
FRN 4003	Literature in Francophone Nations II
FRN 4004	French and Francophone Film

Windows to the World participants must take FRN 3000 and FRN 3001 as prerequisites.

Gender Studies

Choose five courses, one lower division and four upper division:

GNS 2000	Introduction to Gender Studies
GNS 2001	Communication and Gender (WI, OI)
GNS 3001	Women and Men in Cross-Cultural Perspectives
GNS 4800 (WI, OI)	Seminar: Male and Female Creativity
HIS 3005	History of Women & Men in the U.S.
PHL 3500	Epistemology and Gender
PSY 2125	Human Sexuality
SOC 3310	Family and Kinship in a Multicultural Context

Health Psychology

PSY 1171	Introduction to Health Psychology
PSY 3171	Social Psychology of Health Care
PSY 3172	Understanding Grief, Loss and Bereavement
PSY 4171	Behavioral Health Therapy
PSY 4172	HIV – AIDS Testing and Counseling

Industrial/Organisational Psychology

PSY 3142	Introduction to Industrial and Organisational Psychology
PSY 3143	Psychology at Work I: Measuring Organisational Characteristics
PSY 4142	Psychology at Work II: Prediction and Measurement of Human Performance
PSY 4143	Social Psychology in an Organisational Context
PSY 4144	Communication and Leadership International Relations

Compulsory

IRL 2000	Foundations of International Relations
IRL 2010	International Organizations
POL 2201	Introduction to Political Science

Choose two electives

IRL3000	Comparative Political Systems
IRL4010	Geopolitics
IRL4020	International Law
IRL4030	International Political Economy
IRL4811	Critical Issues in Africa
IRL4850	Studies in Contemporary International Crisis

Japanese

Students who wish to take a minor in Japanese must take all courses beginning with JPN 2000.

JPN 2000	Intermediate Japanese I
JPN 3000	Intermediate Japanese II
JPN 4000	Advanced Japanese I
JPN 4001	Advanced Japanese II
JPN 4002	Japanese Culture and Civilization

Windows to the World participants must complete all courses as prerequisites.

Literature

Students wishing to take a minor in Literature will be expected to take:

LIT 1106	African Fiction: Introduction to the African Novel
LIT 2220	Literature and Culture (WI, OI)

And choose any 3 upper elective courses, at least one course from each level (3000 & 4000 level).

LIT 3340	Myths, Rituals and Archetypes
LIT 3351	Masterpieces of World Literature: Major Works from the World's Cultures
LIT 4785	African Authors Seminar (WI, OI)
LIT 4815	Oral Literature
LIT 4825	Contemporary Literary Critical Theory

Psychology

PSY 1101	Introduction to Psychology
PSY 1105	Developmental Psychology
PSY 3110	Psychology of Personality
PSY 3115	Abnormal Psychology

Choose one course

PSY 2125	Human Sexuality
PSY 2105	Social Psychology
PSY 2120	Psychology of Learning

Sociology

SOC 2201	Introduction to Sociology
----------	---------------------------

Choose four upper level courses

SOC 3301	Social Problems
SOC 3305	Deviant Behavior
SOC 3310	Family & Kinship in a Multicultural Context
SOC 3315	Sociology of intercultural Relations
SOC 3500	Social Conflict and Resolution
SOC 4025	Perspectives on the Future of Human Society

Spanish

Students who wish to take a minor in Spanish must take one required lower level elective (SPN 2000) and one required upper level elective (SPN 3000) and any three other upper level electives on the 3000 and 4000 levels.

SPN 2000	Intermediate Spanish I
SPN 3000	Advanced Grammar and Composition
SPN 3001	Spanish Culture and Civilization
SPN 3002	Contemporary Spanish History
SPN 3003	Spanish Literature I
SPN 3004	Spanish Literature II
SPN 3005	Spanish Literature III
SPN 4000	Latin American Culture and Civilization
SPN 4001	Contemporary Latin American History

SPN 4002	Latin American Literature I
SPN 4003	Latin American Literature II
SPN 4004	Spanish and Latin

American Film Windows to the World participants must complete SPN 3000 and SPN 3001 as prerequisites.

Swahili

Students who wish to take a minor in Swahili must take one required lower level elective (SWA 2000), one required upper level elective (SWA 3000) and any three other upper level electives on the 3000 and 4000 levels.

SWA 2000	Intermediate Swahili I
SWA 3000	Advanced Grammar & Composition
SWA 3001	Culture and Civilization of Swahili-Speaking Countries
SWA 4000	Classical and Modern Swahili Literature
SWA 4001	Political Terminology

Windows to the World participants must complete SWA 3000 and SWA 3001 as prerequisites.

Opportunities are like
sunrises. If you wait too
long, you miss them.

William Arthur Ward

Bachelor of Arts in Animation

Mission Statement

Dive into a world where imagination meets innovation! The Bachelor of Arts in Animation program is designed for aspiring artists, storytellers, and digital visionaries who are passionate about drawing, game design, animation, and visual storytelling. This program encourages you to experiment, innovate, and push creative boundaries, equipping you with the skills to create standout animations and games stories for the global digital arts industry.

Program Learning Outcomes

In addition to developing critical thinking, communication, and technological literacy, by the end of the program, students will be able to:

1. Analyze animation theory, tradition and practice in global context
2. Develop creative animated stories for different genres and platforms
3. Apply legal ethics in the management of animation business
4. Use variety of software to develop characters capable of acting and speaking in the animation production process.

Bachelor of Arts in Film Production & Directing

Mission Statement

With a strong emphasis on both theory and practical skills, the Bachelor of Arts in Film Production and Directing seeks to create film professionals who are well versed in the aesthetics and technical aspects of film production and directing. The program aims at helping Kenya and other African countries meet local media content demand, which has been created by the exponential growth of the media industry in the continent.

Program Learning Outcomes

Upon completion of this program, the student will be able to:

1. Analyze film theory, traditions and practices in a global context.
2. Script, produce, direct, shoot, act and edit in films and different genres.
3. Apply ethical, legal and management principles in a film business
4. Use appropriate technology to make films
5. Manage production teams through synergy and resonance to achieve set production goals.

JOURNALISM MINORS AVAILABLE FOR STUDENTS FROM OTHER SCHOOLS

A minor at USIU-Africa consists of 15 units, at least 12 of which must be upper-level. However due to the skill-based nature of the Journalism program, the minors are sequential including foundational, intermediate and advanced courses.

Graduate Programs

Master of Arts in Counseling Psychology

Mission Statement

The mission of the Counseling Psychology Program is to provide students with the knowledge and skills necessary to enter a career as a Counseling Psychologist.

Program Learning Outcomes

In addition to the university wide outcomes of higher order thinking, oral and written competence, scientific and technological literacy, global understanding and multicultural perspectives, as well as service to the community, the following are the M.A. Counseling Psychology program learning outcomes:

1. Demonstrate competency in various counseling theories and therapeutic techniques required of counselling psychologists;
2. Apply appropriate psychotherapeutic theories and techniques to assess, diagnose and provide treatment with diverse clients.
3. Conduct research in counseling psychology;
4. Apply APA guidelines in academic writing and presentations;
5. Apply current professional standards of ethics, values and laws relevant to the practice of psychology;

Note: Students without a background in Psychology must take the following prerequisite courses:

PSY 1101	Introduction to Psychology
PSY 1105	Developmental Psychology
PSY 3110	Psychology of Personality
PSY 3115	Abnormal Psychology

DEGREE REQUIREMENTS (63 UNITS)

Courses are three units unless otherwise indicated.

PSY 6002	Methods of Research
PSY 6003	Statistics for Behavioral Sciences
PSY 6005	Biological Basis of Behaviour
PSY 6111	Introduction to Psychopathology
PSY 6113	Psychological Assessment
PSY 6114	Life Cycle Developmental Psychology
PSY 6115	Personality Theories
PSY 6116	Issues of Chemical Dependency
PSY 6117	Principles and Processes of Counseling
PSY 6118	Clinical Interviewing Techniques/Lab
PSY 6220	Professional Ethics and the Law
PSY 6259	Psychopharmacology for Psychologists
PSY 6312	Theories of Marital & Family Therapy
PSY 6329	Theories & Techniques of Individual Counseling
PSY 6330	Multicultural Issues of Counseling

PSY 6331	Trauma and Trauma Counseling
PSY 6713	Process of Group Therapy

Thesis (6 units)

PSY 6991	Thesis I
PSY 6992	Thesis II

Students are required to be continuously enrolled in PSY 6992 every semester while their thesis remains incomplete. Courses are taken in sequence.

Practicum (6 Units)

PSY 6248	Counseling Practicum I
PSY 6249	Counseling Practicum II

Personal Therapy Requirements

Each student must complete 25 hours of personal therapy, prior to registration for PSY 6248 Practicum I.

Note: In compliance with APA ethics code, a student's personal therapy is not permitted with USIU Africa Psychology faculty

Master of Arts in Marriage and Family Therapy

Mission Statement

The Master of Arts in Marriage and Family Therapy Program is a specialized form of psychotherapy that deals with family patterns of behavior, couples relationships, individual challenges using a systematic framework to nurture change. Trainees are exposed to systems theories that they will use to diagnose mental and emotional diseases. Marriage and family therapists are trained to work in diverse clinical settings and conduct research in the field.

Program Learning Outcomes

1. Apply a systemic framework and clinical language in their clinical practice;
2. Develop treatment plans after conducting mental status examination, assessment and diagnosis according to the current Diagnostic and Statistical Manual of Mental Disorders system;
3. Apply theories of psychotherapy to assessments and interventions;
4. Apply professional ethics and law following local and international standards;
5. Conduct research in Marriage and Family Therapy.

Note:

1. MFT students are required to publish a paper prior to graduation.
2. The program is set by cohort and classes are taken sequentially (a class missed is taken when it is next offered which is the following year same semester).
3. MFT students are encouraged to join the Family Therapy Student Association (FTSA).

Note: Students without a background in Psychology must take the following prerequisite courses:

PSY 1101	Introduction to Psychology
PSY 1105	Developmental Psychology
PSY 3110	Psychology of Personality
PSY 3115	Abnormal Psychology

DEGREE REQUIREMENTS (57 UNITS)

CORE COURSES (30 Units)

MFT 6800	Introduction to Family Therapy
MFT 6801	MFT Ethics and the Law
MFT 6802	Family Therapy with Adolescents and Children
MFT 6803	Child Abuse and Family Violence
MFT 6805	Group Psychotherapy
MFT 6806	Supervision in MFT
MFT 6807	Couples and Sex
MFT 6812	Family Assessment
PSY 6002	Research Methods
PSY 6704	Clinical Psychopathology I Assessment and Diagnosis

CONCENTRATIONS (12 UNITS)

Choose any one concentration from the following two concentrations:

Family Violence and Trauma

MFT 6819	First Responders, Military Personnel and Trauma
MFT 6821	Culture, Attachment and Trauma
MFT 6822	Immigration Trauma
MFT 6823	Trauma and the Family

Mindfulness and Family Therapy

MFT 6824	Mindfulness and Acceptance in Couples Therapy
MFT 6826	Mindfulness and Family Therapy
MFT 6827	Integrating Mindfulness and Narrative Therapy
MFT 6828	Mindfulness and Art Therapy

Personal Therapy Requirements

Each student must complete 25 hours of personal therapy, prior to registration for PSY 6771A Practicum I.

Note: In compliance with APA ethics code, a student's personal therapy is not permitted with USIU Africa Psychology faculty.

Thesis (6 Units)

MFT 6810	Master's Thesis I
MFT 6811	Master's Thesis II

Practicum (9 Units)

PSY 6771A	Clinical Practicum I
PSY 6772A	Clinical Practicum II
PSY 6773A	Clinical Practicum III

Extra credit electives

MFT students must choose an elective to take from the list of MFT electives

MFT 6804	Publication & Research Presentation
MFT 6809	Family and Divorce Mediation
MFT 6813	Life Work and Planning
MFT 6814	Men and Families
MFT 6815	Couple & Family Therapy with LGBTQ Relationships
MFT 6816	School Counseling Seminar
MFT 6817	Play Therapy
MFT 6818	Current Trends in the Field of Family Therapy
MFT 6820	Substance Abuse and Childhood Trauma
MFT 6825	Mindfulness Based-play Family Therapy

Master of Arts in Clinical Psychology

Mission Statement

The MA in Clinical Psychology is a psychotherapeutic practitioner model. The mission of this program is to provide education and training in professional standards of practice in Clinical Psychology. By incorporating the American Psychological Association's ethical standards in both the content and practice, the program will prepare students for clinical psychotherapy skills in case conceptualization, assessment, clinical diagnoses, and treatment planning.

Program Learning Outcomes

1. Conduct research in the area of Clinical Psychology;
2. Conduct case conceptualization and treatment plan;
3. Diagnose disorders, symptoms and differential diagnoses using the current Diagnostic and Statistical Manual of Mental Disorders;
4. Utilize psychotherapeutic techniques and skills when providing treatment;
5. Write clinical progress notes, empirically based treatment plans, psychological reports, and case presentations;
6. Apply and maintain professional ethics and the law following American Psychological Association (APA) standards.

Note: Students without a background in Psychology must take the following prerequisite courses:

- PSY 1101 Introduction to Psychology
PSY 1105 Developmental Psychology

- PSY 3110 Psychology of Personality
PSY 3115 Abnormal Psychology

DEGREE REQUIREMENTS (57 UNITS)

- PSY 6002 Methods of Research
PSY 6003 Statistics for Behavioral Sciences
PSY 6110 Personality and Affect
PSY 6114 Life Cycle Developmental Psychology
PSY 6116 Issues of Chemical Dependency
PSY 6216 Research Practicum and Course Project
PSY 6220 Professional Ethics and the Law
PSY 6703 Neuropsychology and Biological Basis of Behavior
PSY 6704 Clinical Psychopathology I
PSY 6707 Assessment and Diagnosis
PSY 6713 History and Systems of Psychology
PSY 6717 Process of Group Therapy
PSY 6717 Psychological Trauma, Risk Assessment, Crisis Intervention, Partner and Family Violence
PSY 6718 Clinical Psychotherapy Skills Lab
PSY 6722 Clinical Assessment

Thesis

- PSY 6991 Thesis I
PSY 6992 Thesis II

Students are required to be continuously enrolled in PSY 6992 every semester while their thesis remains incomplete.

Personal Therapy Requirement

Each student must complete 25 hours of personal therapy prior to registration for PSY 6771 Clinical Practicum I.

Clinical Practicum Requirements

Students must complete 600 hours of Practicum training over 3 semesters at 200 hours per semester. Courses include case presentations and group supervision.

- PSY 6771 Clinical Practicum I
PSY 6772 Clinical Practicum II
PSY 6773 Clinical Practicum III

Note: In compliance with APA ethics code, personal therapy with USIU-Africa Psychology faculty is strictly not permitted.

Master of Arts in Criminal & Transitional Justice

Mission Statement

The goal of the proposed MA in Criminal and Transitional Justice program is to develop and enhance the student's knowledge of criminal justice by expanding and developing the student's analytical and assessment skills to further develop their facility with oral and written communication and with research. It provides the basis for entry to graduate work at the doctoral level or applied work in criminal justice agencies.

Program Learning Outcomes

Upon successful completion of the programme, the students will be able to:

1. Evaluate various transitional justice mechanisms and how they are implemented in the criminal justice system.
2. Develop intellectual socio-legal arguments with respect to criminal and transitional justice.
3. Apply different theories in the discipline to explain national and international mechanisms in criminal and transitional justice.
4. Evaluate ethical dilemmas relating to criminal and transitional justice.
5. Conduct research in the fields of criminal and transitional justice.

Note: Students without a background in Psychology must take the following prerequisite courses:

PSY 1101	Introduction to Psychology
PSY 1105	Developmental Psychology
PSY 3110	Psychology of Personality
PSY 3115	Abnormal Psychology

DEGREE REQUIREMENTS (48 UNITS)

CTJ 6000	Criminology & International Crimes
CTJ 6001	Principles of International Criminal Justice
CTJ 6002	Principles of Transitional Justice
CTJ 6010	Ethics in Criminal & Transitional Justice
CTJ 6011	Restorative Justice
CTJ 6012	Advanced Criminological Theory
CTJ 6015	Research Methods in Criminal & Transitional Justice

CTJ 6016	International Criminal Law
CTJ 6017	Indigenous Justice Systems

Thesis (9 Units)

CTJ 6020	Thesis 1
CTJ 6021	Thesis 2

Electives (12 Units) (Choose any 4 courses)

CTJ 6030	Reparations & Truth Commissions
CTJ 6031	Prosecution & Diversion
CTJ 6032	Punishment & the International Criminal Justice System
CTJ 6033	Public & Private Policing
CTJ 6034	Law, Crime & Society
CTJ 6035	Transitional Justice Comparative Perspectives
CTJ 6036	International Criminal Courts & Tribunals

Master of Arts in International Relations

Mission Statement

To generate and disseminate knowledge and produce highly qualified graduates in International Relations. To be a leading International Relations program in research, dissemination and application of knowledge in the areas of Foreign Policy, Diplomacy, Development, Conflict, Peace, and Security studies.

Program Learning Outcomes

1. Evaluate contending concepts and theories in International Relations;
2. Conduct empirical research in International Relations;
3. Formulate evidence-based policies;
4. Devise problem-solving intervention strategies and programs for dealing with national and international situations;
5. Employ an integrated multi- disciplinary approach to the study of international affairs;
6. Assess issues in International Relations within the context of a complex multi- cultural and interconnected world.

Note: Students without a background in IR/ Political Science must take the following prerequisite courses, this category of students are required to take a total of 51 Units.

POL 2201	Introduction to Political Science
IRL 2000	Foundations of International Relations
IRL 4020	International Law

DEGREE REQUIREMENTS (42 UNITS)

CORE COURSES (21 UNITS)

IRL6004	Foundations of International Relations
IRL6006	Contemporary International Relations Theory
IRL6007	International Law
IRL6008	Qualitative Research Methods
IRL6009	Quantitative Research Methods
IRL6200	International Organizations
IRL6234	International Political Economy

Thesis (6 units)

IRL6901	Thesis I
IRL6902	Thesis II

Students are required to be continuously enrolled in IRL6902 every semester while their thesis remains incomplete.

CONCENTRATIONS (15 UNITS)

NOTE: Students can opt to take a concentration from the three listed below or a combination of various electives.

DEVELOPMENT STUDIES

All students taking this concentration must take:

Compulsory:

IRL6054	Theories of Development
IRL6031	Politics of International Development
IRL6033	Global Environmental Politics

Select two electives:

IRL6032	Sustainable Development Theories, Policy, and Practice
IRL6034	Public Policy
IRL6240	Post Coloniality in Africa
IRL6050	Project Management

DIPLOMACY & FOREIGN POLICY

Students selecting this concentration must register for all the courses below:

Compulsory:

IRL6210	Foundations of Diplomacy
IRL6211	Geopolitics and Diplomacy
IRL6260	Foreign Policy Analysis

Select two electives:

IRL6250	Africa in International Affairs
IRL6251	Diplomatic Practices
IRL6252	Diplomatic and Consular Law

PEACE & CONFLICT STUDIES

Students selecting this concentration must register for all the courses below:

Compulsory:

IRL6011	Theories of Peace, Conflict, and Security Studies
IRL6012	Conflict Analysis and Resolution
IRL6013	Conflict and Human Security

Select two electives:

IRL6241	Peacekeeping and Peacebuilding
IRL6242	Emerging Issues in Peace and Conflict Studies and World Politics
IRL6215	International Humanitarian Law

Master of Arts in Communication Studies

Mission Statement

The mission of the Master of Arts in Communication Studies program is to provide holistic training and equip learners with strategic thinking abilities and creative competencies to enable them provide evidence-based solutions for real-world communication problems that affect organizations and individuals.

Program Learning Outcomes

1. Design and implement communication strategies for various types of organizations
2. Monitor and evaluate the impact of communication programs
3. Manage communication programs and projects in organizations and other settings
4. Analyze communication problems in various settings and develop evidence-based solutions
5. Apply research approaches and methods to interrogate communication issues at local and international context.
6. Utilize descriptive digital technologies in communication practice
7. Apply theories to explore various societal communication issues

Prerequisites

Students without Communication Studies background will be required to take the following survey courses. Students without a Communications undergraduate degree are expected to report a semester in advance (Summer or Fall) preceding the January intake to fulfill this requirement.

JRN 3004	Media Ethics
JRN 3000	News Reporting and Writing
JRN 3020	Development Journalism
JRN 3911	Principles of Public Relations

DEGREE REQUIREMENTS (48 UNITS)

CORE COURSES (27 UNITS)

MAC 6010	Introduction to Graduate Studies
MAC 6020	Communication Theory
MAC 6030	Introduction to the Digital Age
MAC 6040	Entrepreneurship for Communication Professionals
MAC 6050	Communication Research Methods
MAC 6060	Global Communication
MAC 6120	Organizational Communication
MAC 6851	Project I
MAC 6852	Project II

CONCENTRATIONS 15 UNITS

Strategic Corporate Communications (15 Units)

SCC 6110	Corporate Communication
SCC 6130	Managing the Communication Function
SCC 6140	PR Writing
SCC 6160	Issues & Crisis Management
SCC 6170	Communications Strategies and Campaigns

Digital Communication (15 Units)

DCM 6110	Multimedia Design
DCM 6130	Digital Communication Strategy
DCM 6140	Online Corporate Branding
DCM 6160	Effective Web Design and Strategy
DCM 6170	Social Media Strategies

Communication for Development (15 Units)

CFD 6110	Development Communication Theory
CFD 6120	Participatory Communication Strategy Design
CFD 6130	Public Policy & Advocacy
CFD 6140	Risk Communication
CFD 6170	Program Monitoring & Evaluation

Media Studies – (ON HOLD) (15 Units)

MDS 6110	Media Criticism and Theory
MDS 6120	Media Writing
MDS 6140	Media, Identity and Representation
MDS 6160	Multimedia Journalism
MDS 6170	Media Management

ELECTIVES (6 UNITS)

Students to choose two courses from the electives below or from any of the other concentration

CFD 6160	Behavior Change Communication
CFD 6180	Resource Mobilization
DCM 6120	Digital Communication & Society
SCC 6120	Integrated Marketing Communication

Master of Business Administration (MBA)

Mission Statement

The mission of the MBA program is to provide a range of knowledge, skills and abilities in Strategic Management, Human Resource Management, Finance, IT, Marketing and Global Sustainable Entrepreneurship and Innovation with an emphasis on practical applications, case studies, simulations and research.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; and service to the community, the following are the program's specific learning outcomes:

1. Analyze and utilize business data in making decisions in international business
2. Develop viable international business plans
3. Apply marketing principles in designing strategies for international business
4. Prepare and interpret financial statements for international business
5. Demonstrate leadership skills and ethical behavior in international business environments
6. Interpret environmental factors in international business operations.

DEGREE REQUIREMENTS (48 UNITS)

CORE COURSES (27 UNITS)

ACT 6010	Managerial Accounting
BUS 6020	Strategic Management
BUS 6035	Leadership and Ethics
BUS 6220	Business Research Methods
BUS 6225	Business Statistics
ECO 6010	Managerial Economics
FIN 6000	Managerial Finance
MKT 6000	Managerial Marketing
GSE 6000	Entrepreneurship and New Venture Creation

Concentrations (18 Units)

The following concentrations are available to students who are seeking an MBA degree in the Chandaria School of Business. Students seeking double concentration are required to meet the project requirement for one of the concentrations and select any two courses from any other concentration. For more information on double concentrations enquire from the Principal Academic Advisor.

Finance

FIN 6010	Investments
FIN 6030	International Financial Markets
FIN 6040	Information Systems Applications in Finance

Master of Business Administration in Global Business Management

Mission Statement

The world needs broad-minded leaders to seize opportunities and lead change in times of escalating complexity. The world needs broad-minded leaders to seize opportunities and lead change in times of escalating complexity.

The MBA (Global Business Management) program is a rigorous one-year course of study that focuses on globalization, entrepreneurship and applicability. It has been designed for ambitious, dynamic executives willing to learn from and with their peers, and receive an MBA education that will propel them to the next level in their professional and academic careers. The small class sizes that our MBA program is famous for, provide students with the intellectual activity that foster collaboration and discussion around current global strategic management thinking, and lead to strong professional networks that contribute not only to personal development, but also to the future of their own organizations.

Program Learning Outcomes

Upon completion of the Master of Business Administration - Global Business Management program, students will be able to:

1. Analyze and interpret financial information for decision making.
2. Formulate, implement and evaluate firm strategies.
3. Evaluate entrepreneurial opportunities and develop strategies in a dynamic environment.
4. Exhibit leadership and ethical behavior in a diverse environment.
5. Conduct research in the field of specialization.
6. Embrace global practices.

DEGREE REQUIREMENTS (45 UNITS)

CORE COURSES (24 UNITS)

Master of Science in Information Systems Technology

Mission Statement

The mission of the MSc. IST program is to provide a range of knowledge, skills and abilities in IT security, software development, business systems management and mobile technology.

Program Learning Outcomes

Upon successful completion of the MSc. IST program, the students will be able to:

1. Design and implement programs to specification
2. Apply systems development techniques in a variety of contexts
3. Utilize appropriate skills in the management of IT-based project
4. Analyze problems in different domains and solve them using information systems drawing on multidisciplinary perspectives.
5. Develop a research proposal, and conduct an appropriate Information Systems research project.

Pre-requisites:

Students with a first degree in sciences, engineering or business studies with limited background in Information Technology or Computing will be required to take the survey courses listed for this program. These are:

MIS5010	Data Structures and Algorithms
MIS5020	Fundamentals of Programming
MIS5030	Concepts of Operating Systems
BUS5080	Survey of Information Systems
BUS5090	Survey of Business Statistics
BUS5110	Computer Applications Skills

DEGREE REQUIREMENTS (54 UNITS)

CORE COURSES (39 UNITS)

MIS 6010	IT Infrastructure
MIS 6020	Application Domains of Information Technology
MIS 6030	Applications Development
MIS 6040	Networking and Wireless Communications
MIS 6050	Database Development Technology
MIS 6060	Distributed Computing & Internet Technology
MIS 6070	Web Based Information Systems
MIS 6120	Mobile Computing
MIS 6130	Information Systems Security, Control and Audit
MIS 6140	Information Systems Strategy and Management

MIS 6160	IT Project Management
MIS 6220	Research Methods

CONCENTRATIONS (15 UNITS)

Choose one of the following concentrations.

Business Information Systems (15 Units)

BIS 6120	Knowledge Management Systems
BIS 6130	Management and Economics of E-Business
BIS 6150	Enterprise Systems
TMC 6130	Cloud Computing and Virtualization
MIS 6851	Information Systems Project I
MIS 6852	Information Systems Project II

Software Engineering (15 Units)

SWE 6110	Principles of Software Engineering
SWE 6120	Human Computer Interface
SWE 6130	Mobile Applications Development
SWE 6140	Group Work in Large Scale Software Development
MIS 6851	Information Systems Project I
MIS 6852	Information Systems Project II

Telecommunications and Mobile Computing (ON HOLD)

TMC 6110	Broadband Network Architectures and Protocols
TMC 6120	Digital Mobile Communications
TMC 6130	Cloud Computing and Virtualization
TMC 6140	Cryptography and Network Security
MIS 6851	Information Systems Project I
MIS 6852	Information Systems Project II

Internet Security and Cybercrime (15 Units)

ISC 6110	Network Security and Management
ISC 6120	Advanced Information Systems Security
ISC 6130	Computer Forensics and Cybercrime
ISC 6140	IT Security Techniques and Incident Handling
MIS 6851	Information Systems Project I
MIS 6852	Information Systems Project II

Master of Science in Information Security

Mission Statement

The mission of the MSc. Information Security program is to equip students with practical skills in the information security discipline and with the ability to create, model, evaluate, improve, design, and manage complex information security systems and/or artefacts.

Program Learning Outcomes

Upon completion of the programme, students will be able to:

1. Assess new developments in information security threats, technologies and controls.
2. Conduct a forensic audit on a range of information security breaches
3. Implement cryptographic enabled mechanisms to counter a range of information security breaches
4. Design network defense solutions to counter cyber threats in modern organizations' networks and systems
5. Analyze strategic information systems security governance and management in organizations

6. Execute scholarly information security research, communicate effectively, and develop professional skills in information security discipline.

DEGREE REQUIREMENTS (54 UNITS)

CORE COURSES (49.5 UNITS)

ISC 6110	Network Security and Management
ISC 6125	Intrusion Detection and Prevention
ISC 6140	IT Security Techniques and Incident Handling
ISC 6210	Software Security
ISC 6220	Advanced Cryptography
ISC 6230	Information Security Auditing and Compliance
ISC 6310	Digital Forensics
ISC 6320	Ethical Issues in Information Security
ISC 6330	Information Security Governance and Management

ISR 6410	Research Methods in Computer Science
ISR 6420	Modern Issues in Information Security (Special Topics Course)
ISC 6430	Security architecture for cloud computing
ISR 6890	Research Thesis I (Proposal Stage)
ISR 6892	Research Thesis II (Experimentation/field)
ISR 6894	Research Thesis III (Thesis writing and defense)

ELECTIVE COURSES (4.5 UNITS)

Choose one of the following:

ISE 6440	Reverse Engineering and Malware Analysis
ISE 6450	Vulnerability Assessment and Penetration Testing

Master of Science in Clinical Pharmacology and Therapeutics

Mission Statement

This program will enhance the students' capability to design and conduct Pharmacodynamic and pharmacokinetic studies in animals and humans; carry out toxicity studies of chemicals and drugs; identify newer drug target for the treatment of various diseases, monitor adverse drug reactions (ADR) in patients; give pharmacology services (therapeutic drug monitoring, bioequivalence studies etc.) and consultancy services to drug control authorities and other related agencies, advise clinicians, patients and other stakeholders on appropriate use of drugs and do collaborative clinical and pre-clinical research with others. The MSc. Clinical Pharmacology and Therapeutics will contribute to ongoing research in new drug and vaccine development in the country and the globe.

Program Learning Outcomes

Upon completion of the programme, students will be able to:

1. Provide clinical pharmacokinetics, therapeutic drug monitoring, pharmacogenomics and pharmacovigilance services.
2. Provide clinical and forensic toxicology services.
3. Conduct drug discovery research from natural or synthetic sources.
4. Conduct pharmacodynamics, pharmacokinetic and toxicity studies of drugs in animals and humans.
5. Demonstrate ethical leadership in clinical, research and health education.

DEGREE REQUIREMENTS (60 UNITS)

CORE COURSES (57 UNITS)

PHM 6511	Molecular Pharmacology and pharmacokinetics
PHM 6512	Clinical and Forensic toxicology
PHM 6513	Applied Pharmacometrics and clinical pharmacokinetics
PHM 6521	Computational pharmacology and toxicology
PHM 6422	Vaccine Development and Bioassay methods in drug discovery research
PHM 6522	Advanced Pharmacology and Integrated therapeutics I
PHM 6523	Clinical pharmacokinetics and Pharmacovigilance
PHM 6531	Advanced pharmacology and Integrated therapeutics II
PHM 6432	Clinical trials, research methods and biostatistics

PHM 6433	Health assessment and Clinical services
PHM 6541	Research Project I (Proposal)
PHM 6542	Attachment (Research inst., Hospital, Forensic lab)
PHM 6551	Research project II (Data collection/ Experiment)
PHM 6561	Research project III (Thesis writing and defense)

ELECTIVE COURSES (3 UNITS)

Choose one of the following:

PHM 6543	Global tour
PHM 6544	Seminar on advances in drug research

ADMISSION REQUIREMENTS

In addition to the general admission requirements, candidates must have earned a degree from a health-related field, specifically: Bachelor of Pharmacy (BPharm), MBChB, Doctor of Pharmacy (PharmD), Doctor of Dental Medicine (DDM), Doctor of Veterinary Medicine (DVM), or a BSc in Clinical Medicine, Nursing, from a recognized university with a minimum GPA of 2.5 or its equivalent. Candidates who have not taken undergraduate courses in anatomy, physiology, biochemistry, microbiology, pharmacology, and pharmacognosy equivalent to those in a BPharm curriculum will be required to complete and pass survey courses, including Human Anatomy, Medical Physiology, Medical Biochemistry, Medical Microbiology, Pharmacology and Therapeutics, and Basic Pharmacognosy. The specific survey courses required will be determined on a case-by-case basis.

Education is what survives when what has been learned has been forgotten.

B.F. Skinner

Doctoral Programs

Doctor of Business Administration (DBA)

Mission Statement

The mission of the Doctor of Business Administration (DBA) is to provide an opportunity for experienced business professionals to refine and extend their business knowledge and skills at an advanced level.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; and service to the community, the following are the Doctor of Business Administration program's specific learning outcomes:

1. Apply effective leadership in a dynamic business environment.
2. Apply emerging business theories and practice in providing solutions to interdisciplinary business problems.
3. Integrate financial information for business making.
4. Formulate and implement strategic solutions in a turbulent business environment.
5. Design, conduct and disseminate applied research that contributes to business knowledge and solutions.

DEGREE REQUIREMENTS (811 UNITS)

CORE COURSES (30 UNITS)

DBA 7000	Business Research Statistics
DBA 7010	Human Resource Management
DBA 7020	Entrepreneurship
DBA 7030	Accounting and Financial Management
DBA 7040	Strategic Management
DBA 7050	Leadership
DBA 7060	Business Research Methods
DBA 7070	DBA Comprehensive Examination

SPECIALIZATION COURSES (6 UNITS)

The following specialization courses are offered in the DBA program:

Finance

FIN 7000	Corporate Finance
FIN 7010	Seminar in Finance

Strategic Management

MGT 7000	Global Strategic Management
MGT 7010	Seminar in Strategic Management

Leadership and Organisational Change

LED 7000	Strategic Leadership and Change Management
LED 7010	Seminar in Leadership and Change Management

DISSERTATION (45 UNITS)

Before the award of the Doctoral degree, a candidate should demonstrate proof of acceptance for publication of at least two (2) journal articles in refereed journals.

Doctor of Psychology (Psy D.) in Clinical Psychology

Mission Statement

The Doctor of Psychology (Psy D.) in Clinical Psychology program follows a practitioner-scholar model designed to meet international professional standards of practice in Clinical Psychology with a multicultural emphasis. The program integrates coursework, psychometrics, supervised practicum and internship in clinical settings, and a doctoral dissertation, emphasizing academics, experiential learning, skills and research. Students gain expertise in psychological assessment, application of psychometric tests, diagnosis, psychotherapy modalities, and clinical report writing with a strong focus on ethical practice based on the American Psychological Association’s standards that enable graduates to handle the global complex and emerging mental health issues in the 21st Century.

Program Learning Outcomes

Students graduating from this program will be able to:

1. Conduct empirical research in clinical psychology;
2. Apply psychotherapeutic theoretical orientation in clinical settings;
3. Conduct client case conceptualization and develop treatment plans;
4. Apply and maintain professional ethics and the law following American Psychological Association (APA) standards and other relevant standards;
5. Conduct psychological assessments and evaluations and prepare reports.

DEGREE REQUIREMENTS (90 UNITS)

CORE COURSES (54 UNITS)

PSY 7701	Adult Psychopathology
PSY 7703	Child and Adolescent Psychopathology
PSY 7708	Cognitive and Neuropsychological Assessments: Psychometric Lab II
PSY 7709	Advanced Group Therapy
PSY 7714	Trauma and Bereavement Interventions
PSY 7716	Community and Rural Psychology
PSY 7717	Treatment Modalities I: Brief, Behavioral and other Therapies
PSY 7718	Treatment Modalities II: Humanistic, Existential, and other therapies
PSY 7719	Advanced Psychopathology I: Assessment and Diagnosis
PSY 7720	Advanced Psychopathology II: Case

PSY 7721	Conceptualization and Treatment
PSY 7722	Doctoral Practicum I (200 Hours)
PSY 7723	Doctoral Practicum II (200 Hours)
PSY 7724	Doctoral Practicum III (200 Hours)
PSY 7725	Intraprofessional Ethics
PSY 7726	Neuropsychopathology
PSY 7727	Quantitative Research Methods and Statistics
PSY 7729	Qualitative Research Methods and Analysis
PSY 7730	Psychopharmacology in Clinical Psychology
PSY 7734	Personality & Behavioral Assessments: Psychometric Lab I
PSY 7736	Cultural Diversity in Clinical Psychology
PSY 7737	Memory and Cognition
PSY 7748	Psychotherapy Lab
	Clinical Issues of Personality & Development

Advancement to Candidacy for the Doctoral Degree

Passing both a written and an oral comprehensive exam is required before the student can be advanced to candidacy for the Doctoral degree. Upon successful completion of both exams, the student will be notified to register for PSY 7731, Dissertation I. In addition, the student may then identify their dissertation Chairperson and committee members.

Dissertation Chair and Committee

The student will identify their Dissertation Chairperson and committee members upon advancement to candidacy for the Doctoral degree, and after registration for PSY 7731 Dissertation I.

Doctoral Dissertation Requirement

Before the award of the doctoral degree, a candidate shall show proof of acceptance for publication of at least two (2) papers in refereed journals.

PSY 7731	Dissertation I
PSY 7732	Dissertation II
PSY 7733	Dissertation III
PSY 7735	Dissertation (1 unit)

Students are required to be continuously enrolled in PSY 7735 every semester while their Dissertation remains incomplete.

Doctoral Internship Requirement

Personal therapy of 50 hours required prior to registering for PSY 7741.

PSY 7741	Internship I: 500 hours and group supervision
PSY 7742	Internship II: 500 hours and group supervision
PSY 7743	Internship III: 500 hours and group supervision <i>Total 1500 hours.</i>

Doctoral Electives

PSY 7760	Special Topics in Psychology I
PSY 7761	Special Topics in Psychology II OR Flexible elective topics to be determined per cohort or selected from the list below:
PSY 7751	Program Evaluation
PSY 7752	Advanced Clinical Practice in Gerontology
PSY 7753	Parent-Child Therapy
PSY 7754	Adolescent Therapy
PSY 7755	Advanced Clinical Practice in Pediatrics
PSY 7756	Child Play Therapy
PSY 7757	Forensic Psychology

Doctor of Philosophy in International Relations

Mission Statement

The general purpose of the PhD IR program is to pursue and promote advanced knowledge production and dissemination through research, teaching, learning and publications in International Relations.

Program Learning Outcomes

The following are the specific program goals:

1. To equip candidates with the knowledge, skills and techniques for undertaking innovative academic and policy research at an advanced level, particularly in the areas of peace and conflict studies, development studies, and foreign policy and diplomacy.
2. To produce a dissertation that makes original theoretical and practical contributions to the field of International Relations.
3. To prepare candidates for positions in the academia, research institutions, government, international organisations, non-governmental organisations and the civil society in Kenya, Africa, and beyond.
4. To aspire to become a regional hub noted for cutting-edge research and publications in the areas of regional integration, development, democratic consolidation, conflict transformation, food security, and environmental and regional security.

Expected Learning Outcomes

The Program learning outcomes for the proposed Program are spelt out as follows:

By the end of the program, the students will be able to:

1. Generate and utilize knowledge of International Relations;
2. Apply knowledge and skills of theory and process in peace-building and conflict transformation;
3. Evaluate various forms of public policy;
4. Communicate issues of International Relations;
5. Evaluate performance of actors in International Relations.

Coursework

1. Students will devote their first two years to coursework (three years for part-time students). This will involve a successful completion of the taught courses and two seminars in which they are required to achieve a minimum grade of B grade in each of their assessed works.
2. Most courses will be examined in a classroom setup with the exception of more practical/ seminar courses, such as PhD Research Seminar and PhD Project Development & Fieldwork.
3. A successful completion of the course work will be followed by a comprehensive written and oral examination as a prerequisite for progressing to doctoral research work. The pass mark of B grade will apply to the comprehensive examination.

DEGREE REQUIREMENTS (60 UNITS)

CORE COURSES (36 UNITS)

IRL 7001	Epistemological Debate on the Application of IR Theories
IRL 7002	Research Philosophy & Methods in IR
IRL 7004	Comparative Foreign Policy Analysis
IRL 7005	Classical Political Philosophy
IRL 7007	Peace & Security Studies
IRL 7008	Public Policy Analysis
IRL 7009	Comparative Politics
IRL 7011	PhD Research Seminar
IRL 7012	PhD Project Development & Field Work
IRL 7013	International Law
IRL 7015	Environmental Theories & Politics
IRL 7016	Democratization & Governance

ELECTIVE COURSES (12 UNITS)

(Select any four courses)

IRL 7003	International Development
IRL 7006	Contemporary Political Philosophy
IRL 7010	Diplomatic & Consular Practice
IRL 7014	Gender and IR
IRL 7017	International Humanitarian Law
IRL 7018	Conflict Analysis
IRL 7019	Conflict Resolution and Peace building

DISSERTATION (12 UNITS)

IRL 7900 Dissertation

There are four semesters of Dissertation (IRL 7900A, IRL 7900B, IRL 7900C and IRL 7900D).

Failure to complete within the 4 semesters, a student will be required to register for IRL 7900E Dissertation every semester until the dissertation is complete.

PhD Dissertation Research & Seminars

During this second phase (subsequent two years) of the PhD program, students will have to concentrate on their dissertation research. A PhD dissertation should be original research that makes a significant contribution to the subject of enquiry. A normal dissertation should range between 85,000 – 100,000 words, including references and appendices. The acceptable referencing method for doctoral dissertation is the Harvard style/APA and this should be emphasized in the PhD Research Seminar course.

Students are required to make three seminar presentations during the research phase (in the following order): a PhD proposal, post-fieldwork or data collection progress report, and presentation of preliminary research findings. Each seminar presentation will be preceded by the candidate's

distribution of a narrative paper to all the members of the assessment panel to be constituted by the IR Graduate Committee. Panelists will assess each presentation using a modified version of the dissertation evaluation instrument and a candidate is required to achieve a B grade to proceed to the next stage of the study.

PhD Dissertation Supervision

Each PhD candidate will be assigned one or two supervisors, depending on the nature of the research topic and the available supervisory expertise on the subject. Each faculty can only serve as principal supervisor for a maximum of three candidates and co-supervisor for one candidate at a time.

All principal supervisors are members of the IR Graduate Committee, which coordinates and regulates graduate studies in the department.

PhD supervision starts in year three of the program (i.e. after students' completion of their coursework).

PhD Dissertation Assessment

Upon completion of the PhD dissertation (with the approval of his/her Supervisor), the student is required to submit five copies of his/her dissertation for viva (in light cover binding). The hard cover binding versions of the dissertation can only be submitted after the viva.

The dissertation will be assessed by a panel of three - the student's principal supervisor and second marked by two other examiners (one of them coming from outside the International Relations program). The non-examining members of the PhD viva panel will include the Chair of the IR Graduate Studies Committee and the Dean of the School of Humanities and Social Sciences.

The three key examiners will have to agree on a common grade, but if they are not able to reach an agreement, the final grade should be decided by the IR Graduate Studies Committee. A PhD dissertation will be graded at any of the following six different levels:

5. Passed without any corrections.
 6. Passed with minor corrections to be overseen and certified by an internal examiner.
 7. Passed with major corrections to be overseen and certified by an internal committee of examiners.
 8. Passed with major corrections to be re-submitted to and certified by the external examiner.
 9. Passed with major corrections to be presented in a repeat viva within six months.
 10. Failed with an option of repeating the study and preparing for an entirely fresh viva within 12 months.
- Failed with an option of repeating the study and preparing for an entirely fresh viva within 12 months.

Doctor of Philosophy in Information Systems and Technology

Mission Statement

The mission of the PhD in IST is to produce career innovators, researchers and academics who can contribute to the good of the community and society using Information Systems and Technology concepts. In line with the university mission, the program offers an opportunity for Information Technology professionals to refine and extend their knowledge and skill at an advanced level by treating ICT as an ecosystem and encompasses multiple elements: ICT human resources; ICT industries and services; ICT applications (informatics) in government, business and finance, and civil society organisations; ICT in various sectors (education, health, agriculture, etc.); digital policies and regulations; and digital leadership in institutions.

Program Learning Outcomes

Upon completion of the programme, students will be able to:

1. Evaluate conceptual and theoretical underpinnings of Information Systems and Technology.
2. Apply Information Systems and Technology knowledge, skills and values to create innovations and solve issues in organisations and the society.
3. Design, conduct and disseminate research and innovation on Information Systems and Technology issues that impact organisations and the society.

DEGREE REQUIREMENTS (72 UNITS)

CORE COURSES (42 UNITS)

PIS 8110	Advances in Cloud Computing
PIS 8120	Problem Solving Paradigms in Informatics
PIS 8130	Computing Research Methods I
PIS 8140	Advanced Topics in Cryptography and Blockchains
PIS 8150	Research Seminar
PIS 8160	Information Systems Theories
PIS 8170	Advances in Machine Learning
PIS 8180	Advanced Statistical Techniques
PIS 8190	Computing Research Methods II
PIS 8210	Information and Communications Technologies for Development
PIS 8220	Qualitative and Quantitative Research Methods

PIS 8230	Information Security Governance
PIS 8240	Comprehensive Examination

Thesis

PIS 8250	PhD (IST) Thesis: Proposal Writing and Defense
PIS 8310	PhD (IST) Thesis: Implementation / Data Collection
PIS 8320	PhD (IST) Thesis: Data Analysis and Report Writing
PIS 8330	PhD (IST) Thesis: Thesis Defense

Online Programs

Bachelor of Science in Data Science and Analytics

Mission Statement

The objective of the Bachelor of Science in Data Science and Analytics program is to prepare professionals in the field of Data Science by equipping them with the core mathematical and computer science knowledge and skills needed to present, analyze and ultimately understand large, unstructured and complex data sets.

Program Learning Outcomes

Upon completion of the BSc. in Science in Data Science and Analytics program, students will be expected to:

1. Solve analytical problems based on sound data science principles;
2. Develop analytical models and demonstrate their power and limitations;
3. Apply programming and computational tools to analyze and visualize data sets;
4. Deploy machine algorithms to data mining;
5. Apply data science techniques to organisations' data management.

DEGREE REQUIREMENTS (150 UNITS)

GENERAL EDUCATION 39 UNITS

SIGNATURE COURSES (15 UNITS)

STRATEGIES FOR UNIVERSITY SUCCESS (3 UNITS)

SUS 1010 Strategies for University Success

RESEARCH METHODS (3 UNITS)

GRM 2000 Introduction to Research Methods

COMMUNITY SERVICE OR COMMUNITY PROJECT (3 UNITS)

STA 3040	Mathematical Modeling and Simulation
STA 3050	Time Series Analysis and Forecasting
STA 4030	Bayesian Inference and Decision Theory

Bachelor of Science in Epidemiology & Biostatistics (On hold)

Mission Statement

The program's mission is to promote the discovery and application of epidemiology and biostatistics knowledge as well as the acquisition of competencies for designing and conducting studies in the public, health and medical research domains.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; and service to the community whose foundation is laid by the General Education Program (see section on General Education). The following are the Bachelor of Science in Epidemiology and Biostatistics Program- specific Learning Outcomes:

1. Use epidemiologic knowledge to respond to a variety of practical situations that impact on public health;
2. Employ biostatistical methods to conduct basic life science research;
3. Apply appropriate laws and ethics in assuring population public health;
4. Interpret research results of statistical analyses in public health;
5. Use relevant statistical software to organize, analyze, and report on life science research data;
6. Develop a plan for data management and analysis using appropriate statistical techniques.

Bachelor of Arts in Criminal Justice Studies

Mission Statement

The Criminal Justice program seeks to provide a general and specialized education in Criminal Justice that is grounded in theory, research and best professional practices. The program is committed to impart attitudes, skills, knowledge and problem solving abilities in areas related to justice for all citizens: victims, witnesses and offenders; and thus to produce professionals who have the ability to creatively envision changing relationships within the systems of criminal justice and are dedicated to honorable service in a diverse society.

Program Learning Outcomes

In addition to the university wide outcomes of: higher order thinking; oral and written competence; scientific and technological literacy; global understanding and multicultural perspectives; and service to the community, whose foundation is laid by General Education Program (see section on General Education), the following are the Criminal Justice program- specific learning outcomes:

1. Outline the components, procedures and the role of the criminal justice professionals in both local and international systems;
2. Apply relevant theories to analyze crime in society and the criminal justice system's response;
3. Appraise the role of ethics and diversity in criminal justice procedures in decision- making as a criminal justice professional;
4. Use ICT and emerging technological innovations in the analysis of crime and management of

Criminal Justice systems;
5. Conduct research in a criminal justice field.

DEGREE REQUIREMENTS (120 UNITS)

GENERAL EDUCATION 39 UNITS

SIGNATURE COURSES (15 UNITS)

STRATEGIES FOR UNIVERSITY SUCCESS (3 UNITS)

SUS 1010 Strategies for University Success

RESEARCH METHODS (3 UNITS)

GRM 2000 Introduction to Research Methods

COMMUNITY SERVICE OR COMMUNITY PROJECT (3 UNITS)

CMS 3700 Community Service

THE SENIOR EXPERIENCE (3 UNITS)

SEN 4800 Integrated Senior Seminar

FUNDAMENTALS OF INFORMATION LITERACY (3 UNITS)

FIL 1010 Fundamentals of Information Literacy

LANGUAGE STUDIES (12 UNITS)

ENGLISH LANGUAGE (6 UNITS)

ENG 1106 Composition I (WI)
ENG 2206 Composition II (WI)

FOREIGN LANGUAGE (6 UNITS)

Students must have credit for a foreign language or must take a two-course foreign language sequence of one language. USIU-Africa offers courses in Arabic (ARB1000), French (FRN1000), Japanese (JPN1000), Spanish (SPN1000), Swahili (SWA1000), Chinese (CHI1000), Kenya Sign Language (KSL1000), American Sign Language I (ASL 1000) and American Sign Language II (ASL 1001).

DISCIPLINARY GENERAL EDUCATION ELECTIVES (6 UNITS)

IST 1010 Introduction to Information Systems
MTH 1109 College Algebra

SCHOOL-BASED GENERAL EDUCATION ELECTIVES (6 UNITS)

Students are required to pick 2 from the other Schools. At least one of the courses should be an upper level course. Lower level courses are coded 1000-2999 while upper level coded 3000-4999.

CHANDARIA SCHOOL OF BUSINESS

LOWER LEVEL

BUS 1010 Introduction to Business
ECO 1010 Principles of Microeconomics
ENT 1010 Introduction to Entrepreneurship
HRT 1010 Introduction to Hospitality & Tourism Management

UPPER LEVEL

MGT 3010	Overview of Management Practice
MKT 3010	Principles of Marketing

SCHOOL OF SCIENCE & TECHNOLOGY AND SCHOOL OF PHARMACY AND HEALTH SCIENCES

LOWER LEVEL

ENV 2000	Introduction to Environmental Sciences
ENV 2001	Sustainable Resource Management
JRN 1109	Introduction to Mass Communication
JRN 2103	Fundamentals of Photography
MTH 2210	Introduction to Applied Statistics
MTH 2010	Probability and Statistics
NSC 2215	Introduction to Physical Mechanics
NSC 2205	Human Physiology
NSC 2212	Life, Environment & Society
NSC 2216	Introduction to Earth Sciences

UPPER LEVEL

ENV 4000	Environmental Economics
ENV 3200	Water Use & Management
ENV 3500	Regional Environment
ENV 3300	Energy Use and Management
ENV 3288	Field Studies
ENV 4200	Environmental Law
NSC 3304	Biology and the Environment
JRN 3015	Media Management

CORE COURSES

CJS 1101	Introduction to Criminal Justice Systems
CJS 1103	Juvenile Justice
CJS 1104	Criminology
CJS 2203	Criminal Law & Procedure
CJS 2204	Corrections and Punishment
CJS 2205	Ethics in Criminal Justice
CJS 2211	Community and Social Justice
CJS 2212	Gender, Diversity, and Criminal Justice
CJS 2213	Critical issues in Policing
CJS 3301	Crime and Public Policy
CJS 3303	Victimology

CJS 3305	Forensic Science
CJS 3306	Criminal Investigations
CJS 3307	Comparative Criminal Justice Systems
CJS 3309	Terrorism and International Security
CJS 3310	Crime Prevention & Security Management
CJS 4120	Criminal Evidence 3
CJS 4130	Research Methods in Criminal Justice
CJS 4136	International Criminal Law & Procedures

ELECTIVES 9 UNITS

Lower Level (Choose One Course)

CJS 2200	Human Rights & Criminal Justice
CJS 2211	Community and Social Justice
CJS 2212	Gender, Diversity & Criminal Justice
CJS 2220	Introduction to Genocide Studies
CJS 2221	Mooting Skills for Criminal Justice Professionals
CJS 2342	Fundamentals of Transitional Justice
PSY 2105	Social Psychology

Upper Level (Choose 2 Courses)

CJS 3312	Community Policing
CJS 3117	Forensic Psychology
CJS 3320	Fraud Detection & Investigation
CJS 3321	Environmental Criminology
CJS 3322	Cybercrime & Cybersecurity
CJS 4138	Criminal Profiling
CJS 4150	Criminal Justice Administration
CJS 4151	Restorative Justice & Alternative Dispute Resolution
CJS 4152	Crime Mapping & Analysis
CJS 4153	Sexual & Gender-Based Violence
CJS 4210	Transnational Organized Crime
CJS 4211	Media & Crime
CJS 4212	Intelligence Analysis Techniques
CJS 4250	Special Topics in Criminal Justice
SOC 3305	Deviant Behavior

MINOR (15 UNITS)

Students can minor in either Sociology or Security Studies.

Master of Science in Data Science and Analytics (Online only)

Mission Statement

The Master of Science in Data Science and Analytics program is grounded on the belief that data-driven decision-making is central to organizational success in the digital era. The program is designed to provide learners with the technical abilities and professional skills to utilize various analytical tools required to discover, understand and engage with massive complex data with the aim of meeting specific organizational needs and goals. Learners will gain the expertise required to analyze data, improve decision-making, enhance critical thinking and help organizations gain a competitive advantage.

Program Learning Outcomes

Upon successful completion of the MSc.IST program, the students will be able to:

1. Apply data analytics expertise and devise successful analytics strategies to a wide range of organizations.
2. Apply tools and techniques for building statistical or machine learning models to make predictions and decisions based on data.
3. Implement computerized decision support systems applied to specific real-life problems.
4. Conduct big data projects and manage innovation for developing data-driven solutions.
5. Use data mining techniques to extract insights from data.

ADMISSION REQUIREMENTS:

Must be a holder of a Bachelor's degree in Data Science and Analytics, Statistics, Engineering, Computer Science/Information Technology/ Mathematical Sciences (with adequate computing units) or a related discipline with at least;

1. Upper second-class honors degree or cumulative Grade Point Average (GPA) of 3.0 on a scale of 4.00; or
2. Lower Second-Class Honors or cumulative GPA of 2.50 on a scale of 4.00 with additional relevant training, evidence of research capacity through research, presentations or peer-reviewed publications and relevant working experience of two years

Other degrees maybe considered by demonstration of adequate programming skills/ take some bridging or pre-requisite courses

Pre-requisites:

MDA 5110 Mathematics for Machine Learning

MDA 5120 Probability and Statistics
MDA 5130 Advanced Programming
MDA 5140 Statistical Computing

DEGREE REQUIREMENTS (51 UNITS)

CORE COURSES (36 UNITS)

STA 6110 Linear and Nonlinear Models
MTH 6120 Mathematics for Machine Learning
STA 6130 Time Series Analysis
MDA 6210 Data Visualization and Communication
STA 6220 Computational Statistics
STA 6230 Bayesian Statistics
MDA 6310 Cybersecurity Analytics
MDA 6320 Data Governance and Ethics in AI
MDA 6330 Data Science Seminar
MDA 6570 Project Proposal
MDA 6610 Project Report/ Dissertation

CONCENTRATIONS (15 Units)

MDA 6410 Advanced Machine Learning
MTH 6420 Graph Analytics
MDA 6430 Data Mining and Warehousing
STA 6510 Multivariate Methods
MTH 6520 Optimization and Simulation
Methods for Analytics

Machine Learning Operations (MLOps) Concentration

MDA 6410 Advanced Machine Learning
MTH 6420 Graph Analytics
MDA 6430 Data Mining and Warehousing
MDA 6450 DevOps
MDA 6530 Software Design and Architecture

Applied Analytics Concentration

MDA 6460 Business Analytics
MDA 6470 Fraud Detection Analytics
MDA 6480 Text Analytics
MDA 6550 Finance and Risk Management Analytics
MDA 6560 Geo-Intelligence/ Spatial Analytics

Master of Arts in Counseling Psychology

Mission Statement

The mission of the Counseling Psychology Program is to provide students with the knowledge and skills necessary to enter a career as a Counseling Psychologist.

Program Learning Outcomes

In addition to the university wide outcomes of higher order thinking, oral and written competence, scientific and technological literacy, global understanding and multicultural perspectives, as well as service to the community, the following are the M.A. Counseling Psychology program learning outcomes:

1. Demonstrate competency in various counseling theories and therapeutic techniques required of counselling psychologists;
2. Apply appropriate psychotherapeutic theories and techniques to assess, diagnose and provide treatment with diverse clients.
3. Conduct research in counseling psychology;
4. Apply APA guidelines in academic writing and presentations;
5. Apply current professional standards of ethics, values and laws relevant to the practice of psychology;

Note: Students without a background in Psychology must take the following prerequisite courses:

PSY 1101	Introduction to Psychology
PSY 1105	Developmental Psychology
PSY 3110	Psychology of Personality
PSY 3115	Abnormal Psychology

DEGREE REQUIREMENTS (63 UNITS)

Courses are three units unless otherwise indicated.

PSY 6002	Methods of Research
PSY 6003	Statistics for Behavioral Sciences
PSY 6005	Biological Basis of Behaviour
PSY 6111	Introduction to Psychopathology
PSY 6113	Psychological Assessment
PSY 6114	Life Cycle Developmental Psychology
PSY 6115	Personality Theories
PSY 6116	Issues of Chemical Dependency
PSY 6117	Principles and Processes of Counseling
PSY 6118	Clinical Interviewing Techniques/Lab
PSY 6220	Professional Ethics and the Law
PSY 6259	Psychopharmacology for Psychologists
PSY 6312	Theories of Marital & Family Therapy
PSY 6329	Theories & Techniques of Individual Counseling
PSY 6330	Multicultural Issues of Counseling

PSY 6331	Trauma and Trauma Counseling
PSY 6713	Process of Group Therapy

Thesis (6 units)

PSY 6991	Thesis I
PSY 6992	Thesis II

Students are required to be continuously enrolled in PSY 6992 every semester while their thesis remains incomplete. Courses are taken in sequence.

Practicum (6 Units)

PSY 6248	Counseling Practicum I
PSY 6249	Counseling Practicum II

Personal Therapy Requirements

Each student must complete 25 hours of personal therapy, prior to registration for PSY 6248 Practicum I.

Note: In compliance with APA ethics code, a student's personal therapy is not permitted with USIU Africa Psychology faculty

Master of Arts in Communication Studies

Mission Statement

The mission of the Master of Arts in Communication Studies program is to advance knowledge through creative works, critical and strategic thinking.

Program Learning Outcomes

Upon successful completion of the program, the students will be able to:

1. Design and implement communication strategies for various types of organizations
2. Monitor and evaluate the impact of communication programs.
3. Manage communication programs and projects in various national and global contexts
4. Apply research approaches, theories, methods to interrogate communication issues at local and international contexts
5. Utilize disruptive digital technologies in communication practice.

Prerequisites

Students without Communication Studies background will be required to take the following survey courses. Students without a Communications undergraduate degree are expected to report a semester in advance (Summer or Fall) preceding the January intake to fulfill this requirement.

JRN 3004	Media Ethics
JRN 3000	News Reporting and Writing
JRN 3020	Development Journalism
JRN 3911	Principles of Public Relations

DEGREE REQUIREMENTS (48 UNITS)

CORE COURSES (27 UNITS)

MAC 6010	Introduction to Graduate Studies
MAC 6020	Communication Theory
MAC 6061	Global Communication in the Digital Age
MAC 6040	Entrepreneurship for Communication Professionals
MAC 6120	Organisational Communication
MAC 6151	Qualitative Research Methods
MAC 6152	Quantitative Research Methods
MAC 6851	Project I
MAC 6852	Project II

CONCENTRATIONS (15 UNITS)

Strategic Corporate Communications (15 Units)

SCC 6110	Corporate Communication
SCC 6120	Integrated Marketing Communication
SCC 6140	PR Writing
SCC 6160	Issues & Crisis Management
SCC 6170	Communications Strategies and Campaigns

Digital Communication

DCM 6110	Multimedia Design
DCM 6120	Digital Communication & Society

DCM 6130	Digital Communication Strategy
DCM 6160	Effective Web Design and Strategy
DCM 6170	Social Media Strategies

Communication for Development

CFD 6110	Development Communication Theory
CFD 6120	Participatory Communication Strategy Design
CFD 6130	Public Policy & Advocacy
CFD 6140	Risk Communication
CFD 6170	Program Monitoring & Evaluation

Media Studies – On hold

MDS 6110	Media Criticism and Theory
MDS 6120	Media Writing
MDS 6140	Media, Identity and Representation
MDS 6160	Multimedia Journalism
MDS 6170	Media Management

ELECTIVES (6 UNITS)

Students to choose two courses from the electives below

CFD 6160	Behaviour Change Communication
CFD 6150	Project Management
CFD 6180	Resource Mobilization
DCM 6140	Online Corporate Branding
MDS 6130	Political Communication

MDS 6190	Community Media and ICT in Development
SCC 6130	Managing the Communication Function

Master of Business Administration

Mission Statement

The mission of the Online MBA program is to provide a range of knowledge, skills and abilities in IT security, software development, business systems management and mobile technology.

Program Learning Outcomes

Upon successful completion of the MBA program, the students will be able to:

1. Analyse and interpret financial information for decision making
2. Formulate, implement and evaluate firm strategies
3. Demonstrate leadership and ethical behaviour in a diverse environment
4. Conduct research in the field of specialization
5. Employ global practices in business management.

DEGREE REQUIREMENTS (45 UNITS)

MBA 6000	Organizational Behavior
MBA 6010	Managerial Marketing
MBA 6020	Strategic Human Resource Management
MBA 6030	Legal Environment of Business
MBA 6040	Managerial Finance
MBA 6050	Leadership and Ethics
MBA 6060	Managerial Accounting
MBA 6070	Managerial Economics
MBA 6080	Strategic Management
MBA 6090	Management Information Systems
MBA 6100	Operations Management
MBA 6110	Business Statistics
MBA 6120	Business Research Methods
MBA 6130	Research Project 1
MBA 6131	Research Project 2

The good life is a process, not a state of being. It is a direction, not a destination.

Carl Rogers

Schools

Chandaria School of Business

Mission Statement

In line with the university's mission, the mission of Chandaria School of Business is to provide a range of knowledge, skills, attitudes and problem-solving abilities to enable students to respond to the need for successful management and leadership of profit and not-for-profit organisations in a dynamic environment. Programs provide the following outcomes for traditional and non-traditional, domestic and international students.

Phone: (+254) 730 116 414
E-mail: csb@usiu.ac.ke

Prof. Timothy Okech
Dean, Chandaria School of Business
Phone: (+254) 730116415
E-mail: tokech@usiu.ac.ke

Prof. Juliana M. Namada
Chair, Department of Business Administration
Phone: (+254) 730116228
E-mail: jnamada@usiu.ac.ke

Dr. Selefano F. Odoyo
Chair, Department of Accounting, Finance, Economics and Hospitality
Phone: (+254) 730116103
E-mail: sodoyo@usiu.ac.ke

Chandaria School of Business is committed to excellence in formulation and delivery of high quality programs at both undergraduate and graduate levels in a dynamic and challenging business environment.

Learning Outcomes

Global-oriented: Demonstrate awareness, knowledge and appreciation of global business practices.

Multidisciplinary: Demonstrate knowledge about the different functions of business and show an appreciation and integration of functional business areas.

Change-oriented: make use of adaptive and innovative skills.

Experiential: Develop practical working experience through participation and contribution to community and societal causes.

Initiative and problem solving abilities: Collect and analyze data to provide business solutions.

Team player: Demonstrate understanding of diversity and work harmoniously with individuals and groups in organisations.

Effective communication: Develop competencies in oral and written communication skills and use of technology.

Preparedness for career: Develop mastery of knowledge, skills and values relevant to careers in their selected disciplines.

Transformational leadership: Demonstrate effective, efficient and ethical leadership.

The Chandaria School of Business is committed to excellence in the formulation and delivery of programs in a climate that includes:

- Challenging academic requirements for students;
- An interdisciplinary faculty with a holistic perspective who provide excellence in teaching, curriculum development, scholarship, and service to the University and to the global community;
- A support staff that is dedicated to the creation of a conducive learning environment for students and faculty; and
- A mutually supportive faculty-student community.

UNDERGRADUATE PROGRAMS

Undergraduate programs provide a liberal and intercultural education; understanding of business, management, information systems and technology, hospitality, or tourism disciplines; proficiency in selected disciplines; understanding of the overall dynamics of organisations; skill in critical thinking; and competence in interpersonal, oral, written, quantitative, and computer skills. The undergraduate programs prepare students for advanced study and entry level professional positions.

GRADUATE PROGRAMS

Graduate programs provide advanced skills in selected business and management disciplines, including practical experience in the application of those skills in the context of the overall dynamics of organisations; change manager and change agent skills; skill in working as a member of a multicultural team; and ability to collect, analyze and critically evaluate data as well as other information to arrive at reasoned conclusions. They also provide an ability to evaluate the environments of organisations and develop responsive strategies for organisations; and advanced competence in interpersonal, oral, written, quantitative, and technology management skills. The Master's programs prepare students for positions in management or consulting, and entry into doctoral programs.

DEGREE PROGRAMS

Undergraduate

- Accounting (B.Sc.)
- Finance (B.Sc.)
- Hotel and Restaurant Management (B.Sc.)
- International Business Administration (B.Sc.)
- Bachelor of Global Leadership and Governance (on hold)

These undergraduate programs offer concentrations in:

- Accounting
- Economics
- Entrepreneurship
- Finance
- Hotel Management
- Hospitality Planning and Development
- Investment Management
- Management
- Marketing
- Real Estate Finance
- Leadership and Governance in Government and Public Benefit Organisations
- Corporate Leadership and Governance

Graduate

- Master of Business Administration (MBA)
- Management and Organisational Development
- Online Master of Business Administration (Online MBA)

The MBA program offers concentrations in:

- Global Business Management
- Health Leadership & Management
- Finance
- Human Resource Management
- Marketing
- Strategic Management
- Global Social Sustainable Enterprise (GSSE)

Doctoral

- Doctor of Business Administration (DBA)

The DBA program offers concentrations in:

- Finance
- Strategic Management
- Leadership and Organisational Change

Course Descriptions

ACT: Accounting

ACT 1010 Principles of Accounting I

Study of the objectives of fundamental concepts of accounting; analyzing and recording financial transactions; preparation of income statements, the balance sheet and interpretation of financial income statements; analysis of assets, liabilities and equity; partnerships and corporations; cash flow analysis; and introduction to software applications in accounting.

Prerequisite: IST 0999 and MTH 1109

Credit: 3 Units

ACT 2010 Principles of Accounting II

This course provides an over view of accounting as an effective aid to management in the control of resources, interpretation of financial statements, cost volume analysis, product cost systems, budgets and variance analysis.

Prerequisite: ACT 1010

Credit: 3 Units

ACT 3010 Accounting Information Systems

Fundamental accounting principles in a computerized environment; Application of accounting packages to the accounting cycle and management reports; Contemporary issues and ethical practices in accounting information systems.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4010 Managerial Accounting

An extensive analysis of management decision making based on accounting concepts; the use of accounting statements and reports in policy making

and control; ethical considerations and emerging trends of management accounting.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4020 Financial Accounting I

An over view of the theoretical foundations of financial reporting; Standard setting processes and conceptual framework, valuation of assets and current liabilities.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4030 Financial Accounting II

Accounting principles and reporting requirements for liabilities, long-term investments and stockholders' equity are studied. Other topics included are accounting for pensions, leases, accounting changes, and the statement of cash flows. (OI)

Prerequisite: ACT 4020

Credit: 3 Units

ACT 4040 Cost Accounting

The course is designed to provide in-depth coverage of cost accounting concepts, objectives, and accumulation and reporting procedures. Topics covered include material, labor and overhead costs in job order and process cost accumulation systems and other emerging cost accounting topics.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4050 International Accounting

Study of international dimensions of accounting and use of accounting information for decision making in multinational environment; Accounting and managerial issues of multinational corporations such as currency translation, financial reporting and disclosure, international taxation, transfer pricing, and current issues and developments.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4060 Taxation

An overview of the application of the principles, laws and practices of taxation of individuals, partnerships and corporations.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4070 Auditing

A study of auditing principles, concepts and practices as it applies mainly to business and investors. A working knowledge of auditing procedures and techniques, standards, ethics and legal environment, statistical audit tools as well as audit reports. (OI, ILI, WI)

Prerequisite: ACT 2010 and BUS 3010

Credit: 3 Units

ACT 4110 Taxation II

The course is designed to ensure that the students can prepare tax returns, evaluate the tax implications of business decisions, and analyze the impact of government fiscal measures on industry and the economy.

Prerequisite: ACT 4030

Credit: 3 Units

ACT 4120 Auditing and Investigations

The course provides the students with practical skills required to audit public and private institutions and to carry out audit investigations in computerized and non-computerized environments.

Prerequisite: ACT 4070

Credit: 3 Units

ACT 4130 Forensic Accounting

The primary objective of this course is to provide students an opportunity to gain experience in investigative (forensic) accounting. Topics include background, legal framework, prevention, risk assessment, financial fraud schemes, investigation and specialized issues.

Prerequisite: ACT 4120

Credit: 3 Units

ACT 4910 Accounting Internship

This program is in accord with the overall mission of USIU-Africa to provide an environment of growth, knowledge and work experience for its students. This entails preparedness for career through mastery of a field of knowledge and its multicultural and multinational application. Such mastery is accomplished through both formal study and various experiential forms of learning such as the internship and fieldwork. It provides practical and hands on experience in the student's area of study. A range of 200-400 hours required depending on the organisation.

Prerequisite: Students must be seniors

Credit: 3 Units

ACT 1010 Principles of Accounting I

Study of the objectives of fundamental concepts of accounting; analyzing and recording financial transactions; preparation of income statements, the balance sheet and interpretation of financial income statements; analysis of assets, liabilities and equity; partnerships and corporations; cash flow analysis; and introduction to software applications in accounting.

Prerequisite: IST 0999 and MTH 1109

Credit: 3 Units

ACT 2010 Principles of Accounting II

This course provides an over view of accounting as an effective aid to management in the control of resources, interpretation of financial statements, cost volume analysis, product cost systems, budgets and variance analysis.

Prerequisite: ACT 1010

Credit: 3 Units

ACT 3010 Accounting Information Systems

Fundamental accounting principles in a computerized environment; Application of accounting packages to the accounting cycle and management reports; Contemporary issues and ethical practices in accounting information systems.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4010 Managerial Accounting

An extensive analysis of management decision making based on accounting concepts; the use of accounting statements and reports in policy making and control; ethical considerations and emerging trends of management accounting.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4020 Financial Accounting 1

An over view of the theoretical foundations of financial reporting; Standard setting process and conceptual framework, valuation of assets and current liabilities.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4030 Financial Accounting 2

Accounting principles and reporting requirements for liabilities, long-term investments and stockholders' equity are studied. Other topics included are accounting for pensions, leases, accounting changes, and the statement of cash flows. (OI)

Prerequisite: ACT 4020

Credit: 3 Units

ACT 4040 Cost Accounting

The course is designed to provide in-depth coverage of cost accounting concepts, objectives, and accumulation and reporting procedures. Topics covered include material, labor and overhead costs in job order and process cost accumulation systems and other emerging cost accounting topics.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4050 International Accounting

Study of international dimensions of accounting and use of accounting information for decision making in multinational environment; Accounting and managerial issues of multinational corporations such as currency translation, financial reporting and disclosure, international taxation, transfer pricing, and current issues and developments.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4060 Taxation

An overview of the application of the principles, laws and practices of taxation of individuals, partnerships and corporations.

Prerequisite: ACT 2010

Credit: 3 Units

ACT 4070 Auditing

A study of auditing principles, concepts and practices as it applies mainly to business and investors. A working knowledge of auditing procedures and techniques, standards, ethics and legal environment, statistical audit tools as well as audit reports. (OI, ILI, WI)

Prerequisite: ACT 2010 and BUS 3010

Credit: 3 Units

ACT 4110 Taxation II

The course is designed to ensure that the students can prepare tax returns, evaluate the tax implications of business decisions, and analyze the impact of government fiscal measures on industry and the economy.

Prerequisite: ACT 4030

Credit: 3 Units

ACT 4120 Auditing and Investigations

The course provides the students with practical skills required to audit public and private institutions and to carry out audit investigations in computerized and non-computerized environments.

Prerequisite: ACT 4070

Credit: 3 Units

ACT 4130 Forensic Accounting

The primary objective of this course is to provide students an opportunity to gain experience in investigative (forensic) accounting. Topics include background, legal framework, prevention, risk assessment, financial fraud schemes,

investigation and specialized issues.

Prerequisite: ACT 4120

Credit: 3 Units

ACT 4910 Accounting Internship

This program is in accord with the overall mission of USIU-Africa to provide an environment of growth, knowledge and work experience for its students. This entails preparedness for career through mastery of a field of knowledge and its multicultural and multinational application. Such mastery is accomplished through both formal study and various experiential forms of learning such as the internship and fieldwork. It provides practical and hands on experience in the student's area of study. A range of 200-400 hours required depending on the organisation.

Prerequisite: Students must be seniors

Credit: 3 Units

ACT 4950 Accounting Project

Independent study under the direction of a faculty advisor; Projects may include library or empirical research or analysis and written report on management aspects of an appropriate business organisation, private firm, not-for profit organisation, or government agency.

Prerequisite: Students must be seniors

Credit: 3 Units

ACT 6010 Managerial Accounting

This course intends to develop the student's ability in understanding managerial uses of accounting data in cost analysis, decision-making, planning, control, budgeting, variance analysis, performance measures and management reports.

Prerequisite: BUS 5010

Credits: 3 Units

BUS: Business

BUS 1010 Introduction to Business Organisations

An overview of the interrelationships among the functions of the business firm and between the firm and its environment; topics include a study of managerial functions, marketing concepts, production systems, leadership practices and business ethics.

Credit: 3 Units

BUS 2000 Foundations of Business Edge

This unit introduces students to the concept of business and to various interpersonal, group work and organisational skills essential for university and employment success. Integrating theory with applied activities, students will develop skills in self-advocacy, personal management and information management *Prerequisite: None*

Credit: 3 Units

BUS 2010 Business Mathematics

Fundamental mathematical operations in banking and borrowing; financial ratio analysis; payrolls; retail; insurance; and elementary statistics.

Prerequisite: MTH 1109

Credit: 3 Units

BUS 2020 Business Communications

This course is designed to introduce students to the fundamental principles of effective business communication in a global environment. It will emphasize written communications such as standard and persuasive business letters, memorandums, and informational as well as analytical reports, along with proposals, resumes, and other employment-related documents. The course addresses the skills necessary for developing, planning, organizing, outlining, and editing various business documents. The problem-solving approach is used to focus on proper grammar, punctuation, vocabulary, and tone as well as the use of computer technology and software in the development of effective oral and

written business communication skills. *Prerequisite: BUS 1010*

Credit: 3 Units

BUS 3010 Business Law

Study of the legal environment in which profit and not-for-profit organisations operate; Includes study of courts and procedure, criminal law, torts, contracts, and formations, operation and termination of corporations, agency and partnership relationships. (OI)

Prerequisite: BUS 1010

BUS 3020 Production and Operations Management

An introductory analysis of productive systems, operations planning, and control; Topics include forecasting, inventories, scheduling, quality assurance, and productivity.

Prerequisite: BUS 2010

BUS 3030 Business Statistics

A further study in statistical methods and its application in the field of business and economics. Regression, time series analysis, index numbers, association of attributes, probability, theoretical distributions, sampling hypothesis tests and confidence levels. *Prerequisite: MTH 2210*

Credit: 3 Units

BUS 4000 Corporate Law

An examination of the law governing formation, composition, operations and dissolution of companies: Topics include Nature and classification of companies, Registration of a company, Share capital, Debt capital, Membership of a company, Meetings, Directors, Auditors, Company accounts, audit and inspection, Corporate insolvency and winding up.

Prerequisite: BUS3010

Credit: 3 Units

BUS 4005 Project Management

The course provides overview of project management, proposal writing and fundraising strategies in profit and non-profit organisations. The course focuses on the essential elements of project management and project life cycle including: project identification, planning, implementation and evaluation.

Prerequisite: MGT3010

Credit: 3 Units

BUS 4010 Small Business Entrepreneurship

Investigation into entrepreneurial behavior, the role of entrepreneur in society: the conditions necessary for it to evolve; the development of a venture whether in terms of start up, acquisition, or expansion of an existing business. The theory and practice of small business management.

Prerequisite: MKT3010, FIN3010 and MGT3010

Credit: 3 Units

BUS 4015 Supply Chain Management

This course is designed to expose the learner to the phases of supply management namely; generation of requirements, sourcing, pricing, and make, do, or buy, and post award activities including evaluation procedures. It also explores the supply chain management systems, linkages between supply chain management and other major functions of the firm such as marketing, finance-accounting, operations (with emphasis on quality- material control, engineering, and production-inventory control), logistics, and research and development. Value for money principles, procurement in the public sector, and relationship management in supply chain activities are also addressed.

Prerequisite: BUS3020

Credit: 3 Units

BUS 4020 Business Mathematics and Statistics

This course aims at equipping students with an elementary statistical base in solving decision-

making problems especially those which involve numerical data. It also provides students with basic skills and knowledge in the fundamental business mathematics calculations that include the operation in banking: borrowing, financial analysis, payrolls, retail, insurance, interest, discount, depreciation and elementary statistics.

Pre-requisite MTH 2210

Credit: 3 Units

BUS 4030 Quantitative Methods

Study of the mathematical techniques/ methods used to solve business problems. Include meaning and scope, Linear programming-Graphic, simplex and duality, Transportation, Assignment, Replacement, Queuing, Decision theory, Inventory management, Sequencing, PERT, Game theory, Investment Decision Analysis and Simulation.

Prerequisite: BUS 3030

Credit: 3 Units

BUS 4070 Business Values and Ethics

Introduction to the basic categories and framework of philosophical ethics; examination of selected corporate policy statements on social and ethical responsibility with consideration of how to develop and implement such policy statements; consideration of ethical issues in selected professions. (OI)

Prerequisite: BUS 1010 MGT 3010

Credit: 3 Units

BUS 4080 Business Process Management

The course introduces a process- oriented view of the flows of materials, information, products and services through and across organisational functions. All organisations must carefully analyse and document their business processes and must continuously assess the efficiency and effectiveness of these processes to minimize cost and maximize value creation. The course helps students identify information-bearing events, assess and improve process efficiency, learn to model and analyse business processes, and understand the interactions

between human behavior and process design. Hands-on, case-based assignments allow students to practice some of the principles addressed.

Prerequisite: MGT3010

Credit: 3 Units

BUS 4090 Strategic Management

This is a course that provides an overview of the economic, cultural, psychological, sociological, technological and political aspects of the business environments confronting environment serving organisations (ESOs); the concept of environmental turbulence; the nature of strategic and operating work; the formulation of a corporate mission, goals and objectives; and strategies for firms operating at different levels of environmental turbulence. The course facilitates the development of skills in problem analysis and decision-making in corporate strategy and business policy. BUS 4090 is the integrating course for the undergraduate program that concentrates on the application of concepts through case studies and decision simulation exercises. (ILI, WI) Prerequisite: MGT 3010; Senior Standing

Credit: 3 Units

BUS 6020 Introduction to Strategic Management

An introductory course that provides an overview of the economic, cultural, psychological, sociological, technological, and political aspects of the global environments confronting environment serving organisations; the concept of environmental turbulence; the nature of strategic and operational work formulation of mission, goals, objectives, strategy; environment serving organisation strategic aggressiveness and capability at different turbulence levels; and strategic diagnosis.

Credit: 3 Units

BUS 6050 Total Quality Management

An overview of the quantitative and qualitative theory, methodologies, and strategies for introducing and sustaining total quality management (TQM) philosophy; and development of a TQM strategy for an existing organisation.

Prerequisite: BUS 5070

Credit: 3 Units

BUS 6120 Strategic Response to Turbulent Environments

A study of strategy formulation for environment serving organisations (ESOs) that are serving discontinuous transnational environments. Included are: strategy formulation in discontinuous transnational environments; competitive posture analysis; integration of societal and technology strategies for a total environment serving organisation strategy; and strategic portfolio optimization.

Prerequisite: BUS 6020

Credit: 3 Units

BUS 6140 Management of Technological Innovations

A study of the management of technological innovation as a key factor in the strategy of environment serving organisations. Included are: the nature of technology and innovation; the technological environment; technology strategies; technology substitution; technology transfer; societal responsibility and technology; the role of general management in technology management; the interface between technology and business strategies; environment serving organisation capability for technological innovation; and management of innovation projects.

Prerequisite: BUS 6020

Credit: 3 Units

BUS 6150 Contributors to Strategic Management

This course/seminar is a study of the major strategic management contributors to the theory and practice of strategic management. The course involves examination of the role major contributors play in informing and guiding the practice of strategic management. Emphasis is on gaining an in-depth, critical understanding and appreciation of the influence each particular orientation's metaphors and theories have had on our cumulative understanding and knowledge about strategic management. This seminar is historical in scope, however current theoretical strategic management trends are also considered. This is a capstone course and relates to other strategic management modules to strategic management taught at USIU- Africa.

Prerequisites: BUS 6120

Credit: 3 Units

BUS 6220 Business Research Methods

The course is designed to review research methodology associated with various types of projects and statistical analysis. Examines research planning and implementation process including identification of research problem and formulation of research questions, literature review, data collection and data analysis methods, and dissemination of research findings. Also included is an emphasis on the use of appropriate statistical package to analyze descriptive and inferential statistics. The major objective is to develop a project proposal on a relevant business topic.

Prerequisite: BUS6225

Credit: 3 Units

BUS 6225 Business statistics

This course has three objectives: to bridge the gap between the MBA core and more advanced statistical methods courses, to cover applied aspects of the multiple regression model, and to learn effective communication of statistical analysis. Emphasis will be on applying this material in managerial settings, rather than the underlying mathematics, so all techniques will be illustrated with applications.

Credit: 3 Units

BUS6235 Leadership and Ethics

The course provides an in-depth study and analysis of corporate governance. The course focuses on the key aspects involved in steering organisations forward in dynamic/ turbulent environments including transformation leadership, strategic leadership, culture, values and ethics; and strategic management of change. The course focuses on individuals as leaders, team leadership and organisational leadership and also on the management of Boards, ethical orientation in management, and culture.

Credit: 3 Units

BUS 6850 A Strategic Management Project I

The aim of this course is the development of a cogent project proposal, pilot study and field work (data collection) under supervision. Project proposals may include library or empirical research or analysis and written report on the management aspects of an appropriate business organisation (private, not-for-profit or government organisation)

Prerequisite: BUS 6220

Credit: 3 units

(Grading - Credit/No credit)

BUS 6850 B Strategic Management Project II

This course focuses on data analysis, report writing and submission of approved project report under supervision. Final projects may include library or empirical research or analysis and written report on the management aspects of an appropriate business organisation (private, not-for-profit or government organisation)

Prerequisite: BUS 6850 A

Credit: 3 units

(Grading: Letter Grade)

DBA: Doctor of Business Administration

DBA 7000 Business Research Statistics

This course is designed to provide basic concepts and methods of statistical analysis for processes and products. Its major focus is on probability analysis, correlation analysis, regression analysis, analysis of variance (ANOVA), Chi square analysis, t tests, and hypothesis testing. Special emphasis will be placed on the understanding of statistical techniques in business context, the use of statistical software (SPSS) to run descriptive and inferential statistical analyses, and the correct interpretation of the results from such runs. Practical labs sessions will be held in conjunction with lectures to provide hand on experience with various software packages including SPSS and Excel.

Credit: 3 units

DBA 7010 Human Resource Management

This course examines contemporary human resource philosophies, policies and practices that focus on unique areas of human capital management in a variety of organisational settings. It focuses on decision-making processes in the development and maintenance of various program elements in human resource management. Critical HRM elements addressed include human resource planning, recruitment and selection, appraisal and performance management, training and development, compensation and incentives, governance, separation, and human resource information systems.

Credit: 3 units

DBA 7020 Entrepreneurship

This course examines the concept and value of entrepreneurship in a wider context including theoretical models of entrepreneurial behavior and their application in various organisational contexts. It seeks to develop a critical understanding of key concepts, processes, and issues in entrepreneurship including creativity and innovation, corporate entrepreneurship, social entrepreneurship,

entrepreneurial environment and opportunities, ethics and social responsibility, growth and succession in entrepreneurial ventures. Special emphasis is placed on the identification of viable business opportunities and the development of a comprehensive business plan for entrepreneurial venture startup or expansion.

Credit: 3 units

DBA 7030 Accounting and Financial Management

This course introduces the concepts and applications of accounting and financial management. It aims to provide an understanding of the practical use of accounting and financial information for decision making and the achievement of business goals. Students are exposed to a variety of topics including introduction to accounting and financial management concepts; measuring and reporting financial position, financial performance and cash flows; impact of technology, control issues, and behavioral aspects of the AIS process; specification of corporate objectives, evaluation of investment projects, working capital management, alternative sources of finance, risk, the operation of capital markets, the financing decision, the dividend decision, and the cost of capital.

Credit: 3 units

DBA 7040 Strategic Management

This course focuses on critical issues that add complexity to the management of organisations both in the public, private and social/ community sectors. It examines critical issues such as social reforms, economic and financial reforms, globalization, international politics, the new world order and new technology among others, all adding to the complexity of managing organisations in today's highly turbulent business environment. The course involves in-depth examination of contemporary strategic and management philosophies, theories, policies and practices that focus on critical aspects of the discipline of strategic

management. Contemporary theories of excellence in management, key concepts/ paradigms, skills and knowledge presented and discussed focus on the creation of sustainable competitive advantage through examination of environmental factors that define management actions/responses and orientation in highly dynamic business environments.

Credit: 3 units

DBA 7050: Leadership

This course examines the role and importance of effective leadership in organisations. It offers a critical review of the evolving theories of leadership and paradigm shift in leadership research perspectives including traits, behavioral, contingency and integrative approaches such as charismatic and transformational leadership models. Major emphasis is placed on leadership aspects that affect organisational performance and success such as sources of power and influencing strategies, leadership and ethics, leadership styles and approaches, leadership motivation and effective communication. The course provides hands on applications on critical leadership decisions through case studies and projects of practical nature.

Credit: 3 units

DBA 7060: Business Research Methods

This course introduces students to the foundations of research design for business and management research. The course examines the critical elements of the research process including selection of research topic and research questions, literature review, qualitative and quantitative research designs and methodologies, report writing and disseminating research findings. Quantitative designs covered include experimental and quasi-experimental, survey, causal-comparative, evaluation, and action research; qualitative designs covered include case study, ethnography and grounded theory. Also included are advanced statistical techniques for analyzing quantitative data and testing hypothesis such as Chi-square, two way analysis of variance

and covariance, multivariate analysis techniques, and econometric analysis. Special emphasis will be placed on the preparation of a draft proposal for the DBA dissertation

Credit: 3 units

DBA 7070 Comprehensive Examination

The objective of the comprehensive examination in the DBA program is to provide students with the opportunity to demonstrate depth and breadth of knowledge in business management. During the comprehensive exam, the student will also be expected to demonstrate that they have sufficient knowledge to begin their dissertation. Contemporary topics in business management are examined in a 3-hour closed book examination.

Credit: 9 Units

Dissertation

FIN 7030/ LED7030/ MGT7030

The dissertation will be the unifying capstone of every doctoral student's learning experience. It addresses a real-world problem, bring new information to light, and make an original contribution to the field of study. The objective of the dissertation stage is to demonstrate that the student has synthesized the knowledge gained during the pre-dissertation stage and is able to apply this knowledge to the resolution of a substantial problem.

Credit: 45 units

ECO: Economics

ECO 1010 Principles of Microeconomics

Introduction to theories regarding the decision making of firms and households in market transactions.

Credit: 3 Units

ECO 1015: Introduction to Economics

The course provides the students with a good grounding of economic principles and practices for effective operations of entities in a given environment.

Credit: 3 Units

ECO 1020 Principles of Macroeconomics

Introduction to theories regarding consumption, investment, money and banking and government activities

Prerequisite: ECO 1010

Credit: 3 Units

ECO 4010 Intermediate Microeconomics

The purpose of this course is to equip students with skills and knowledge that enable them analyse consumer behaviour, behaviour of firms and markets. It explores how individuals and firms respond to changes in the opportunities and constraints that they face and how they interact in markets. It also enables them to apply basic tools that are used in many fields of economics, including household economics, labor economics, production theory, international economics, natural resource economics, public finance, and capital markets.

Pre-requisite ECO 1010

Credit: 3 Units

ECO 4020 Intermediate Macroeconomics

This course equips the learners with skills and knowledge that enable them analyze the macro-economic environment in which individuals and firms exist. It enhances their understanding of the interaction of economic agents in the overall economy.

Pre-requisite ECO 1020

Credit: 3 Units

ECO 4030 Economic Development

This course equips learners with knowledge and skills on economic growth and development, analyses welfare and critically shows the development status of nations. It also discusses the vicious cycle of poverty.

Pre-requisite ECO 1010 and ECO 1020

Credit: 3 Units

ECO 4040 Public Finance

This course introduces students to the theory of public finance. It develops the knowledge learn in FIN 4060 by applying critical and analytical aspects of taxation, redistribution and capital budgeting. The course also discusses the economics of foreign aid.

Prerequisite: FIN 4060

Credit: 3 Units

ECO 4050 Health Finance and Economics

This course introduces students to the basics of health financing and economics. The course explores health as a public good and reviews the options available in health financing. Lastly the course evaluates the economic efficiency of health provision in both the private and public sectors.

Pre-requisite ECO 1010 and ECO 1020

Credit: 3 Units

ECO 6010 Managerial Economics

Review of microeconomics and theories surrounding managerial decision-making as well as applications involving cost and risk analysis and forecasting.

Credit: 3 Units

ENT: Entrepreneurship

ENT 1010 Introduction to Entrepreneurship

This course offers a framework for understanding the entrepreneurial process and exposes students to how to find business ideas, how to evaluate their potential, challenges, problems, identifying what it takes to get a new venture off the ground and issues faced by entrepreneurs who start new businesses. Students will also learn about themselves, their decisions, and their goals to determine how entrepreneurship can play a role in their lives. Case study is the principal teaching methods will involve lectures, business cases, case study and guest speakers. Students will also be introduced to entrepreneurship from an economic perspective and the concepts of environmentally sustainable practices and social entrepreneurship.

Prerequisite: None

Credit: 3 Units

ENT 4005 Entrepreneurial Behavior and Ethics

The course surveys theoretical perspectives and ethics that underpin the practice of entrepreneurship. Examines entrepreneurial behavior theories and approaches including psychological, sociological and economic perspectives; key dimensions of entrepreneurial behavior including entrepreneurial characteristics and motivation, entrepreneurial organisation, entrepreneurial process and environment. The course also examines ethical behavior and code of ethics and social responsibility as major requirements for entrepreneurship practice.

Prerequisite: BUS 1010 and MGT 3010

Credit: 3 Units

ENT 4020 Management of Entrepreneurial Ventures

Examines the nature of entrepreneurial ventures and how to manage them effectively for greater success; entrepreneurship environment and business opportunities; entrepreneurship strategies and legal forms of business ownership; special needs of entrepreneurial ventures in the approach

to start-up and management in terms of marketing, production, human resource management, financial management and total quality management. Also examines methods for measuring financial performance and financing options for start-up and expansion of entrepreneurial ventures. The course emphasizes business plan preparation as a requirement for start-up and effective management of entrepreneurial venture.

Prerequisite: MGT 3010, MKT 3010, FIN 3010

Credit: 3 Units

ENT 4040 Electronic Commerce

This course explores ways that entrepreneurial organisations can take advantage of the growing capabilities of the Internet and electronic commerce to increase the horizons for entrepreneurial ventures. It discusses the use and application of Internet and Intranet in the management of entrepreneurial ventures in functions such as marketing, retailing, operations and finance. Students learn how to develop effective on-line presentations for ventures of differing types. Legal requirements and ethical issues affecting on-line business are also discussed.

Prerequisite: IST2040 and ENT 4020

Credit: 3 Units

ENT 4050 International Dimension of Entrepreneurship

Examines the role and effects of the growing number of entrepreneurial ventures that exist worldwide including international business environment and opportunities; forms and types of international ventures; major issues affecting international trade; methods of starting and managing entrepreneurial ventures in the domestic market with international marketing capabilities; strategies for developing strategic alliances and collaborations to facilitate start-up and growth of international entrepreneurial ventures. Also examines regulations, documentation and payment methods for import/export entrepreneurial ventures. The course emphasizes business plan preparation as a requirement for start-

up and effective management of entrepreneurial ventures in the international dimension.

Prerequisite: ENT 4020

Credit: 3 Units

ENT 4060 Small Business Consulting

Prepares students to serve as consultants to a wide variety of problems facing Micro and Small Enterprises (MSEs) in today's competitive business environment. Examines the role and importance of consulting; the characteristics of a good business consultant; the consulting process including entry, diagnosis, action planning, implementation and termination. Discusses management of change and the role of effective communication in developing and maintaining effective client-consultant relationship. The course also addresses the process and requirements for starting and managing a Small Business Consulting Firm.

Prerequisite: ENT 4020

Credit: 3 Units

ENT 6010 Entrepreneurial Behavior

The course examines entrepreneurial behavior theories and approaches including economic, psychological and sociological perspectives. Discusses major dimensions of entrepreneurial behavior including entrepreneurial characteristics and motivation, organisation, process and entrepreneurial environment; examines social responsibility and business ethics as key factors influencing entrepreneurial behavior. Also discusses entrepreneurship as a key strategy in a dynamic and highly competitive corporate environment.

Credit: 3 Units

FIN: Finance

FIN 3010 Principles of Finance

The application of financial principles to problems involving the acquisition and management of funds by private and public organisations. (ILI)

Prerequisite: ACT 2010 and BUS 1010

Credit: 3 Units

FIN 4010 International Managerial Finance

The course critically examines the global financial landscape and more specifically the money markets. The spot, the forward, the currency futures, the options, the inter-bank and the Euro currency – markets are fully explored. The hedging techniques are examined so as to place the student at advantaged position in the economic and transaction exposure.

Prerequisite: FIN 4040

Credit: 3 Units

FIN 4015: Public Finance and Budgeting

This course introduces students to the theory of public finance. It develops the knowledge learn in in public budgeting by applying critical and analytical aspects of taxation, redistribution and public budgeting. The course also discusses the economics of foreign aid.

Prerequisite: ACT 4060

Credit: 3 Units

FIN 4020 Corporate Finance

The management of funds in corporations; analysis of capital budgeting; risk and basic risk models; cost of capital and optimal capital budgeting; project cash flow analysis; capital structure decisions; dividend policy; financial derivatives; hybrid financing; financial distress; restructuring and liquidation.

Prerequisite: FIN 3010

Credit: 3 Units

FIN 4030 Investments

The course is designed to facilitate evaluation of various alternative investment vehicles including investments in Bonds, Shares, Real Estate, Derivative instruments, Mutual Funds, Gold and other Commodities, Collectibles, and Portfolio construction and management.

Prerequisite: FIN 4040

Credit: 3 Units

FIN 4040 Money and Capital Markets

The course surveys issues related to financial intermediaries, with an emphasis on Depository institutions, Non depository institutions and Securities markets. It addresses Asset/ Liability Management, Credit Risk Management and maintenance of adequate capital.

Prerequisite: FIN 3010

Credit: 3 Units

FIN 4050 Financial Information Systems

The course is designed to train students in performing financial tasks using information technology. The course covers computer applications in various corporate finance areas. It provides basic skills for developing corporate finance models such as financial planning, funds, forecasting and, project evaluation using computer software.

Prerequisite: IST1010 and FIN 4030

Credit: 3 Units

FIN 4060 Financial Management in the Public Sector

The course is designed to equip the students with an understanding of financial management aspects of central and local government, and sources, costs and utilization of funds. *Prerequisite: FIN 3010*

Credit: 3 Units

FIN 4110 Portfolio And Derivatives Management

The major purpose of this course is to equip learners with knowledge in portfolio management and in particular: basic portfolio construction skills to facilitate the formation of an efficient and effective investment portfolio in creating and enhancing investor's wealth. Further the skills learned in the course will enable the learner to evaluate investment portfolios over time taking into consideration the returns and risks inherent in the portfolio and the market. The course aims at developing the student's ability to determine the returns and risks in the individual investment instruments and the ability to combine these individual assets into productive portfolio that will bring maximum benefits to the investor.

Pre-requisite: FIN 4030

Credit: 3 Units

FIN 4120 Pensions And Insurance

This course intends to provide a detailed understanding of the main principles of insurance as a risk management technique and pensions as an old-age safety net. It explains the economics behind the concept of insurance. Also discusses the insurance products and contracts in depth. Course also focuses on the role of pensions in life cycle financial planning in addition to pension rules and regulations. Different pension types and the main methods used to calculate pension liabilities are discussed. A discussion of how the macro-economic and demographic shocks affect insurance and pensions is also discussed

Pre-requisite: FIN 4040

Credit: 3 Units

FIN 4130 Financial Analysis And Reporting

This course provides a broad framework on analytical tools and procedures used to evaluate firm business operations. The course introduces and analyzes the relationship between business activities (operating, financing and investing) and

financial statements, from both views of internal and external users of financial information. It concentrates on understanding published financial statements, analysis of mergers and acquisitions, mortgages and bonds, and leases.

Pre-requisite: FIN 4010 and FIN 4020

Credit: 3 Units

FIN 4140 Emerging Issues In Finance

This course is meant to equip students with knowledge on development and advancements in the financial world. Although certain topics are recommended, the instructors are allowed to pick on topical issues in finance and focus on them.

Pre-requisite: FIN 4050

FIN 4150 Financial Modelling

This course aims to equip students with skills that enable them to develop quantitative financial models and use the solutions generated to make better decisions. The course requires students to apply financial tools in modelling and apply them to real world cases. The course further enhances financial information skills as the financial models are developed by the use of spreadsheets.

Prerequisite: FIN4050 and FIN4110

Credit: 3 Units

FIN 4210 Real Estate Portfolio Management

This course exposes students to the concepts, tools and strategies used in the management of portfolios of real estate investments. Students are exposed to the reasons why investors should evaluate potential real estate investment deals in relation to their overall portfolio goals.

Pre-requisite: FIN 4030

Credit: 3 Units

FIN 4220 Real Estate Investment Analysis

The purpose of the course is to impart knowledge to the learners on the options available in the financing of real estate ranging from owners capital, debt and collective investments. The course emphasizes on

the analytical evaluation of the financial options. A discussion of the role of taxation in real estate financing is also included

Pre-requisite: FIN 4050

Credit: 3 Units

FIN 4230 Real Estate Economics

The course equips learners with skills to evaluate the problems related to land use, the theory and analysis of land rent, land evaluation, efficiency of land as a factor of production and the economic policies on land

Pre-requisite: ECO 1020

Credit: 3 Units

FIN 4240 Property Law

This course provides an understanding of laws relating to ownership and use of property including contracts found in the property industry (leasing, transfer and valuation), land ownership and financing. Students are exposed to the realistic scenarios found in the property industry through use of established case law.

Pre-requisite: BUS 3010

Credit: 3 Units

FIN 4250 Real Estate Management And Consultancy

This course prepares students to manage real estate properly. It focuses on the unique management approaches used by commercial and residential managers. The course further imparts skills for in-depth decision making processes enabling the students undertake consultancy assignments for clients.

Pre-requisite: FIN 4020 and BUS 4090

Credit: 3 Units

FIN 6000 Managerial Finance

Study of basic principles, theories and tools required by managers to effectively conduct managerial duties. It deals with financial, dividend decisions and working capital management.

Credit: 3 Units

FIN 6010 Investments

Study of stocks, bonds, mutual funds, treasury and other government bonds, gold and other commodities, real estate and collectibles.

Prerequisite: FIN 6000

Credit: 3 Units

FIN 6030 International Financial Markets

Examination of the implications of the globalization of financial markets, financial instruments composition of world bond and equity markets, foreign exchange markets, interest rate and currency swaps, global interest rates links, and cross currency and cross border arbitrages.

Prerequisite: FIN 6000

Credit: 3 Units

FIN 6040 Information Systems Applications in Finance

This course trains students to manage computer technology used in corporate financial, investment and banking areas. Students will build knowledge of the leading-edge applications of technology in financial service firms, such as electronic trading systems, ATMS and security valuation software packages.

Prerequisite: FIN 6000

Credit: 3 Units

FIN 6800 Seminar in Finance

Seminar on special topics in finance

Prerequisite: FIN 6000

Credit: 3 Units

FIN 6850 A Finance Project I

The aim of this course is the development of a cogent project proposal, pilot study and field work (data collection) under supervision. Project proposals may include library or empirical research or analysis and written report on the financial aspects of an appropriate business organisation (private, not for profit organisation or government organisation)

Prerequisite: BUS 6220

Credit: 3 units

(Grading - Credit/No credit)

FIN 6850 B Finance Project II

This course focuses on data analysis, report writing and submission of approved project report under supervision. Projects may include library or empirical research or analysis and written report on financial aspects of an appropriate business organisation (private, not for profit organisation or government organisation)

Prerequisite: FIN 6850 A

Credit: 3 units

(Grading: Letter Grade)

FIN 7000 Corporate Finance

The course offers a rigorous theoretical and practical treatment of the major subject areas in corporate finance: unanimity, agency theory, management compensation, capital structure, dividends, application of Option Pricing Theory to the pricing of corporate liabilities, common stock, corporate bonds, mergers and acquisitions, leasing, capital budgeting, international corporate finance and some of the most recent advances in corporate finance.

Credit: 3 units

FIN 7010 Seminar in Finance

This seminar examines topics of current interest among researchers and practitioners in the field of Finance to reflect trends and developments in the discipline. It is centered around readings from recent articles and recently-published books on the selected topics. The current academic research will be covered in the areas of portfolio theory, equilibrium and arbitrage-based pricing models including CAPM, APT and option pricing models, efficient market hypotheses, corporate hedging, mergers and acquisitions, and financial markets and Institutions development.

Credit: 3 units

GLG: GLOBAL LEADERSHIP AND GOVERNANCE

GLG 1010: INTRODUCTION TO LEADERSHIP AND GOVERNANCE

The major purpose of this course is to equip the students with skills, knowledge, and attitudes necessary for effective ethical leadership and embrace elements of good governance in leadership decisions. It is expected that the students will be equipped with the knowledge to be able to compare and contrast traditional and contemporary leadership theories while emphasizing on ethical considerations under each theory and establish how to deal with ethical dilemmas while embracing good governance. The course will also familiarize learners with the legal provisions on ethics and integrity applicable to leaders both in public and private spheres.

Credit: 3 Units

ECO 1015: INTRODUCTION TO ECONOMICS

The course provides the students with a good grounding of economic principles and practices for effective operations of entities in a given environment.

Credit: 3 Units

GLG 2010: PSYCHOLOGY OF LEADERSHIP

This course is designed to expose students to psychological and social processes that bring about effective leadership. Effective leadership emanates from a clear understanding of a social exchange between leaders and followers and their situations or behaviors. Thus, the study of psychology offers valuable insight into the key determinants of leadership success or failure.

Credit: 3 Units

GLG 2000: MARKETING FOR BUSINESS LEADERS

Understand the scope of marketing, appreciate the need for detailed analysis as a basis for successful marketing decision making, and develop the ability to apply marketing concepts in a sustainable manner within BOP in developing economies and

other markets.

Credit: 3 Units

GLG 2080: HUMAN RIGHTS AND LABOUR RELATIONS

This course aims at introducing learners to human rights and labour relations as critical themes in global leadership and governance. The course explores international human rights theory and practice and its relevance in governance. The course also discusses labour law and practice as a critical aspect of human rights. In addition, the course examines the United Nations human rights system, regional human rights systems as well as Kenya's domestic framework for human rights protection and enforcement. The course will analyze the history of evolution of the international labour movement and examine various mechanisms for averting and resolving rights-related disputes.

Credit: 3 Units

GLG 3010: LEADERSHIP AND ORGANISATIONAL BEHAVIOR

Prerequisite: GLG 2010

This course focuses on leadership and organisational Behavior (OB). OB is a field of study that focuses on the multiplicity of interrelated factors which influence the behavior and performance of people in organisations. In particular, the courses emphasize the recognition of the role of leadership as an integrating activity and as a cornerstone of organisational effectiveness.

Credit: 3 Units

GLG 3020: POLICY FORMULATION & ANALYSIS

This course is designed to deepen students' understanding of the nature of policy formulation. It further aims at equipping students on policy analysis process of public and private enterprises. The course equips students with knowledge and skills needed to make appropriate choices among policy alternatives.

Credit: 3 Units

GLG 4020: SUSTAINABLE SOCIAL ENTREPRENEURSHIP

The main purpose of the course is to equip students with knowledge, skills and attitudes necessary for understanding of sustainability, sustainable development initiatives in the organisations and society impact and performance, innovation and leadership in the context of social programs and enterprises. This course is a study of the philosophical, conceptual and technical approaches to sustainable development and entrepreneurship. Students will get a detailed understanding of the meaning of development, entrepreneurship, sustainable development, and the connection to human development index.

Credit: 3 Units

GLG 4030: COMMUNICATION AND CONFLICT MANAGEMENT

This course is designed to enhance the students' understanding of the inevitability of conflict both in life and in the workplace. It helps them understand the nature and causes of conflict and exposes them to the different negotiation skills and strategies, as well as the dispute resolution mechanisms in order to lead meaningful lives in the workplace.

Credit: 3 Units

GLG 4090: GLOBAL LEADERSHIP AND CHANGE MANAGEMENT

The main purpose of this course is to equip the learners with skills, knowledge and attitudes necessary for effective global leadership and change management in contemporary dynamic and multicultural organisations. The course exposes the learners to problems of global leadership and change management through exploration of real organisational case studies and designing strategies to manage change.

Prerequisite: GLG 2010

Credit: 3 Units

GLG 4910: GLOBAL LEADERSHIP AND GOVERNANCE INTERNSHIP

The Internship aims to give practical experience to students in their areas of study so as to link the learned concepts, theories and practical experience into the world of business, industry and career. The internship can be undertaken in a business, school, non-profit organisation, volunteer organisation or in any other group or organisation approved by the Faculty Dean or Internship Office in a student's major area of study.

At the end of the Internship, the students are expected to write a report on their experiences. This report should indicate the main experiences gained by the student, as well as major implications and applications to the organisation or the subject of study. The report should follow the research format.

Credit: 3 Units

GLG 4950: PUBLIC MANAGEMENT AND LEADERSHIP PROJECT

This is an extended individual research or project under the direction of a faculty member and approved by the department chair or dean, which enables students to come up with their own original ideas to be researched in order to make a contribution in the field. Projects may include library or empirical research, analysis and written or oral presentation of a report on a topic in the student's major field.

Credit: 3 Units

GLG 4015 Constitutional and Administrative Law

This course aims to give insights into the relation between law, public policy and administration in Kenya. Students will become acquainted with the major legal parameters within which Kenyan politicians and public servants function, especially with regard to constitutional law and administrative law. Students will learn skills to help them analyze the legal implications of devolved governments and understand the implications of decisions of courts

and tribunals. In addition, the course will explore the law regulating the conduct of state and public officers, the decisions of the courts on chapter six of the constitution on leadership and integrity and assess the effectiveness of its provisions in governance.

Credit: 3 Units

GLG 4075 POLITICS AND ADMINISTRATION

The main purpose of this course is to equip the students with the necessary skills and knowledge about the administrative structure of Kenya. The course explores the nature of the workings of the government including factors leading to bureaucracy in the work environment. In addition, the course analyses the contemporary issues and problems being faced in politics and administration today.

Credit: 3 Units

GLG 4080: GLOBAL LEADERSHIP AND DEMOCRACY

Purpose of the Course

This course is designed to help students examine the type of leadership necessary for effective democratic management. The course helps enhance the students' knowledge, skills and motivation for civic and political action, and solidarity building and networking in order to create a more just, democratic and peaceful world.

Credit: 3 Units

GLG 4085: ADVOCACY AND LOBBYING

This course is designed to provide students with an opportunity to understand the fundamentals of lobbying while learning first-hand about the lobbying efforts of advocacy groups covering various sectors of the economy and social welfare issues. At the end of the course the students will have a working knowledge of lobbying and advocacy practices from the perspective of the "lobbyer" and "lobbyee" as well as gain experience in developing a simulated lobbying and advocacy deliverables.

Credit: 3 Units

GLG 4040: BOARD LEADERSHIP AND GOVERNANCE

This course is designed to increase students' in-depth knowledge of board governance, especially the issues of ownership and control, stakeholders and the board, staff and the board, disclosure and transparency, governance policies, the responsibilities of the board of directors, and board governance in various scenarios.

Credit: 3 Units

GLG 4045: RISK MANAGEMENT

This course will assist students to better understand the significance of adequately assessing and managing risk in the context of the management of business operations and in making informed business decisions.

GBM: Global Business and Management

GMB 6000 Managerial Finance

A study of managerial mega-trends, concepts, theories and tools required by financial managers to efficiently and effectively conduct their financial decision roles. These decisions are concerned with the investment, financing, dividend and working capital decisions. The course culminates in demonstrating the reciprocal, the symmetrical and asymmetrical relationships amongst the investment, financing, dividend and working capital decisions. The course provides hands-on problem solving activities, augmented by case studies and individual research

Credit: 3 Units

GMB 6010 Global Strategic Management

A study of business, corporate, and global strategy – developing an understanding of global strategy. This course is designed to provide participants with a working understanding of the complexities and challenges faced by firms doing business globally. The course will focus on international management and leadership challenges in global strategy, the importance of cross cultural awareness and understanding, global communications, and strategic implementation of global strategies. The course provides hands-on problem solving activities, augmented by case studies and individual research.

Credit: 3 Units

GMB 6020 Management of Entrepreneurial Ventures

This course is designed to provide the participant with an understanding of the linkage between the business environment and new business creation as well as learning the analytics of venture management. In addition to discussing the range of global entrepreneurial situations, students will be exposed to a practicum of managing and growing a new firm through an understanding of the context of entrepreneurship, start-up and planning issues,

organizing issues, leading and control issues, hence an insight into the complex tasks faced by entrepreneurs and managers of 4written business plan.

The course will expose participants to what entrepreneurship takes in a startup context, and how integrative, entrepreneurial execution can be successfully utilized in a variety of career and work contexts.

Credit: 3 Units

GMB 6030 Accounting for Managers

A study of the use of the interpretation and application of accounting data in cost analysis, planning, decision-making, control, performance measures and management reports. The course provides hands-on problem solving activities, augmented by case studies and individual research.

Credits: 3 Units

GMB 6040 International Financial Markets

The course involves a study of the global financial markets and their implications on the wealth creation process of the various actors. It examines the global financial landscape and infrastructure as the basis of appreciating the role and contribution of international financial markets. Additionally, the course provides insight in to financial arbitrage and the associated hedging techniques available to the participants in international financial markets.

Credit: 3 Units

GMB 6050 Business Ethics and Governance

A study of the legitimacy dimension of environment serving organisation output. Included are: impact of societal issues on management of environment serving organisations; stakeholder identification and analysis; ethical issues in the relationship between organisations and the environment; social responsibility strategy; legitimacy strategy; and building a socially responsive environment serving organisation. The course provides hands-

on problem solving activities, augmented by case studies and individual research.

Credit: 3 Units

GMB 6060 Management of Creativity and Innovation

This course is intended to help organisations harness creativity to add value to customers, firm and stakeholders alike. All organisations face the growth imperative and need to innovate continuously in order to stay ahead of the competition. Innovation demands creative thinking. Yet, many organisations have come to the realization that one of the most valuable assets they lack is creativity– both at an individual level and at an organisational level. In this course, you will learn how to drive innovation by generating creative solutions to the challenges of new product design and positioning.

You will learn tools to help you tackle almost any marketing challenge more creatively. Supported by recent studies, this course reflects a completely different approach to creativity and is grounded in the assumption that creative thinking is not different from other cognitive thinking and processes used in the best professional reasoning.

This course presents creativity, as a skill that can be acquired and improved by practice. Included are: creativity; systematic methodologies for creative thinking; the nature of technology and innovation; technological innovation strategies and transfer; societal responsibility and technology; the interface between technology and business strategies; environment serving organisation capability for technological innovation; and management of innovation projects.

Prerequisite: GMB 6010 Global Strategic Management

Credit: 3 Units

GMB 6070 Strategic Human Resource Management

A study of the theory and practice of strategic

human resource management (SHRM) in relation to the challenges and opportunities facing the firm in today's rapidly changing, globally oriented, and highly competitive environment. The course focuses on the formulation of the human resource policy at the strategic level. The course examines typical functions of human resources such as recruitment, selection, training, rewarding and others from a strategic perspective. Specifically, it explores how the functions integrate with the overall strategy of the firm in order for the firm to become more effective and efficient.

Credits: 3 units

GMB 6080 Global Strategic Marketing

A study of necessary skills for effective global strategic marketing including analytical decision-making tools that applies to managerial aspects of the marketing functions and tasks. Emphasis is placed on the analytical and decision-making functions of managers in the planning and implementation of marketing strategies at all levels of an organisation. Included are: (a) external and internal analyses for business opportunities, (b) application of popular strategic options/models, and (c) planning for market- and competitive-orientation. The course provides hands-on problem solving activities, augmented by case studies and individual research.

Credits: 3 Units

GMB 6090 Transformational Leadership

A study of the dynamics of transformation leadership in a global environment. Included are: the nature and characteristics of transactional and transformational leadership; relationships of power, authority and responsibility to leadership effectiveness including conflict management, ethics, decision making, risk propensity and change introduction; dynamic relationship between environment, leadership style and change Catherine Kyotubungi strategies; the nature of change; and the relationships between power, and the roles of the change agent and the

change manager. The course provides hands-on problem solving activities, augmented by case studies and individual research.

Credits: 3 Units

GMB 6220 Business Research Seminar

A study of research methodology associated with various types of projects and statistical analysis. Examines research planning and implementation process including identification of research problem and formulation of research questions, literature review, data collection and data analysis methods, and dissemination of research findings. Also included is an emphasis on the use of appropriate statistical package to analyze descriptive and inferential statistics.

Credits: 3 Units

GMB 6230 Global Experience

This course provides exposure to timely issues in global business growth and development. It also provides you an invaluable asset of on-site learning, and application of global business concepts to real-life situations around the world.

Credits: 3 Units

GSE: Global Social and Sustainable Enterprise

GSE 6010 Global Social and Sustainable Enterprise

Global Social Sustainable Enterprise provides a critical introduction to the pervasive sustainable global economic challenges of our day: poverty, environmental degradation, and public health. Students examine the role of innovation and entrepreneurship in private and public sector approaches.

Students form themselves into teams to start social business ventures to tackle their chosen global challenge and find and implement business solutions.

Prerequisites: None

Credits: 3 Units

GSE 6030 Development of Social Sustainable Enterprises

Development of Social Sustainable Enterprise focuses on the development and management of the early stage new ventures that students formed in GSE 6010. Students create a business plan for their business startups and further examine social entrepreneurship and sustainable business strategies. Students learn to recognize and analyze economic and institutional sources of social and environmental problems and the transformation necessary to eliminate those underlying conditions with special attention to the role of entrepreneurs in resolving market failures.

Prerequisites: GSE 6010

Credits: 3 Units

GSE 6040 Sustainable Enterprise Funding and Evaluation

Sustainable Enterprise Funding and Evaluation delves into evaluation and funding of triple bottom line enterprises: people, planet, and profit. During the courses, students will complete their business startup business plan that started in GSE 6010 and continued into GSE 6030 with added attention to their entity's approach to evaluation and funding. Students learn how to finance new business startups and the financial consequences of various business model choices for new ventures and, inasmuch, create appropriate fundraising strategies for social and sustainable ventures.

Prerequisites: GSE 6010

Credits: 3 Units

GSE 6890 Project Practicum

During the Project Practicum, students expand upon their startup business venture that provides a solution or solutions to the student's chosen global challenge. The fieldwork involves research, implementation planning, and hands-on experience for student ventures. Students apply classroom skills and knowledge to fieldwork involving enterprise creation and business development while demonstrating the ability to plan and execute a substantial project. The final project will comprise extensive research on the industry and strategy from primary and secondary sources put together into a thoroughly researched comprehensive business plan.

Prerequisites: BUS6220, GSE 6040

previously or concurrently

Credits: 3 Units

GSE 6850 A GSSE Project I

The aim of this course is the development of a cogent project proposal, pilot study and field work (data collection) under supervision. Project proposals may include library or empirical research or analysis and written report on the social entrepreneurship aspects of an appropriate business organisation (private, not for profit organisation or government organisation)

Prerequisite BUS 6220

Credit: 3 units

(Grading - Credit/No credit)

GSE 6850 B GSSE Project II

This course focuses on data analysis, report writing and submission of approved project report under supervision. Final projects may include library or empirical research or analysis and written report on the social entrepreneurship aspects of an appropriate business organisation (private, not for profit organisation or government organisation)

Prerequisite GSE 6850 A

Credit: 3 units

(Grading: Letter Grade)

HRM: Hotel and Restaurant Management

HRM 1020 Kitchen Organisation and Food Knowledge

Introduces students to the development of culinary practices exposing them to effective kitchen organisation, equipment and their uses, knowledge of various foods and their quality specifications, and how such foods should be handled and stored before the production process.

Credit: 3 Units

HRM 3010 Food and Beverage Cost Control

Equips the students with the knowledge and skills that will enable them to interpret and provide solutions to food and beverage control problems.

Prerequisite: HRT1010

Credit: 3 Units

HRM 3015 Hotel and Catering Law

An introduction to the laws of Kenya, Hotel and Catering Law, consumer protection, law of contract, labour laws and industrial relations. Enlightens the students on the rights of the hospitality organisations, the rights of the consumers, the rights of the employees in the organisation and the rights of the owners of the organisation.

Prerequisite: BUS 3010

Credits: 3 Units

HRM 3020 Catering Management

This course concentrates on the understanding of food and beverages and how they should be served. It requires a good understanding of the different types of cookery, cutlery, glassware and silverware and how they should be set on the table given sample menus. The student will also learn the different service styles, and functions.

Prerequisites: HRT1010 and HRM1020

Credits: 3 Units

HRM 3025 Physical Plant Development and Maintenance

Makes the students appreciate the importance of knowing the physical layout of catering units, management of sewer systems and plumbing systems, utilities and other equipment. Gives ideas on hotel/ catering operations in relation to the environment and an understanding of preventive maintenance practices.

Prerequisite: HRT 1010

Credits: 3 Units

HRM 3030 Environmental Management for Hotels

Focuses on hotel environmental systems, material and waste management, and energy and water conservation in hotels. Also covers indoor environmental management, pesticides and herbicides, and how to deal with hazardous materials.

Prerequisite: HRT 1010

Credits: 3 Units

HRM 3035 Beverage and Bar Service Management

This course deals with the management of beverages within the hospitality industry context. The course provides students with a history of beverages within the industry as well as knowledge of products, facilities, regulations and mixology. Students will gain knowledge of the wine industry vitification methods, spirits, along with bar service including alcoholic and non-alcoholic beverages. Barista skills will be included to ensure students gain an overall knowledge of running and servicing a bar operation.

Prerequisites: HRT1010 & HRM3020

Credit: 3 Units

HRM 3040 Hygiene and Nutrition

This course covers personal hygiene, food hygiene, and sanitation. It includes handling and storage of foodstuffs, processing of foodstuffs, the nutritional values of foods and related diseases.

Prerequisite: HRT 1010

Credits: 3 Units

HRM 3045 Advanced Food Production

This course prepares students to effectively work in various types of Kitchens. Students learn how to plan, cost and prepare a wide variety of dishes under hygienic conditions. During training the students undergo extensive practical training at Safari park Hotel. The course also includes a compulsory 60 hour attachment at Safari park Hotel.

Prerequisite: HRT1010, HRM1020 & HRT2010

Credit: 3 Units

HRM 3050 Hotel and Restaurant Managerial Accounting and Finance

The application of accounting and finance principles to the hospitality industry; special purpose journals and ledgers, analysis and interpretation of financial statements, ratio analysis, internal control and cost management.

Prerequisite: ACT 1010

Credits: 3 Units

HRM 4010 Restaurant Development and Operations

Provides students with the fundamentals of restaurant concept development to enable them plan and develop an integrated approach for a "new restaurant" concept. Enables the students to review and integrate the key elements of a successful restaurant start-up, including; concept, marketing plans, financial projections, menu, equipment, and human resources.

Prerequisite: HRT 1010

Credit: 3 Units

HRM 4015 Food and Beverage Management

An advanced course that covers all aspects of food and beverage management, including: Management of quality, the service and its marketing; financial aspects, purchasing process, preparation methods and control systems.

Prerequisite: HRM 3020

Credits: 3 Units

HRM 4020 Front Office Management

Designed to cover the organisation of different hotels' front office department; the duties and the responsibilities of the front office personnel; various front office equipment and records; various reservation systems and the check-in, check-out procedures. It also covers the different communication systems in the hotels.

Prerequisite: HRT 1010

Credits: 3 Units

HRM 4025 Hotel Information Systems

Covers the reservation procedures, guest check-in and checkout, posting of charges, settlement management, and room status management in a hotel, end of the day auditing, guest history, ledger management, credit accounts and generation of management reports.

Prerequisite: IST1010, HRM 4020

Credit: 3 Units

HRM 4030 Housekeeping and Laundry Management

Provides students with the basics of housekeeping and laundry organisation charts in different hotels, standards and working procedures of the housekeeping and laundry departments, room status control systems, purchasing procedures of housekeeping and laundry equipment and materials and their inventory procedures.

Prerequisite: HRT1010

Credits: 3 Units

IBA: International Business Administration

IBA 4010 International Business Operations

Introduction to world business environments, financial transactions, and international marketing. The role of the multinational enterprise is explored, including emerging trends and issues related to international management.

Prerequisite: MKT 3010; FIN 3010

Credit: 3 Units

IBA 4020 International Economics and Trade

Study of open and closed economies, trade regimes, and regional trade agreements. Includes analysis international finance and capital flows.

Prerequisite: ECO 1020; FIN 3010; IBA 4010

Credit: 3 Units

IBA 4910 International Business Internship

Directed internship in a private firm, a not-for profit organisation or a government agency for experience in the practical application of international business. A range of 200 – 4000 hours required depending on the organisation.

Credit: 3 Units

IBA 4950 International Senior Project

Independent study under the direction of a faculty member. Projects may include library or empirical research, analysis and written report on the management aspects of an appropriate international business organisation (private firm, government agency, not-for-profit organisation).

Prerequisite: IBA 4010 or Senior Standing

Credit: 3 Units

IBA 6020 Transnational Strategic Management

Addition of new transnational dimensions to the core technology of strategic management. Included are: the transnational environment; aggressiveness of transnational strategy; responsiveness of transnational general management capability; responsiveness of transnational functional capability; and strategy issues in transnational environments such as strategic information, societal strategy, technology, and competitive strategy. *Prerequisite: BUS 6020*

Credit: 3 Units

LED: Leadership

LED 7000 Strategic Leadership and Change Management

This course examines the environmental forces and processes influencing organisational change and how these influences affect the strategies, structures and contexts within which contemporary organisations operate. It examines leadership from three perspectives.

The first is the nature of leadership examining examples of leadership style and decision making. The second covers the linkages and differences between leadership and management. The third profiles leaders and the characteristics associated with leadership. The course deals with topics as varied as leadership styles, good and bad leadership, and how leaders make decisions and solve problems.

Credit: 3 Units

LED 7010 Seminar in Leadership and Change Management

This course focuses on the theoretical and practical use of Leadership and agents of change. The course provides students with theory and application from the individual and organisational perspective to conduct doctoral research and/or participate in leadership activities. The workplace is analyzed for its adaptation to manage change, define its culture, utilize group dynamics and team building, integrate Leadership practices and theories, and create leadership potential.

Credit: 3 Units

Online Master of Business Administration (MBA)

MBA 6000: Organisational Behaviour

The major purpose of this course is to equip the students with skills, knowledge and attitudes necessary for effective understanding, analysis and management of organisational behaviour. Students will examine how personality, motivation, communication, leadership style, power, conflict, and organisational culture affect productivity and personal satisfaction. The course also examines the concepts, processes and managerial skills that are needed in motivating, leading, and managing our increasingly more diverse work force. The course helps in developing problem solving and decision making techniques in the world of managing people and developing our interpersonal skills.

Credit: 3 Units

MBA 6010: Managerial Marketing

Marketing Management is the art and science of choosing target markets and getting, keeping, and growing customers through creating, delivering, and communicating superior customer value. Marketing management seeks to meet organisational objectives by effectively satisfying customers in a dynamic environment. This course provides an overview of marketing processes and marketing principles, and provides students with the opportunity to apply the key concepts to practical business situations.

Credit: 3 Units

MBA 6020: Strategic Human Resource Management

The course will equip the students with knowledge, skills, strategies, attitudes and values necessary

for effective management of human resources in a dynamic business environment.

Credit: 3 Units

MBA 6030: Legal Environment of Business

The course does not discuss in any great amount of detail the public law rules, which govern trade between states; rather it concerns itself with the private law rules of international trade that a business-person is more likely to encounter. It surveys almost the whole field of international trade, and focuses thought and attention on essential features of practical importance. As the focus is on explaining the law to non-lawyers, the course will not dwell on statutes, case law or legal analysis, except when it is strictly necessary. However, in some instances recourse to the aforementioned is inevitable, particularly when explaining certain legal concepts. In such instances, the course facilitator will provide necessary guidance.

Credit: 3 Units

MBA 6040: Managerial Finance

The course seeks to provide some of the basic managerial megatrends, concepts, theories and tools required by financial managers to efficiently and effectively conduct their financial decision. Principally, these decisions are concerned with the investment, financing, dividend and working capital that are undertaken for the maximization of shareholders' wealth. By making and implementing informed investment and financing and working capital decisions, a firm's financial health is enhanced. The course will integrate investment, financing and reward systems in a strategic fashion. The overall course will deepen and widen the student's rational and creative thinking

Credit: 3 Units

MBA 6050: Leadership and Business Ethics

The major purpose of this course is to equip the students with skills, knowledge and attitudes necessary for effective leadership and ethics in a dynamic and multicultural environment. Course Introduction and Overview of Leadership Concepts; Leadership Traits, Behavior and Ethics; Contingency Leadership Theories and Approaches/Models;

Leadership Motivation and Influencing: Power and Organisational Politics; Team Leadership, Effective Communication, Delegation and Conflict Management; Charismatic and Transformational Leadership Theories and Approaches The Role of Transformational and Strategic Leadership in the Management of Change; Ethical Issues and Ethical Philosophies in Ethical Decisions Making; Individual and Organisational Factors Influencing Ethical Behavior; Corporate Social Responsibility and Ethics; Corporate Governance and Ethics

Prerequisite: MBA 6000

Credit: 3 Units

MBA 6060: Managerial Accounting

The course seeks to provide some of the basic managerial megatrends, concepts, theories and tools required by financial managers to efficiently and effectively conduct their financial decision roles. Principally, these decisions are concerned with the investment, financing, dividend and working capital that are undertaken for the maximization of shareholders' wealth. The course culminates in establishing the financial health of a firm through the use of financial analysis, investment tools, capital structure and subsequent financial reengineering financing, dividend and working capital. The course will portray these issues irrespective of the managerial background of the student. The overall course will deepen and widen the student's rational and creative thinking

Credit: 3 Units

MBA 6070: Managerial Economics

The purpose of this course to expose the students to a rigorous foundation in microeconomics, game theory and industrial organisation. Its main objective is to develop students' capacity to analyze the economic environments in which business entities operate and understand how managerial decisions can vary under different constraints that each economic environment places on a manager's pursuit of his/her goals. Its focus will be on analyzing the functioning of markets, the economic behavior of firms and other economic agents under various market structures, and the economic and social implications of the outcomes.

Credit: 3 Units

MBA 6080: STRATEGIC MANAGEMENT

An introductory course that provides an overview of the economic, cultural, psychological, sociological, technological, and political aspects of the global environments confronting environment serving organisations; the concept of environmental turbulence; the nature of strategic and operational work; formulation of mission, goals, objectives, strategy; environment serving organisations; strategic aggressiveness and capability at different turbulence levels; and strategic diagnosis.

Credit: 3 Units

MBA 6090: Management Information Systems

This course is designed to enable students to gain the perspectives and abilities that they will need to manage organisations in what is increasing being known as the information age. It will entail a study of systems used to accumulate, classify, and organize information to facilitate managerial decision making. Course emphasis is placed upon the upper-level managerial considerations associated with the development, deployment, and use of information systems.

Credit: 3 Units

MBA 6100: Operations Management

The main purpose of this course is to equip the students with operations management knowledge and skills such as productivity, strategy, forecasting, quality control, inventory control, scheduling and tools for decision making.

Credit: 3 Units

MBA 6110: Business Statistics

This course aims at equipping students with a strong statistical base in solving decision-making problems especially those which involve numerical data; and effective communication of statistical analysis. Students will also familiarize themselves with the statistical software specifically, SPSS/ Excel, and utilizing a number of datasets measuring real business activities.

Credit: 3 Units

MBA 6120: Business Research Methods

The course is designed to review research methodology in business management context. It examines research planning and implementation process including, identification of research problem and formulation of research questions, literature review, data collection and data analysis methods, and dissemination of research findings. Emphasis is placed on quantitative research designs, scientific methods and business research ethics. The major purpose of the course is to develop a viable research project proposal on a relevant business management topic.

Prerequisite: MBA 6110

Credit: 3 Units

MBA 6130: Research Project 1

The course is designed to review research methodology in business management context. It examines research planning and implementation process including, identification of research problem and formulation of research questions, literature review, data collection and data analysis methods, and dissemination of research findings. Emphasis is placed on quantitative research designs, scientific methods and business research ethics. The major purpose of the course is to develop a viable research project proposal on a relevant business management topic.

Prerequisite: MBA 6110 & MBA 6120

Credit: 3 Units

MBA 6131: Research Project 2

This course seeks to facilitate data collection, data analysis methods, and dissemination of research findings.

Prerequisite: MBA 6110 & MBA 6120

Credit: 3 Units

HLM: MBA Health Leadership and Management

MBA 6000: Organizational Behaviour

The major purpose of this course is to equip the students with skills, knowledge and attitudes necessary for effective understanding, analysis and management of organizational behaviour. Students will examine how personality, motivation, communication, leadership style, power, conflict, and organizational culture affect productivity and personal satisfaction. The course also examines the concepts, processes and managerial skills that are needed in motivating, leading, and managing our increasingly more diverse work force. The course helps in developing problem solving and decision making techniques in the world of managing people and developing our interpersonal skills.

Credit: 3 Units

MBA 6010: Managerial Marketing

Marketing Management is the art and science of choosing target markets and getting, keeping, and growing customers through creating, delivering, and communicating superior customer value. Marketing management seeks to meet organizational objectives by effectively satisfying customers in a dynamic environment. This course provides an overview of marketing processes and marketing principles, and provides students with the opportunity to apply the key concepts to practical business situations.

Credit: 3 Units

MBA 6020: Strategic Human Resource Management

The course will equip the students with knowledge, skills, strategies, attitudes and values necessary for effective management of human resources in a dynamic business environment.

Credit: 3 Units

MBA 6030: Legal Environment of Business

The course does not discuss in any great amount of detail the public law rules, which govern trade between states; rather it concerns itself with

the private law rules of international trade that a business-person is more likely to encounter. It surveys almost the whole field of international trade, and focuses thought and attention on essential features of practical importance. As the focus is on explaining the law to non-lawyers, the course will not dwell on statutes, case law or legal analysis, except when it is strictly necessary. Credit: 3 Units

MGT: Management

MGT 3010 Overview of Management Practice

Examination of management processes, structure and behavior, focusing on the changing nature of management in response to turbulent internal and external environments; various theories are integrated into applied dimensions of successful business practices; emphasis on global management perspectives. (WI)

Prerequisite: BUS 1010

Credit: 3 Units

MGT 4010 Dimensions of Leadership and Management

Multidisciplinary perspectives on the role of leadership and management in society; review of the differences and similarities between leadership and managerial mindsets and behavior; the theoretical and applied aspects of leadership and management in social, cultural, and organisational contexts; the motivation of people and the role leaders and managers play in creating quality of work life and enhanced productivity.

Prerequisite: MGT 3010

Credit: 3 Units

MGT 4020 Organisations and Organisational Behavior

Introduction to the concept of the business entity as an environment serving organisation (ESO) with economic and social responsibilities; explores organisation structures, systems, staffing and management processes; covers theoretical and applied aspects of behavior in organisations, including organisational change and development.

Prerequisite: MGT 3010

Credit: 3 Units

MGT 4030 Cross-Cultural Management

Examines the challenges and opportunities of managing cultural diversity in organisations with emphasis on the transnational enterprise; introduces phenomena of globalization, culture

and organisational cultures, and cultural synergy; develops intercultural awareness and strategies for hedging cultural gaps.

Prerequisite: MGT 3010

Credit: 3 Units

MGT 4040 Human Resource Management

A study of the theoretical and practical aspects of human resource management including job analysis and design, recruiting, retention, training, appraisal, and compensation systems and employee health and safety; emphasis on contemporary issues such as changing governmental and legal requirements, increasing demands for more highly skilled workers and international competition. **Prerequisite:** MGT 3010

Credit: 3 Units

MGT 4050 Total Quality Management

A study of philosophical and conceptual

approaches to quality management espoused by leading theorists and practitioners such as Demming, Juran, and Crosby. Practical aspects of TQM theory, and an introduction to a framework for developing, implementing, and continuously improving upon an organisational quality culture.

Prerequisite: MGT 3010

Credit: 3 Units

MGT 6010 Human Resource Management

A study of the theory and practice of human resource management in relation to the challenges and opportunities facing the firm in today's rapidly changing, globally oriented, and highly competitive environment. The course focuses on strengthening employee- management relations and creating a productive work environment. Major topics covered include job analysis, staffing, training and development, performance appraisal, compensation management, labour relations, workplace safety and health. Also included is a discussion on managing human resources in an international business.

Credit: 3 Units

MGT 6020 Human Resource Development

The course examines effective human resource development (HRD) practices as a key factor in today's dynamic and competitive business environment. Topics covered include the role and structure of HRD function; employee training, education, and development; systematic approach to training process including needs assessment, planning, implementation and evaluation; training methods and techniques; adult learning process and principles; costing training programs and services. Also included is an emphasis on contemporary issues in HRD such as increased globalization and development of a learning organisation.

Prerequisite: MGT 6010

Credit: 3 Units

MGT 6030 Labour Relations Management

A study of the theoretical and practical aspects of labour relations management in a changing business environment including factors influencing effective employee- management relationships, the role of labour unions; collective bargaining process; conflict management and negotiation; employee discipline and counselling. Also included is an emphasis on labour laws and regulations regarding employment, labour disputes, compensations, wages, retirement benefits, and industrial training.

Prerequisite: MGT 6010

Credit: 3 Units

MGT 6850 A Management Project I

The aim of this course is the development of a cogent project proposal, pilot study and field work (data collection) under supervision. Project proposals may include library or empirical research or analysis and written report on the human resource management aspects of an appropriate business organisation (private, not for profit organisation or government organisation)

Prerequisite: BUS 6220

Credit: 3 units

(Grading - Credit/No credit)

MGT 6850 B Management Project II

This course focuses on data analysis, report writing and submission of approved project report under supervision. Final projects may include library or empirical research or analysis and written report on the human resource management aspects of an appropriate business organisation (private, not for profit organisation or government organisation)

Prerequisite: MGT 6850 A

Credit: 3 units

(Grading: Letter Grade)

MGT 7000 Global Strategic management

This course examines new transnational dimensions to the core technology of strategic management and includes the transnational environment; aggressiveness of transnational strategy; responsiveness of transnational general management capability; responsiveness of transnational functional capability; and strategy issues in transnational environments such as strategic information, societal strategy, technology and competitive strategy.

Credit: 3 Units

MGT 7010 Seminar in Strategic Management

This course is designed to study strategy and related issues that affect the success of the entire organisation. This course introduces the theory and tools of critical and effective strategic analysis, and thinking. It concentrates on current theoretical and empirical research relating to emerging areas of knowledge in the strategic management field. It reflects the emphasis of current research on strategic and organisational phenomena.

Credit: 3 Units

MKT: Marketing

MKT 3010 Principles of Marketing

An introduction to the study of the marketing function in the business enterprise. A study is made of market segmentation and the creation of market demand to serve profitably the needs of customers. The key elements in marketing strategy are studied - product planning and promotion - with customers and competitors as dominant reference points. (ILI, WI)

Prerequisite: BUS 1010

Credit: 3 Units

MKT 3020 Marketing Information Systems

This course equips the students to understand marketing projects and functions using computer technology. The students are introduced to marketing decision support systems for tasks as product pricing, distribution choices, promotion planning.

Prerequisites: IST 2040 and MKT 3010

Credit: 3 Units

MKT 4010 International Marketing

An analysis of key international marketing activities and functions. Topics include environmental constraints, exporting, international product planning, and international selling and advertising. The various concepts are integrated through the development of a complete international plan for the marketing of a product in another country.

Prerequisite: MKT 3010

Credit: 3 Units

MKT 4020 Marketing Research

Examine marketing research information as an information-providing activity for the purpose of management decision making. Provides an understanding of what marketing research is, what kinds of information it can provide, and how it is used by marketing managers.

Prerequisite: MTH 2210, MKT 3010

Credit: 3 Units

MKT 4030 Marketing Communications and Buyer Behavior

Examines methods that organisations use to communicate with customers and prospects, including personal selling, advertising, sales promotion, public relations, and other forms of promotion. Evaluates the characteristics of each form of promotion in varying marketing situations for formulating communications strategies and tactics.

Prerequisite: MKT 3010

Credit: 3 Units

MKT 4040 Global Marketing Strategy

Investigates marketing techniques and programs as developed and implemented on an international scale. Evaluates international marketing strategies, special goals, and decision-making processes that are part of marketing internationally.

Prerequisite: MKT 3010

Credit: 3 Units

MKT 4050 Services Marketing

An examination of the unique aspects of services. Study of the role of the marketing manager and the service/sales team's responsibility to develop and implement market plans as part of the corporation's strategic and operational plan.

Prerequisite: MKT 3010

Credit: 3 Units

MKT 6000 Managerial Marketing

Focuses on the necessary skills to be an effective global marketing manager including analytical decision-making tools that apply to managerial aspects of the marketing functions and tasks. The course will address the skills needed to be a persuasive oral and written communicator of corporate marketing information

Credit: 3 Units

MKT 6010 Marketing Communications Strategy

Examination of strategies that organisations use to communicate with customers and prospects, including personal selling, advertising, sales promotion, public relations, and other forms of promotion. Focuses on managerial aspects of communications design, development, and appraisal, and on decisions made to stimulate demand and develop total marketing communications programs.

Prerequisite: MKT 6000

Credit: 3 Units

MKT 6020 Marketing Research

Examination of marketing research information as an information providing activity for the purpose of management decision making, alternative research designs and their relative strengths and weaknesses; and the major types of measurement techniques and data collection methods.

Prerequisites: BUS 5090; MKT 6000

Credit: 3 Units

MKT 6040 Global Marketing Strategy

Investigation of marketing techniques and programs as developed and implemented on a global scale, the extent of standardization of marketing programs across several countries; and the selection of appropriate entry strategies for foreign markets.

Prerequisites: BUS 5080; MKT 6000

Credit: 3 Units

MKT 6050 Information Systems Applications in Marketing

The course covers various aspects of designing information systems so as to make marketing decisions. It also covers aspects of planning and designing the marketing information systems to leverage company wide data from other functional areas in order to efficiently create competitive advantage.

Credit: 3 Units

MKT 6850 A Project I

The aim of this course is the development of a cogent project proposal, pilot study and field work (data collection) under supervision. Project proposals may include library or empirical research or analysis and written report on the marketing aspects of an appropriate business organisation (private, not for profit organisation or government organisation)

Prerequisite BUS 6220

Credit: 3 units

(Grading- Credit/No credit)

MKT 6850 B Project II

This course focuses on data analysis, report writing and submission of approved project report under supervision. Final projects may include library or empirical research or analysis and written report on the marketing aspects marketing aspects of an appropriate business organisation (private, not for profit organisation or government organisation)

Prerequisite MKT 6850 A

Credit: 3 units

(Grading: Letter Grade)

MOD: Master of Science in Organisational Development

MOD 6000 Managerial Accounting for Non Accountants

The study of managerial accounting principles including foundations of accounting and managerial uses of accounting data in cost analysis, planning, decision-making, control and performance measures.

Credit: 3 Units

MOD 6010 Organisational Theory and Behavior

Inquiry into individual behavior in organisations, group dynamics in organisations and organisational processes. Topics include organisation behavior theories and approaches; diversity and management across cultures; individual differences and values; group dynamics and decision making; leadership and effective communication; and organisational change; practical application, individual research and case studies are emphasized.

Credit: 3 Units

MOD 6020 Strategic Management in Profit and Non-Profit Organisations

This course explores the issues of defining corporate mission, objectives, and goals. Participants focus on the analysis of the firm's external and internal environment to identify and create competitive advantage in a global context. The course emphasizes the cultural, ethical, political, and regulatory issues faces any global business environment and the need for leadership for a successful management of strategic change.

Credit: 3 Units

MOD 6225 Organisational Development Research Statistics

This course has three objectives: to bridge the gap between the MBA core and more advanced statistical methods courses, to cover applied aspects of the multiple regression model, and to learn effective communication of statistical analysis. Emphasis will be on applying this material in managerial settings,

rather than the underlying mathematics, so all techniques will be illustrated with applications.

Credit: 3 Units

MOD 6030 Leadership and Management of Change

A study of the dynamics of transformation leadership and management of change in environment serving organisations. Included are: the nature and characteristics of transactional and transformational leadership; relationships of power, authority and responsibility to leadership effectiveness including conflict management, ethics, decision making, risk propensity and change introduction; dynamic relationship between environment, leadership style and change strategies; the nature of change; and the relationships between power, and the roles of the change agent and the change manager. The course provides hands-on problem solving activities, augmented by case studies and individual research.

Credit: 3 Units

MOD 6035 Organisational Leadership & Ethics

The course provides an in-depth study and analysis of corporate governance. The course focuses on the key aspects involved in steering organisations forward in dynamic/turbulent environments including transformation leadership, strategic leadership, culture, values and ethics; and strategic management of change.

The course focuses on individuals as leaders, team leadership and organisational leadership and also on the management of Boards, ethical orientation in management, and culture.

Credit: 3 Units

MOD 6040 Strategic Human Resource Management

A study of the theory and practice of strategic human resource management in relation to the challenges and opportunities facing organisations in today's rapidly changing, globally oriented, and highly

competitive environment. The course focuses on key aspects of managing human resources in domestic and multinational organisations, emphasizing the link between human resource policies and practices and organisational strategy. Topics include human resource planning, job analysis, staffing, the legal environment, training, performance appraisal, compensation, employment relations, health and safety, labour relations, and recent developments and future trends.

Credit: 3 Units

MOD 6045 Organisation Development Economics

The purpose of this course is to expose the learner to the decision making processes in organisations by equipping them with skills and knowledge which prepare and enable them to effectively undertake decision-making at managerial level. It is an applied economics course designed to explore widely accepted theories about organisational activities.

Credit: 3 Units

MOD 6050 Program Management and Fundraising

This course is meant to equip students with program management, fundraising and proposal writing strategies in non-profit organisation. The course will introduce students to the essentials of project management and the project life cycle including project identification, planning, implementation and evaluation. Topics include: project charter, network diagramming, scope management, stakeholder identification, cost management and scheduling.

The course will explore fundraising and grant writing knowledge including but not limited to the following: identifying fundraising needs and goals; designing a viable fundraising program (campaign); creative fundraising activities; grant writing; understanding grant requirements and their relationship to the non-profit organisations.

Credit: 3 Units

MOD 6060 Business Ethics and Corporate Social Responsibility

The course examines the relationship of values, ethics and corporate social responsibility within the global business environment and the ability of leaders and managers to respond effectively to society and ethical issues. Included are: the dimensions of culture and ethical behavior; corporate social responsibility models and approaches; arguments for and against corporate social responsibility; codes of ethics and governance structures.

Addresses the development and implementation of corporate social responsibility strategies and programs in multicultural environments.

Credit: 3 Units

MOD 6070 Organisation Development and Consulting

The course provides overview of organisational development (OD) as a planned process of change and the role of OD practitioner or consultant as a change agent. It focuses on the major elements of OD process including entry and contracting, diagnosis, action planning, intervention and evaluation. Heavy emphasis is placed on diagnosis and diagnostic techniques as well as OD interventions including human process, technological, and human resource management interventions. The course provides hands-on diagnostic activities, augmented by case studies and individual research.

Credit: 3 Units

MOD 6075 Conflict Management

This course focuses on managing disputes in the profit and nonprofit sectors. It explores practical dispute resolution processes and procedures in the context of transformational and situational leadership. Skills are developed to enhance analysis of complex conflict and dispute situations. Conflict resolution policies and procedure formulation in an organisation are also discussed.

Credit : 3 Units

MOD 6080 Business Analysis

The course provides a critical view of organisational processes and strategies in the present and future by use of analytical techniques such as forecasting, financial and gap analysis. Using case studies, the course presents the multi-disciplinary view of the organisation with an emphasis on problem identification, solving and implementation of the identified solutions.

Credit: 3 Units

MOD 6220 Organisation Development Research Methods

The course is designed to review research methodology associated with various types of projects and statistical analysis. Examines research planning and implementation process including, identification of research problem and formulation of research questions, literature review, data collection and data analysis methods, and dissemination of research findings. Emphasis is placed on action research, survey, and case study research designs and evaluations methods. Also included is an emphasis on the use of appropriate statistical package to analyze descriptive and inferential statistics. The major objective is to develop a project proposal on a relevant organisational development topic.

Credit: 3 Units

MOD 6225 Organisational Development Research Statistics

This course has three objectives: to bridge the gap between the MBA core and more advanced statistical methods courses, to cover applied aspects of the multiple regression model, and to learn effective communication of statistical analysis. The course begins with a review of descriptive statistics, hypothesis testing and confidence intervals, and then focuses on the multiple regression model. Topics include model formulation and assumptions, residual analysis, diagnostics, transformation, model selection, collinearity and inference. Emphasis will be on applying this material in managerial settings, rather than the underlying mathematics, so all

techniques will be illustrated with applications. Computations will be done primarily with Microsoft Excel and SPSS.

Credit (3 Units)

MOD 6850 A Organisational Development Project I

The aim of this course is the development of a cogent project proposal, pilot study and field work (data collection) under supervision. Project proposals may include library or empirical research or analysis and written report on the leadership/management/finance/marketing/entrepreneurship aspects of an appropriate business organisation (private, not-for-profit or government organisation)

Prerequisite MOD 6220

Credit: 3 units

(Grading - Credit/No credit)

MOD 6850 B Organisational Development Project II

This course focuses on data analysis, report writing and submission of approved project report under supervision. Final projects may include library or empirical research or analysis and written report on the leadership/ management/finance/marketing/ entrepreneurship aspects of an appropriate business organisation (private, not-for-profit or government organisation)

Prerequisite MOD 6850 A

Credit: 3 units

(Grading: Letter Grade)

Chandaria School of Business Faculty Profiles

Bellows, Scott J.

Assistant Professor of Management

B. A. Economics, Management, Delaware, Ohio, USA, MBA- Cleveland, Ohio, USA, MBA- Chicago, Illinois, USA, Master Science, New Orleans, Louisiana, USA, Doctor of Business Administration, University of Durham, UK;

Bwire, Albert Camus

Assistant Professor of Finance

PhD Finance - Moi University, MSc Finance -University of Strathclyde in Glasgow
BSc Accounting- Oxford Brookes, Associateship in Banking - Chartered Institute of Bankers-London (ACIB),
Fellow of the Association of Chartered Certified Accountants (FCCA)
Specialty areas: Banking and Finance

Gatumo, Francis Mambo

Assistant Professor of Finance

B. Commerce, University of Nairobi; MBA, York University (Canada); CPA (K); CPS (K); DBA California Miramar University;
Specialty areas: International Finance and Investments

Getecha, Ciru

Assistant Professor of Management

B.A; M.A. (Management Studies), University of Leeds (UK).
Specialty areas: Leadership, Strategic Management, Cross Cultural Management;

Githaiga, Stephen, PhD.

Assistant Professor of Finance

Gitahi, Jesse, PhD.

Assistant Professor of Finance and Accounting

Kalunda, Elizabeth Nthambi

Associate Professor of Finance

B.Ed. (Home Science and Technology), MBA, Ph.D. (Business Administration), University of Nairobi,

Kenya; CPA (K);

Specialty areas: Finance, Accounting

Kaluyu, Veronica Kaindi

Assistant Professor of Strategic Management

B.Ed. Kenyatta University, ABE, Post Graduate Diploma, MBA, Jomo Kenyatta University of Agriculture and Technology, M.Ed. Egerton University, Ph. D. Kenya Methodist University.
Specialty Areas: Strategic Management, Human Resource Management & Project Management

Kamau, Joseph Ngugi

Associate Professor of Marketing

B.Sc., Jomo Kenyatta University of Agriculture and Technology; MBA, Marketing Management (University of Nairobi); MBA, Human Resource Management (Kenyatta University); Ph.D. Business Administration and Management (Entrepreneurship); Kenya Methodist University; Specialty areas: Business Administration, Management and Marketing Management.

Katuse, Paul

Associate Professor of Strategic Management

B.Com, M.Com – BA (Marketing), Ph.D in Strategic Management. Mohanlal Sukhadia University, India.
Specialty areas: Strategic Management, Management of Change and Marketing

Kangu Maureen Adhiambo

Assistant Professor of Marketing

B.Ed. University of Nairobi, MBA, Egerton University, Ph.D., Jomo Kenyatta University of Agriculture & Technology
Specialty Areas: Marketing, Business Communication & Strategic Management

K'Aol, George Ondego

Professor of Management

B.Ed., University of New Brunswick, Canada; M.Ed., Ph.D., Entrepreneurship and Human Resource Development; University of Illinois, USA.
Specialty areas: Entrepreneurship,

Total Quality Management, Management of Technological Innovations and Human Resource Management.

Kihara, Allan Samuel N.

Associate Professor of Strategic Management

Ph.D in Strategic Management ---JKUAT, 2. MBA in Strategic Management--- JKUAT, 3. Bachelor of Education (Arts) Mathematics and Business Studies- Kenyatta University

Kiriri, Peter Ndung'u

Professor of Marketing

B.Com. University of Nairobi; CI (UK); DBA, Australia. Specialty areas: Management, Services Marketing, Research, Monitoring and Evaluation, Entrepreneurship.

Koshal, Jeremiah Ntaloi_Ole

Assistant Professor of Leadership

B. Commerce, Daystar University; MBA, Ph.D. (Organisational Leadership) Regent University, USA;
Specialty areas: Leadership

Linge, Teresia Kavoo

Associate Professor of Management

B.Ed., University of Nairobi; MBA United States International University. PhD, North West University;
Specialty areas: Human Resource Management and Research Methods.

Muchara, Maina

Assistant Professor of Strategic Management

B. Sc. (Economics), University of London; MBA, United States International University; Ph.D. (Strategic Management), University of Nairobi
Specialty areas: Strategic Management, Total Quality Management, Organisational Behavior

Mbogo, Marion Njeri

Assistant Professor of Accounting and Finance

B. Sc., International Business Administration (Finance) United States International University; M.Sc. International Business Administration

(Finance), United States International University;

Mulindi, Patrick Maringo

Lecturer, Tourism Management

B.A., Columbia College, Missouri (USA); MBA., Victoria University of Technology (Australia).
Specialty Areas: Travel and Tourism Management

Muraguri, Charity Wairimu

Assistant Professor of Strategic Management

B.Ed., Kenyatta University, MBA Strategic Management, University of Nairobi, Ph.D. Kenyatta University. Specialty Areas: Strategic Management.

Musebe, Edward Achieng

Assistant Professor of Strategy and Leadership

BSc. Mechanical Engineering University of Nairobi, MBA Strategic Management, United States International University - Africa, Ph.D. University of Nairobi. Specialty Areas: Strategy and Leadership.

Mutisya, Mary Mumbua

Assistant Professor of Hospitality Management

B.Ed., Kenyatta University, MSc Hospitality & Tourism Management, Kenyatta University, Ph.D. Kenyatta University. Specialty Areas: Hospitality Management & Hospitality Marketing.

Namada, Juliana Mulaa

Associate Professor of Strategic Management

B.A. (History & Government), MBA (Strategic Management), Ph. D. Business Administration - University of Nairobi, Kenya; Specialty Areas: Strategic Management

Ndegwa, Joyce

Assistant Professor of Strategic Management

B.Ed. (Arts), MBA, Ph.D. (Business Administration), University of Nairobi, Kenya; Specialty areas: Strategic Management

Ngari, James Karimi

Associate Professor of General Management

B.A. (Human Resource Management), Kenya

Methodist University; MBA (Finance), Ph.D. (Human Resource Management), Jomo Kenyatta University of Agriculture and Technology, Kenya; Specialty areas: Human Resource Management, Human Resource Development, Leadership, Organisational Behavior;

Njeru, Godwin Kinyua

Lecturer, Hotel and Restaurant Management
B.Ed (Science), Kenyatta University, Kenya; M.Sc (International Hospitality Management), University of Strathclyde, UK; Specialty area: Hotel Management

Njuguna, Amos Gitau

Professor of Finance
Deputy Vice Chancellor Academics, Transformative Teaching, Learning and Research
MBA (Finance) Egerton University. DBA, Nelson Mandela Metropolitan University, South Africa; CPA(K);
Specialty Areas: Accounting and Strategic Financial Management.

Newa, Fred Omondi

Lecturer, International Business Administration
Bachelor of Architecture, University of Nairobi (K), MBA, United States International University-Africa.

Nerubucha, David Wafula

Lecturer, Economics B. Sc. in Agricultural Economics, Wilmington College, USA; M.Sc. in Social and Applied Economics, Wright State University, USA;

Ngui, Thomas Katua

Associate Professor of Human Resource Management and Leadership
PhD Human Resource Management: Jomo Kenyatta University of Agriculture and Technology, Master of Business Administration: Kenyatta University, Bachelor of Education: Kenyatta University, Speciality areas: Human Resource Management, Leadership, Corporate Governance, Research Methods.

Njenga, Kefah Muiruri

Assistant Professor of Organisational

Development

B.Com. Calicut University, India; M.Com (Management), University of Wollongong, New South Wales Australia; Ph.D Bus & Mgt, Royal Ireland Institute of Business & Technology

Nyambegera, Stephen Morangi

Professor of Organisational Development
BA (Management), Bhopal University- India; MBA, Osmania University- Hyderabad, India; M.Ph. (Research Training Program), The University of Sheffield, UK; Ph.D (Human Resource Management and Organisational Psychology), The University of Sheffield, UK.

Odooyo Fredrick Selefano

Assistant Professor of Finance
B.Commerce, Masharshi Dayanand University, India; M.Finance and Control, Alagappa University; M.Commerce, Dr. Bhim Rao Ambedkar University, India, Ph.D. (Accounts & Finance), Guru Nanak Dev University, India;

Oduol, Truphena, PhD.

Assistant Professor of Leadership

Ogada, Agnes Owuor

Lecturer, Finance & Accounting
B.Sc International Business Administration (Accounting), MBA Finance & Strategy, DBA (Finance), United States International University - Africa; CPA (K); Specialty areas: Finance (International, Managerial); Accounting (Cost, Financial, Asset); Investments, Asset Management, Financial Markets;

Omboi, Bernard Messah

Assistant Professor of Finance and Accounting
B. Commerce, M. Commerce (Accountancy & Statistics), Ph.D. (Commerce) Mohanlal Sukhadia University, India; Specialty areas: Accountancy, Research Methods, Finance, Taxation;

Okech, Timothy Chrispinus

Professor of Economics
B.A. (Economics), M.A (Economics), Ph.D (Economics), Kenyatta University. Specialty areas:

Health Economics, International Economics, Public Sector Economics, Macroeconomics, Microeconomics;

Ouma, Caren Akomo

Professor of Management

B.Com. University of Nairobi; MBA University of Nairobi; Ph.D. Cebu Doctors' University, Philippines. Specialty areas: Organisational Development and Transformation; Administration and Management.

Sikalieh, Damary A.Olesi

Professor of Management, Business Research Methods and Entrepreneurship

B.Ed, M.Ed, Kenyatta University, Ph.D, University of Illinois, Urbana- Champaign, USA. Specialty areas: Entrepreneurship education/ development, Business, Social and Academic Research, Human Resource Development, Management, Project Design, Implementation and Evaluation, Curriculum Development and Training Design, Implementation and Evaluation, organisation Behavior and Organisation Development and Consulting

Wachana, Paul

Assistant Professor of Project Management and Implementation

B.Sc. (Agriculture), University of Nairobi, Kenya; Master of Urban and Regional Planning, Master of Science in Economics, Ph.D. (Urban Studies and Economics), Portland State University, USA; Specialty areas: Economics, Urban Studies, Transportation, Real Estate Development, Finance;

Wainaina, Samuel

Lecturer, Accounting and Finance

B.Com & MBA, University of Nairobi. Specialty areas: Management and Cost Accounting, Accounting Theory, Financial Accounting and International Financial Reporting Standards IFRS, Portfolio Management, Risk Management and Derivative Instruments.

Wambalaba Francis Wamukota

Professor of Economics

B.Sc., Economics, B. A. Business Administration, M.Sc (Economics); M. US. (Urban Studies - Regional Structure); Ph.D (Urban Studies - Regional

Science), Portland State University; Speciality areas: Economic Development; Transportation Economics; Managerial Economics; International Economics; Research Methods;

An investment in
knowledge pays the
best interest.

Benjamin Franklin

School of Communication, Cinematic and Creative Arts

Mission Statement

The mission of the School of Communication, Cinematic and Creative Arts (SCCCA) is to advance knowledge through creative endeavors, critical and strategic thinking, and innovative teaching. We strive to foster ethical decision-making and social responsibility in a world that is increasingly technological, multicultural, and globalized.

Geoffrey Serede Sikolia, Ph.D.
Dean, School of Communication, Cinematic and Creative Arts

Mr. Silvester Mutua Kisila James
Chair, Cinematic Arts Department

Phone: +254 730 116 706

E-Mail: sjames@usiu.ac.ke

Ms. Robi Koki-Ochieng
Chair, Media and Communications Department

Phone: +254 730 166 715

E-mail: rochieng@usiu.ac.ke

The School of Communication, Cinematic and Creative Arts is committed to providing high quality programs for students at both the undergraduate and graduate level. It fulfills its mission by providing programs with an international perspective and by emphasizing the importance of science, technology and communication skills to the global community.

Learning Outcomes

1. **Develop competence** in critical thinking, creative skills, use of technology, creativity and good communication skills.
2. **Provide service to the community:** acquire practical working experience through participation and contribution to positive and good community and societal causes.
3. **Demonstrate preparedness for career and lifelong learning** in their chosen disciplines as well as understanding of and appreciation for the interdisciplinary nature of knowledge.
4. **Demonstrate the use of qualitative and quantitative research skills** in communication, cinematic and the creative arts.
5. **Apply theories, concepts, and principles found in communication, cinematic and creative arts**, including a thorough grounding in communication skills in multicultural and global perspectives.
6. Demonstrate thorough understanding of effective, efficient, professional and **ethical leadership**.

Core Values

1. **INNOVATION** - Integration of theory and practice
2. **COMMUNITY** - Multi-disciplinary and interdisciplinary teaching and learning strategies
3. **CREATIVITY** - Mentoring students for professional preparedness
4. **INTEGRITY** - Prepare graduates who are ethically and intellectually aware of the technological advancements in the communication industry.

Course Descriptions

ANM: Animation

ANM 1010: History of Film Animation

Animation is more than moving images—it's a dynamic storytelling medium that has evolved alongside technology, culture, and artistic expression. This course traces the history of film animation, from early experimental techniques to today's digital masterpieces. Students will explore ground-breaking innovations, influential animators, and major industry milestones that have shaped animation into a global phenomenon. By analysing different styles, genres, and cultural influences, students will develop a deep understanding of animation's artistic and societal impact.

Prerequisite: None
Credit: 3 Units

ANM 1020: Fundamentals of Animation

The magic of animation lies in the principles that bring characters and objects to life. In this hands-on course, students will explore foundational techniques such as squash and stretch, anticipation, timing, and easing. Through engaging exercises and projects, they will develop an understanding of movement, weight, and expression—core elements that make animations believable and engaging. By the end of the course, students will have the technical and artistic confidence to create fluid, expressive motion.

Prerequisite: None
Credit: 3 Units

ANM 1030: Introduction to Drawing

Strong drawing skills are essential for any animator. This course introduces students to fundamental drawing techniques, including line quality, shading, perspective, and composition. Through observational drawing, figure studies, and imaginative exercises, students will strengthen their

ability to visualize and construct forms. Emphasis is placed on developing a keen eye for proportion and gesture—critical skills for creating compelling animated characters and environments.

Prerequisite: None
Credit: 3 Units

ANM 1040: Character Design

Great characters aren't just drawn—they are designed with purpose and personality. In this course, students will explore the principles of character design, focusing on anatomy, shape language, proportions, and expression. Through gesture drawing, silhouette studies, and storytelling exercises, students will learn to craft unique and expressive characters that resonate with audiences. By the end of the course, students will have developed a portfolio of original characters suitable for animation, games, and comics.

Prerequisite: ANM 1030
Credit: 3 Units

ANM 1050: Cinema and Television Equipment Workshop

Understanding the tools of visual storytelling is key to producing professional-quality animation and film. This course provides hands-on experience with industry-standard cameras, lighting, sound, and editing equipment. Students will learn essential setup techniques, troubleshooting methods, and best practices for capturing high-quality footage. The course also explores the roles of production crew members, providing a comprehensive understanding of the technical aspects of film and television production.

Prerequisite: None
Credit: 3 Units

ANM 1060: Illustration and Environment Design

A well-crafted world can elevate a story, immersing audiences in rich and dynamic environments. This course focuses on environment design for animation, film, and video games, covering key principles such as perspective, lighting, colour theory, and composition. Students will use both traditional and digital techniques to create realistic and stylized backgrounds that enhance storytelling. Emphasis is placed on how characters interact with their surroundings to create visually engaging narratives.

Prerequisite: ANM 1030
Credit: 3 Units

ANM 1070: The Art of the Storyboard and Animatic Design

Storyboarding is the foundation of animated storytelling, bridging the gap between concept and final production. In this course, students will develop the skills to create detailed storyboards and animatics that effectively convey visual narratives. Topics include shot composition, camera movement, pacing, and storytelling clarity. Students will use industry-standard software to produce animatics (moving storyboards with sound), learning how to refine their timing and presentation. By the end of the course, students will be equipped with essential pre-visualization skills for animation and film.

Prerequisite: ANM 1020
Credit: 3 Units

ANM 2010: Fundamentals of Scripting for Animation

Great animation starts with a compelling script. This course introduces students to the art of writing for animation, covering character development, world-building, and dynamic storytelling. Students will

analyse different script formats used in animation and film while crafting their own engaging narratives. Through practical exercises and peer reviews, they will refine their ability to create scripts that captivate audiences and bring animated worlds to life.

Prerequisite: MTH 1109
Credit: 3 Units

ANM 2020: Introduction to 2D & 3D Animation

This course provides an in-depth exploration of the principles, techniques, and workflows of both 2D and 3D animation. Students will gain hands-on experience with industry-standard software, learning the production pipeline from concept development to final rendering. Emphasis is placed on understanding the differences between 2D and 3D animation while applying best practices for each medium.

Prerequisite: ANM 1020
Credit: 3 Units

ANM 2040: Acting for Animators

Bringing animated characters to life requires an understanding of human movement, emotion, and voice performance. This course helps students develop the skills to direct and animate expressive characters. Topics include voice acting, gesture analysis, and performance techniques that enhance believability. By studying acting fundamentals, students will create more engaging and emotionally compelling animations.

Prerequisite: ANM 1040
Credit: 3 Units

ANM 2050: Camera Language and Cinematography

Visual storytelling in animation relies on effective

camera work and composition. This course teaches students the grammar of cinematography, covering shot types, camera movement, lighting, and scene composition. By analyzing film and animation examples, students will develop the ability to craft visually dynamic and emotionally engaging animated sequences.

Prerequisite: None
Credit: 3 Units

ANM 2055: Introduction to Coding

Coding unlocks creative possibilities in animation and interactive design. This course introduces students to programming using Processing, an open-source language tailored for artists and designers. Students will learn how to generate animations, interactive graphics, and procedural designs, gaining essential coding skills that enhance their creative workflows.

Prerequisite: ANM 1060
Credit: 3 Units

ANM 2070: Theoretical Perspectives in Film and Animation

This course explores the deeper meanings behind film and animation, analysing how they reflect and influence society. Students will engage with critical theories and case studies to understand the cultural, political, and artistic dimensions of visual media. By the end of the course, students will have the analytical tools to assess the impact of animation and film on audiences worldwide.

Prerequisite: ANM 1010
Credit: 3 Units

ANM 2080: Composition and Sound Design for Animation

Sound is a powerful storytelling tool in animation. This course covers the principles of sound composition, sound effects, and music integration. Students will learn how to design and edit audio to enhance animated scenes, ensuring synchronization, mood, and emotional impact. Hands-on projects will help them master the use of industry-standard sound design tools.

Prerequisite: ANM IST1010
Credit: 3 Units

ANM 2090: Theories of Popular Media and Art

Focusing on contemporary media theories, this course examines the evolving relationship between digital media, films, and popular culture, particularly in Africa. Students will explore how media consumption and production are influenced by cultural, technological, and economic factors, gaining insights into the shifting landscape of modern storytelling.

Prerequisite: None
Credit: 3 Units

ANM 3000: Fundamentals of Compositing

Compositing blends multiple visual elements into seamless, polished images. This course introduces students to photo compositing and editing techniques essential for animation storytelling. Through hands-on projects, students will develop confidence in creating professional-quality visual effects, layering, and color correction.

Prerequisites: ANM 2020 & GRM2000
Credit: 3 Units

ANM 3010: Storyboarding and Script Writing

A well-structured script and storyboard are crucial for effective animation. This course teaches students to translate scripts into visual sequences, ensuring clear storytelling and visual flow. Topics include shot planning, pacing, and integrating dialogue with visuals. By the end of the course, students will be proficient in pre-visualization techniques for animation production.

Prerequisites: ANM 1070
Credit: 3 Units

ANM 3015: Character Rigging Script

Rigging breathes life into digital characters. This course covers the fundamentals of character rigging, including joint placement, skinning, and control systems. Students will create functional rigs that allow for natural movement and expressive

animation, developing the technical skills necessary for professional character animation.

Prerequisite: ANM 2020
Credit: 3 Units

ANM 3040: Law & Ethics in the Animation Business

Success in animation goes beyond creativity—it requires legal and ethical awareness. This course introduces students to intellectual property laws, contracts, and ethical considerations in animation production. Through case studies and real-world scenarios, students will gain the knowledge needed to navigate the business side of the industry.

Prerequisite: CMS 3700
Credit: 3 Units

ANM 3060: The Business of Animation Content

Turning creative ideas into marketable animation requires business acumen. This course teaches students the fundamentals of pitching, funding, marketing, and distributing animated content. Industry professionals provide insights into navigating the commercial landscape of animation, ensuring students are prepared to succeed as independent creators or studio professionals.

Prerequisite: None
Credit: 3 Units

ANM 4015: Aesthetics of the African Story

Step into the world of African storytelling and uncover the rich artistic traditions that define its narratives. This course explores the themes, aesthetics, and storytelling techniques that make African films and animations unique. Through an in-depth analysis of works by renowned African filmmakers and animators, students will gain an appreciation for the cultural significance of storytelling across the continent. By the end of the course, students will be equipped to craft authentic and compelling African stories, reflecting the vibrancy and depth of the continent's diverse heritage.

Prerequisite: ANM 2070
Credit: 3 Units

ANM 4020: 3D Environment and Effects

Bring animated worlds to life with realistic and immersive 3D environments. This course teaches students how to design and develop high-quality backgrounds and simulations using industry-standard techniques. From lighting and texturing to mapping and environmental effects, students will explore the tools and processes that create breath-taking digital landscapes. By the end of the course, students will be able to construct detailed and visually compelling 3D settings that enhance storytelling and animation production.

Prerequisite: ANM 2020
Credit: 3 Units

ANM 4030: Advanced 3D Computer Animation

Push the boundaries of 3D animation and refine your technical and artistic skills in this advanced course. Students will explore complex rigging, nuanced character expressions, and high-fidelity simulations to create professional-level animations. Emphasizing industry standards and real-world applications, the course prepares students for commercial and professional animation development. By the end of the course, students will be ready to produce high-quality 3D animations that meet industry demands.

Prerequisite: ANM 2020
Credit: 3 Units

ANM 4035: Advanced 2D Computer Animation

Transform your 2D animation skills into polished, production-ready projects. This course focuses on refining storytelling techniques, character development, and animation workflows to bring narratives to life. Students will also learn how to pitch and develop projects for professional production, preparing them for careers in animation and media. By the end of the course, students will have mastered advanced 2D techniques and created high-quality animations ready for industry presentation.

Prerequisite: ANM 2020
Credit: 3 Units

ANM 4045: 3D Modelling & Design Methods

Master the art of 3D modelling and asset creation for animation. In this course, students will develop the technical skills needed to create realistic and stylized characters, props, and environments. Through hands-on projects, they will explore different modelling techniques, texturing methods, and rendering workflows. By the end of the course, students will have the ability to produce detailed and professional-quality 3D assets for animation, gaming, and visual effects.

Prerequisite: ANM 2020

Credit: 3 Units

ANM 4050: Advanced Scripting for Animation and Production

This capstone course bridges theory and practice, guiding students through the process of crafting compelling, market-ready scripts for animation. Emphasizing narrative structure, character development, and visual storytelling, students will refine their scripting techniques to align with industry expectations. By the end of the course, students will have the skills to develop polished scripts that serve as the foundation for professional animation productions.

Prerequisites: ANM 2010 & ENG 2206

Credit: 3 Units

ANM 4055: Digital Effects for Film and Television

Master the art of visual effects and elevate your animations to a cinematic level. This course covers the core principles of digital effects, from compositing to advanced simulations, using industry-standard software. Students will learn how to seamlessly integrate VFX into film and animation, enhancing storytelling with dynamic visuals. By the end of the course, students will be proficient in creating and editing professional-quality visual effects for film and television.

Prerequisite: ANM 2020

Credit: 3 Units

ANM 4060: Senior Project and Portfolio Development

Showcase your animation expertise with a professional-grade portfolio. This course guides students in compiling a collection of their best 2D and 3D animation work, emphasizing both artistic versatility and specialized skills. Through mentorship and critique, students will refine their portfolios for job applications, industry presentations, and freelance opportunities. By the end of the course, students will have a compelling body of work that highlights their creative and technical capabilities.

Prerequisites: Completion of all lower division core courses

Credit: 3 Units

ANM 4080: Interactive Design

Discover the power of interactive storytelling in game design. This course explores how gameplay mechanics, user interfaces, and dynamic interactions shape player experiences. Students will learn to design immersive, engaging environments that respond to player input, blending aesthetics with functionality. By the end of the course, students will be equipped with the skills to create compelling interactive simulations that enhance gameplay and user engagement.

Prerequisite: ANM 1060

Credit: 3 Units

ANM 4082: Virtual and Augmented Design

Step into the future of digital experiences with VR and AR design. This course teaches students how to develop immersive virtual and augmented reality applications, utilizing real-time interaction, 3D modelling, and animation. By exploring innovative design techniques, students will create engaging digital experiences that enhance storytelling and user engagement. By the end of the course, students will be prepared to design and develop cutting-edge VR and AR applications.

Prerequisites: ANM 1060, ANM 2020 & ANM 2080

Credit: 3 Units

ANM 4085: Gaming Environment Design

Build vibrant, interactive game worlds that captivate players. This course delves into level design, environmental storytelling, and world-building principles, ensuring that every element of a game's setting feels alive. Students will craft detailed landscapes, architectural designs, and immersive environments that enhance gameplay. By the end of the course, students will be proficient in designing dynamic, aesthetically rich game spaces.

Prerequisites: ANM 1060 & ANM 2020

Credit: 3 Units

ANM 4090: Artificial Intelligence in Gaming

Design intelligent and responsive game worlds with AI-driven mechanics. This course introduces students to the principles of artificial intelligence in gaming, covering NPC behavior, decision-making algorithms, and strategic AI systems. Students will learn how to create adaptive, challenging AI that enhances player engagement. By the end of the course, students will be equipped to develop sophisticated AI-driven gameplay experiences.

Prerequisites: ANM 3015 & ANM 4092

Credit: 3 Units

ANM 4092: Game Programming

Take your coding skills to the next level with advanced game programming techniques. This course provides in-depth training in scripting, mechanics development, and interactive system implementation. Students will gain hands-on experience with programming languages and tools essential for game development. By the end of the course, students will be proficient in writing efficient, optimized code for dynamic and interactive games.

Prerequisite: ANM 2055

Credit: 3 Units

ANM4910: Internship

Gain real-world experience and industry exposure with a professional internship. This course places students in business, government, or non-profit organizations, allowing them to apply their animation

skills in a professional setting. During the three-month internship, students will work on real projects, gaining valuable insights and practical expertise. A final report, reviewed by industry supervisors, will document their experience and skill development. By the end of the internship, students will have a strong professional foundation and a deeper understanding of the animation industry.

Prerequisite: Completion of all lower level core courses

Credit: 3 Units

CIN: Cinema

CIN 2005 Visual Production Design

The purpose of this course is to teach basic of visual production design and its related parameters. It will enable students to develop impeccable observational skills in art and design and be able to transfer them in visual effects.

Prerequisite: FLA 1020

Credit: 3 Units

CIN 3005 Advanced Color Theory And Color Timing for Cinematography

The purpose of this course is to create and show skill in color integration and color-differentiation by combining knowledge from different subjects as theory, physics of color (light) and the Chemistry of Color (Pigment) and the impact of Color (Psychology).

Credit: 3 Units

CIN 3010 Shooting the Master Scene

This course builds upon the student's ability to analyse a scripted scene or sequence, develop a unique vision derived from thorough text analysis, then communicate his or her vision effectively to an audience through carefully designed camera movement and choreographed actor staging.

Prerequisite: CIN 3005

Credit: 3 Units

CIN 3015 Visual Effects and Green Screen Cinematography

The purpose of this course is to teach basic of visual effects and how to manage green screen Cinematography to improve the audio and visual quality. The course also introduces the filmmaker to special effects as used in Cinema.

Prerequisite: CIN 3010

Credit: 3 Units

CIN 4010 Script Analysis and Project for Cinematography

The purpose of this course is to teach students how to write and analyze the script along with all its basic elements that go into professional writing being prepared for production.

Prerequisite: CIN 4005

Credit: 3 Units

CFD: Communication for Development

CFD 6110 Development Communication Theory

This course provides an overview of the historical and contemporary nature of issues and theories that have influenced the field of development communication. It interrogates the role of communication in socioeconomic developments and introduces students to key communication theories that have been associated with development practice since the mid-twentieth century.

CFD 6120 Participatory Communication Strategy Design

This course explores the strategic use of media in development, emphasizing the "dialogic" use of communication to design communication strategies that develop projects and programs. Students will discuss the shift from transmission-based communication practices to participatory approaches that empower communities. They will be required to develop a participatory communication strategy that addresses a specific development communication strategy for an organisation utilizing skills such as Communication-Based Assessment, communication strategy and design, implementation and communication monitoring and evaluation.

CFD 6130 Public Policy and Advocacy

This course introduces students to the deliberate process organisations undertake to speak out on issues and exert influence over the policies that have the potential to impact them and the way they do business. The class will cover how organisations conduct advocacy efforts and how communication is used as a tool to advance policy change. Students will gain a practical understanding of how policy groups and communications professionals operate in the field.

CFD 6140 Risk Communication This introduces how society thinks about, evaluates, debates and discovers risks in the external environment and within the human body. The course examines

how all societies seem to construct notions of "jeopardy," "harm," and the concept of risk perception. The goal of this course is to explain how communication professionals can create and implement communication plans related to either possible or actual hazards (anything that can cause morbidity or mortality). Students will learn to apply strategic communication approaches used in emergency preparedness, environmental health, food security, national security, and financial security and other real-world emergencies.

CFD 6160 Behavior Change Communication

This course examines the fundamentals of public health communication and help students discover the vital role public health communication plays in the success of new health care delivery structures. The implementation of health care reform and the adoption of advances in prevention, health promotion and emergency preparedness. It will explore the latest public health communication innovations, tools, technologies, research and strategies. Throughout the course, students will learn and practice the skills of citizen engagement - with consumers, family members, providers, policy makers, researchers and the general public - skills that build the foundation for improving and maintaining health and well-being through public health communications.

CFD 6170 Program Monitoring And Evaluation

This course outlines what monitoring and evaluation are i.e. how you plan to do them, how you design a system that helps students monitor and an evaluation process that brings it all together usefully. It will outline how to establish indicators, collect and analyze information and how to use the results to improve programs. This course will also examine both formative and summative evaluation and their role in assessing the effectiveness, efficiency and

impact of an organisation's programs.

CFD 6180 Resource Mobilization

This is a hands-on course in which students will learn about the fundraising cycle such as research and donor identification, understanding request for proposals (RFPs), writing various types of proposals, concept papers, fund raising letters and other documents related to soliciting for funds. Essential grant seeking and writing strategies, including grant-related terminology will be covered to enable the students submit competitive funding proposals to a variety of funding agencies, both local and international. In order to obtain a real-world experience, students will be expected to work with a client.

DCM: Digital Communication

DCM 6110 Multimedia Design

The purpose of this course is to give students the opportunity to practice and develop the skills necessary for planning and producing effective multimedia programs. The course will cover basic computer topics and terminology, digital workflow issues, introduction of design elements of Adobe Creative Suite – Illustrator, Photoshop, InDesign, work flow production on both the Mac and PC platforms; how to access, evaluate and secure information, integration of theory and technology; application of theory and technology in Design projects.

DCM 6120 Digital Communication and Society

The purpose of this course is to explore the societal dynamics occasioned by new media and engage with theories that seek to explain human behavior in the light of a digital age and elaborate on implications for the Kenyan society. The course will explore key concepts in new media; impact of new media on society; past, present and future of the networked media world; complex interactions between media and identity; social, political, economic and cultural consequences of electronically networked and mediated world; design smart, goal-oriented strategies in response; new media theory-based, implications of networked society, emerging trends of digital society, global divide, global policy on new media, research trends in new media.

DCM 6130 Digital Communication Strategy

The purpose of this course is to give students the necessary skills to design a digital communications strategy that spells out how communication goals can be achieved across all digital platforms. This course will explore design and implementation of digital media strategies; review of today's digital tools, trends and tactics; effective digital communications strategies, analysis of today's business environment; digital communications nexus with traditional marketing and Public Relations (PR) tactics, integrated approaches of traditional and new media,

evaluating attractiveness and effectiveness of social media, hands-on application of digital platforms, web analytics and Kenyans' social media practices.

DCM 6140 Online Corporate Branding

This course is designed to teach how to develop a consistent and recognizable corporate identity for clients on digital platforms. The course will cover introduction to online branding; coordinated identity branding within a digital context; matching applications to corporate audiences; case analysis, design of original identity systems, aligning visual expressions of corporate culture with corporate goals, identification of brand attributes need to be emphasized/addressed by organisations, positive representation of the corporate brand images online. The course will also cover matching organisations' online and off line identity, differences between corporate and product branding.

DCM 6160 Effective Web Design and Strategy

This course is designed to give students the skills to develop original websites that are effective in achieving a variety of goals e.g. communicating across various stakeholders of an organisation, increasing interactivity, optimizing e-business etc. the course will explore analysis of critical communication considerations that drive the strategy of successful websites, knowledge of web design vocabulary, structure and development of effective web-based communications platforms; audience definition and content strategy, usability testing, information architecture, technologies, design, and search engine optimization. The course will teach students how to define, design, and deploy successful smart sites; evaluation of effectiveness across divergent audiences, brands, and businesses will also be addressed.

DCM 6170 Social Media Strategies

This course is designed to enable students to explore the social media landscape and help them learn how to integrate social web into broader organisational

goals by designing viable social media strategies for organisations. In this course, students will learn about several useful social media tools, including blogging, Twitter, social networking, podcasting, online video, and Digg. More importantly, students will apply what they learn by developing a social media plan for an organisation that they choose. Each week, students will learn how to use a different social media tool to engage in conversations that help to tell their client's story. Students will also learn the theories behind why social and digital media is fundamentally changing the way that customers, advocates, and engaged consumers are interacting with brands. The class will include specific new media case studies, hands-on participation, and an introduction to effective online communication and internet strategies

DIR: Directing

DIR 3005 Art Direction and Production Design

In this course, the student will learn how the art department works in terms of design, build, cast make-up and properties management.

Credit: 3 Units

DIR 3010 Directing Actors

This course aims at providing students with practical skills, practice and knowledge in directing actors. Students learn how to train actors their language, interpreting and analysing the script and working as a cast director

Prerequisite: DIR 3005

Credit: 3 Units

DIR 3015 Location and Studio Directing

This course aims at providing students with practical skills, practice and knowledge in location and studio directing. Students learn television production environment, audio control and technical directing and also lighting.

Prerequisite: DIR 3010

Credit: 3 Units

DIR 4005 Directing the Master Scene

This course aims at providing students with practical skills, practice and knowledge in sound composition and design. Students learn the foundations of audio in their different categories and the role they play.

Prerequisite: DIR 3015

Credit: 3 Units

DIR 4010 Script Analysis and Project For Directing

The purpose of this course is to teach students how to write and analyze the script along with all its basic elements that go into professional writing being prepared for production.

Prerequisite: DIR 4005

Credit: 3 Units

EDT: Editing

EDT 3005 Sound and VFX for Film And Video

The purpose of this course is to teach students sound, harmonization, management and creatives as regards sound editing for dramatic film. Students will be exposed to different styles of sound management including special effects.

Credit: 3 Units

EDT 3010 Advanced Color Theory and Color Timing for Editing

The purpose of this course is to create and show skill in color integration and color-differentiation by combining knowledge from different subjects as theory, physics of color (light) and the Chemistry of Color (Pigment) and the impact of Color (Psychology).

Prerequisite: EDT3005

Credit: 3 Units

EDT 3015 After Effects

This course aims at providing students with fundamental skills to produce traditional animation and the knowledge of the principles of animation to be built upon in subsequent courses leading up to the Portfolio course.

Prerequisite: EDT 3010

Credit: 3 Units

EDT 4005 Editing the Narrative

This course aims at providing students with practical skills in cutting the narrative. Students learn the foundations of editing and its effect in narrative story telling.

Prerequisite: EDT 3015

Credit: 3 Units

EDT 4010 Sound Design for the Final Mix And Project

This course equips students with technical skills in the acquisition, manipulation, production and presentation and use of sound in all forms of design and communication.

Prerequisite: EDT 4005

Credit: 3 Units

FLA: Film

FLA 1005 History of Film and Video

The purpose of this course is to understand the nature and process of film production, learning how to read and analyze film as you would a novel, a poem or a short story exploring the major aesthetic trends in the history of Cinema.

Credit: 3 Units

FLA 1010 Fundamentals of Photography & Cinematography

This course introduces students to the techniques, aesthetics and practices of photography and Cinematography.

Credit: 3 Units

FLA 1020 Film and Video Production Fundamentals

The purpose is to introduce students to the production processes of visual/ aural, time-based, creative work.

Credit: 3 Units

FLA 1015 Fundamentals of Scripting

The purpose of the course is to learn about film and television screenplay structure, analyze dramatic strategies in film and television, learn and apply correct script form, and creatively engage in the various stages of original scriptwriting.

Credit: 3 Units

FLA 1030 Fundamentals of Film Editing

This course develops storytelling and rhythmic sensibilities through close study of films, critique and discussion of works in progress, and hands-on practice.

Credit: 3 Units

FLA 1035 Introduction to Production Design & Art Directing

The purpose of this course is to introduce the students into the practical, aesthetical aspects of art direction.

Credit: 3 Units

FLA 1040 Camera Operation Techniques and Aesthetics

The purpose of this course is to introduce students to the production processes of visual creativity. Students will work on numerous creative projects: performed, written, photographed and created digitally.

Prerequisite: FLA 1030

Credit: 3 Units

FLA 2010 The Business Of Film, Culture And Society

The purpose of this course is to expose the students to the relationship of film as a business in the cultural environment of society.

Credit: 3 Units

FLA 2015 Fundamentals of Film Directing

This course introduces students to the techniques, practice and role of the film director.

Prerequisite: FLA 1035

Credit: 3 Units

FLA 2020: Principles of Writing for Dramatic and Factual Production

The purpose of this course is to equip students with the basics of storytelling and the principles of writing that should be followed in professional writing for production in drama.

Credit: 3 Units

FLA 2025 World Approaches To Film

This course purposes to help a student articulate an identity in a world of film that is always diverse and more often characterized by internal tensions and antagonisms.

Credit: 3 Units

FLA 2030 Entertainment Law and Ethics of Film Production And Directing

The purpose of this course is to help students become better media practitioners by learning and following the ethics and laws involved in the entertainment industry, in particular the production and direction.

Credit: 3 Units

FLA 2035 Film Theory and Criticism

The purpose of this course is to discuss the establishment of film movements such as German Expressionism, French Impressionism and new wave, Italian Neorealism, and Surrealism.

Credit: 3 Units

FLA 1005 History of Film and Video

The purpose of this course is to understand the nature and process of film production, learning how to read and analyze film as you would a novel, a poem or a short story exploring the major aesthetic trends in the history of Cinema.

Credit: 3 Units

FLA 1010 Fundamentals of Photography & Cinematography

This course introduces students to the techniques, aesthetics and practices of photography and Cinematography.

Credit: 3 Units

FLA 1020 Film and Video Production Fundamentals

The purpose is to introduce students to the production processes of visual/ aural, time-based, creative work.

Credit: 3 Units

FLA 1015 Fundamentals of Scripting

The purpose of the course is to learn about film and television screenplay structure, analyze dramatic strategies in film and television, learn and apply correct script form, and creatively engage in the various stages of original scriptwriting.

Credit: 3 Units

FLA 1030 Fundamentals of Film Editing

This course develops storytelling and rhythmic sensibilities through close study of films, critique and discussion of works in progress, and hands-on practice.

Credit: 3 Units

FLA 1035 Introduction to Production Design & Art Directing

The purpose of this course is to introduce the students into the practical, aesthetical aspects of art direction.

Credit: 3 Units

FLA 1040 Camera Operation Techniques and Aesthetics

The purpose of this course is to introduce students to the production processes of visual creativity. Students will work on numerous creative projects: performed, written, photographed and created digitally.

Prerequisite: FLA 1030

Credit: 3 Units

FLA 2010 The Business Of Film, Culture And Society

The purpose of this course is to expose the students to the relationship of film as a business in the cultural environment of society.

Credit: 3 Units

FLA 2015 Fundamentals of Film Directing

This course introduces students to the techniques, practice and role of the film director.

Prerequisite: FLA 1035

Credit: 3 Units

FLA 2020: Principles of Writing for Dramatic and Factual Production

The purpose of this course is to equip students with the basics of storytelling and the principles of writing that should be followed in professional writing for production in drama.

Credit: 3 Units

FLA 2025 World Approaches To Film

This course purposes to help a student articulate an identity in a world of film that is always diverse and more often characterized by internal tensions and antagonisms.

Credit: 3 Units

FLA 2030 Entertainment Law and Ethics of Film Production And Directing

The purpose of this course is to help students become better media practitioners by learning and following the ethics and laws involved in the entertainment industry, in particular the production and direction.

Credit: 3 Units

FLA 2035 Film Theory and Criticism

The purpose of this course is to discuss the establishment of film movements such as German Expressionism, French Impressionism and new wave, Italian Neorealism, and Surrealism.

Credit: 3 Units

FLA: Film

JRN 1100 Introduction to Broadcast Media Technique and Technology

Introduction to the basic principles, technology, terminologies, techniques and practices in broadcast media (radio, television and film). The course explores the practical, technical and aesthetic aspects of broadcast production process and focuses on Television camera work, lighting, videography, the microphone and basic recording of sound. Other areas include New Media Production techniques and basic requisite studio experience. Content includes basic shots, camera angles, principles of composition, broadcast formats, basic broadcast editing techniques and technology and studio audio recording techniques.

Credit: 3 Units

JRN 1106 History and Theory of Public Relations

Focus on this course will be on an intensive examination of the practice of public relations. Topics include the organisation and management of public relations agencies; planning and executing multimedia public relations campaigns, special problems, the management of public opinion; research and evaluation techniques in public relations, in addition to the function of institutional public relations for government or industry.

Credit: 3 Units

JRN 1109 Introduction to Mass Communication

This course traces the historical development of print, broadcast, public relations and advertising and their impact on society. At the same time, it examines the rapid growth and development of the Internet as a new medium in mass communication field. It introduces students to the inventors, patents, copyright regulations, script writing formats, Kenyan government media regulation statutes, and careers in the media industry. Additionally, the course explores how the media reflect and inspire cultural, political, and ethical norms with emphasis on various storytelling techniques based on audience and method of delivery. The course also examines the role of the mass media in the creation for the audience.

Credit: 3 Units

JRN 2004 Public Relations Writing

The course will teach students how to write effectively in a variety of media with the clarity, insight and skill expected of PR professionals. This will involve learning to judge the importance of information, set priorities and tailor writing to meet the needs of different audiences. The course focuses on the strategy of crafting and delivering a PR message with special emphasis on pre-writing, preparation and editing.

Credit: 3 Units

JRN 2103 Fundamentals of Photography

This course develops an understanding of the scientific, technical and creative principles of still photography. The use of the 35mm camera. Basic aspects of photographic composition. Among practical topics covered will be: focusing, framing, shutter & motion, depth of field, metering, the use of flash, shooting portraits and darkroom techniques. Equipment: 35 mm camera and flush unit; film; darkroom and chemicals

Credit: 3 Units

JRN 2106 Principles of Broadcasting

Writing for broadcast media, elements of radio and television program productions, radio and television news reporting, live coverage of events on location. Definitions of terms and the process of electronic media communication, and characteristics of radio. Characteristics and roles of television and radio, television and radio studio layout, radio and television program pre-production, production and post-production, animation, cartoons, puppets, new technologies, sound recording, news stories, features, audio and audio-visual documentary programs.

Prerequisite: JRN1100

Credit: 3 Units

JRN 2107 Writing for Broadcast Media

An exploration into the practice of writing for different formats and genres for factual productions in radio, television and film. In this course, the emphasis is on story development for the factual genres. Areas to be covered include loglines, pitches, treatments,

proposals, factual story development, script formats, copy writing, styles, structure, and techniques involved in writing for Broadcast Advertising, Public Service Announcements (PSAs), Public Relations writing, and Documentary and Feature scripting.

Prerequisite: JRN 2106

Credit: 3 Units

JRN 2109 History and Theory of Advertising

This course aims to provide students with knowledge of the principles and techniques used in the practice of advertising to sell goods, services and ideas. It considers the development of advertising, its functions and varieties, basic advertising research, basic media strategy, media markets and audience for newspapers and magazines, television and radio, in addition to other media services, preparing advertising copy layout, development of advertising campaigns and budgeting.

Prerequisite: JRN 1106

Credit: 3 Units

JRN 2223 Theories of Mass Communication

Introduction to the concepts and theories of mass communication: mass communication and culture; new media theory; normative theory of media and society; media structures and performance; media economics and governance; media organisation; the production of media culture; media content; processes and model of media effects; news and political communication.

Prerequisite: JRN1109;

Credit: 3 Units

JRN 3000 News Reporting and Writing

Emphasis will be on reporting, the gathering of information and turning that raw information into readable, informative and compelling stories for a newspaper audience. Issues covered include news theory, research, story structure and deadline writing. Story components such as the Intro/Lead, attribution, the nut graph and back grounding are covered. The art of interviewing is taught and tested. Beats such as the police, the courts, sports, business reporting, local government, parliament, education, health, and covering press conferences

are introduced. Equipment: Computer lab

Prerequisite: JRN1109;

Credit: 3 Units

JRN 3002 Introduction to News Editing

News gathering and editing theories and techniques, policies and philosophies, page layout, printing production and design. Professional orientation for journalism, public relations and advertising including in-house publications and journals, newsletters and press releases. Co-requisite: the Gazette.

Equipment: Computer lab

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3003 Media Law

This course explores the social role of journalism and the journalist from legal perspectives. It entails a thorough examination of both the Constitution of Kenya and that of United States of America as they defend free speech. The course equips the student journalist with a working knowledge of media law relevant to their distinctive callings. This will entail looking at the Media Act 2007; the Defamation Act; the Kenya Information and Communication Act as well as the Penal Code and how it affects the profession of journalism. The course pays special attention to the Libel laws and the various defences available in Kenya. Then students are exposed to various freedoms of information acts in a number of countries and particularly the existing drafts for Kenya before this law is introduced to Parliament. Trespass/privacy and government-related laws as they pertain to Kenya will be examined. The course is also intended to develop knowledge and understanding of mass media legal issues as they affect journalists in Kenya, Africa and the rest of the world.

Credit: 3 Units

JRN 3004 Media Ethics

This course examines the history of media fraternity's search for a code of ethics for Journalists in Kenya. It examines the differences between professionalization and professionalization of journalism in Kenya. The course covers such perennial controversies

as accuracy, impartiality, fair play, decency and responsibility. It examines in details professional and ethical challenges of the coverage of elections and scientific subjects such as climate change. It also studies truth as journalism's first obligation; who journalists work for; objectivity; independence; proportionality; monitor of power; engagement versus relevance; and the dynamics between Press freedom and the protection of individual and community rights. The course examines the principles of self-regulation as it is practiced in various countries especially, Kenya, Britain United States and India.

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3006 International Mass Media

This course develops the student's knowledge and understanding of global mass communication. In analyzing international media theories and systems, it addresses the practice and study of journalism from a variety of international perspectives. It recognizes global trends in information flows and media ownership, and examines similarities and differences in journalism activities and techniques. A study of News Agencies as agents of globalization is incorporated. Finally, the course introduces the student into functioning as an international correspondent.

Prerequisite: JRN1109

Credit: 3 Units

JRN 3009 Community Media

A critique of approaches to alternative media, based on critical theory and theories of popular culture. The application of the critique to alternative media, to have some impact on issues such as access, cultural development, trading and production, in rural and/ or community settings, feasibility studies of rural newspapers, radio stations, rural video production, and other projects.

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3010 Television and Video Production I

A course on audio-visual media, and evaluation of programs. Students' work as individuals and in groups on a variety of programs and in different talent and production roles. Tutorial and lab exercises require students to have basic media production skills. Knowledge of production

equipments and camera techniques such as camera shots, movements, angles and picture composition. Knowledge of script writing, lighting equipment, television studio and control room, electronic editing, post-production work and practical assignments.

Equipment: TV studio, editing suites

Prerequisite: JRN2107

Credit: 3 Units

JRN 3011 Online Journalism

This course serves as an introduction to the practice of journalism on the web. It provides an overview of the technologies involved in building a web application, including skills learning. Students will learn about journalistic issues relating to credibility, ethics and standards on the web. History and context of new media publishing, finding and evaluating information online, hypertext and writing for new media, site architecture and design, digital images, digital cameras, scanning, a case study on the future of web-based journalism.

Equipment: Computer lab

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3012 Broadcast Presentation

Specialized and advanced exploration and practice of the principles and practice of broadcast news writing, editing, and presentation for television. The course incorporates an overview from newsroom organisation to basic television news gathering and studio production, paying attention to ethics of newsgathering, basic rules of grammar, techniques of copywriting, field reporting, interviewing, and editing techniques for television and radio.

Prerequisite: JRN 3010

Credit: 3 Units

JRN 3013 Broadcast Journalism

Specialized and advanced exploration and practice of the principles and practice of broadcast news writing, editing, and presentation for television. The course incorporates an overview from newsroom organisation to basic television news gathering and studio production, paying attention to ethics of newsgathering, basic rules of grammar, techniques of copywriting, field reporting, interviewing, and editing techniques for television and radio.

Prerequisite: JRN 3010

Credit: 3 Units

JRN 3014 Public Relations Management

Attention is focused on managerial communication practices and skills, organisation and financing of media house services, criticisms and evaluation of media services. Also covered are communication channels, networks and organisational communication techniques. This course also explores media house management structures, procedures, policies, and goals of news operations within print and broadcast media. It delves into the mechanics of news making as an industry; business models, technology, relationships with program consumers, and the impact of the increasing complexity and competition. Such changes put a premium on management planning and standards; all of which are essential in creating a unique and differentiated presence in the program marketplace.

Prerequisite: JRN 1106

Credit: 3 Units

JRN 3015 Media Management

Attention is focused on managerial communication practices and skills, organisation and financing of media house services, criticisms and evaluation of media services. Also covered are management principles and theory and their application to the media and related industries. This course also explores media house management structures, procedures, policies, and goals of news operations within print and broadcast media. It delves into the mechanics of news making as an industry; business models, technology, relationships with program consumers, and the impact of the increasing complexity and competition. Such changes put a premium on management planning and standards; all of which are essential in creating a unique and differentiated presence in the program marketplace.

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3016 Public Speaking

This course focuses on developing communication skills with an emphasis on topic research, patterns of organisation and speech preparation, speech delivery techniques, interpretive communication skills, and analysis of popular speeches, radio and TV presentation techniques. Attention will be given to theories of motivation and leadership in communication. This course also aims at inculcating

practical, oral and written skills as well as listening and speaking skills.

Credit: 3 Units

JRN 3018 Organisational Communication

This subject introduces students to contemporary Kenyan and international public relations and organisational communication practice. Students develop an understanding of contemporary public relations in the context of international and external organisational communication and in the relationship between practice and theory.

Prerequisite: JRN 1106

Credit: 3 Units

JRN 3020 Development Journalism

Are the journalists doing enough toward the development of a society that is undergoing serious reconstruction? Can journalism be used to actually benefit and inspire its audience? This course envisions the needs of a developing country. It focuses on communities doing things for themselves. A part from its traditional beats, journalism is also about highlighting what people are doing to help transform their lives, be it alongside government or on their own. The idea in this course is to avoid feeding media consumers with stories about crime, calamity and scandal on a daily basis. But the basic professional skills of reporting are respected, taking into account the marketplace and the special target audience.

Credit: 3 Units

JRN 3024 Communication Research

This course aims to teach students the theory and practice of audience research methods and public opinion polls. The subject examines the techniques used in media research; how researchers define topics, structure their research, control and measure variables and how they utilize these variables to develop conclusions concerning media audiences. The subject examines issues in planning, research, reviewing literature, developing research instruments and obtaining data, analyzing data and completing research projects with written reports, observations and findings.

Credit: 3 Units

JRN 3025 Human Rights Reporting

Develops knowledge on how the media often impinges on individual human rights. The course also focuses on the challenges of reporting human rights abuses in Kenya and overseas. Class will discuss the history of the concept of human rights and innovations in the enforcement of human rights law. Particular stress will be laid on the practical and ethical challenges facing reporters and investigators who cover human rights, in the course of duty. These include subjects such as refugee status, police tactics, tribal profiling, court procedures, and the moral responsibility of multinational business for human rights.

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3026 Gender Reporting

This course provides a theoretical and historical framework for understanding the complexities of cultural heritage, tensions among social classes, gender and sexual prejudices. The objective is to cover these subjects with greater sophistication and originality, and to prepare students for work in an increasingly global society. Among issues covered are: cultural feminist media studies, stereotyping, pornographic media content, role of gender in positioning the spectacular in relation to images – film, television, photo coverage of males versus females, and the place of women in society

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3027 New Media Production

The course integrates traditional journalism with new media storytelling skills and techniques and hands-on professional experience. Students add web publishing to their print or broadcast skills. web publishing software, digital photography, audio; audio-visual, and video production and interactive tools. Technology training is balanced with an extensive study of the issues that separate Web-based journalism from other forms of media.

Equipment: Lab, digital cameras, web space

Credit: 3 Units

JRN 3028 Business Reporting

This course introduces the tools and terms of business journalism so that students can report business stories in a readable and understandable language. Students will be exposed to different

business beats. They will be taught to develop sources and analyze data: charts, graphs, financial reports, economic indicators and on-line resources. A major emphasis is on writing well-crafted, lively stories that explain business concepts without relying upon the twin crutches of jargon and cliché.

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3029 Media Studies

This course introduces students to critical appreciation of media texts and structures, giving them grounding in Marxist and neo-Marxist theories. Students would be able to see media as a site where power dynamics in society play out at ideological level. We are living in a media saturated era and therefore a student of media and mass communication is expected to develop a critical mind as a requisite skill for journalism practice and media practice. In order to appreciate this students will be exposed to British cultural studies and French semiotics and related meaning - making theoretical frameworks. This course will equip students with critical media literacy skills and give them a good foundation for taking higher degree programs in Media and Cultural Studies.

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3301 Feature Writing

Develops techniques of feature article writing skills, knowledge of types of feature articles, documentary-film review, book review, movie reviews, studies the operations of cinema theatre industry, personal column, editorial comment, sports features and writing of obituaries.

Prerequisite: JRN 3000

Credit: 3 Units

JRN 3321 Radio Production I

Theory of oral-aural communication, tools of production, control room, types of microphones, sound recording equipment, acoustics, tape recorders/cassettes, sound effects, editing, voicing, program formats – interviews, talk shows, magazines, features, documentaries, script writing, presenting, and practice in the studio.

Equipment: Radio studio

Prerequisite: JRN 2106

Credit: 3 Units

JRN 3322 Radio Production

The course introduces students to the theoretical and practical approaches to radio production with great emphasis on the development of effective oral-aural communication for modern radio production, focusing on the development of effective radio performance. Students are introduced to Radio Production tools, skills and techniques and are further guided in the acquisition of operational skills related to handling the various radio production elements such as microphones, audio console, audio recording and manipulation devices and software respectively, as well as help them understand the radio control room operations. The importance of acoustics is emphasized and basic audio studio design is introduced to enable students clearly understand the centrality of acoustics to effective audio production for radio. This course provides students with a comprehensive approach to radio production; and requires students to make various radio production programme genres. It also equips students with audio editing skills using modern audio production and editing software. The unit further expose students to modern commercial and non-commercial radio station operations through visits to selected radio stations. Students are guided in the development of critical minds in areas of professional radio production oriented toward the provision of answers to some of the challenges faced in society.

Prerequisite: JRN2107

Credit: 3 Units

JRN 3901 Principles of Advertising

History and theory of advertising, marketing function of advertising, types of advertising - radio, television, newspapers, magazines, informal advertising, and advertising as communication. The advertising agency, advertising design, research in advertising, public relations advertising, measuring effectiveness of advertising, gender and other issues in advertising, portrayal of women, ethics.

Prerequisite: JRN 2109

Credit: 3 Units

JRN 3911 Public Relations Campaigns

Public relations principles and practices, including writings and using media releases and public service announcement, media liaison, crisis communication

management, handling media conferences and creating the public relations campaigns.

Prerequisite: JRN 1106

Credit: 3 Units

JRN 3922 Photojournalism

Equipment: computer lab, digital cameras, scanner, photographic paper and colour printer.

Reporting the news and telling stories with the camera. Stresses recognition, development and creation of news photographs and the skills of the photo editor. Provides experience in shooting and digital editing. Incorporates skills such as photo-story and photo-essay production; transmitting electronic images and judging photographs for publication. Students are also exposed to research, law and ethics as it applies to the photojournalist.

Prerequisite: JRN 2103

Credit: 3 Units

JRN 4011 Mass Media Criticism

Radio, television, music, the recording industry, the theatre, books, articles and other forms of modern entertainment and information, viewed through the theory of modern and classical criticism lectures and critical practical yielding papers. Students work on critical formats in print and non-print and the requirements for publication and broadcast.

Credit: 3 Units

JRN 4013 Broadcast Screenwriting

The students will learn the theory and practice of broadcast script development through analysis and practical scriptwriting for film, stage television, and video production. Assignments and projects will involve story construction, writing of story treatment, loglines and synopsis. Other areas of focus will include the development of story premise, theme, plot, characterization, dialogue and action. The students will be required to develop a minor and major script as part of their assessment.

Prerequisite: JRN2107

Credit: 3 Units

JRN 4025 Creative Writing

Develops knowledge and skills of the building blocks of creative writing. Fictionalized writing based on creative interpretation of perceived events in society and creatively developing plots/themes with a view to understanding the elements of fiction

writing. Analysis of plots, themes, characterization; setting, timing and environment. Perceiving and developing incidents, episodes, suspense, dialogue, flashbacks, story beginnings, story endings and humor. Prerequisite: ENG 2206 (Minimum: C Plain)

Credit: 3 Units

JRN 4027 Documentary Production

This is an advanced level course in documentary video-film, which involves shooting on location, script writing and editing for broadcast media. Each student will undertake the writing of a major project for film or broadcast media. The course will cover writing proposal and production treatment; elements, characteristics, plot and narrativity; as well as the development of a story idea through a shooting script.

Prerequisite: JRN 3010

Credit: 3 Units

JRN 4029 Radio Production II

This course provides an intensive practical experience, which emphasizes professional independence and creativity of the student. Students will create and produce radio magazine programs, radio dramas and radio documentaries. In addition, students will undertake the production of sound effects and multi-task recordings.

Prerequisite: JRN 3322

Credit: 3 Units

JRN 4030 Television and Video Production II

This is an intermediate level course designed to give students with knowledge of video and television production skills and techniques. The course covers television production and direction, elements of visual style, picture composition, television graphics and set design as well as the use of television production facilities and equipment. Special attention is paid to the writing, production and presentation of broadcast news and public affairs programming.

Equipment: TV studio, editing suites

Prerequisite: JRN 3010

Credit: 3 Units

JRN 4031 Print Media Production

This is a hands-on opportunity to experience print journalism. It is the practical convergence zone of all those journalistic principles already learnt in earlier principal courses. Students plan, report, write and produce a quarterly newspaper/magazine that focuses primarily on campus life and in-depth stories emanating from the broader Nairobi cosmopolitan. Under the supervision of faculty and guest practicing journalists, student editors make the assignments and handle layout and copy editing, while others work as general assignment reporters. This course will sharpen your reporting, writing and editing skills. It will prepare you for newspaper jobs and help you stretch and produce quality journalism. Co-requirement: the Gazette production. Equipment: Computer lab

Prerequisites: JRN 2103

Credit: 3 Units

JRN 4032 Public Relations Ethics

This class will guide students to identify ethical issues in advertising and public relations. These issues will be considered alongside a study of moral philosophy and industry codes of ethics. The class will discuss how to respond to ethical issues in the workplace, including how to express dissent effectively. In addition, the students will discuss past and current ethical issues in public relations and advertising to help them learn how to address ethical issues at the workplace.

Credit: 3 Units

JRN 4033 Advertising Content and Media Audiences

The study of advertising within media economics, studies of audience effects, popular culture, and media economic policy.

Credit: 3 Units

JRN 4037 Advertising and Creative Strategy

This course examines various theoretical frameworks necessary for effective organisational communication. It analyzes the application of communication strategies within organisations in terms of their effectiveness. It provides the infrastructure necessary for the such pertinent concepts and variables as message, channel, networks, information, information flow, communication climate, communication audit

aimed at analyzing organisational communication problems and an introduction to interventions and methods of communication training.

Credit: 3 Units

JRN 4050 Advertising Planning and Placement

The fundamentals of creative writing for print, electronic media, out-of-home, direct marketing, retailing, Catalogs, company magazines, internal communications and web based communications will be covered. Students will create writing and messaging for advertisements in a variety of media with visual and verbal components. Copywriting for consumer business to business (b2b) advertising will be analyzed, evaluated and studied.

Credit: 3 Units

JRN 4401 Editorial Writing

The course develops the students' editorial appreciation and editorial writing. The subjects include the nature and functions of various types of editorial and other opinion pieces, local and international editorial policies of newspapers, writing editorial and other opinion pieces for newspapers and magazines, selecting and managing Letters to the Editor column.

Equipment: Computer lab

Prerequisite: JRN 3000

Credit: 3 Units

JRN 4900 Journalism Project

Extended individual research or project under the direction of a faculty member and approved by the department chair or dean. Projects may include library or empirical research, analysis and written or oral presentation of a report on a topic in the student's major field.

Prerequisite: Senior standing and completion of core courses; JRN3024

Credit: 3 Units

JRN 4910 Journalism Internship

Internship in business, school, non-profit organisation, volunteer organisation or in another group or organisation approved by the faculty department chair or dean. Must be in the student's major area of study. A minimum of 120 hours required. (Grading is credit/no credit) Prerequisite: Senior standing and completion of core courses

Credit: 3 Units

JRN 4911 Media Tour Experience

This course focuses on giving senior students experiences where students tour local, regional or international media organisations to work or observe the functioning of the media. After the tour, the student s required to come up with a report and media product based on the experience.

Prerequisite: Senior standing and completion of core courses; JRN3029

Credit: 3 Units

MAC : Master of Arts in Communication Studies

MAC 6010: Introduction to Graduate Studies

This course introduces newly-admitted graduate students to the principles and philosophy of graduate studies in communication. Students will learn different professional activities and methods used in the graduate communication studies. Additionally, they will learn the methods of conducting research and standards for writing at graduate level.

MAC 6020: Communication Theory

This course will help students become more interested in theories of mass communication, such that they will be able to identify themselves with some of the theories which they will find fascinating to understand, how they work, their meanings, effects, and applications in society. The course is intended to provide students with an understanding of mass communication theories-in-action, not just theories-in-a-textbook or research papers.

MAC 6030: Introduction to the Digital Age

This course explores the changes in society occasioned by technological advancement and how this impacts the field of communication and nature of audiences. In this course, students will reflect on the recent changes in communication technologies and how it is changing how communication professionals communicate with the publics and how people access, understand, and process information. Students will further explore this new media landscape and its impact on the broader sociocultural, political and economic contexts. Topics will include globalization and new media, cyber-culture, social media and net democracy among others.

MAC 6040: Entrepreneurship for Communication Professionals

This course is designed to impart knowledge and skills in entrepreneurship to graduate students so they can have the capacity to embark on their own businesses when the opportunity presents itself. The course will explore communication, entrepreneurship and business; self-employment, entrepreneurial opportunities in the communication; stages of building and launching a project; gauging the marketplace; crafting a business plan; developing a prototype; managing technology building and engaging audiences; communication consulting skills; facilitation, training, presentation coaching, speech writing, and communicating organisational change; consulting basics, proposals, cost estimating, and writing final reports.

MAC 6050: Communication Research Methods

The course will prepare students to undertake research projects in the area of corporate and mass communication. It will explore introduction to basics of the quantitative and qualitative research process; research design, instrumentation, data collection, and data analysis; problem identification; research questions development; findings presentation using quantitative and qualitative approaches and analysis skills; use of APA manual referencing style; production of a research project.

MAC 6060: Global Communication

Communication systems are rarely national or regional but have a global genesis. This course introduces the student to the underlying historical trends of global communication, attempts to theorize

global communication, the globalization of media industries and its impact on the world economy, politics and culture as well as the implications of new technologies for communication in the future.

MAC 6120: Organisational Communication

The course is designed to explicate principles of organisational communication and prepare students for careers within organisations. The course will explore analyses of organisations and their structure; organisations and the communication process from a broader social, economic, cultural context within a global perspective; analysis of traditional and contemporary theories of communication in the context of modern complex organisations (government, industry, education, etc.); relational strategies of organisational design; organisational culture; network strategies of organisational design; organisational power; communication and organisational decision making, organisational change, diversity, globalization; role of technology in organisation.

MAC 6851 Project I

The students will choose either a project or a thesis. For the project, the students will be engaged in a specific project within an organisation of their choice which must be approved by the supervisor with the tasks to be undertaken clearly delineated and the product to come out of this process clearly defined. At the proposal stage, the student will carry out formative research and spell out procedures for carrying out the project which must be successfully defended. The product could be a media product such as a documentary, developing

digital content for an organisation, cases studies, a crisis communication plan, an advocacy strategy, training manual in an area of communication related to a student's concentration. Alternatively, the student could also choose to do a thesis within the department advised by a faculty member, and he or she must defend the proposal successfully. This course will cover Chapter 1 (background and statement of the problem), Chapter 2 (literature review) and Chapter 3 (methodology).

Prerequisite: MAC6050

Credit: 3 Units

MAC 6852 Project II

This course is a continuation of MAC6851 (Project I). For the project, the student will undertake all the tasks required to execute the project with advice from the department and depending on the nature of the project, an external advisor may be appointed as well. At the completion of the project, the student will prepare an exhibit for the examiners to evaluate. For thesis students, this segment of the course will cover Chapter 4 (findings), and Chapter 5 (discussion and conclusion) of the research project / thesis. Chapter 4 will focus on presenting the research findings. On the other hand, Chapter 5 interprets the meaning of the findings and their implication to the topic, research limitations, and recommendations on to overcome such shortcomings in future similar studies.

Prerequisite: MAC6851

Credit: 3 Units

MDS: Media Studies

MDS 6110: Media Criticism and Theory

This course introduces students to how to investigate media criticism through a variety of theories and methods. It examines media from various dominant critical perspectives that contribute to the understanding of media role in society. Such perspectives include organisational, Marxist and pragmatic, psychoanalytic, and cultural, among others. Throughout the semester students will explore, understand, and effectively apply the various schools of media criticism through reading, watching, discussing, and writing wide range of media texts.

MDS 6120: Media Writing

In this course, students will learn to write for a multimedia environment. The course equips learners with writing skills suited for print, broadcast, and public relations. Students will learn to synthesize and integrate these styles to be effective media writers. Additionally, they will learn basic principles of Internet writing and social media reporting.

MDS 6130: Political Communication

Political Communication is an interdisciplinary field situated at the intersections of communication, media and journalism fields, political science and sociology. As such, its theoretical foundations and empirical approaches are also drawn from the mentioned fields. The course is, thus, designed to introduce students to major works and topic in this interdisciplinary field. It will explore the role of

political communication in democratic practice, the engagements that occur among citizens, between citizens and their governments, and among officials within governments.

MDS 6140: Media, Identity and Representation

In this course, students will explore how media represents different groups and the discourse it creates regarding different ethnic or racial groups. It will explore the role of stereotypes, how media communicates identity of different groups including construction of national identity and culture in international media and self-representation in mass media. Media construction of gendered identities in films, news media, entertainment and other forms of media and the implication of media on social political and global events will be covered.

MDS 6160: Multimedia Journalism

In this course, students will learn how to make the most of digital technology to tell their stories effectively across multiple media platforms – print, audio, video and online. It will address multi-media and cross-media thinking, organizing, reporting and producing for both short-form spot news and long-form features. The course will deliberate on both storytelling principles and specific technical practices, providing journalists with the mindset and skills they need to adapt their writing and reporting for the tools of today's change media landscape due to the advent in new technology.

MDS 6170: Media Management

This course will cover media management theories. Specifically, it will explore responsibilities of managers of media organisations such as leadership, motivation, planning, marketing, and strategic management. It will further explore management of public service media and the challenges of changing media landscape occasioned by new technology. The course will use media-based cases that promote the development of critical thinking and problem-solving skills. By discussing real-world scenarios, students will be better able to anticipate and prepare for experiences in their future careers.

MDS 6190: Community Media and ICT in Development

This course will explore community media initiatives, information and communication technology (ICTs) interventions, and the role they have played in the field of development and social change. Mobile phones are playing an increasingly important role. This course will explore the role of ICTs and community media in social change and analyze the effectiveness of these mediums. It will investigate the key factors that contribute towards the quality and sustainability of these mediums, and question the role that larger political and economic context plays. Students will be able to reflect on the role these mediums have played in development (e.g. issues such as HIV/AIDS, gender, health, agriculture, education, disaster mitigation) through exploring both the theory and best practice of these tools.

PRD: Production

PRD 3005 The Art of The Pitch

The purpose of this course is to help students encapsulate their ideas into saleable concepts, present those ideas, and communicate with the writers and others who become involved in bringing these ideas to fruition.

Credit: 3 Units

PRD 4010 Producing: From Green Light to Completion

This course focuses on the independent producer and the vast array of skills required to make a film from inception to completion.

Prerequisite: FLA 2035

Credit: 3 Units

PRD 4015 Internship in Producing: From Green Light to Completion

This is a capstone course that triangulates the theory and practice of the classroom and the praxis of the industry. The course is designed to serve as an exit assessment of the student's competence to serve the film industry.

Credit: 3 Units

SND: Sound

SND 1005 History and Theory of Sound For Film And Video

This course gives a survey of the history of sound theory for both film and video to enable the student to appreciate the latest technologies in sound production and management. Credit: 3 Units

SND 2010 Sound Physics

The purpose of this course is to introduce the students to the physical properties of sound. Students will be able to appreciate sound calibration and its significance in good sound production and management.

Prerequisite: FLA 1020

Credit: 3 Units

SND 2015: Sound Design and Aesthetics

The purpose of this course is to introduce students to the basics of sound design and how to use the sound in an artistic way for professional production.

Prerequisite: SND 2010

Credit: 3 Units

SND 3005 Sound Mixing

The purpose of this course is to teach students the basics of sound mixing. Different sound instruments will be used for technical and creative influences on individual sounds and multiple sounds on varying channels and tracks.

Credit: 3 Units

SND 3010 Sound Script Analysis and Project

The purpose of this course is to teach students how to write and analyze the script along with all its basic elements that go into professional writing being prepared for production.

Credit: 3 Units

SCC: Strategic Corporate Communication

SCC6110 Corporate Communication

This course is designed to introduce

students to the core principles and theories in corporate communication as a necessary foundation to understanding the discipline and practice of corporate communication/ public relations. The course will cover trends in corporate communication from both the academic and practitioner worlds; theoretical foundations, historical development, corporate communication practice, corporate citizenship, corporate identity, corporate culture, the role of corporate communication in propagating an organisation's purpose and goals, public opinion and persuasion, developing communication policies, change communication and public relations ethics and professionalism.

SCC6120 Integrated Marketing Communication

This course will create a clear understanding of traditional advertising and promotional tools, and show how other key elements within the marketing communications mix (e.g. advertising, direct marketing, promotion and the Internet) can be integrated. The course will explore elements of integrated marketing communication; optimum mix of media and message; matching media to target audience, the use of the internet and now Web 2.0 support. It will also cover the importance of a comprehensive approach, identification of below-the-line and above-the-line-media, evaluating audience characteristics, designing integrated campaigns proposals and measuring the effectiveness of marketing campaigns.

SCC 6130 Managing the Communication Function

This course is designed to help students explore theoretical and practical issues related to managing communication within various organisational contexts. This course will cover

management skills of the corporate communication function; conceptualizing and organizing corporate communication; the power of corporate communication to manage complexity; public relations in international management; differences in organisation of the corporate communication function in various organisational settings; the strategic communication role; professional development; the entrepreneurial role of the corporate communication officer; the professional identity of the corporate communication and communications professionals in the 21st century.

SCC 6140 Public Relations Writing

This course will refine and strengthen students' written communication skills with particular emphasis on communicating on behalf of the organisation or clients to diverse public audiences. Students completing this course should develop the skills to plan, organize, write and edit various organisational communication materials. The course will cover overview of Public Relations (PR) Writing; review of journalistic writing principles; differences between PR and journalistic writing; press releases, media advisories, fact sheets, newsletter articles, talking points, crisis materials, presentations, video scripts, advertising copy, backgrounders, features and online content.

SCC 6160 Issues & Crisis Management

This course will equip students with the skills needed to anticipate issues likely to affect an organisation negatively as well as how to handle a crisis, should it happen, in a way that will restore an organisation's reputation. The course will cover the overview of social, economic and social changes for organisations; anticipatory strategic management, environmental scanning, responding to stakeholder expectations and perceptions. Introduction to crisis management; crisis management principles, strategies, tactics, and communication methods.

Development a crisis management plan for analysis and discussion, predict, manage, and control of real-world controversies and media relations skills for crisis situations.

SCC 6170 Communications Strategies and Campaigns

This course will help students learn how to do strategic communication planning in order to adequately support the organisational goals of an organisation. The course will cover strategic leadership and communication program development, management, and evaluation. Strategic thinking, how to build a strategic communications plans; components of communication plans; targeting the right audiences with the right messages at the right times and through the right channels; discussion of strategic planning tools, implementation fully integrated communication programs, monitoring and evaluation of strategic communication.

SCR: Scripting

SCR 3005 Screen Writing: Characters & Genres

The purpose of this course is to teach students the basics of screen writing in terms of different genres and construction of powerful and convincing characters.

Credit: 3 Units

SCR 3010 Writing for the Short Film

This course seeks to equip students with skills of script management for the short film. It teaches the students the essence of precise thinking for the short film story development and aesthetics.

Prerequisite: SCR 3005

Credit: 3 Units

SCR 3015 Writing for Television Drama

This course incorporates a comprehensive understanding of how the industry operates as well as covering the technicalities of scriptwriting itself.

Prerequisite: SCR 3010

Credit: 3 Units

SCR 4005 Feature Film Writing

This course gives the students advanced skills in dramatic screenplay writing. Students immerse themselves in the theory of script writing for the future film.

Prerequisite: SCR 3015

Credit: 3 Units

SCR 4010 Script Analysis and Project For Scripting

The purpose of this course is to teach students how to write and analyze the script along with all its basic elements that go into professional writing being prepared for production.

Prerequisite: SCR 4005

Credit: 3 Units

School of Communication, Cinematic and Creative Arts

Faculty Profiles

Akundabweni, Loreen

Lecturer of Animation

M.A. (Animation & Multimedia Technology), Chandigarh University; India. B.A. (Film production & Animation), Multimedia University; Specialty Areas: Animation.

Diang'a, Rachael A.

Assistant Professor of Film

Ph.D (Film Technology), Kenyatta University; M. A. (Literature/Film Studies); Specialty Areas: African Cinema, Film Production, Postcolonial Cultures.

Keziah Wangui Githinji

Lecturer Multimedia Journalism

Currently doing Ph.D (Film Technology), Kenyatta University. M. A. (Communication Studies); University of Nairobi, B.A Journalism, USIU-Africa. Specialty Areas: Electronic media and Film production.

Kimotho, Stephen Gichuhi

Assistant Professor of Strategic & Health Communication

Ph.D. (Communication), Daystar University. M.A. (Linguistics), Kenyatta University; B. Ed. (Arts), Moi University; Specialty areas: Media, Corporate and Development Communication.

Mutua, James Sylvester

Lecturer of Journalism

Chair, Cinematic Arts Department. M. A., Daystar University. B.A., Kenyatta University; PGD-Film Production and Directing, Kenya Institute of Mass Communication; PGDE, Kenyatta University. Specialty areas: Electronic Media and Development Communication.

Njoroge, Dorothy W.

Assistant Professor of Corporate Communication

B. Education (Business Studies), Kenyatta University; M A (Communication Studies), Daystar University; Ph. D (Mass Communication and Media Arts), Southern Illinois University Carbondale, USA. Specialty Areas: Critical Media Studies, Gender and Media and Policy Advocacy.

Nyabere, Emily

Lecturer of Animation

Currently doing Ph.D (Animation), Kenyatta University. M.A. (Digital Film and Animation), London Metropolitan University; B.A. (Fine Art), Kenyatta University; Specialty Areas: Animation.

Nyanoti, Joseph Nyamwange

Assistant Professor of Journalism

Ph. D in Sociology of Communication from University of Nairobi; B.A., M.A., PGD (Mass.Com.) University of Nairobi; Specialty Areas: Editing Skills, News Reporting and Writing.

Ochieng, Robi Koki

Lecturer of Journalism

Chair, Media and Communications Department. M.A. (Communication Studies), University of Nairobi. B.Ed. (Arts), Moi University; Specialty Areas: Development and Organisational Communication.

Omondi, Daniel Onyango

Assistant Professor of Strategic & Corporate Communication.

Ph.D.(Communication), Daystar University. MSc (Organizational Development) United States International University-Africa (USIU-Africa); B.A. (Philosophy), Urbaniana University; B.A. (Journalism) United States International University-Africa (USIU-Africa); Specialty Areas: Organizational Communication, Corporate Communication, Print Media.

Owino, Ruth Aoko

Assistant Professor of Strategic & Corporate Communication

PhD, Communication -Daystar University (Specialisation -Strategic & Political Communication) MA, Communication -Daystar University (Specialisation -Corporate Communication & Media Studies). BA, Mass Communication -Busoga University (Broadcast and PR). Specialty Areas: Corporate communication, Public Relations and Media studies.

Owuor, Bernard

Lecturer of Film

Currently doing Ph.D (Film Production), Technical University of Kenya. Masters (film editing and post production) - Bournemouth University, UK. BA in telecommunication (electronic media) - Texas Southern University, USA. Specialty Area: Film Production and Editing.

Sikolia, Geoffrey Serede

Dean, School of Communication, Cinematic and Creative Arts

Assistant Professor of Mass Communication. Ph.D (Jomo Kenyatta University of Agriculture and Technology); M.A. Communication, Daystar University. B.Ed. (Fine Art), Kenyatta University; Specialty Areas; New Media, Social Media; Social Network Sites; Development Communication; Risk Communication, Behavioural Change Communication, Mass Communication.

Mukiria, Albert

Lecturer of Animation

If you don't have time
to do it right, when will
you have time to do it
over?

John Wooden

School of Humanities and Social Sciences

Mission Statement

The mission of the School of Humanities and Social Sciences is to provide an enabling learning environment through quality programs where Undergraduate, Graduate and Doctoral students acquire knowledge, skills, positive attitudes, values and desirable behavior. The School of Humanities and Social Sciences is committed to promoting the generation and dissemination of knowledge in order to create a better world.

Mission Outcomes

1. Competence in critical thinking, creative skills, use of technology, and communication skills.
2. Effective, efficient and ethical leadership.
3. Service to the community: acquire practical working experience through participation and contribution to community and societal causes.
4. Preparedness for career and lifelong learning in their chosen disciplines as well as understanding of and appreciation for the interdisciplinary nature of knowledge.
5. Use of qualitative and quantitative research skills in humanities and social sciences.
6. Awareness and appreciation of diversity, and development of a world view informed by a multicultural and global perspective.

Academic Programs

The international and multicultural emphasis of the University is central to the mission of the School of Humanities and Social Sciences. The belief that neither nations nor individuals can survive in isolation impacts program design and course content. The school stresses understanding and appreciation of cultural diversity, societal interdependence, and global perspectives. Its culturally diverse faculty is committed to preparing students for enlightened leadership in an increasingly related world.

The School of Humanities and Social Sciences offers a range of programs that serve the academic needs of the University. It is home to a variety of undergraduate majors, Master of Arts programs in International Relations, Counseling Psychology Clinical Psychology and Marriage and Family Therapy, and doctoral programs in Clinical Psychology and International Relations.

These programs emphasize interdisciplinary approaches while, at the same time, maintaining the integrity and quality of individual disciplines. As the school with the critical responsibility for the

broad intellectual development of undergraduates, it stresses clear understanding of facts, events and ideas in a global perspective.

Towards those ends, the faculty of the School of Humanities and Social Sciences strives to nurture and develop students who, by the time they successfully complete their coursework at USIU-Africa, will have manifested the following attitudes, skills, understandings, and behavior:

- Global outlook, i.e. show understanding, respect, and appreciation for others irrespective of cultural backgrounds and, additionally, show a deeper and broader understanding of the interactions, interconnectedness, and interdependence of individuals and cultures;
- Competency in critical, creative, and quantitative skills in thinking, writing, and speaking;
- Breadth and depth in their chosen disciplines as well as understanding and appreciation of the interdisciplinary nature of knowledge;
- Effective and ethical leadership;
- Service to the community;
- Preparedness for professions, specific careers, or further study; and
- Skill in using computers as learning tools.

For graduate students, the above- listed goals will be evidenced at a more sophisticated level. Additionally, graduate students will manifest the following:

- Advanced skills and comprehension in their specific discipline;

- Independent and co- operative research and scholarship;
- Ability to function effectively as individuals and as members of multicultural, international teams; and
- Leadership in chosen discipline and areas of interest.

Bachelor of Arts Programs

Majors

The School of Humanities and Social Sciences offers the following Undergraduate degrees and majors:

- International Relations (B.A.)
- Psychology (B.A.)
- Criminal Justice Studies (B.A.)
- Sociology (Double Major) (B.A.) (on hold)

Minors

The following minors are available:

- African Studies
- Arabic
- Chemical Dependency
- Chinese
- Comparative Philosophy
- Criminal Justice Studies
- English
- Family Studies
- French
- Gender Studies
- Health Psychology
- Industrial / Organisational Psychology
- Integrated Studies
- International Relations

- Japanese
- Literature
- Psychology
- Sociology
- Spanish
- Swahili

Minors in the Chandaria School of Business and School of Science and Technology are also available.

Master of Arts Programs

At the Graduate level, the School of Humanities and Social Sciences offers the following programs:

- Clinical Psychology (M.A.)
- Counseling Psychology (M. A.) (Available Online)
- International Relations (M. A.) (Available Online)
- Marriage and Family Therapy (M. A.)

The International Relations Undergraduate and Graduate programs offer concentrations in:

- Diplomacy & Foreign Policy
- Development Studies
- Peace & Conflict Studies
- Intergrated Studies (Undergraduate program only)

The Marriage and Family Therapy graduate program offers concentrations in:

- Family Violence and Trauma
- Mindfulness and Family Therapy

Doctoral Programs

- Doctor of Psychology, PsyD, Clinical Psychology
- Doctor of Philosophy in International Relations

Course Descriptions

ARB: Arabic

ARB 1000 Beginning Arabic I

This first course in a sequential series introduces students to the basic skills of listening, speaking, reading and writing standard Arabic. Lexis and structure are presented and practised in context with glimpses at culture and civilization. By the end of the course, students should be able to embark upon further study of Arabic grammar. *Prerequisite: The course is open to students who have no knowledge of Arabic.*

Credit: 3 Units

ARB 1001 Beginning Arabic II

The second beginning course in this series builds on the skills acquired in Arabic 1000 to expand the student's knowledge of Arabic grammar and structure. Development of basic competencies continues with further focus on culture and civilization.

Prerequisite: ARB 1000

Credit: 3 Units

ARB 2000 Intermediate Arabic I

The course aims to develop students' reading/listening comprehension and oral/written comprehension. It introduces further elements of grammar and exposes students to such points as voice (active/passive), modal verb forms, weak roots, stem formation and derivation. The course is conducted in Arabic. It is intended for students who wish to either complement their language studies or begin the minor. It is the required lower level elective for the minor.

Prerequisite: ARB 1001

Credit: 3 Units

ARB 2001 Intermediate Arabic II

The course completes Arabic 2000, developing listening, speaking, reading and writing skills. It also introduces Arabic literature through a selection of texts and gives further insight into Arabic culture and civilization. It is conducted in Arabic.

Prerequisite: ARB 2000

Credit: 3 Units

ARB 2002 Business Arabic

The course focuses on spoken Arabic and is recommended for students pursuing degrees in international relations and business administration. It is a conversational course intended to develop skills required in the business world.

Prerequisite: ARB 2000

Credit: 3 Units

ARB 2003 Tourist Arabic

With emphasis on spoken Arabic skills needed in the tourist world, this conversational course is recommended for students pursuing degrees in Journalism, Hotel and Restaurant Management and Tourism. It is also suitable for students who wish to participate in the Windows to the World Program.

Prerequisite: ARB 2000

Credit: 3 Units

ARB 2004 Arabic for International Relations

The course focuses on terminology and concepts in the context of international relations. It is aimed to enable the students to describe and discuss contemporary political systems, foreign and trade issues and international organisations. Both reading and writing skills are enhanced. It is recommended for students

pursuing degrees in international relations.

Prerequisite: ARB 2000

Credit: 3 Units

ARB 3000 Advanced Grammar and Composition

This course develops and reinforces the grammar acquired in earlier courses and focuses on writing skills. Arabic culture and civilization feature as the framework for composition activities. The course is a required upper level elective for the minor. It is conducted in Arabic and English.

Prerequisite: ARB 2000

Credit: 3 Units

ARB 3001 Arabic Culture and Civilization

The course surveys the history, geography and literature of the Arab World. It reviews the cultural, social, political trends and explores customs and traditions. It is conducted in Arabic and may be taken as part of the Windows to the World Program.

Prerequisite: ARB 3000

Credit: 3 Units

ARB 3002 Contemporary History of the Arab World

The course covers the history of the Arab World from the fall of the Ottoman Empire and the beginning of European protectorates and the colonial era to the present. It highlights the rise of pan-Arabism, nationalist movements, the role of prominent leaders, the Arab-Israeli conflict, burgeoning democracies and the Arab League. The course is conducted in Arabic.

Prerequisite: ARB 3001

Credit: 3 Units

ARB 3003 Literature in Arabic I

This course focuses on the analysis and interpretation of representative works of Arabic literature within their cultural context. It covers the pre-Islamic and the Umayyad (early Islamic) periods (500-750 AD). Students are expected to read, analyze and discuss prose and poetry, both orally and in writing. The course is conducted in Arabic.

Prerequisite: ARB 3001

Credit: 3 Units

ARB 3004 Literature in Arabic II

This course comprises the analysis and interpretation of representative works of Arabic literature within their cultural context. It covers the Abbasid and Andalusian periods (750-1250 AD). Students are expected to read, analyze and discuss prose and poetry, both orally and in writing. The course is conducted in Arabic.

Prerequisite: ARB 3001

Credit: 3 Units

ARB 3005 Literature in Arabic III

This course focuses on the analysis and interpretation of representative works of Arabic literature within their cultural context. It covers renaissance, modern and contemporary prose, drama and poetry (19th century – Present time). Students are expected to read, analyze and discuss both orally and in writing. The course is conducted in Arabic.

Prerequisite: ARB 3001

Credit: 3 Units

ARB 4000 Arab-Islamic Thought I

The course is a survey of Arab and Islamic philosophy and theology. It highlights formative

influences, major trends and main protagonists and is conducted in Arabic. Students are expected to read, analyze and discuss both orally and in writing.

Prerequisite: ARB 3001

Credit: 3 Units

ARB 4001 Arab-Islamic Thought II

This course builds on the insights acquired in ARB 4000. It comprises the study of classical, social and contemporary Arab and Islamic philosophy. Reading, writing, analysis and extensive discussion are expected. The course is conducted in Arabic.

Prerequisite: ARB 4000

Credit: 3 Units

ATH: Anthropology

ATH 4000 Cultural Anthropology

Examination of the dominant theoretical orientation, methodologies, and research findings generated in studies of human culture in diverse socio-cultural settings. Through lectures, assigned readings, class discussions and activities, and field research, students will explore the structural and functional components of human cultural systems and the theoretical perspectives, which can be utilized in the study of human culture and socio-cultural change.

Credit: 3 Units

Cultural anthropology is an examination of the dominant theoretical orientation, methodologies, and research findings generated in studies of human culture in diverse socio-cultural settings.

CHI: Chinese

CHI 1000 Beginning Chinese I

This is the first Chinese course in a sequential series conducted in Chinese. The study involves basic language skills of listening, speaking, reading and writing.

Credit: 3 Units

CHI 1001 Beginning Chinese II

This is a second course in a sequential series; basic language skills continue.

Prerequisite: CHI 1000

Credit: 3 Units

CHI 2000 Intermediate Chinese I

This is the first course in the intermediate Chinese series. There is continued development of skills in all areas at the sentence level. The student begins learning to comprehend and create paragraph-level language, such as factual descriptions and narrations, and handle more every day, life situations. It is intended for students who wish to either complement their language studies or begin the minor. It is the required lower level elective for the minor.

Prerequisite: CHI 1001

Credit: 3 Units

CHI 2001 Intermediate Chinese II

This is the second course in the intermediate Chinese series. There is continued development of language skills.

Prerequisite: CHI 2000

Credit: 3 Units

CHI 2002 Business Chinese

This course aims to teach students the communication skills in daily life and business interactions. The course introduces basic business vocabulary and forms of communication appropriate for various business situations. The aim is to enable students to acquire foundational, cultural, social,

and legal knowledge for engaging in business in or with China. It is a conversational course.

Prerequisite: CHI 1001

Credit: 3 Units

CHI 2003 Tourist Chinese

The course is designed for students who have finished beginning level of Chinese study and want to go to China for living, study and travelling. It provides the introduction to practical Chinese used in airports, shops, restaurants, banks, hospitals and tourist attractions. It is a conversational course. This course is recommended to the students who are interested in Windows to the World Program.

Prerequisite: CHI 1001

Credit: 3 Units

CHI 2004 Conversational Chinese

The course complements CHI 2002 and CHI 2003 continuing to place emphasis on spoken Chinese in the context of today's modern world. It presents more dialogues and role playing and is focused towards the student's career goals.

Prerequisite: CHI 1001

Credit: 3 Units

CHI 3000 Advanced Grammar and Composition I

This is the first advanced course in a sequential series. It further develops the basic language skills of the intermediate level. It focuses on expressing opinions, comparisons, describing things, and giving encouragement. It is the required upper level elective.

Prerequisite: CHI 2000

Credit: 3 Units

CHI 3001 Advanced Grammar and Composition II

This is the second course in a sequential series. It further develops the basic language skills of the intermediate level. It focuses on making acquaintances, indicating possibilities, expressing concern, stressing a point, questioning and refusing.

Prerequisite: CHI 3000

Credit: 3 Units

CHI 3002 Ancient China: Culture and Civilization

The course is designed to introduce different cultural aspects of ancient China. The contents include ancient Chinese thought, eminent personnel in the ancient times, painting, calligraphy, architectural styles, ancient cities and historical sites.

Prerequisite: CHI 3000

Credit: 3 Units

CHI 3003 Modern China: Culture and Civilization

It is an introductory course to the culture and civilization of modern China which includes not only an understanding of the art, entertainment and life style of the nation, but also less tangible aspects such as attitudes, prejudices, folklore and so forth. It may be taken as part of Windows to the World Program.

Prerequisite: CHI 3000

Credit: 3 Units

CHI 3004 Advanced Business Chinese

A continuation of CHI 2001, the course is designed for students who are interested in doing business in Chinese-speaking communities (China, Taiwan, Hong Kong, and Singapore). Students not only learn specialized vocabulary for business and economics but also the conventions of business interaction and correspondence.

Prerequisite: CHI 3000

Credit: 3 Units

CHI 4000 Advanced Chinese Reading and Writing I

A modern Chinese reading and writing course at the advanced level, it serves as a transitional course from language to literature. It aims at increasing students' linguistic competence by focusing on the following aspects:

(1) expansion and enrichment of the students' vocabulary significantly; (2) practice in advanced Chinese grammar and rhetoric; (3) development of the students' abilities to read and analyze modern Chinese prose, essays and short stories; (4) comprehensive training in Chinese formal writing.

Prerequisite: CHI 3000

Credit: 3 Units

CHI 4001 Advanced Chinese Reading and Writing II

A continuation of CHI 4000, CHI 4001 is a modern Chinese reading and writing course at the advanced level. It aims at increasing students' linguistic competence by focusing on the following aspects: (1) expansion and enrichment of students' vocabulary significantly; (2) practice in advanced Chinese grammar and rhetoric; (3) development of the students' abilities to read and analyze modern Chinese prose, essays and short stories; (4) comprehensive training in Chinese formal writing.

Prerequisite: CHI 4000

Credit: 3 Units

For a minor in Chinese, the student is required to take one lower level elective (CHI 2000), one upper level elective (CHI 3000) and any three other upper level courses on the 3000 and 4000 levels.

CJS: Criminal Justice Studies

CJS 1101 Introduction to Criminal Justice Systems

This course is a basic study of all components of the criminal justice systems, namely law enforcement, courts and corrections at various levels both nationally and internationally and their inter-relationship in the administration of justice. It involves an examination of the historical development and contemporary practices related to the major components of the criminal justice system. Criminal justice standards and goals and the relationship of the social and behavioral sciences to criminal justice will be emphasized. Topics include concepts of law and crime, the criminal justice process, overview of criminal justice agencies, current criminal justice issues, and interactions and conflicts between criminal justice agencies. A brief analysis of the international criminal justice system will also be undertaken, with emphasis on the International Criminal Court.

Credit: 3 Units

CJS 1103 Juvenile Justice

The course provides an orientation to the issues, policies and procedures which make up the system of justice for children. It involves an examination of the historical development and examination of the concept of juveniles and adolescence. The function and legal responsibilities of the Police, probation, Juvenile Court and corrections system will be studied. Emphasis will be on societal forces that bring children into the Justice System including child abuse, as well as the legal response of mandated agencies. Theoretical perspectives are applied to explain juvenile delinquency, punishment, treatment, and rehabilitation. The course also focuses on the special juvenile justice system, protective custody of juveniles whom are abused, neglected and dependent.

Prerequisite: CJS 1101

Credit: 3 Units

CJS 1104 Criminology

Criminology is the scientific study of crime, criminal behavior and societal responses to crime and to crime victims. Students will be introduced to theories of crime causation, crime types, ethics of research, data collection and methods of crime prevention and control. Issues such as capital punishment and restorative justice will be debated.

Prerequisite: CJS1101

Credit: 3 Units

CJS 2201 Criminal Law

This course is about the substantive law of crime; it will examine the scope, purpose and definition of crime and criminal offences. It examines the history and development of criminal law as well as the elements of a crime, parties to a crime and types of offenses. Although many offences are created either under the common law or customary law, this course shall focus on those crimes created by the Penal Codes of various jurisdictions, particularly Kenya. The course also focuses on defenses against criminal liability by emphasizing the two categories of defenses, i.e., justifications and excuses. The general principles of substantive criminal law will be studied through the analysis of judicial opinions and texts.

Prerequisite: CJS 1101

Credit: 3 Units

CJS 2202 Criminal Procedure

This course involves an in-depth look at the procedures utilized in the criminal justice system. It includes a brief introduction to the criminal court structures and the participants in the courtroom, namely the state and its agents such as the police and the prosecutors, the suspect/accused, experts, witnesses, etc. The procedural requirements of the criminal justice system as mandated by the relevant laws such as, the constitutions, criminal procedure codes/rules will be analyzed. Fundamental principles such as presumption of innocence, double jeopardy, etc. will be discussed. The course focuses

on the procedures required by the criminal justice system, and the courts, from initial suspicion of a crime to post-conviction. Constitutional safeguards are emphasized, with a particular emphasis upon the purposes of laws pertaining to arrest, warrants, search and seizure, trial procedures, and other process remedies.

Prerequisite: CJS 1101

Credit: 3 Units

CJS 2204 Corrections & Punishment

This course covers the history, major philosophies, components, and current practices and problems of the field of corrections. This course explores justifications and practices of punishment and social control from a socio-legal perspective. Theoretical perspectives are applied to explore questions such as: Why do we punish? What are the purposes of punishment? Is incarceration the best option? It examines Contemporary corrections in terms of structure, clients, management, staff, programs and prisoners' rights. Topics include historical evolution, functions of the various components, alternatives to incarceration, treatment programs, inmate control, and other related topics.

Prerequisite: CJS 1101

Credit: 3 Units

CJS 2205 Ethics in Criminal Justice

This course focuses on understanding and dealing with ethical and moral issues that arise in the criminal justice system. Different theoretical perspectives will be used to explore the social and organisational processes that lead to corruption and abuse of power, systemic discrimination, and illegal behavior by criminal justice practitioners. The course will examine both the individual perspective and the organisational standpoint. Students will study four areas of ethical decision making opportunities: law enforcement ethics; correctional ethics; legal profession ethics; and policymaking ethics. Some of the topics to be covered include the use of harm to prevent harm, the use of discretionary decision-making, prediction

problems and moral dilemmas that confront various justice agents, e.g., police, judicial officers and correctional officers. The use of case studies will provide a realistic picture not only of what ethical questions arise in the criminal justice system, but also of how sound moral decisions are made in response to them.

Prerequisite: CJS 1101

Credit: 3 Units

CJS 2207 Diversity & Criminal Justice

This is an examination of classical and contemporary theories of the social ecology of communities and how this social ecology relates to crime. Further, it will explore the impact of community development activities on crime outcomes in neighborhoods. It will examine the importance of race, gender and class in forging effective community based development models. Lastly, it will examine specific community based solutions to crime and disorder problems.

Prerequisite: CJS 1101

Credit: 3 Units

CJS 2210 Crime and Gender

This is an examination of the gender gap as it relates to deviant Behavior. There is an assessment of the relationship between gender and crime. Theoretical perspectives will be used to examine how gender affects the patterns of offending, victimization and imprisonment. Students will study differences in the norms, expectations and socialization of males and females in society. The course analyses the role gender and gendered experiences play in creating, legitimating, and perpetuating the fear of crime; the parallels between women's limited mobility in legitimate and illegitimate economies; crimes and policies that differentially involve or affect female offenders and victims; and criminological theory.

Prerequisite: CJS 1101

Credit: 3 Units

CJS2211 Community and Social Justice

The course examines why justice is important to peoples' feelings and attitudes, and how these may influence criminal justice outcomes. The main goal of this course is to enhance critical thinking skills through a social science inquiry. It will deal with general questions of social justice and those relating to the role of law and social change in the justice process. The theoretical foundations of social justice and how it connects to peoples' feelings about their social status in the community will be discussed. Additionally, the role of the United Nations (U.N.) as an institution that promotes international community social justice will be examined.

Credit: 3 Units

CJS 3301 Crime and Public Policy

This course focuses on criminal justice and non-criminal justice policies used to combat crime. Students will use the most recent crime data and explanatory theories on crime to evaluate current policy. A multi-disciplinary approach will be used to develop new policies designed to have a long-lasting impact on crime. (OI)

Prerequisite: CJS 1101

Credit: 3 Units

CJS 3303 Victimology

This course seeks to introduce students to the study of Victimology. It will consist of a survey of the literature, theory research and current trend on crime victims. It will focus on the different agencies responses to crime victims and the development of victims' rights, the fear of crime, difficulties in measuring victimization, and the impact on the individual. (WI)

Prerequisite: CJS 1101 & CJS 1103

Credit: 3 Units

CJS 3305 Forensic Science

The course introduces and familiarizes students with the basic principles and uses of forensic science/evidence and the development in crime scene techniques. It applies science to the process of law

and involves the collection, examination, evaluation and interpretation of evidence. The course reviews the basic applications of the biological, physical, chemical, medical and behavioral sciences to the questions of evidence and law.

Prerequisite: CJS 1101 & CJS 1103

Credit: 3 Units

CJS 3306 Criminal Investigations

The initial crime scene investigation can make or break subsequent crime solving and conviction of offenders. What does one look for? Who has responsibility for the collection of evidence and the resulting chain of custody? This course seeks to answer these questions. Criminal profiling, which is an advanced course in applied criminology, will also be introduced at this stage as it is part and parcel of investigations. Topics include, case management, database development, typology validation, motive and pattern analysis, personality assessment, forensic demography, principles of geo-coding, statistical prediction, and the ethics of provocation, interview and interrogation strategies.

Credit: 3 Units

CJS 3307 Comparative Criminal Justice Systems

This course seeks to familiarize the students to issues related to crime internationally. It consists of a comparative analysis of criminal justice systems from around the world. Emphasis shall be placed on Europe, Asia, Africa and America. In order to better understand the selected systems, the course shall begin by introducing the various schools/families of law, particularly common law, civil law and Islamic law traditions. In addition it will look at the various models of criminal justice systems including their strengths and weaknesses. A comparative analysis of criminal justice policies shall be carried out, including; policing and prosecution, trials and sentencing, corrections/punishment and transnational crimes. The course will also introduce the students to the international criminal justice system, i.e., the international courts and tribunals, which complement the national criminal justice systems and deal with international crimes.

Prerequisite: CJS 1101 & CJS 1103

Credit: 3 Units

CJS 3309 Terrorism and International Security

The purpose of this course is to acquaint the student with the growing social phenomenon of widespread violence and indiscriminate terrorism. The course will emphasize the historical, sociological, and political aspects of violence and terrorism. Present-day terrorists have introduced into contemporary life a new breed of violence in terms of technology, victimization, threat and response. The deliberate use of terrorism as a technique for disrupting the fabric of civilized order in open societies is one of the most menacing facts of international life today. The course provides an in- depth exposure to modern terrorism, its characteristics and modus operandi. Students will acquire an understanding of the challenge terrorism presents to decisions makers, security personnel, and the intelligence community. Until government officials become more conscious of the strategic dangers reflected in the deliberate use of terrorism and violence as an instrument of policy, nations will face worldwide security problems. The challenge for democratic governments is to balance civil and human rights with security and public safety. Students of "terrorism" must be aware of responding to terrorism within the constraints of the criminal justice system. (ILI)

Prerequisite: CJS 1101

Credit: 3 Units

CJS 3312 Community Policing

This course examines the philosophy and practice of community policing and contrasts community-based approaches with traditional models of policing. It studies the history, theory, and practice of community policing. It reviews and discusses best practices, research, and future trends. It also reviews the structure and delivery of modern policing services as a response to contemporary issues such as fear of crime and the changing nature of crime in diverse communities.

Prerequisite: CJS 1101 & CJS 1103

Credit: 3 Units

CJS 3313 Information Technology & Crime

This course provides an overview of computer crime. Emphasis will be placed on the legislative

responses and policy issues related to computer intrusions and cyber-fraud. Issues encountered when enforcing laws in cyberspace and the public/private sector initiatives for dealing with computer crime will also be explored.

Prerequisite: CJS 1101 & IST 1010 & CJS 1103

Credit: 3 Units

CJS 4120 Criminal Evidence

This course is an in-depth analysis of criminal evidence rules. Topics include trial procedures, examination of witnesses, real/physical evidence, circumstantial evidence, hearsay evidence and exceptions, privileged communications, declarations against interests, and judicial notice. (OI)

Prerequisite: CJS 1101 & CJS 2202

Credit: 3 Units

CJS 4125 Seminar in Criminal Justice

This seminar offers an exciting culminating experience for senior criminal justice majors. Broader questions about the nature and scope of justice and criminal justice are also explored. The course orients students to the major areas of advanced criminal justice inquiry including criminal justice theory; law and the court process; policing; and punishment and corrections. It will provide students the opportunity to thoroughly synthesize their acquired understanding of criminological theory and research methods in consideration of practical applications and public policy. Students will assess, evaluate, and critique the findings of prior empirical research and make recommendations for improvement in light of criminological theories, social phenomena, and proper analytic approaches. Moreover, this seminar will explore the role of punishment and social control in modern society, although students will have much latitude to delve deeply into any criminal justice study that they wish. This reading - and writing - intensive course will not only deepen students' appreciation for important substantive and technical issues and help refine students' writing abilities, but also engage them in intensive group discussions, debates, and presentations about various criminological matters, thereby providing the opportunity to hone speaking skills, as well.

Prerequisite: Completion of all core courses Credit: 3 Units

CJS 4130 Research Methods in Criminal Justice

This course covers the scientific approaches to the study of criminal justice. Major theoretical and philosophical underpinnings of research as well as validity and reliability measures and ethics will be covered. Particular attention will be paid to research concepts, methodologies, and techniques appropriate for application in criminal justice environment. (ILI, WI) *Prerequisite: Completion of all core courses Credit: 3 Units*

CJS 4136 International Criminal Law and Procedure

The course seeks to develop students' awareness of the basic concepts of substantive international criminal law, including, the development of international criminal law, the international crimes such as 'genocide', 'crime against humanity', 'aggression' and 'war crimes', and the institutions of international criminal justice in an historical and contemporary context. Emphasis will be on the Statute of the International Criminal Court. This course is also devoted to a practical perspective on international criminal procedure in the fields of immunities, primacy vs. complementarity, tribunals' requests for assistance (including binding orders and subpoenas), as well as protection of witnesses. This course addresses various aspects of investigation and trial before international criminal courts. The main features of the collection, presentation and evaluation of written and oral evidence before various international criminal tribunals, including the International Criminal Court, will be explored. The course has a practical component, which includes a one-week field trip to the International Criminal Court in The Hague, The Netherlands.

Credit: 3 Units

CJS 4140 Police Administration

This course is a study of the organisation, administration, and management of law enforcement

agencies. It examines the contemporary law enforcement agency and its functions, structure, and operational techniques; implications of generalized and specialized units; development of resources by time and area of function; analysis of line, staff, and auxiliary functions; and current issues facing today's police agencies including: coordination and consolidation of police services; the effect of terrorism on domestic policing strategies; and the use of modern technology.

Prerequisite: CJS 3312

Credit: 3 Units

CJS 4150 Criminal Justice Administration

Criminal Justice Administration is an examination of all facets of the criminal justice system as well as other related matters of interest to prospective and current justice administrators. This course is designed to familiarize the student with the theoretical and practical management perspectives adopted by the American and Kenyan criminal justice systems. This will include nature of criminal justice organisations, individual and group behavior within those organisations, processes inherent in those organisations, and areas of criminal justice reform. Some of the topics to be covered include the current trends in criminal justice organisation and management including: social setting, organisational theory and design, productivity and evaluation, human resource management, decision making, and organisational change.

Prerequisite: CJS 1101

Credit: 3 Units

CJS 4900 Criminal Justice Project

The course is recommended for practitioners serving in some capacity of the criminal justice system: law enforcement, judiciary, prisons and juvenile justice system. Students will be assigned a faculty member in their area of concentration to guide their thesis project. Students will select a professional outside academia working in the field of criminal justice as a consultant to their project.

Prerequisite: Completion of ALL CJS Core Courses

Credit: 3 Units

CJS 4910 Criminal Justice Internship

The internship is fourteen weeks in duration. Students must complete 200- 400 hours of on-the-job experience. Students will gain practical experience on the internal operations of a criminal justice organisation. This course is student's initial exposure to the criminal justice system. Students will be placed in an authorized criminal justice agency. Students will be placed based on a certified and recommended list of agencies. The internship is coordinated and directed by an Internship Administrator at USIU-Africa. The course is suggested for non-practitioners.

Prerequisite: Completion of ALL CJ Core Courses

Credit: 3 Units

A brief analysis of the international criminal justice system will also be undertaken, with emphasis on the International Criminal Court.

COM: Communication

COM 1500 Intercultural Communication

Study of cultural issues in their relation to communication, language, society, family, work, education, problem solving, religion and worldviews. (WI)

Credit: 3 Units

COM 2000 The Communication Process

Selected theories of the fundamental nature and function of the communicative process. Introduces the dynamics of who says what to whom and how. Explores the interplay of the message, source, channel, and destination. Examines the key components of human communication codes with reference to formal, informal, and other levels of communication. Identifies a variety of styles associated with different cultural and co-cultural groups.

Credit: 3 Units

COM 2010 Research and Writing in Communication Studies

Study of major categories of research and methods of data collection and analysis. Includes a research project and development of guidelines for style and mechanics.

Credit: 3 Units

COM 2205 Media, Communication and the Information Society

The role of communication in society as manifested through print, visual, and electronic media.

Credit: 3 Units

COM 3000 Organisational Communication

Structure and function of vertical and horizontal communication in organisations at local, national, and international levels. Focuses on effective communication strategies for facilitating and achieving organisational goals. Case studies of selected organisational communication to illustrate the practical application of the concepts and principles underlying various models and approaches.

Credit: 3 Units

COM 3005 Diversity Training

Examination of the concepts, tools, and activities to design and present basic diversity training. Focuses on recognizing the dimensions of diversity and their impact in the workplace, understanding the range of cultural norms and values in work groups, and learning how to confront and deal with stereotypes and prejudice in organisations.

Prerequisites: COM 2000 and COM 3000 or permission of instructor

Credit: 3 Units

COM 3010 Group Dynamics

Theoretical processes of group communication. Emphasizes concepts of group formation, communication channels, team-building, and group decision-making.

Prerequisites: COM 2000 and COM 3000 or permission of instructor

Credit: 3 Units

COM 3100 Technical Rhetoric

Introduction to the rhetoric of technical communication. Includes the visual rhetoric of

graphics and document design, rhetorical modes of narration, description, exposition, and argumentation as used in technical communication, and the ethics of technical communication.

Credit: 3 Units

COM 4005 Nonverbal Communication

Examination of the characteristics, functions, and importance of nonverbal communication across cultures and in different organisational settings. Includes investigation of body movement, physical appearance and clothing, physical touch, space, paralanguage and time.

Credit: 3 Units

COM 4010 Language, Culture, and Society

Examination of the relationship between linguistic, social and cultural factors in human communication. Focuses on dialects, regional and social variation, language change, speech communities, gender and language conflict.

Credit: 3 Units

COM 4100 Advanced Technical Communication

Advanced study of technical communication. Includes work in technical style and the common document types produced in business and industry, including proposals, progress reports, completion reports, and manuals.

Credit: 3 Units

COM 4105 Technical Editing

The fundamentals of editing. Focuses on the role of the editor in organisational settings; basic editorial activities; methods for analyzing, critiquing, and revising manuscripts for different audiences; and

techniques for successful writer/editor dialogues. Includes techniques for verbally and visually revising documents for publication.

Credit: 3 Units

COM 4110 Document Production

Study and application of principles of producing effective technical documents. Focuses on the relationship between page layout and readability, techniques for combining textual and non-textual information and the use of word processing and technical graphics software. Taught as a workshop in which students produce basic technical documents, such as brochures, data sheets, flyers, reports, and manuals.

Credit: 3 Units

COM 4200 Communication and Leadership

The study of the changing concepts of leadership, types and functions of leadership, and the leader as a person with special talents of communication. Investigates leadership in communication contexts at local, national and international levels. Explores various contexts for leadership, including among women and across cultures. Uses case studies of selected leaders.

Credit: 3 Units

COM 4205 Principles of Public Speaking

Study of the fundamental processes of oral expression. Focuses on methods of obtaining and organizing material and principles and practice in constructing and delivering various forms of presentations and speeches.

Credit: 3 Units

EIL: English as an International Language

EIL 1000 Grammar and Writing

Advanced communicative approach to the study of the English grammar system. Addresses issues of English syntax, verb aspect, and discourse analysis. Provides opportunities for students to apply their knowledge of the English grammar system through authentic language use. Satisfies foreign language requirement for non-native English speakers only. (Undergraduate only) (WI)

Credit: 3 Units

EIL 1001 Advanced Written English

Introduction to literature and expository writing. Approaches writing through the reading of multicultural literary works written in English. Focuses on critical and analytical reading of literature and the principles of effective composition with emphasis on rhetorical patterns and the writing process. Satisfies foreign language requirement for non-native speakers of English only. (Undergraduate only) (WI)

Credit: 3 Units

EIL 1002 Advanced Oral Communications

Content-based approach to the development of fluent expression in English. Emphasizes research and oral presentation of ideas, summarization of main points in a discussion, interviewing skills, group participation, and spontaneous communication skills. Satisfies foreign language requirement for non-native speakers of English only. (Undergraduate only) *Credit: 3 Units*

ENG: English

ENG 0999 Basic Reading and Composition

Basic expository essay writing skills, including "on-demand" timed writing in class; college entry-level analytical reading skills; credit/no credit ("C" level competency required); credit does not apply to any degree program.

Credit: 3 Units

ENG 1106 Composition I

Principles of effective composition; emphasis on expository writing; analytical and critical reading of texts; competency required (grade of "C" or higher) to take ENG 2206. (WI, ILI) Prerequisite: Passing ENG 0999 or passing the English Placement Test

Credit: 3 Units

ENG 2000 Introduction to Creative Writing

Introduction to imaginative forms of writing: fiction, poetry, drama, screenplay, personal essay and journal. (WI)

Prerequisite: ENG 1106 or instructor's consent.

Credit: 3 Units

ENG 2206 Composition II

Principles of effective composition continued; emphasis on argumentative writing and critical reading and thinking; writing the research paper. (WI, ILI)

Prerequisite: Competency in ENG 1106 (grade of "C" or higher) or equivalent

Credit: 3 Units

ENG 3303 Advanced English Composition

Principles of effective composition continued; emphasis on rhetorical techniques, modes of discourse; inquiry into what is 'quality' in writing. (WI)

Prerequisite: ENG 1106 and 2206 or equivalents.

Credit: 3 Units

ENG 3304 English Language History

Development of the English language; Anglo-Saxon, Greek, and Latin roots; characteristics of Old, Middle, Modern and contemporary English.

Credit: 3 units

ENG 3306 English Grammar

Prescriptive and descriptive models of grammar; some transformational grammar.

Credit: 3 Units

ENG 3307 Introduction to Linguistics

The nature of language; includes the study of phonetics, phonology, syntax, semantics, and morphology.

Credit: 3 Units

ENG 3309 Creative Writing Workshop: Fiction

Writing imaginative prose, primarily the short story (some introduction to novel writing); investigation into narrative art through reading and discussion of models and students' work.

Prerequisite: ENG 2000, or instructor's consent.

Credit: 3 Units

ENG 3310 Creative Writing Workshop: The Essay

Writing the personal essay; practice in narrative, expository, descriptive, and persuasive writing; reading and discussing models and students' work.

Prerequisites: ENG 1106 and 2206 or equivalents, or instructor's consent.

Credit: 3 Units

ENG 3311 Creative Writing Workshop: Writing for the Media

Writing for the print media, television, and radio. Internship option available. (This course is recommended for students who work on the campus newspaper.)

Prerequisites: ENG 1106 and 2206, or instructor's consent.

Credit: 3 Units

ENG 4000 Creative Writing Workshop: Poetry

Writing poetry; practice in formal and free verse; study of poetic models, techniques, styles; reading and discussing students' work.

Prerequisite: ENG 2000, or instructor's consent.

Credit: 3 Units

ENG 4900 Creative Writing Workshop: Individual Project

Extended focus on guided, individual project: longer short story or novel, biography, screenplay, poetry collection or sequence, etc. *Prerequisite: ENG 2000, Introduction to Creative Writing, or instructor's consent.*

Credit: 3 Units

FAR: Fine Arts

FAR 1000 Introduction to the Arts

Investigation into artistic perception, creativity, aesthetics, criticism and meaning; techniques and forms of visual and performing arts of the world; includes critical thinking and individual creative projects.

Credit: 3 Units

FAR 2000 Introduction to Music

Introduction to basic music theory, basic compositional skills: vocal, instrumental and dance, enhancing singing, instrumental, listening and performance techniques.

Credit: 3 Units

FAR 3000 Music of the World (WI, IO)

Comparison of melodic, harmonic and rhythmic theories of Eastern and Western cultures; historical and contemporary listening skills developed; compositional and improvisational practices experienced through individual creative projects and excursions.

Credit: 3 Units

FAR 3001 Visual Arts of the World

Techniques and forms of sculpture, architecture, painting, etc.; recognition and analysis of artistic styles of world civilizations with emphasis on the

twentieth century.(WI, IO)

Credit: 3 Units

FAR 3030 Art in Pre-Columbian and Colonial Latin America

This is the first of a two- course sequence concentrating on the development of artistic representation in pre-Columbian and colonial Latin America. The art of Mesoamerica, as well as that of Central and South America, is studied. Emphasis is also placed upon the artistic production of Latin America in the post-conquest period. Architecture, music, the visual and performing arts are all analyzed.

Credit: 3 Units

FAR 3031 Art in Latin America: From Independence to Modernity

This is the second of a two - course sequence, which traces the development of an original Latin American artistic expression from the late eighteenth to the late twentieth centuries. Special emphasis is placed upon the formation of national and regional identities as reflected by the artistic expressions of Latin America. Special consideration is given to art of the modern era, as well as contemporary artistic representation in all of Latin America as well as the Spanish-speaking U.S.

Credit: 3 Units

FRN: French

FRN 1000 Beginning French I

This first beginning course in a sequential series introduces students to the fundamental skills of oral, aural and written French for everyday usage. French culture and civilization will be introduced.

Prerequisite: The course is open to students who have no knowledge of French. Students that have minimal knowledge of French who express an interest in the class must contact Academic Advisors and the Dean or

Designee to determine their eligibility.

Credit: 3 Units

FRN 1001 Beginning French II

This second beginning course builds on French 1000. It ensures that students have a firm basis in basic French by developing written and reading skills, with particular emphasis on listening and oral skills. Students will be taught more on French culture and civilization.

Prerequisite: The course is open to students who have satisfactorily completed French 1000

Credit: 3 Units

FRN 2000 Intermediate French I

The course develops oral expression, listening comprehension, reading and writing skills. Students learn the finer points of grammar and are exposed to the active and passive voices, direct and indirect speech, the subjunctive and conditional moods and more specific French culture. The course is conducted in French. It is intended for students who wish to either complement their language studies or begin the minor. It is the required lower level elective for the minor.

Prerequisite: The course is open to students who have satisfactorily completed French 1001

Credit: 3 Units

FRN 2001 Intermediate French II

The course completes French 2000. It continues to

develop oral expression, listening comprehension, reading and writing skills. It is conducted in French.

Prerequisite: FRN 2000

Credit: 3 Units

FRN 2002 Business French

The course places emphasis on spoken French in the context of skills needed in the business world. This course is recommended for students pursuing degrees in international relations and business administration. It is a conversational course.

Prerequisite: The course is open to students who have satisfactorily completed French 1001

Credit: 3 Units

FRN 2003 Tourist French

The course places emphasis on spoken French in the context of skills needed in the tourist world. The course is recommended not only for students pursuing degrees in journalism, hotel and restaurant management and tourism but also for students who wish to participate in the Windows to the World Program. It is a conversational course.

Prerequisite: FRN 1001

Credit: 3 Units

FRN 2004 Conversational French

The course complements FRN 2002 and FRN 2003 continuing to place emphasis on spoken French in the contexts of today's modern world. It presents more dialogues and role playing and is focused towards the student's career goals.

Prerequisite: FRN 1001

Credit: 3 Units

FRN 3000 Advanced Grammar and Composition

The course advances and consolidates the grammar learnt thus far and enhances writing skills. The history and geography of France serves as a framework for writing. The course serves as a prelude for FRN 3001. It is a required upper level elective for the

minor. It is conducted in both French and English.

Prerequisite: FRN 2000

Credit: 3 Units

FRN 3001 French Culture and Civilization

This course is a survey of the geography, history, architecture, art, fine arts, science, culture and customs of France. It also explores the historical, social, political, economic and cultural trends in the country. The course is conducted in French. It may be taken as part of the Windows to the World Program.

Prerequisite: FRN 3000

Credit: 3 Units

FRN 3002 Contemporary French History

This course is a study of the history of France from The Franco-Prussian War of 1870 to the 5th republic. It looks at World War II, the roles of Marshal Henri-Philippe Pétain and Charles de Gaulle, France's African and Asian colonies and the wars in Algeria and Indochina as well as the protest movements. France's entry into NATO and EEC will be the highlights. The course is conducted in French.

Prerequisite: FRN 3001

Credit: 3 Units

FRN 3003 Literature in France I

The course focuses on the analysis and interpretation of representative works of French literature within their cultural context. Emphasis is placed on a literary study of the Middle Ages in France. Students are expected to read, write, analyze and discuss extensively. The course is conducted in French.

Prerequisite: FRN 3001

Credit: 3 Units

FRN 3004 Literature in France II

The course comprises the analysis and interpretation of representative works of French Literature within their cultural context. This course focuses on the

literary study of the French Renaissance. Students are expected to read, write, analyze and discuss extensively. The course is conducted in French.

Prerequisite: FRN 3001

Credit: 3 Units

FRN 3005 Literature in France III

The course comprises the analysis and interpretation of representative works of French Literature within their cultural context. This course focuses on the literary study of contemporary works in France, including works of Jean-Paul Sartre and Albert Camus. Students are expected to read, write, analyze and discuss extensively. The course is conducted in French.

Prerequisite: FRN 3001

Credit: 3 Units

FRN 4000 Francophone Culture and Civilization

This course is a survey of the geography, history, architecture, art, fine arts, science, culture and customs of French speaking nations. It also explores the historical, social, political, economic trends in French speaking nations. The course is conducted in French.

Prerequisite: FRN 3001

Credit: 3 Units

FRN 4001 Contemporary Francophone History

This course is a study of Francophone History from the conquests and settlements in the Americas to the present day. Emphasis will be on the colonization of Africa and Asia, with special emphasis on French Algeria, Sekou Toure's Guinea-Conakry, Leopold Sedar Senghor's Senegal, Boigny's Cote d'Ivoire, Vietnam and Cambodia. The course is conducted in French.

Prerequisite: FRN 4000

Credit: 3 Units

FRN 4002 Literature in Francophone Nations I

GEO: Geography

This course comprises the analysis and interpretation of representative works of French speaking nations within their cultural context. Emphasis is placed on representative works of colonial literature and the Negritude Literary Movement, influenced by the Harlem Renaissance. Included, are the works of Leopold Sedar Senghor, Aimé Césaire and Camara Laye, among others. The course is conducted in French.

Prerequisite: FRN 4000

Credit: 3 Units

FRN 4003 Literature in Francophone Nations II

This course comprises the analysis and interpretation of representative works of French Speaking Nations within their cultural context. Emphasis is placed on representative works of Mariama Ba and Sembène Ousmane, among others. The course is conducted in French.

Prerequisite: FRN 4000

Credit: 3 Units

FRN 4004 French and Francophone Film

The course examines different aspects of French and Francophone Africa, Caribbean and Asian history and culture through films. Students are expected to discuss and present extensively.

Prerequisite: FRN 3001 or FRN 4000

Credit: 3 Units

GEO 2000 Introduction to Physical Geography

The Earth's surface features and their relationship to geographic location; location and maps, weather and climate, landforms, resources, and vegetation.

Credit: 3 Units

GEO 2100 World Regional Geography

A study of the major regions of the world and their physical, cultural, economic, and political patterns. The interaction of people and their physical environments from a geographic perspective that emphasizes the spatial distribution of phenomena. (WI)

Credit: 3 Units

GEO 3000 Geography and the Environment

Geographic variability of climate, landforms, vegetation, and resources and the effect of that variability on humans and other organisms; the relationship of environmental problems to geographical location; the global impact of "local" environmental problems. (WI, IO)

Credit: 3 Units

GNS: Gender Studies

GNS 2000 Introduction to Gender Studies

Interdisciplinary study of gender issues from social, historical, and cultural perspectives; analysis of feminist theory and men's roles in the feminist movement. (WI, IO)

Credit: 3 Units

GNS 2001 Communication and Gender

Similarities and differences in male and female communication styles and patterns; emphasizes implications of gender as social construct influencing perception, values, stereotyping, language use, nonverbal communication, and power and conflict in human relationships.

Credit: 3 Units

GNS 3001 Women and Men in Cross- Cultural Perspective

Men and women from an anthropological perspective; changing gender roles in various contemporary cultures, including industrial democracies and developing nations.

Credit: 3 Units

GNS 4800 Seminar: Male and Female Creativity

Interdisciplinary and multicultural inquiry into differences and similarities between men and women in their expressions of creativity. (WI, IO)

Credit: 3 Units

JPN: Japanese

JPN 1000 Beginning Japanese I

First course in a sequential series; basic language skills of listening, speaking, reading, and writing. Basic greetings, numbers, time expressions; “desu” (be), its conjugation and sentence pattern; verbs and sentence pattern for movement; transitive and intransitive verbs for daily activities; how to write and read in Hiragana letters. (Course is open to students who have no knowledge of Japanese.)

Credit: 3 Units

JPN 1001 Beginning Japanese II

This is the second course in a sequential series. The attempts to master basic language skills continue: mentioning, means, period of time, various types of quantity; adjectives; verbs for existence; non-volitional verbs; superlative and comparative sentences; how to read and write in Katakana letters.

Prerequisite: JPN 1000

Credit: 3 Units

JPN 2000 Intermediate Japanese I

The course focuses on further development of grammar and communication skills, both oral-aural and written. Among others, it focuses on Te-form, Nai-form and basic verb forms, and their uses in expressing wishes, requests, prohibitions, obligations, capabilities, repeated actions etc. (Course not open to native speakers of Japanese.)

Prerequisite: JPN 1001

Credit: 3 Units

JPN 3000 Intermediate Japanese II

This is the second course of Intermediate Japanese in a sequential series. It focuses on further development of grammar and communication skills, oral, aural and written. It centres on Ta-form and Plain form of verbs and on the mastery of various phrases that go with the forms. Various types of compound sentences, relative clauses and conditional are also included. (Course is not open to native speakers

of Japanese) **Prerequisite:** JPN 2000 or permission from the instructor.

Credit: 3 Units

JPN 4000 Advanced Japanese I

This is the first course of Advanced Japanese in a sequential series. It focuses on further development of grammar and communication skills, both oral-aural and written. Among the contents covered are verb forms such as potential / ability form, volitional form, conditional form, various applications of all the forms learned, and conjectural expression. (The course is not open to native speakers of Japanese)

Prerequisite: JPN 3000 or permission from the instructor.

Credit: 3 Units

JPN 4001 Advanced Japanese II

This is the second course of Advanced Japanese in a sequential series; further development of grammar and communication skills, both oral-aural and written. Passive verb, nominalization, polite request, causative verb, various expressions that go with different verb forms are among other topics covered. (Course is not open to native speakers of Japanese)

Prerequisite: JPN 4000 or permission from the instructor.

Credit: 3 Units

JPN 4002 Japanese Culture and Civilization of Japan

This is the last course of Japanese for the minor. Polite, deferential, and humble expressions of Japanese are explored. Some aspects of Japanese culture, society and civilization are delved into. Students may participate in Windows to the World Program as part of the course. (Course is not open to native speakers of Japanese)

Prerequisite: JPN 4001 or permission from the instructor.

Credit: 3 Units

HIS: History

HIS 2000 U.S. History

Provides a survey of U.S. culture and institutions from pre-colonization to the present, with topics that include exploration and colonization, the War of 1812, the establishment of the national government, the Civil War, Reconstruction, Industrialization, urbanization, the World Wars, the Cold War, and the Post Cold War Era. Emphasizes the study of U.S. history from a multicultural perspective.

Credit: 3 Units

HIS 2005 Major Social Movements in U.S. History

Survey of 19th and 20th Century social movements including nativism, abolitionism, temperance, immigration, the women's movement, the labour movement, and the civil rights movement.

Credit: 3 Units

HIS 2010 History of Africa since 1800

This course provides students with a background of Africa in the 19th Century; internal transformations; 19th century jihads; long distance trade; the Mfecane in Southern Africa; the anti-slavery movement and the decline of the slave trade; the mineral revolution in South Africa; and modernization in Egypt. It also focuses on Ethiopia in the 19th century; the scramble for Africa; imperialism and conquest; African responses to colonization; colonial administrations; the colonial impact and African resistance; social transformation and the African elite; African nationalisms; decolonization; wars of liberation in Algeria and Kenya; post-colonial Africa.

Credit: 3 Units

HIS 3000 Latin American Studies Special Topics

Gives students with an interest in Latin American Studies greater exposure to Latin American realities. Course combines lectures, discussion sessions and audio-visual materials to present Latin America's past, present, and future dilemmas. Although issues

will be analyzed and presented in a general Latin American context, Mexico will be used as a case study.

Credit: 3 Units

HIS 3005 History of Women and Men in the U.S.

The changing roles of women and men from colonial times to the present with emphasis upon how these changes affect social institutions and interaction between the sexes.

Credit: 3 Units

HIS 3010 History of Modern Europe I, 1500 - 1815

The major social, political, and economic forces that shaped modern Europe in the years from the Reformation through the French Revolution.

Credit: 3 Units

HIS 3011 History of Modern Europe II, 1815 - the Present

The major social, political, and economic forces that have dominated modern Europe from the era of early industrialization to the present.

Credit: 3 Units

HIS 3015 20th Century Eastern Africa

A study of the historical forces that have shaped Eastern Africa. Starts with pre-colonial societies and covers such topics as European intrusion and the partition of East Africa; the establishment of colonial states in Tanganyika, Uganda and Kenya and East Africa in World War I. It also focuses on the colonial economy in Kenya, Uganda and Tanganyika; East Africa and World War II; nationalism in East Africa; the East African community; post-independence developments, the collapse of the East African Community; and inter-state political and economic relations.

Credit: 3 Units

HIS 3020 History of Traditional Asian Civilization

The ideologies, social and political organisations, and cultural achievements that characterized the great civilizations of traditional Asia.

Credit: 3 Units

HIS 3021 History of Modern Asian Civilization

The impact of European expansion on traditional Asian societies, the political and social upheavals of the 19th and 20th centuries, and the status of contemporary society.

Credit: 3 Units

HIS 3025 History of Kenya (WI, IO)

The course examines the historical transformation of Kenya from the onset of colonialism. Starting with a survey of the peoples of Kenya in 1890's, it deals with the interacting forces, events and people that have shaped Kenya in the 20th Century.

Credit: 3 Units

HIS 3030 History of Latin America I

Survey of the pre-Colombian civilizations, the effect of European exploration and conquest, and the shape of colonization in Latin America. **Credit: 3 Units**

HIS 3031 History of Latin America II

The major social, economic, and political forces that have slowed as well as contributed to the development of modern Latin America.

Credit: 3 Units

HIS 3301 Foundations of the U.S.

Development of American culture and institutions from pre-colonization to the end of the War of 1812; discovery and exploration, colonization, the American Revolution, and the establishment of the national government.

Credit: 3 Units

HIS 3302 The U.S. in the 19th Century

Political and social transformation of the nation from 1815 to the end of the century; emphasizes political and social events which led to, and followed the Civil War.

Credit: 3 Units

HIS 3303 The U.S. in the 20th Century

The major economic, political, social, and cultural factors, which transformed a rural U.S. into a modern industrial, corporate, international power during the 20th century.

Credit: 3 Units

HIS 3304 History of California

The history of California from the period of Spanish exploration and expansion to the present.

Credit: 3 Units

HIS 4001 The Immigrant Experience in U.S. History

The experiences of the various waves of immigrants that have settled in the U.S.; the process of assimilation and acculturation, problems encountered, and the contributions of immigrants to American society.

Credit: 3 Units

HIS 4002 The Quest for Equality in U.S. History

The experiences of African-Americans, Native-Americans, Hispanic Americans, Asian Americans, and other ethnic minorities in their struggle to participate fully in American society. **Credit: 3 Units**

HIS 4120 African Economic History since 1900

This course focuses on the economic history of Africa since 1900 and entails an analysis of major economic trends from the on-set of colonialism to the post-colonial era. Particular emphasis will be placed on agriculture, colonialism, colonial capitalism, industrialization, mining, indigenous capitalism, urbanization, proletarianization, commerce and attempts at continental economic cooperation. These thematic issues will be discussed in the context of theoretical debates on development and underdevelopment, imperialism and colonialism, neo-colonialism and dependency.

Credit: 3 Units

HIS 4995 Latin American Studies: Special Topics

Gives students with an interest in Latin American Studies greater exposure to Latin American realities. Course combines lectures, discussion sessions, and audio-visual materials to present Latin America's past, present, and future dilemmas. Although issues will be analyzed and presented in a general Latin American context, Mexico will be used as a case study.

Credit: 3 Units

HUM: Humanities

HUM 1000 World Civilizations

Historical, cultural, and conceptual aspects of major civilizations from the ancient world to the present.

Credit: 3 Units

HUM 1020 Interdisciplinary Exploration: The Good Life

Replaces FYE 1020. This course is taught as a combined lecture and small seminar. Each class is organized around the following components: 1) the regions of the world –North America, Latin America, Europe, Asia, Africa the Middle East, and Oceania; 2) thematic issues, topics, and/or problems; and 3) an interdisciplinary approach. Must be taken during the first year.

Credit: 3 Units

HUM 1103 African Civilization

An introduction to the major civilizations of Africa, focusing on the various traditions and ideas that shaped their origins, growth, and declines; cultural contributions of Africa to the world.

Credit: 3 Units

HUM 1105 U.S. Culture through the Humanities

Characteristics of the multicultural experience in the civilization of the U.S. as revealed through literature, film, drama, music, painting, sculpture, and dance. (WI)

Credit: 3 Units

HUM 3005 The Arts of the U.S.

Artistic trends, landmarks and styles of a “New World”. Influence of culture wars, wealth, depressions, commercialism, abstraction, and technology.

Credit: 3 Units

HUM 3100 Cultural Perspectives on the Environment

Concepts of the environment from different cultures and groups; effects of cultural perspective on environmental activities and on the use and development of resources; consideration of cultural perspective and human needs in environmental action plans.

Credit: 3 Units

HUM 4800 Seminar: Nature and Humanity

Concepts and attitudes towards the natural world held by the humans who inhabit it; relation between human existence and the power and demands of nature.

Credit: 3 Units

IRL: International Relations

IRL 2000 Foundations of International Relations

This course offers a strong foundation in the study of world politics. It introduces students to the concept of theories and the relevance of explaining world politics theoretically. It surveys the canonical theories of IR; Realism, Liberalism and Marxism and the ways in which such theories approach some central topics in

IR including sovereignty, power, war, peace, IPE, environmental issues, humanitarian intervention, International Law, Terrorism etc. It is a good basis from which to appreciate the theoretical schools of thought in the study of international relations.

Prerequisite: ENG 2206

Credit: 3 Units

IRL 2005 Comparative Foreign Policy

Constant and variable factors determining foreign policies of major powers from a comparative perspective, including various techniques employed by states at the bilateral and multilateral levels.

Prerequisite: IRL 2000

Credit: 3 Units

IRL 2010 International Organisations

This course offers a survey of leading international organisations and their impact on world politics. It introduces students to the history of International Organisations and samples types of International Organisations. It then concentrates on the history and problems of the United Nations and introduces students to the theoretical and applied survey of the United Nations System since 1945 with a particular emphasis on the agendas, procedural rules, deliberations, and decision-making processes of its main organs. It also looks at UN roles in various challenges such as peacekeeping, mediation and challenges to calls for its reform.

Prerequisite: IRL 2000

Credit: 3 Units

IRL 2100 Introduction to Human Rights

This course will introduce students to both theoretical and practical issues in the human rights field. In doing so, it will give students grounding in the basic principles of human rights. It will provide an understanding of the historical development of human rights and critically analyze issues of rights and responsibilities and interdependence of rights. Students will also be exposed to real cases of conflicting rights and how relevant institutions have dealt with these. The course will also examine issues of human rights and war and human rights and foreign policy. It will provide an overview of the international and African human rights systems, human rights promotion including monitoring and enforcing human rights and human rights issues in organisations. Finally it will examine issues arising in economic, social and cultural rights.

Prerequisite: IRL 2000

Credit: 3 Units

IRL 2220 Gender and International Relations

This course offers a comprehensive overview of feminist scholarship and feminist contributions to international relations. It also provides students with an in-depth discussion of how IR feminist scholars have sought to re- think key concepts and central areas of concern in this field. Key traditional concepts that IR feminist scholars seek to uncover and the hidden assumption includes state sovereignty, foreign policy decision making, use of military force, war and international security. The role of gender in International Relations theory is also examined.

Prerequisite: IRL 2000

Credit: 3 Units

IRL 3000 Comparative Political Systems

Political systems: federal and unitary, parliamentary and presidential, party politics and electoral systems; emphasis on such major powers as United States, Great Britain, France, Germany, Russia, China, and Japan. (ILI)

Prerequisite: IRL 2010

Credit: 3 Units

IRL 3003 Research Methods in International Relations

Study of major types or research, methods of data collection and treatment; applied critical analysis of source materials; mechanics of writing research papers. (WI)

Prerequisite: IRL 2010

Credit: 3 Units

IRL 3005 Contemporary Theories and Ideologies in International Relations

This course is a continuation of IRL 2000. It introduces students to contemporary theoretical debates including critical theory, feminism, post-modernism, gender issues, constructivism etc. Students will be exposed on how these theories approach IR from different perspectives. Students will explore how these theories approach world politics. They will also be able to understand the link between producing theories in International Relations and engaging in politics. The course will also survey major ideologies and systems of modern governments with special emphasis on democracy, authoritarianism, capitalism, democracy etc.

Prerequisite: IRL 2010

Credit: 3 Units

IRL 3010 Development Issues in Africa

The course is a study of development and under-development issues in Africa. The course engages a historical perspective and examines trends in the development process in Africa. It includes aspects of socio-political-economic, infrastructure, modernization and industrialization policies. It further examines the demographic and security issues that have a bearing on development in Africa. This will include aspects of food security, hunger and development as well the impact of poverty on development. The course further compares

development patterns in developing and developed nations and examines the factors that contribute to the disparity between the developing and developed nations. This will include aspects of culture, educational systems, advancement of science and technology and exploration of natural resources. The course further examines the role of the international organisations in the development of Africa and the place of African countries in these organisations.

Prerequisite: IRL 2010; ECO1020

Credit: 3 Units

IRL 3015 Introduction to Peace and Conflict Studies

This course is intended to provide students with an introduction in the field of peace and conflict studies. It offers an analysis of issues and theories about peace, violence and conflict. Peace and conflict is defined from a theoretical perspective. The course also presents the different typology of peace and violence and analyzes the changing dynamics and the new trends of peace and conflict studies from the different perspective.

Prerequisite: IRL 2000

Credit: 3 Units

IRL 3021 African Philosophy and Ideologies

This course explores African political ideologies and how they have evolved in a historical context. The course will examine the nature and role of ideology in pre-colonial African societies, colonialism and its influence on the development of a radical brand of corrective and emancipatory ideologies; the political philosophies of African nationalist leaders – Leopold Senghor and negritude, Kwame Nkrumah and the ideology of pan-Africanism, Julius Nyerere and Ujamaa socialism, Abdel Nasser and anti-imperialism, Amílcar Cabral and the ideology of national liberation. Finally, the course will examine the impact of Western political thought on African philosophy and ideologies.

Prerequisite: IRL 2000, IRL 3005

Credit: 3 Units

IRL 3040 Politics in Africa

This course introduces the problems, realities, and patterns of politics in Africa. It surveys the relationship between political and economic systems in Africa, and analyzes the problems and prospects for regional economic integration. The course examines contemporary movements towards democracy in Africa, and the historical and contemporary role of the military in African politics.

Prerequisite: IRL2000

Credit: 3 units

IRL 3045 Politics of Regionalism in Africa

This course explores the historical stages of the evolution of politics of regionalism in Africa and the contemporary challenges the phenomenon faces. Among the various topics to be examined include: the struggle for unity in colonial and immediate post-colonial Africa, the formation of the Organisation of African Unity (OAU) and politics of regional economic integration; the emergence of Regional Economic Communities (RECs) and politics of sub-regional integration; Complex Political Emergencies (CPEs) and the evolution of security regionalism in Africa (OAU/AU & RECs); the transition from OAU to the African Union (AU), and regional institution building for conflict intervention, development and preventive diplomacy.

Prerequisite: IRL 2010; ECO1020

Credit: 3 Units

IRL 3060 African International Relations

A survey of relations among selected African nations, and among African nations and other regions of the world; the role of ideology, foreign economic and political pressures, and personality on African international policies.

Prerequisite: IRL 3005

Credit: 3 Units

IRL3100 Diplomacy

Diplomatic practices among major powers and developing nations in historical perspective. A detailed look at the applications of contemporary diplomacy and its impact on international politics.

Prerequisite: IRL 2010; IRL 2005

Credit: 3 Units

IRL3110 Simulation Exercise

This course seeks to introduce students to the practical understanding of taught theoretical knowledge. It exposes students to the practice of diplomatic mannerisms such as etiquette, negotiation and mediation, arbitration, dressing and speech delivery. Students will be further exposed to the research and drafting of documents such as letters of credence, policy statements, policy papers, composite briefs, diplomatic notes, protest notes, bilateral and multilateral agreements and the diplomatic diary. The exercise involves understanding and simulating the rules of debate and conference procedures and drafting of conference documentation as required. It focuses on simulating and debating the different contemporary issues and presenting comprehensive non-violent solutions on the same. (OI)

Prerequisite: IRL 3100; IRL 3200

Credit: 3 Units

IRL 3200 Negotiation & Mediation

This course explores the theoretical aspects of intervention in disagreements. It is explored in three ways: Negotiation, Mediation and Simulation. Negotiation will explore basic negotiating skills with a lot of emphasis on individual efforts as opposed to institutions. Mediation will concentrate on third party intervention with an in-depth exposure on problem solving skills within small groups. The Simulation will apply these techniques into practice while encompassing other theoretical aspects learnt in relevant Prerequisites.

Prerequisite: IRL2010

Credit: 3 Units

IRL 4001 Regional Conflict in Africa

This course surveys past and present trends in conflict and cooperation in Africa. It examines the role of military and economic organisations in the management of African conflicts, and analyzes in detail the role of the OAU in conflict management in Africa. The course also examines the role of extra-continental actors in the conflict of Africa.

Credit: 3 Units

IRL 4010 Geopolitics

This course examines the interplay between geography and international politics, and how power is related to geographical proximity to certain natural resources. It analyses how theories of geographical control affect the behavior of countries aspiring to become big powers and how small powers use their geographical location to their advantage.

Prerequisite: IRL 2000

Credit: 3 Units

IRL 4020 International Law

This course seeks to introduce students to the basic concepts and understanding of the role and function of public international law. It introduces students to the doctrines, theories, concepts and rules of international law, the similarities and differences between international law and domestic law, the relevance of international law to international relations, the relationship between power and the use and abuse of international law and the limitations of international law. (OI)

Prerequisite: IRL 2010

Credit: 3 Units

IRL 4030 International Political Economy

The course is a study of international economic relations that includes economic nationalism versus free trade versus protectionism and activities of multinational corporations. The course

engages in a historical survey of the development of international economic relations and gives the current situation. Throughout the course there is a detailed examination of how the African position is defined within the international economic setting. The course further examines international economic negotiations and negotiations skills, poverty and aid in Africa and the relationship between energy/oil and the economy. The course further analysis the major actors within the international economic setting and the influence they yield in international economic relations.(ILI)

Prerequisite: IRL 3000

Credit: 3 Units

IRL 4035 Environmental Politics

This course is an examination of the global ecosystem and a survey of the ecological damage and the international cooperative efforts to protect the world natural environments. It includes a study of the theories of negotiation, compliance, problem identification and regime effectiveness and a look at the linkages between environment and security, free trade and environment and the future of environmental governance.

Prerequisite: IRL2010, IRL 4030

Credit: 3 Units

IRL 4040 Africa-Asia Relations

The forces that have, and continue to, shape the interactions between the peoples of Africa and those of Asia. It analyses common experiences and contacts that Africa and Asia have had and continue to have, the concept of the African-Asian solidarity, and responses to international forces.

Prerequisite: IRL 2010; IRL2005

Credit: 3 Units

IRL 4050 U.S. – Africa Relations

This course surveys U.S. relations with African states. It engages in a historical survey, and examines the position of the U.S. on colonialism in Africa, as well

as anti-colonial movements. The course further examines the place of independent African states during the Cold War, including the problem of dependency and aid. The course eventually adopts a contemporary perspective, and examines the major post-Cold War issues in Africa-U.S. relations.

Prerequisite: IRL 2000

Credits: 3 units

IRL 4045 Security Studies and Strategies

This course provides a survey of the nature and significance of security in international relations. It includes the analysis of security concepts, relevant sectors (military, environmental, economic, societal, and political), terrorism, private security companies, and conflict prevention.

Prerequisite: IRL 2000

Credit: 3 Units

IRL 4055 Africa - Middle East Relations

This course is a survey of how African countries have related to developments and issues in the countries of the Middle East. The impact of the volatility of the Middle East, its peoples, politics and economies, on different regions and countries will be examined.

Prerequisite: IRL2010

Credit: 3 Units

IRL 4065 East Africa in World Affairs

This course focuses on the position of the East African countries in world affairs individually or collectively. How each of the countries deals with its neighbors as well as with forces outside the region such as those from Europe, North America, Middle East, and Asia.

Prerequisite: IRL 2005; IRL2010

Credit: 3 Units

IRL 4075: Mechanism of International Communication

This course presents the analysis of the flow of

information and ideas globally. It equips students with specialised skills and knowledge in the field of international communication and explores its effects on international relations, including its impact on bilateral diplomacy, multilateral conferences, international crisis management, multinational transactions, global social action and global news flow through the media. (OI)

Credit: 3 Units

Prerequisite: IRL 3005

IRL 4120 International Humanitarian Law

This course seeks to address the need to find proactive steps to forestall the escalation of armed violence and ensure knowledge of and respect for International Humanitarian norms. IHL addresses legal thinking, promotes justice in armed conflict, International Law, Human Rights, and the Geneva Conventions on the Law of Wars. IHL has the fundamental goal of protecting individual's fundamental rights during times of armed conflicts. The student will learn the history and purpose of IHL, other laws of war, types of armed conflicts and the conduct of hostilities, the question of Prisoners of war and the wounded, actors of IHL, its implementation and violations to provide a scholarly grounding. This knowledge will equip an IHL student to work in conflict situations, amongst refugees, during reconstruction resettlement and variety of development programmes.

Prerequisite: IRL4020

Credit: 3 Units

IRL 4150 Area Studies

Survey of the politics of the world's regions with a view to explaining and understanding their impact on foreign policy and international politics.

Prerequisite: IRL 2010; IRL3000

Credit: 3 Units

IRL 4151 Field Study

The primary objective of the study visit is to provide

students with the opportunity to have a first-hand experience visiting sites (and institutions) of relevance to conflict-prevention, conflict resolution and peace-building in the Horn of Africa, the Great Lakes region and the Middle East. The study will also provide the students with the practical opportunity to test their conceptual and theoretical understanding of security and development. The supervisor of this study will guide discussions on relevant actors, initiatives and the history of security and development processes in the region visited. The supervisor will spend the first part of the semester preparing students - training them to optimize their research, and logistical preparation. Students are required to submit a practical report of 3,500 - 4,000 words based on a topic relevant to the theme of the study visit. (WI)

Prerequisite: IRL 3003

Credit: 3 Units

IRL4220 Refugee Studies

In the wake of numerous internal conflicts and civil wars, there is a rapid increase of refugees throughout the world. This course introduces students to the basic concepts and understanding of refugees. It introduces students to the history of refugee recognition (before and after the 20th Century), some basic concepts and rules of international refugee law, the root causes of refugees, the various stages of refugee flight and challenges, the responses to refugees by the refugee regimes, the impact and challenges of refugees on host communities, the various dilemmas affecting refugee protection over the past fifty years and comparative refugee policies within states with particular emphasis on the Kenya Refugee Act 2007. The course uses a lot of country and individual case studies and multimedia materials so as to give a student a better understanding of the course.

Prerequisite: IRL 4020

Credit: 3 Units

IRL 4281 East Africa and the Indian Sub-Continent

Examines the relationship of the East African Countries to the Indian Sub- continent. The strong presence of Asians and their influence on politics, economy, and cultural activities in East Africa will be studied in historical perspectives.

Credit: 3 Units

IRL 4800 Critical Issues in Kenyan Foreign Policy

The course is a study of Kenya's Foreign policy orientation and the bases of its foreign policy towards states in the East African region, African states generally, the United States of America, Europe and the rest of the world. The course examines the fundamental principles of Kenya's foreign policy and the process and strategies towards achieving the set policy targets. The course further examines the rationale of Kenya's foreign policy towards these regions after it attained independence, during the cold war period and the current period. This will involve an analysis of the development and trends in policy towards these regions over the said periods. The course will further examine the emerging trends in Kenya's Foreign policy and the constraints that influence foreign policy formulation and implementation. The course will further examine current foreign policy documents that are becoming vital in the process of foreign policy. This will include Vision 2030, several sessional papers and the Poverty Reduction Strategy Paper.

Prerequisite: IRL2005; IRL 2010

Credit: 3 Units

IRL 4811 Critical Issues in Africa

This seminar surveys the challenges facing Africa into the 21st Century. It critically examines the main themes and problems that Africa must contend with, including economic and political liberalization, the impact of technology on African states, the impact and role of technology, ethnicity and demographic changes, urbanization and the use of human

resources. The course projects these themes into the future and survival of Africa as a viable entity in the International system.

Prerequisite: IRL2010

Credit: 3 Units

IRL 4850 Studies in Contemporary International Crisis

The aim of this course is to explore contemporary international crisis. It offers students with tools to analysis serious challenges facing the world today such as political unrest, financial and economical instability, environmental issues, conflicts, communicable diseases, access to education, governance and corruption, international terrorism, violation of Human Rights, migration, sanitation and access to clean water, fuel and food. The course also critically analyzes the causes and impact of these challenges both at the local, regional and international level.

Prerequisite: IRL 2000

Credit: 3 Units

IRL 4900 International Relations Project

Extended individual research or project under the direction of a faculty member and approved by the department chair or dean. Projects may include library or empirical research, analysis and written or oral presentation of a report on a topic in the student's major field. (WI) *Prerequisite: Students must be seniors*

Credit: 3 units

IRL 4910 International Relations Internship

Internship in business, school, nonprofit organisation, volunteer organisation or in another group or organisation approved by the faculty department chair or dean. Must be in the student's major area of study (IRL). A minimum of 120 hours required. (Grading is credit/no credit)

Prerequisite: Students must be seniors

Credit: 3 Units

IRL 6000 Research Methods in International Relations

Study of major types of research, methods of data collection and treatment; applied critical analysis of primary and secondary source materials; style and mechanics of writing research papers/theses/dissertations.

Credit: 3 Units

IRL 6002 Foundations of International Politics

Survey of basic terms, theories and concepts of the discipline of international relations with emphasis on state and non-state actors and their respective roles in international affairs. (Course required for students with no or limited background in political science and/or international relations. It is also recommended for students who want to refresh their understanding of the foundational elements of international relations.)

Credit: 3 Units

IRL 6005 Advanced International Relations Theories

Analysis of functions of diplomacy; mechanisms and operational techniques in contemporary state systems; advanced communications; the changing world economy and interdependency.

Credit: 3 Units

IRL 6010 Peace and Conflict

This course examines violence and nonviolence in the modern world. The course treats nonviolence as both a way of life and as a practical approach to conflict resolution. Through an examination of the political, religious, cultural, and gendered dimensions of violence and nonviolence, the course aims to better understand the causes of war, terrorism, and political violence, as well as the praxis required to build a more peaceful and just society.

Credit: 3 Units

IRL 6015 Conflict Resolution

This course offers alternative mechanisms in conflict resolution spectrum. Students will be exposed to theories and analysis of conflict and the different stages of addressing conflict such as resolution, management and transformation. Other specific topics to be examined include; preventive diplomacy (track I, II and III); the theory and practice of non-violence; management of nonviolent and violent conflicts; conflict prevention; promoting conflict prevention through democracy, good governance and peace education; the concept and practice of peace building, pre-conflict and post-conflict peace building; the role of specific actors in conflict processes in developing countries – the state, influential individuals, International Organisations, NGOs, social movements and Multinational Corporations.

Credit: 3 Units

IRL 6020 Techniques of International Diplomacy

Study and analysis of historical and contemporary diplomatic techniques employed by states in their bilateral and multilateral relations.

Credit: 3 Units

IRL 6025 Conflict, Security & Development

The course provides an analytical and empirically informed treatment of the linkages between issues of conflict, security and development in contemporary international relations. Throughout the module, particular emphasis is placed on the need to examine issues of conflict, security and development in their mutual interaction and interlinkages rather than as separate areas of academic enquiry and policy-making.

Credit: 3 Units

IRL 6030 Issues of Development & Conflicts

Study of the role of culture and tradition in obstructing or enhancing development processes in developing

countries.

Credit: 3 Units

IRL 6035 Politics and Patterns of Cooperation and Conflict

Study of patterns of cooperation and conflict between developed nations and less developed countries (LDCs); analysis of the role of industrialized nations and their organisations in the development of LDCs.

Credit: 3 Units

IRL 6050 TProject Management in International Relations

This course is a practical training program that offers students opportunity to explore how to develop, manage and execute different types of projects. Epistemologically, the course will be approached from a conflict and development studies background as opposed to a business studies perspective. The primary focus of the course will therefore be on non-profit oriented projects and organisations. The course also explores mechanics of writing project proposals and the critical issues in fund-raising and grant management.

Prerequisites: IRL 5000, IRL 5002 and IRL 5020.

Credits: 3 Units

IRL 6055 Theories of Development and Underdevelopment

The course is an advanced study of development and under-development issues in Africa. The course engages a historical perspective and examines trends in the development process in Africa. It includes aspects of socio-political-economic, infrastructure, modernization and industrialization policies. It further examines the demographic and security issues that have a bearing to development in Africa. This will include aspects of food security, hunger and development as well the impact of poverty on development. The course further compares development patterns in developing and

The mind is not a vessel
to be filled but a fire to be
ignited.

Plutarch

developed nations and examines the factors that contribute to the disparity between the developing and developed nations. This will include aspects of culture, educational systems, advancement of science and technology and exploration of natural resources. The course further examines the role of the international organisations in the development of Africa and the place of African countries in these organisations. The course allows for the examination of pivotal issues in developing nations; focuses on compatibility, conflict and reconciliation theories of development.

Credit: 3 Units

IRL6065 Human Rights Law and Disarmament

This course will provide students with a critical and analytical insight into human rights and disarmament issues within a global context. The course will introduce students to the history and evolution of human rights, the proponents, custodians and supervisors of human rights such as the UN, core treaties relating to human rights such as the International Covenant on Economic, Social and Cultural Rights, the Universal Declaration of Human Rights and the Paris Principles on National Institutions. The students will then embark on an in depth analysis of regional human rights efforts such as the African Charter on Human and Peoples' Rights, the European Convention on Human Rights and the American Convention on Human Rights. The course will then narrow down so as to address key issues afflicting the African continent as regards Human Rights via case studies.

Credit: 3 Units

IRL 6095 Intercultural Communication

The study focuses on the theories of intercultural communication with emphasis on international instruments to promote common purposes and ideas and to prevent conflicts and hostilities among culturally diverse nations. The course further seeks to examine the mechanisms of international communication and the ways in which they can be

enhanced or improved.

Credit: 3 Units

IRL 6200 International Organisations

Examination of the ideas behind and operations of various international organisations, the global and regional levels, and assessment of their impact on international politics.

Prerequisites: IRL 5000, IRL 5002 and IRL 5020
Credit: 3 units

IRL 6215 International Humanitarian Law

International Humanitarian Law, also known as the law of armed conflict or the law of war, is a body of rules that, during conflict, protects persons who are not ab initio part of the conflict or are no longer participating in the conflict. The course introduces students to the distinction between *ius ad Bellum* and *ius in Bello*, the history of efforts to regulate conduct during hostilities, Henri Dunant and his *Souvenir de Solferino* that inspired the formation of the International Committee of the Red Cross (ICRC) and Inter-state efforts to regulate hostilities giving birth to the 4 Geneva Conventions of 1949 and Additional Protocols of 1977 (with an introductory talk on Additional Protocol III of 2005 establishing an additional emblem, the red crystal). The course will further develop the students understanding of the classifications of the types of armed conflict, means and methods of warfare, war crimes and efforts to repress them from the Nuremberg and Tokyo Tribunals to the International Criminal Tribunal for the former Yugoslavia (ICTY), International Criminal Tribunal for Rwanda (ICTR), Special Court for Sierra Leone and the 1998 Rome Statute establishing the International Criminal Court (ICC).

Credit: 3 Units

IRL 6230 International Financial Mechanisms

International Financial Mechanisms is an area of concern to the scholar of international economics and more so international political economy. To

the International Relations Post- graduate student, therefore the field ought to expose them to various aspects of economic interaction in the international system. Such include the changing global economic order; international trade and financial regimes; regional dynamics and integration dynamics and integration and responses by states to the challenges of international economic forces.

Credit: 3 units

IRL 6235 Advanced International Political Economy

The course is an advanced study of international political economy (IPE). It will review the theoretical approaches and contending perspectives on IPE. It will further examine issues of economic nationalism versus free trade and protectionism, as well as activities of multinational corporations, the debate on entire economies in the global South and the issue of foreign aid. The course engages in a historical survey of the development of international economic relations and reviews the contemporary situation. There will be a detailed examination of how the African position is defined within international political economy. The course further examines international economic negotiations and negotiations skills, poverty and aid in Africa and the relationship between energy/oil and the economy. The course will further analyze the major actors within the IPE and the influence they yield in international economic relations.

Credit: 3 Units

IRL 6240 Post-Coloniality in Africa

This course aims to introduce students to the major competing perspectives and challenges of post-Coloniality in Africa. The specific topics to be covered in the course include: Introduction to colonial and post-colonial discourses; Discursive Violence and Counter-Discourses on African Development; Worldviews of the First Generation of African Leaders and the Shaping of African Post-colonial States; Traditional and Modern Political

Authorities; African Heritage and Occidental / Islamic Philosophical Traditions; Ethnicity & Identity Politics; The Economic Ramifications of the Crises of Post-Coloniality and the Ideological Mind set/Approach of Neo-liberal Institutions; Solving the Crises of Post-Coloniality: African Leaders' Perceptions and Actions; African Solutions to African Problems: The Rhetoric and Politics.

Credit: 3 Units

IRL 6245 Disarmament & Human Rights

This course will provide students with a critical and analytical insight into human rights and disarmament issues within a global context. The course will introduce students to the history and evolution of human rights, the proponents, custodians and supervisors of human rights such as the UN, core treaties relating to human rights such as the International Covenant on Economic, Social and Cultural Rights, the Universal Declaration of Human Rights and the Paris Principles on National Institutions. The students will then embark on an in depth analysis of regional human rights efforts such as the African Charter on Human and Peoples' Rights, the European Convention on Human Rights and the American Convention on Human Rights. The course will then narrow down so as to address key issues afflicting the African continent as regards Human Rights via case studies.

Credit: 3 Units

IRL 6250 Africa in International Affairs

This is an advanced course examining how various African countries and regions responded to other regions of the world. It explores Africa's position in the world arena, starting with different colonial experiences and the anti-colonial struggles. It looks at how different African countries responded to external challenges which included the Cold War and post- Cold War developments, engagements in regional organisations, and crises.

Credit: 3 Units

IRL 6255 Africa / US Relations

This is an advanced course on the relations of various African countries with the United States. It engages in an analysis of the importance Africans attached to their contacts with Americans. This touches on the period of colonialism in Africa, anti-colonialism, Africa's position in the Cold War and the problem of dependency. It will also examine developments in the African- US relations in the post-Cold War period
Credit: 3 Units

IRL 6260 Foreign Policy Analysis

Examination of the techniques and methods of, and issues behind, the formulation and implementation of foreign policies from a multidisciplinary perspective. Focuses on the practical assessment of key foreign policy issues.
Credit: 3 units

IRL 6285 The Foreign Policy of Kenya

The course is an advanced study of Kenya's Foreign policy orientation and the bases of its foreign policy towards states in the East African region, African states generally, the United States of America, Europe and the rest of the world. The course examines the fundamental principles of Kenya's foreign policy and the process and strategies towards achieving the set policy targets. The course further examines the rationale of Kenya's foreign policy towards these regions after it attained independence, during the cold war period and the current period. This will involve an analysis of the development and trends in policy towards these regions over the said periods. The course will further examine the emerging trends in Kenya's Foreign policy and the constraints that influence foreign policy formulation and implementation. The course will further examine current foreign policy documents that are becoming vital in the process of foreign policy. This will include Vision 2030, several sessional papers and the Poverty Reduction Strategy Paper.

IRL 6235 Advanced International Political Economy

The course is an advanced study of international political economy (IPE). It will review the theoretical approaches and contending perspectives on IPE. It will further examine issues of economic nationalism versus free trade and protectionism, as well as activities of multinational corporations, the debate on entire economies in the global South and the issue of foreign aid. The course engages in a historical survey of the development of international economic relations and reviews the contemporary situation. There will be a detailed examination of how the African position is defined within international political economy. The course further examines international economic negotiations and negotiations skills, poverty and aid in Africa and the relationship between energy/oil and the economy. The course will further analyze the major actors within the IPE and the influence they yield in international economic relations.
Credit: 3 Units

IRL 6705 Field Research

The primary objective of the study visit is to provide students with the opportunity to have a first-hand experience visiting sites (and institutions) of relevance to conflict-prevention, conflict resolution and peace-building in the Horn of Africa, the Great Lakes region and Middle East. The study will also provide the students with the practical opportunity to test their conceptual and theoretical understanding of security and development. The supervisor of this study will guide discussions on relevant actors, initiatives and the history of security and development processes in the region visited. The supervisor will spend the first part of the semester preparing students-training them to optimize their research, and logistical preparation. Students are required to submit a practical report of 8,000 words based on their theses topic.

IRL 6710 IRL Internship

This is a supervised internship in an Non-Governmental Organisation, Inter-Governmental Organisations, Multinational Companies and Governments for experience in practical application of International Relations theories. 400 are hours required for Credit but students can be interns for a longer period depending on the organisation. Interns are expected to submit a 10, 000 words reflective report to the organisation and to the International Relations program at USIU-Africa.

Credit: 3 Units

IRL 6890 Specialized Seminar

Special study on a selected subject in the field of international relations.

Credit: 3 units

IRL 6900 Thesis

The selection of a topic in international relations; analysis and writing under the supervision of a thesis committee. Prerequisite: Completion of all core courses

Credit/No Credit

IRL 6901 Thesis I

This is an entirely practical course with no lecture content. Students will be applying and integrating knowledge and skills previously acquired in the various IR classes, dealing with a topic of their own choosing, producing a research proposal that will demonstrate their capacity to proceed to a full thesis. This will be done in close collaboration with a course supervisor.

Prerequisite: Completion of all core courses

Credit/No Credit

IRL 6902 Thesis II

This is an entirely practical course with no lecture content. Students will be building on the proposal created in IRL 6901 and applying and integrating knowledge and skills previously acquired in the

various IR classes, producing a thesis that will allow them to be awarded with a Masters Degree. This will be done in close collaboration with the thesis supervisor.

Prerequisite: Completion of all core courses

Credit/No Credit

IRL 7001 – Epistemological Debate on the Application of IR Theories

The course covers the sociological background of IR theorists, the possible geo-political influences, and their impact on the assumptions of the specific theories and their applications. This is a theoretical course which will require students to adopt a philosophical approach to issues of theory and their applications.

Credit: 3 Units

IRL 7002: Research Philosophy and Methods In International Relations

This course will provide students with the opportunity to explore the philosophy of social research, its historical evolution, leading thinkers and their works, as well as how the various theoretical approaches within the social sciences relate to methods of data collection and analysis. The debate between various philosophical paradigms and the limitations of applying contending theories as methodological frameworks in International Relations (IR) research will also be explored.

Credit: 3 Units

IRL 7003 International Development

This course will examine various theories that influence development discourse, programmes and policies and critically evaluate key propositions that emerge from them. The course will equip students with skills to critically evaluate international development theories and practices and use practical case scenarios to strategize on how developing regions (especially Africa) can make the most of available opportunities. The course will also

examine the likely costs and benefits of development strategies and programmes, with particular attention to the impact on the most vulnerable developing countries **Credit: 3 Units**

IRL 7004: Comparative Foreign Policy Analysis

This course will examine and analyze from different theoretical perspectives, comparative foreign policies, surveying a variety of countries and actors. The students will be familiarized with the critical problems inherent in the competing theories for foreign policy analysis. Seminars will be conducted focusing on factors that have influenced or shaped states' and regional foreign policies in a historical perspective, especially during the Cold War and post-Cold War. The roles played in leading international powers (notably US, the P-Five in the UN Security Council and the EU), emerging regional hegemony like China, India, Brazil, South Africa and Nigeria, as well as global and regional governmental and non-governmental organisations will also be explored.

Credit: 3 Units

IRL 7005: Classical Political Philosophy

This course will introduce students to the literature on classical political philosophy. The course will focus on the theoretical and methodological perspectives of classical political philosophy. The course will evaluate the contributions of classical political philosophy to the discipline of Political Science and International Relations. As the course will show, political philosophies and theories are not static but continue to exercise the intellectual imaginations and thinking of scholars in contemporary International Relations and Political Science.

Credit: 3 Units

IRL 7006 Contemporary Political Philosophy

This course will acquaint students with the range of philosophical approaches that characterize contemporary International Relations. The course will also critically explore the key epistemological, methodological, and traditional approaches in IR.

Some of the alternative accounts of world politics that will be covered in this course include Marxism and Critical Theory, Constructivism, Feminism, Post structuralism, and Post colonialism. These theories will be discussed in relation to a variety of substantive questions ranging from traditional problems of international inequality, international security and international cooperation to current issues of globalization, gender, and identity.

Credit: 3 Units

IRL 7007 Peace and Security Studies

This course will provide students with the understanding of concepts of peace and security and how these have transformed to meet the emerging global challenges. It aims to impart international principles and ethics of peace-building and security in relation to reconstruction and development so that professionals have standards by which to evaluate proposed actions.

Credit: 3 Units

IRL 7008: Public Policy Analysis

This course will provide a practical and theoretical overview to crafting effective strategies for advancing public policy changes at the state and local level using a range of legislative, litigation and other policy tools. The Public Policy Analysis course will be based on the assumption that modern policy making, devoted to the principles of good governance, transparency, accountability and effectiveness, needs to be based on sound academic analysis of the problems and policies at stake. In this way, the module aims to attract scholars interested in conducting thorough and systematic academic work on the cause, function, nature and outcome of public policy on all levels of policy-making, whether global, regional, national, or local. The course also aims at training academic researchers in the field of public policy, to learn to apply analytical tools to 'real world' policy problems and to generate high quality policy advice.

Credit: 3 Units

IRL 7009 Comparative Politics

This course examines fundamental issues in comparative politics and provide broad coverage of the central themes under study. It will help students think theoretically and critically about the study of comparative politics, its scientific objectives, and its epistemological assumptions. Within this context, concepts and approaches, as well as some of the most important theories and debates that characterize the sub-field will be covered. The historical development and trends of comparative politics and the study of epistemological and philosophical issues in comparative political inquiry will also be examined. The course will also focus on the logic and process of comparison and methodologies in comparative political studies, in addition to exploring some major theories in comparative politics, such as political system, state and society, political culture, rational choice, institutionalism, political economy, development, democracy and democratic transitions.

Credit: 3 Units

IRL 7010 Diplomatic & Consular Practice

This course will familiarize students with the critical problems inherent in the competing perspectives of diplomacy. The course will examine from theoretical and conceptual perspectives, diplomacy, surveying a variety of inherent issue areas and actors. The course will enhance their knowledge, research and analytical skills in tackling theoretical and thematic-related issue areas in diplomacy. It will review the literature and islands of theory in diplomacy. The course will also enable students gain an in-depth understanding of the origins and evolution of diplomacy. Initially dominated by the superpower Cold War rivalries, the domain of diplomacy now encompasses the role played by, among other actors, the emerging powers and global and regional governmental and non-governmental organisations because of their influence in contemporary world politics. Since their inception, international governmental organisations have played important

diplomatic roles beyond traditional states. Suffice it to say, individuals, through their own initiatives, remain important players in diplomacy. Specifically, the issue of leadership is critical in diplomacy.

Credit: 3 Units

IRL 7011: PhD Research Seminar

This course will help doctoral students develop research topics on contemporary IR issues and strengthen their scholarly writing skills and analytical ability. Students will receive tutorial guidance on issues of seminar presentation, research opportunities and publication.

Credit: 3 Units

IRL 7012 PhD Project Development & Field Work

This course will provide students with relevant techniques and methodologies for designing and developing a project. It will also offer guidelines and practices for carrying out field work. Students will be required to design, develop and implement a project. They will also be expected to write a proposal justifying the purpose of the research and also evaluate the project in line with the student's proposed area of doctoral research. Overall, the course will contextualize and assess the dynamics and practical aspects of fieldwork. There will be sufficient space for discussion of personal fieldwork expectations, experiences and challenges.

Credit: 3 Units

IRL 7013: International Law

This course will provide students with insights to the nature and function of public international law as well as the research methodologies relevant to this field of research. It will give specific emphasis to topics of particular relevance for the wider study of international relations. These include the concept of state sovereignty, the rights of the individual, international criminal law, and systems of enforcement, state responsibility and IR theories concerning the nature and functioning of

international law.

Credit: 3 Units

IRL 7014 Gender And International Relations

This course provides students with a study of the evolving literature on feminist international relations where a group of feminist scholars theorize how gender (as social construction) affects international politics generally and the lives of women around the world specifically. It will introduce students to gendered lenses used to observe, study and addresses the experiences of women in international politics and of the influence of gender on international relations. Also, the roles that women play in international politics is critically evaluated both how those roles came to be and how they are studied. The situations of women around the world, the ways in which gender affects social and political status and relationships between gender, feminism, and activism is highlighted are other areas covered in this course.

Credit: 3 Units

IRL 7015 Environmental Theories & Politics

This course will provide a historical context for understanding domestic and international environmental politics, as well as an introduction to the tools necessary to participate in policy-making in the multi-disciplinary system (science, geography, economics, politics and law) of environmental policy. It will focus on a critical review of alternative theoretical models that explain public attitudes, particularly the values and ethics of the public, towards environmental protection, and research data that documents these attitudes. The goal will be to increase environmental awareness and help students become informed citizens who can participate in the environmental policy process. The course examines the political ideas and practices which have shaped environmental politics and practices in the International systems. There will be an examination of the role of the state and the policy process (agenda-setting, formulation,

implementation), and case studies with a detailed examination of recent developments in one or more areas of environmental politics. The course will introduce and develop students' field research, writing and oral presentation skills.

Credit: 3 Units

IRL 7016 Democracy and Governance

This course provides students with the understanding of issues of democracy and governance and to consider the diverse challenges and obstacles to promoting sustained democratization and achieving effective governance. Effective and accountable government is central to successful peace, security and development. The course will examine issues that contribute to and constrain democratization in the world and specifically around the African continent. It will address issues of the inter-relationship between democracy and governance in an ever-changing global context.

Credit: 3 Units

IRL 7017 International Humanitarian Law

This course will introduce students to the key concepts of international humanitarian law, and how this branch of law should be positioned to related fields of law, such as human rights law and international criminal law. It will also deal with the history of efforts to regulate conduct during hostilities, and provides students with an overview of the relevant legal framework, notably the Geneva Conventions of 1949 and the Additional Protocols of 1977. The course will further develop the students' understanding of the classifications of the types of armed conflict, legal and illegal means and methods of warfare and the concept of war crimes. Students will also be introduced to the mechanism used to enforce the rules of international humanitarian law, including international tribunals' prosecution of war crimes.

Credit: 3 Units

IRL 7018 Conflict Analysis

This course will expose students to techniques and paradigms of conflict analysis, based on an evaluation of a variety of conflicts, and their contending theoretical explanations. The course will delve into an analysis of selected case studies of some of the protracted and persistent conflicts that have rocked the African continent during the post-colonial era. It will further explore the systematic application of specific methods (or tools) to study the profile, causes, actors and dynamics of different levels of conflict (e.g., individual, group, local, regional and international). Applying different analytical tools to different levels of conflict will not only facilitate a rigorous understanding of such conflicts but also help towards achieving constructive remedies.

Credit: 3 Units

IRL 7019 Conflict Resolution and Peace building

This course will explore a range of issues surrounding the conceptualization of the processes of conflict resolution and peace building and the impact of that conceptualization on the practice of conflict resolution and peace building. It examines the basic concepts underpinning the subject of conflict resolution and peace building before delving into the processes of conflict management and resolution (including the range of conflict resolution approaches, primarily on negotiation, mediation, and advocacy) and peace building. The course culminates with the examination of specific case studies of conflict resolution and Peace building in the African continent.

Credit: 3 Units

IRL 7900 Dissertation

There are 4 semesters of Dissertation (IRL 7900A, IRL 7900B, IRL 7900C and IRL 7900D).

Failure to complete within the 4 semesters, a student will be required to register for IRL 7900 Dissertation every semester until the dissertation is complete.

LIT: Literature

LIT 1105 Introduction to World Literature: Fiction, Poetry, and Drama

Readings in the main genres of literature (fiction, poetry, and drama) throughout the cultures of the world; includes consideration of oral literature; introduction to critical approaches to literature. (WI)
Credit: 3 Units

LIT 1106 African Fiction: Introduction to the African Novel

A survey of the development of the African novel from its beginnings to 1970. This is a reading course in the African novel; students are required to read one novel each week for ten weeks, as well as read closely and do an oral presentation and term paper on one particular novel during the quarter. Class time is devoted to discussions of a different novel each week, and students are expected to have read that novel, or substantial portions thereof, before coming to class. (WI)
Credit: 3 Units

LIT 1107 Introduction to African Literature

A survey of African literature in several genres, including folk tale, novel, short story, poetry, drama, and epic, from the English, French, Arabic, and native language traditions. This course serves as an introduction to the riches of African literature in various genres and traditions. (WI)
Credit: 3 Units

LIT 2215 Approaches to Literature

Introduction to literary criticism; consideration of traditional approaches as well as contemporary: historical, moral-philosophical, formal, psychological, mythological, feminist, etc. (WI)
Credit: 3 Units

LIT 2220 Literature and Culture

Literature as the record and expression of a culture's values and beliefs; an inquiry into the symbiotic relationship between a culture and its literature; intercultural, thematic approach to literary works. (WI, OI)
Credit: 3 Units

LIT 2225 Introduction to Shakespeare

Reading, viewing, and interpreting selected comedies, tragedies, and sonnets; introduction to Shakespeare criticism; exploration of the "authorship question;" consideration of Shakespeare's place in the canon. (WI)
Credit: 3 Units

LIT 3001 Latin American Fiction I

Fiction from the earliest years of colonization up to the mid-nineteenth century; includes narratives of indigenous people. (WI)
Credit: 3 Units

LIT 3002 Latin American Poetry I

Poetry from the earliest years of colonization up to the mid-nineteenth century; includes narratives of indigenous people. (WI)
Credit: 3 Units

LIT 3003 Poetry Across Cultures

Comparative study of representative poetry from the world's cultures; emphasis on close reading and interpretation; exploration of historical and cultural significance; consideration of issues of translation. (WI)
Credit: 3 Units

LIT 3020 International Perspectives on the Novel

Investigation of the genre of the novel and its intersection with and manifestation of individual and

cultural meaning. (WI)
Credit: 3 Units

LIT 3330 Literature for Children and Adolescents

Traditional and modern writings for children; includes fanciful tales, realistic stories, fairy folk tales, myths, hero-stories, legends, and fables. (WI)
Credit: 3 Units

LIT 3340 Myths, Rituals, and Archetypes

Study of repeated motifs and analysis of archetypal patterns as they occur throughout literature; includes study of Biblical and other sacred texts, and classical and mythological literature. (WI)
Credit: 3 Units

LIT 3351 Masterpieces of World Literature: Major Works from the World's Cultures

Readings in and study of selected widely acknowledged literary works from the world's cultures; exploration of the notion of the literary masterpiece. (WI)
Credit: 3 Units

LIT 3775 Post-Colonial Writing in English

Survey of important writers of the former British colonies of Africa; Australia, New Zealand and the South Pacific; Canada; the Caribbean; and South and South-East Asia; exploration of historical, cultural and contemporary concerns related to colonial legacies. (WI)
Credit: 3 Units

LIT 4001 Latin American Fiction II

Fiction from the mid-nineteenth century up to the present; short story and novel; includes narratives of indigenous people. (WI)
Credit: 3 Units

LIT 4002 Latin American Poetry II

Poetry from the mid-nineteenth century up to the present; includes poetry of indigenous people. (WI)
Credit: 3 Units

LIT 4003 Latin American Drama

Survey of Latin American drama from colonial times to the present; includes consideration of theatre of indigenous people. (WI)
Credit: 3 Units

LIT 4007 Major Works of British and U.S. Literature

Intensive study of selected British and U.S. literary masterpieces across the genres of fiction, drama, and poetry; comparative study of differences and similarities between British and U.S. literatures. (WI)
Credit: 3 Units

LIT 4010 Specialized Seminar in Regional Literature

In-depth exploration of literature and its relationship to culture and region. Regions to be considered will rotate each time the course is offered through Africa, Europe, Asia and the Pacific, Latin America, and North America. (WI)
Credit: 3 Units

LIT 4785 African Authors Seminar

In-depth consideration of the works of one or two significant writers (novelist, poet, dramatist, or short story writer); his, her, or their contribution to the life and letters of Africa (WI, OI)
Prerequisite: LIT 1105 or equivalent
Credit: 3 Units

LIT 4815 Oral Literature

In-depth consideration of oral literature as a separate genre; investigation into contemporary oral

literature (e.g. folk tales, urban legends, jokes, etc.); examination of oral literature of selected indigenous peoples. (WI)
Credit: 3 Units

LIT 4825 Contemporary Literary Critical Theory

Exploration of the theory and application of literary criticism. Study of contemporary critical theories such as structuralism, deconstruction, feminist theory, and others. Includes consideration of the philosophical, political, and linguistic assumptions and implications. (WI)
Credit: 3 Units

LIT 4820 Sacred Literatures of the World

In-depth study of the scriptures and religious writings of various world cultures, i.e. Taoist, Buddhist, Hebraic, Christian and Islamic. Focus on literary features that cause the literature to be regarded as inspired and sacred. (WI) Prerequisite: LIT 1105 or equivalent.
Credit: 3 Units

LIT 4825 Contemporary Literary Critical Theory

Exploration of the theory and application of literary criticism. Study of contemporary critical theories such as structuralism, deconstruction, feminist theory, and others. Includes consideration of the philosophical, political, and linguistic assumptions and implications. (WI)
Credit: 3 Units

MFT: Marital & Family Therapy

MFT 6800 Introduction to Family Therapy

The purpose of this course is to examine the history of family therapy, the dynamics of family relationships, and the family cycle.

Credit: 3 Units

MFT 6801 MFT Ethics and Law

Examination of legal issues and professional ethics concerning psychologists and clinical researchers including: child and elder abuse reporting laws, danger to self and others reporting, confidentiality, privileged communication, patient's rights and involuntary commitment.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

MFT 6802 Family Therapy with Adolescents and Children

The purpose of this course is to enable students gain a better understanding of the psychological development that occurs in adolescents and the different approaches to family therapy that can be used for this age group.

Credit: 3 Units

MFT 6803 Child Abuse and Family Violence

The purpose of this course is to examine the study of trauma and violence and its impact on the family unit. This course will focus on assessment techniques, diagnosis, and treatment for this type of abuse in both children and the elderly.

Credit: 3 Units

MFT 6804 Publication and Research Presentation

The purpose of this course is to equip students with skills for writing a research proposal, analyzing the data, and presenting the findings.

Credit: 3 Units

MFT 6805 Group Psychotherapy

This course will provide a practical review of principles, issues, and applications of various effective techniques in group psychotherapy, including application of various therapeutic factors of successful groups by successful group therapies. Issues explored regarding group start up, stages in group formation and cohesiveness and common challenges and goals for the newer group therapist. Experiential Role playing and intensive group participation will support the practical learning skill development and objectives in this course.

Credit: 3 Units

MFT 6806 Supervision in MFT

In this course students will learn about how to become a licensed Marriage and Family Therapy Supervisor. As a requirement for clinical training-all MFT students must receive both individual and group therapy supervision so as to meet the clinical requirements as per AAMFT.

Credit: 3 Units

MFT 6807 Couples and Sex

This course delineates the theory, philosophy and sex therapy models to students as a way of teaching them how to work with couples dealing with relational challenges. The role of the clinician and the model strategies will be emphasized. During this course students review the fundamentals of assessment and intervention with couples and how this differs from psychotherapy with individuals, groups, and families.

Credit: 3 Units

MFT 6809 Family and Divorce Mediation

The purpose of this course is to present and help students understand the fundamental mediation principles and their application in domestic relations cases and reviews statutory concepts of domestic relations law. By reviewing the Kenyan Law on

divorce and mediation-students will learn about the laws that govern family, divorce and the role of mediation.

Credit: 3 Units

MFT 6810 Master's Thesis I

The purpose of this course is to put the student's theoretical knowledge and research proficiency to practical test by carrying out an independent, albeit guided, project producing an original piece of research and making a significant contribution to solving a problem and expanding the knowledge base in the specific discipline. While research is an ongoing process, in which one is expected to stay on top of the relevant developments in the discipline, the assumption is that students are capable of thinking through the important milestones in the thesis process and developing a thesis prospectus that spells out the core concepts and questions as well as the designs of research and the structure of intended thesis. This course guides students through the formative stages of proposal development in which constant, critical thinking is required. Interaction among the instructor and students is important to transform latent ideas into a novel, researchable Master's Thesis.

Credit: 3 Units

MFT 6812 Family Assessment

A study of the practice of marital and family therapy with specific emphasis in the clinical assessment of family systems. Assessment information will be used for the development and implementation of the therapeutic treatment plan. Proper diagnosis is critical, the use of standardized assessments will ensure students learn how to give correct reports and treatment plans.

Credit: 3 Units

MFT 6819 First Responders, Military Personnel and Trauma

Family therapists are continually confronted with violent relational systems. Trauma is experienced

not only by the victims but by those who respond to their crises. First responders are in the line of fire every day and are greatly affected. Competence in working with this population is readily needed and is what this course is designed to do.

Credit: 3 Units

MFT 6820 Substance Abuse and Childhood Trauma

Addiction destroys individuals, families, communities, societies and nations. Today, we cannot talk about the field of mental health without including a wide range of issues stemming from various types of addiction. This course will prepare the participants to understand addiction through a systemic lens rather than solely focusing on intra-psychic factors.

Credit: 3 Units

MFT 6821 Culture, Attachment and Trauma

While cultures around the world show remarkable diversity in terms of how they relate to trauma and recovery, there are certain underlying traits that seem to be common across all cultures. This course is designed to help students learn key concepts and gain fundamental skills for engaging in cross-cultural therapy with survivors of trauma.

Credit: 3 Units

MFT 6822 Immigration Trauma

The immigration status in Kenya continues to become a melting pot with all different nationalities residing in the country. The process of immigration is often fueled with trauma given the basis of migration such as war in their countries. Enculturation to any new country poses its challenges on all individuals in a family setting. This course is geared towards teaching students to fulfill a systemic role within a multidimensional team (such as law enforcement, police, medical, social workers to name a few) involved in immigration processes.

Students will be taught how to work with these families given the multilayered challenges they face.

This course provides opportunities for both theory and skill development by examining immigration trauma through a systems lens.

Prerequisite: MFT 6819, MFT 6820, MFT 6821

Credit: 3 Units

MFT 6823 Trauma and the Family

Traumatic stress occurs in specific social contexts. We interpret war, loss, violence and disasters in ways shaped by our culture, by our society, and by its values and norms. Families cope with the effects of traumatic events in ways provided and approved by our surroundings.

Credit: 3 Units

MFT 6824 Mindfulness and Acceptance in Couples Therapy

The purpose of this course is to increase competence in working with couples. Through the diverse uniqueness of couples, students will learn how to cultivate mindfulness as a technique and state of being when working with couples. The course will provide students with a systemic framework of working with couples and utilize the self and awareness in clinical, assessment and research settings.

Credit: 3 Units

MFT 6825 Mindfulness Based-Play Family Therapy

This course will provide a framework for using Play in family therapy through mindfulness based acquisition. Play therapy had been a fundamental aspect and successful technique when working with families.

Credit: 3 Units

MFT 6826 Mindfulness and Family Therapy

This course provides a framework for working with couples and families from a mindful based perspective. Techniques to enhance relaxation and decrease the stress response, which in turn can reduce frustrations and conflicts, are introduced.

Credit: 3 Units

MFT 6827 Integrating Mindfulness and Narrative Therapy

The purpose of this course is to integrate a postmodern theory; Narrative Therapy with mindfulness as the combination has been found to be greatly effective in clinical practice. By increasing competence in Narrative therapy students are able to work with culturally diverse clients utilizing new techniques in the field of MFT.

Credit: 3 Units

MFT 6828 Mindfulness and Art Therapy

This course is part of a 5 part concentration series of the MAMFT degree plan. In this course will learn about the interwoven power of Art therapy and Mindfulness. This course will put theory into practice by enabling the process of art therapy to feed into the systemic needs of the clients.

Credit: 3 Units

PHE: Physical Education

PHE 3306 Physical Growth and Development

Physical growth and maturation; motor development of the individual from birth to maturity; changes in motor patterns of children and adults; and methods of evaluation of motor skills performance, and the selection of appropriate movement experiences.

Credit: 3 Units

PHL: Philosophy

PHL 1104 Introduction to Philosophy

Selected major topics in theories of reality and knowledge as well as from applied areas such as ethics, politics, aesthetics, and religion. Multicultural content. (WI, OI)

Prerequisite: ENG 1106

Credit: 3 Units

PHL 3306 Comparative Philosophy

Cross-cultural exploration of perspectives originating in Africa, Asia, Latin America, and the Middle East.

Credit: 3 Units

PHL 3307 Major Movements in U.S. Philosophy

Inquiry into culturally influential views including Puritanism, Pragmatism, Transcendentalism and evolutionary thought among others.

Credit: 3 Units

PHL 3309 Major Figures in Philosophy

Examination of the thought of prominent philosophers in various cultures from ancient times to the present.

Credit: 3 Units

PHL 3310 Ethics and Value Theory

Basic theories along with an investigation of several current controversies in practical contexts. (WI, OI)

Prerequisite: ENG 1106

Credit: 3 Units

PHL 3500 Epistemology and Gender

Philosophical implications of the sociology of knowledge; special emphasis on the role of gender in forming our picture of the world.

Credit: 3 Units

PHL 4220 Asian Philosophy

Consideration of some of the main schools of Hindu, Buddhist, Taoist and other Asian traditions.

Credit: 3 Units

PHL 4230 African Philosophy

The course is about the discourse of philosophy in Africa. It exposes students to the general problems that are involved in conceptualizing "African philosophy" as well as the work that has been done in African philosophy as scholarly undertakings. It situates African philosophy in the wider context of world philosophy.

Credit: 3 Units

POL: Political Science

POL 2000 Introduction to U.S. Politics

Foundation of American politics _ the Constitution, federalism, the three branches of government, political parties, political values, public opinion, interest groups. (WI)

Prerequisite: ENG 1106

Credit: 3 Units

POL 2105 Principles of Public Administration

The study of the fundamental concepts of public administration; its inter-disciplinary nature and scope; the ethics of public service; and the major tools, techniques and methods involved in the conduct of public administration.

Credit: 3 Units

POL 2201 Introduction to Political Science

The course introduces students of political science as a field of academic inquiry thus placing emphasis on understanding basic concepts of politics, scope and theories of explaining complex political phenomenon. Questions such as what is politics, the role of the state and fundamental theoretical and analytical tools of politics are explained. Furthermore, the course introduces students to a number of different theoretical approaches of analyzing politics especially how the state and society relates. Why study politics, power and the role of the state are also examined.

Prerequisite: HUM 1000; ENG 1106

Credit: 3 Units

POL 2505 State and Local Politics

The study of the politics at the state and municipal level; the constitutional and legal basis for state and local politics; American federalism; policy formulation and implementation; and citizen participation.

Credit: 3 Units

POL 3000 Western Political Thought

This course includes the study of the basis and development of major Western political ideas from classical era to modern times. The roots of Western political notions on Greco-Roman and Judeo-Christian thought. The European medieval influence; and modern liberal ideas from Renaissance to the Industrial Revolution. The Twentieth-century traditional political ideas, such as Existentialism and Marxism are also covered.

Credit: 3 Units

POL 3005 Non-western Political Thought

The study of political ideas as expressed in Ancient Asian philosophies; the influences of traditional African and native American political concepts; and institutions as sources of modern political theories and ideologies.

Credit: 3 Units

POL 3110 Public Policy Formulations

The study of the formulation and implementation of public policy; rational choice and public goods approaches; issues concerning public demand and institutional assessment; externalities; collective decision-making; and systemic theory and cybernetic models.

Credit: 3 Units

POL 3120 Public Personnel Administration

The study of managerial tools for public personnel; its specific nature; the phenomenon of bureaucratic inertia and cooperate interests as variables; effective public administration: case study analysis.

Credit: 3 Units

POL 3125 Municipal Administration

The study of specific issues involved in local level administration; analysis of the institutional mechanisms for citizens participation; administration

of transportation, sanitation, housing, public safety, schools, and planning. *Credit: 3 Units*

POL 3350 The U.S. Presidency

Study of the Presidency as a person and as an institution. Includes the expansion of the power and influence of the office both nationally and internationally.

Credit: 3 Units

POL 3500 The Federal Judiciary and the Constitution

The role of the federal judiciary in interpreting the Constitution, particularly the Bill of Rights, due process, and equal protection under the law.

Credit: 3 Units

POL 3505 Political Parties and Interest Groups in the U.S.

The development and function of political parties and interest groups in the American political system. Examines attempts at political reform and efforts to control the influence of interest groups.

Credit: 3 Units

POL 3510 The U.S. Congress

The study of the structure and functions of the United States Congress; its constitutional foundations; legislative processes; formal and informal operations; congressional staff; and electoral issues.

Credit: 3 Units

POL 4005 Constitutional Law

The study of the United States Constitution; its origins and development, as reflected in the decisions

of the Supreme Court; the Amendments; checks and balances and the separation of powers; the Federal System; the Bill of Rights; and contemporary challenges for the constitutional order.

Credit: 3 Units

POL 4010 Race, Ethnicity, Class, and Gender in U.S. Politics

The struggle for inclusion and the current role of various racial, ethnic, and socioeconomic groups as well as women in the U.S. political system.

Credit: 3 Units

POL 4020 The Politics of Gender

Inquiry into the relationship between politics and gender: the Constitution, the equal rights amendment, the women's movement, gender advocacy, the "men's movement"; the media's role.

Credit: 3 Units

POL 4025 Peace, Conflict and Cooperation

The study of the theoretical and practical bases of peaceful resolution of disputes; theoretical aspects of conflict and its place in the contemporary international system; and peace promotion and cooperation.

Credit: 3 Units

POL 4030 Theories of Revolution

This course covers the study of philosophical, traditional, and historical roots of revolutionary ideas; their development into avenues for political action; and the consequences of various theories of revolution in the contemporary era.

Credit: 3 Units

POL 4035 Theories of Democracy

The study of the origins and historical development of the philosophy of democracy; its applications in contemporary life; and the study of pluralists and liberal political doctrines is covered in this course.

Credit: 3 Unit

POL 4040 Non-Traditional Political Ideas

The study of contemporary political thought, such as Neo-Marxist, Critical Theory, Hermeneutics, structuralism and post-structuralism, liberation theology, feminism and gender studies, post-modern political thought, psychology and identity-based politics.

Credit: 3 Units

POL 4110 Public Budgeting Systems

The study of characteristics of planning the public sector; financial reports; output assessment; programming; budget preparation; performance monitoring; and evaluation are presented in this course.

Credit: 3 Units

POL 4500 Contemporary Political Issues

The study of the major controversial political issues of the day like terrorism; force; nuclear power; protectionism and the free market; trade issues; and proliferation of weapons of mass destruction.

Credit: 3 Units

PSY: Psychology

PSY 1101 Introduction to Psychology

Introduction to the scientific study of behavior and mental processes including areas of human development, learning, cognition, memory, motivation and emotion, personality, abnormal psychology, stress and health, states of consciousness, cultural diversity.

Credit: 3 Units

PSY 1105 Developmental Psychology

Survey of maturational and learned behavior and their interaction as they develop through the life span.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 1110 Experimental Psychology

Introduction to the scientific method as used in psychology. Includes the formation of hypotheses, design of research, conduct of one or more studies, statistical analysis of data, and writing up of results. Critical interpretation of research findings is emphasized.

Prerequisites: PSY 1105

Credit: 3 Units

PSY 1111: Writing in psychology

Discipline-specific writing, such as writing done in psychology, can be similar to other types of writing done in the use of the writing process. The field of psychology also has its own rules and expectations for writing. This course will expose learners to the techniques of writing in Psychology, the writing Process, convention in Writing, Electronic Data Bases, APA Style.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 1171 Introduction to Health Psychology

The course will cover the discipline, concepts and principles of psychology and human behavior in understanding how the mind, body and behavior interact in health and disease. Topics will indicate health promotion and primary prevention of illness, health enhancing and health damaging behaviors; psychosomatic illness and other behavior- related

medical illnesses will be covered.

Prerequisite: PSY 1101

Credit: 3 units

PSY 1185 Introduction to Chemical Dependency

Historical perspectives on alcohol and drug abuse and their impact on the community. Changes in social attitudes and policies. Includes definitions of alcohol and drug dependencies, the disease concept of alcoholism, general models of treatment and recovery, effectiveness of recovery programs, and community responses to dependency problems.

Credit: 3 Units

PSY 2105 Social Psychology

Interdisciplinary introduction to the social aspects of individual behavior. Particular emphasis on interactional analysis and development of the self as well as attitudes, motives, aggression, values, social perception, and interpersonal relationships.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 2120 Psychology of Learning

Survey of historical and contemporary theories, systems and research in learning. Includes the study of programmed learning and the use of the principles of learning to explain animal and human behavior.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 2125 Human Sexuality

Sexual behaviors and attitudes in contemporary societies; physiological and sexual functions and dysfunctions; role of values and cultural mores.

Credit: 3 Units

PSY 2181 Psychopharmacology and Addiction

Examination of the physiological effects of alcohol and other drugs. Includes how drugs are metabolized, their effects on the central nervous system and behavior and the addiction process.

Prerequisite: PSY 1185

Credit: 3 Units

PSY 2182 Treatment Methods and Modalities of Chemical Dependency

Various ways people recover from alcohol/drug abuse. In-depth examination of various models of intervention and treatment and the rationales behind them. Consideration of the individual differences in male and female needs and the needs of special populations.

Prerequisites: PSY 1185, 2181

Credit: 3 Units

PSY 2183 Theories and Techniques of Chemical Dependency Counseling

Theories of counseling and the implementation of therapeutic strategies, including techniques of rapport building, relationship skills, goal setting, implementation of treatment programs and referral skills. Discussion of values and ethics in counseling.

Prerequisites: PSY 1185, 2181

Credit: 3 Units

PSY 3105 History and Systems of Psychology

Examination of the historical roots of psychology in relation to contemporary psychology and its foundations in philosophy and science. (OI)

Credit: 3 Units

PSY 3110 Psychology of Personality

Background, theory, and research related to selected issues in current personality theory. Discussion of psychoanalytic, neo-psychoanalytic, humanistic/existential, cognitive and behavioral approaches. (WI)

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3115 Abnormal Psychology

Introduction to the scientific study of the range and variety of psychological disorders including anxiety, mood and personality disorders, stress and adjustment, schizophrenia, substance use and addictions. Emphasis on identification, symptomatology, etiology and therapeutic intervention, including biological, psychosocial, and cultural viewpoints.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3116: Psychology of Adolescence

The course examines the physical cognitive and social development of adolescent in various contexts such as home and school. It includes theories, methods of study and contemporary issues and concerns of adolescents. The focus will be on adolescent development as influenced by diverse contexts. Particular attention will be given to the challenges and strengths associated with adolescent development in urban cities.

Prerequisite: PSY 1105

Credit: 3 Units

PSY 3125 Multicultural Diversity in Psychology

Examines the cultural context of behavior, personality development, family structure and values. Attention to the interface between African- American, Asian/ Pacific Islander American, Latino, and Native American communities and the field of psychology. (ILI)

Credit: 3 Units

PSY 3130 Physiological Psychology

Introduction to the physiological systems of the body as they relate to behavior. Emphasis on the nervous systems (central, autonomic, and somatic), the muscular systems (striated, smooth, and cardiac), and the glandular systems (endocrine and exocrine)

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3135 Psychology of Communication

Study of the human communication process including the techniques used in government, business, industry, education, athletics, arts, and leisure systems.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3140 Introduction to Counseling

Survey of counseling theories and related techniques of treatment, comparison and contrast of differing approaches. Attention to basic issues such as

change, human relationships, communication, and values and ethics in the change process.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3141: Psychology of Special Needs

This course provides an overview of measurement and evaluation concepts, strategies, and techniques that are appropriate for infants and young children with special needs. It will involve the exploration of diverse cognitive, neurological and emotional characteristics and how these manifest in learners' literacy development. Focus will be on the atypical development and educational needs of students who experience difficulties in acquiring the literacy skills of listening, speaking, reading and writing.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3142 Introduction to Industrial and Organisational Psychology

Focuses on history and development of industrial organisational psychology, current trends in research, and the application of psychological principles and methods to problems in the work environment including prediction of job performance, selection, performance appraisal, personnel training, work motivation, job satisfaction, leadership, organisational development, and ethical considerations.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3143 Psychology at Work I: Measuring Organisational Characteristics

Introduction to the concepts and measurement of job satisfaction, organisational climate and culture, organisational values, organisational commitment, and productivity. Covers methods and techniques (including surveys, interviews, and the use of archival data), and ethical principles involved in psychological work in organisations.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3150 Courtship and Marriage

The role of interpersonal relationships in dating, courtship, and marriage. Considers factors related to mate selection, the transition into marriage, and the stability and satisfaction of marital relationships.

Credit: 3 Units

PSY 3160 Introduction to Marriage and Family Therapy

A comprehensive introduction to the field of marriage and family therapy including major MFT theories and approaches, career options, graduate school preparation, and future directions of the field.

Prerequisite: PSY 3140

Credit: 3 Units

PSY 3171 Social Psychology of Health Care

A critical examination of the application of Sociological theories and research to health promotion. Scientific study of processes of influencing change in lifestyles in individuals and groups.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3172 Understanding Grief, Loss and Bereavement

The course will provide an overview of the societal and individual norms and attitudes regarding the process of dying and subsequent bereavement process. Emphasis will be placed on the normal expressions of grief and experiential exercises to gain basic insight and understanding of grief. Basic skills for supporting the bereaved will be covered.

Prerequisite: PSY 1101

Credit: 3 Units

PSY 3181 Trends and Issues in Chemical Dependency

Identifies the special problems, issues and concerns of modern living to which the helping professions address themselves. Focus on the social psychological dynamics of special population groups, e.g. aging, disabled, women, gays, adolescents, and children from alcoholic families. Development of skills to communicate effectively

with members of diverse populations.

Prerequisite: PSY 1185

Credit: 3 Units

PSY 3182 Group and Family Counseling with the Chemically Dependent

Introduction to the dynamics of group interaction. Emphasis on the group process as a means of changing behavior. Use of group therapy in chemical dependency treatment and aftercare, including support group dynamics of the alcoholic/addict family, and the use of family therapy.

Prerequisite: PSY 1185, 2183

Credit: 3 Units

PSY 3711 Independent Study or Research

Investigation of a topic area in psychology selected by the student under the guidance and supervision of a member of the faculty.

Prerequisite: PSY 4105, 4110

Credit: 1-3 units

PSY 4105 Statistics for Psychology

Statistical methods as used in psychology. Includes elementary probability distributions, sampling, tests of hypotheses, regression and correlation, and contingency analysis. Considerable student practice in computation. Possible introduction to computer technology.

Credit: 3 Units

PSY 4109 Test and Measurements in the Behavioral Sciences

Construction, administration, scoring and evaluation of personality, interest, and general and special ability tests. Includes a survey of published tests and discussion of reliability, validity, and item analysis. (OI)

Prerequisite: PSY 4105

Credit: 3 Units

PSY 4110 Research Methods

This course examines the research designs with methodology as well as basic data analysis techniques employed by social researchers. APA style and mechanics of writing research papers will

be covered. (WI)

Prerequisite: PSY 4105

PSY 4117 Cognitive Psychology

A survey of cognitive psychology, which examines how information of the world is gained, represented and transformed as knowledge, stored, and used to direct attention and behavior. Topics include perception, pattern recognition, attention, memory, imagery, language functions, thinking and problem solving, human intelligence and artificial intelligence. (ILI)

Prerequisite: PSY 1101

Credit: 3 Units

PSY 4142 Psychology at Work II: Prediction and Measurement of Human Performance

Introduction to psychological aspects of selection, job performance measurement, and performance evaluation. Focuses on the concepts relevant to those efforts, and the effective and ethical development, use, and interpretation of predictor and criterion measures of human performance in the organisational setting.

Prerequisite: PSY 3143

Credit: 3 Units

PSY 4143 Social Psychology in an Organisational Context

Exploration of human interactions in organisations from the psychological perspective. Includes the study of role behavior, normative aspects of work group behavior, goal setting theory, decision making, and power relationships.

Prerequisite: PSY 3142

Credit: 3 Units

PSY 4144 Communication and Leadership

The course examines how leaders use communication and covers the relationship between leadership and communication styles. The communication skills needed by organisational leaders, how leaders use communication to facilitate change in organisations and how individuals' gender, race and/or ethnicity affect leadership and communication behaviors.

Prerequisite: PSY 3135

Credit: 3 Units

PSY 4171 Behavioral Health Therapy

A variety of behavioral counseling techniques used to treat health related disorders will be covered.

An experiential approach will be used to provide students with an opportunity to obtain experience with the techniques. Topics covered include stress and stress management techniques, relaxation, cognitive approaches, promotion of health and wellness and management of specific diseases.

Prerequisite: PSY 3140

Credit: 3 Units

PSY 4172 HIV – AIDS Testing and Counseling

The course will cover knowledge and facts about HIV AIDS. An experimental approach will be used to explore various assessment procedures for assessment / testing, prevention and counseling topics to be covered include the clinical manifestation and management of HIV AIDS, VCT and other protocols.

Prerequisite: PSY 3140

Credit: 3 Units

PSY 4181 Fieldwork in Chemical Dependency

Focus on learning by doing. Generally, includes student participation in two practicums under an approved supervisor, each lasting 10 weeks, and two internships, each ten weeks also. A 30-hour workweek at an agency is typical.

Prerequisite: Completion of the 6 Chemical Dependency Minor Courses.

Credit: 3 Units

PSY 4711 Professional Workshop

Investigation of a particular topic, problem, or issue in psychology.

Credit: 1-3 units

PSY 4900 Psychology Project

Extended individual research or project under the direction of a faculty member and approved by the department chair or dean. Projects may include library or empirical research, analysis and written

or oral presentation of a report on a topic in the student's major field.

Prerequisite: Students must be seniors

Credit: 3 Units

PSY 4910 Psychology Internship

Internship in business, school, non-profit organisation, volunteer organisation or in another group or organisation approved by the faculty department chair or dean. Must be in the student's major area of study. A minimum of 120 hours required. (Grading is credit/no credit) *Prerequisite: All core courses. Students must be seniors.*

Credit: 3 Units

PSY 6002 Methods of Research

Examines tools used by psychologists in the process of organized inquiry. It is shown that the basics are the same, whether in formal research or applied contexts. Presentation of the types of design, the internal and external validity of designs, characteristics of adequate measures, the ecology of experiments, and the advantages of materialistic science. Methods of inquiry as applied to individuals, couples, and families are covered.

Prerequisite: BA Psychology

Credit: 3 Units

PSY 6003 Statistics for Behavioral Sciences.

The purpose of this course is to give a continuation in critical thinking in the synthesis of research studies, with a focus on empirical research in Psychology. Students will be exposed to topics to include: psychology research, nature of science, observational, experimental, and case study designs; formulating research questions; measurement strategies; scaling and coding; internal and external validity; naturalism in research; quasi-experiments; archival research; physical traces; data collection; interpreting results; program evaluation; professional writing; and ethics.

Prerequisite: BA Psychology, PSY 6002

Credit: 3 Units

PSY 6014 Qualitative Methods of Research

Examination of various methodologies such as phenomenology, symbolic interactionism, ethno methodology, and systems and historical approaches to research drawn from psychology, social psychology, sociology, and anthropology.

Prerequisite: BA Psychology, PSY 6002

Credit: 3 Units

PSY 6020 Measurement in Psychology

Reviews traditional trait-oriented and behavior-oriented perspectives on assessing human behavior; the development of assessment methodologies including interviews, self-reports, and ratings by others, self-monitoring, and direct observation. Includes reliability and validity, and accuracy and generalizability. Provides the conceptual and methodological under-pinning for future courses in assessment and useful for clinical, industrial, educational or laboratory contexts.

Prerequisite: BA Psychology, PSY 6002

Credit: 3 Units

PSY 6025 Program Evaluation

Examines the practice of program evaluation in organisational and clinical settings. Includes: evaluation models; ethical issues; the impact of the broader, external environment on the conduct of evaluation studies; the design of evaluation studies; special methodologic al issues specific to program evaluation; writing the evaluation report; and the dissemination of the evaluation results to those concerned. Special attention to quasi-experimental designs and their analysis.

Prerequisite: BA Psychology, PSY 6002, PSY 6020

Credit: 3 Units

PSY 6110 Personality and Affect

Investigation and critique of psychoanalytic, humanistic, existential, cognitive, behavioral, biological, socio-cultural and object relations theories of personality and affect. Review of current research on mood associated with emotional reactions. Explores empirical foundations, assessment, research literature and clinical applications.

Prerequisite: BA Psychology

Credit: 3 Units

PSY 6111 Introduction to Psychopathology

A historical view of the concepts of mental health and psychopathology are presented. Primary focus on the diagnosis and prognosis of disturbed behavior. Uses multi-axial system of the DSM as the central organizing structure of the course. Discussion of basic theoretical and treatment issues and future trends.

Prerequisite: BA Psychology

Credit: 3 Units

PSY 6112 Social Psychology

An interdisciplinary approach to the study of human behavior with the major focus on the development of research and theories in areas such as learning, the self as process, person perception, attitudes, affiliations, aggression, and altruism.

Prerequisite: BA Psychology

Credit: 3 Units

PSY 6114 Life Cycle Developmental Psychology

Review of human behavior for each of the stages of life- childhood, adolescence, early and middle adulthood and old age. Specific focus on the various theories of human development and discussion of contemporary issues and trends.

Prerequisite: BA Psychology

Credit: 3 Units

PSY 6115 Psychopathology I: Assessment and Diagnosis

The purpose of this course is to examine the procedures of ethical assessment, diagnosis and treatment planning and includes ethical considerations for intellectual, personality, couple and family assessment techniques. Students will engage with topics such as: the processes of assessment, placement in the different levels of care, counseling sessions' treatment planning in varied modalities, community resources mobilization, multidisciplinary team case consultations and ethical documentation.

Prerequisite: BA Psychology, PSY 6111

Credit: 3 Units

PSY 6116 Issues of Chemical Dependency

An introduction to chemical dependency, including diagnosis, treatment and prevention.

Prerequisite: BA Psychology, PSY 6111

Credit: 3 Units

PSY 6117 Cognition and Learning

The purpose of this course is to examine the processes of cognition and learning such as perception, information processing, reasoning, problem solving, decision making, memory, reaction time and unlearning. It also examines the role of retardation, giftedness and talented, IQ and EQ in cognition and learning.

Prerequisite: BA Psychology, PSY 6111

Credit: 3 Units

PSY 6126 Diversity and the Family

Examines diversity in the family including issues of ethnicity, race, religion, gender, gender- roles, sexual orientation, and social class. Blends systemic theory, research, and practice, as students learn to work with diversity issues in families, and with families having differing cultures, values and needs. Includes consideration of African American, Hispanic, Native American, Filipino, Asian, inter-racial and other ethnic/ racial populations.

Prerequisite: BA Psychology

Credit: 3 Units

PSY 6128 Individual and Family Life- Cycle Development

Studies developmental issues and life events from infancy to old age and their effect upon individuals, couples, and family relationships. Focus on theory, research, and application of individual and family developmental psychology. Examination of continuous and discontinuous changes, e.g. courtship, early marriage, childbirth, childhood, adolescence, divorce, blended families, parenting, and the family in the later life.

Prerequisite: PSY 6114

Credit: 3 Units

PSY 6130 Cultural and Ethnic Diversity in Clinical Practice

Integration of cultural/ethnic diversity and the delivery of psychosocial services to members of the Latino, African- American, Asian/Pacific Islander American and Native American communities. Discusses the cultural context of behavior, personality development, family, values, psychopathology, assessment, and the delivery of psychotherapy/ counseling services. May include field experiences.

Prerequisite: PSY 6110

Credit: 3 Units

PSY 6206 Adult Psychopathology

Examines the range and variety of psychopathological disorders based on the DSM-IV; the dynamic understanding of the conflict/defense model of neurotic forms of adjustment, development of personality disorders and the etiology, symptoms, dynamics, treatment, and prognosis of psychoses, schizophrenia, mood disorders, and borderline phenomena.

Prerequisites: PSY 6110, 6114, 6111

Credit: 3 Units

PSY 6208 Child Psychopathology

Examines theoretical and empirical findings related to the assessment, etiology, correlates, and development of the major categories of childhood psychopathology based on DSM-IV. Includes internalizing disorders, externalizing disorders, and severe developmental, individual, family, school and peer correlates of the behavioral problems.

Prerequisites: PSY 6110, 6114

Credit: 3 Units

PSY 6210 Clinical Interviewing Techniques

Studies the basic issues in the client- therapist interaction process. Focuses on different phases of the interview process with a special emphasis on the initial stages, personality assessment and treatment planning. Includes role playing, group supervision. Must be taken with PSY 6211 lab.

Prerequisite: PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6211 Clinical Interviewing Techniques Lab

Individual supervision and evaluation of a minimum of two cases through audio or videotaped interviews. The student receives supportive and corrective feedback concerning her/ his assessment and interviewing style, communication techniques, counter transference issues/biases, and diagnostic, assessment, and treatment implications for each case being presented. Must be taken with PSY 6212.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 1 unit

PSY 6214 Theories and Techniques of Individual Psychotherapy

An examination of the theory and techniques of major psychotherapy approaches and an introduction to basic components of the psychotherapeutic process. Advanced individual psychotherapy, with particular emphasis on cognitive, behavioral, psychodynamic, interpersonal and existential therapy. Skill in the multi modal assessment process. Knowledge of current research on individual interventions. Integration of theory and practice of psychotherapy interventions. The course will include lecture, audio-visual aids, and role-playing.

PSY 6215 Psycho-dynamic Psychotherapy

An examination of basic issues in psycho-dynamically oriented psychotherapy. Discussion of the different phases of treatment as well as the concepts of insight, free association, transference, counter transference, some aspects of brief therapy and crisis intervention. Use of cases and demonstration.

Prerequisites: PSY 6110, 6114, 6214

Credit: 3 Units

PSY 6216 Research Practicum & Course Project

This is a capstone course in completing a brief research project on a topic within clinical psychology to provide practice in writing a research proposal and study based on use of archival data or a case study. The standard

format of a five chapter document, reflecting the introduction, literature review, methodology, results and discussion sections, utilizing the APA style of writing with minimum of 3000 to 5000 words, or approximately 30 pages in length, will be required.

Prerequisite: PSY 6002, PSY 6711

Credit: 3 Units

PSY 6217 Cognitive and Other Behavioral Therapies

Behavior therapy approaches with a heavy emphasis on the cognitive therapies of Ellis, Beck, Meichenbaum, D'Zurilla, Mahoney, and Cautela. A critical review of the approaches, including their philosophical and empirical basis and research related to each is presented. Assessment procedures related to each approach are included. In-class exercises and demonstrations, however proficient use of procedures will require additional training.

Prerequisite: PSY 6110, 6214

Credit: 3 Units

PSY 6220 Professional Ethics and the Law

Examination of legal issues and professional ethics concerning psychotherapists and clinical researchers including: child and elder abuse reporting laws, danger to self and others reporting, confidentiality, privileged communication, patient's rights and involuntary commitment.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6240 Therapy with the Chemically Dependent Family

Examines definitions of chemical dependency relative to the family. Discussion of etiology, medical aspects, evaluation of the family and treatment approaches, legal aspects, special populations, community resources and referral processes. Education and prevention relative to the family.

Prerequisite: PSY 6116

Credit: 3 Units

PSY 6242 Applied Psychotherapeutic Techniques in Chemical Dependency

Introduction to chemical dependency counseling. Includes assessment of patients and their needs, treatment planning, group and individual therapy techniques with the chemically dependent person.

Prerequisite: PSY 6116

Credit: 3 Units

PSY 6245 Substance Abuse in Diverse Populations

An examination of high-risk groups and groups with special needs in the treatment and prevention of chemical dependency. Includes perspectives of women, African Americans, Spanish-speaking Americans, adolescents and Native Americans.

Prerequisite: PSY 6242, 6116

Credit: 3 Units

PSY 6248 Counseling Practicum I

Observation and supervision of field work in a private or public agency, which includes face-to-face interaction with a supervisor and weekly class on campus. Requirements include assessment and intervention with individuals and groups; a total of 500 hours is required. Course must be taken twice for a total of 8 Units

Prerequisite: All core courses and 25 hours of Personal therapy

Credit: 3 Units

PSY 6249 Counseling Practicum II

Observation and supervision of field work in a private or public agency, which includes face-to-face interaction with a supervisor and weekly class on campus. Requirements include assessment and intervention with individuals and groups; a total of 500 hours is required. Course must be taken twice for a total of 8 Units

Prerequisite: All core courses and Personal therapy

Credit: 3 Units

PSY 6250 Clinical Practicum

Supervised fieldwork concurrent with the clinical placement. Includes experience in psychological

assessment, diagnosis and individual and group psychotherapy and other work typically performed by a clinical psychologist. Weekly meetings on campus with a member of the clinical psychology faculty. A minimum of 1,000 hours of supervised experience is required for completion of the practicum sequence. Course must be taken three times for a total of 9 Units

Prerequisite: Approval of the coordinator of clinical training.

Credit: 3 Units

PSY 6255 Field Placement in Chemical Dependency

Placement of students in the chemical dependency concentration at treatment centres for alcoholism or drug treatment. Experience in intervention, research, education, and administration.

Prerequisite: PSY 6116

Credit: 3 Units

PSY 6257 Psychopharmacology and Biological Basis of Behavior

Presentation of the neurological system of the body. Consideration of the biological explication of mental processes, including learning, motivation and mental disorders. An examination of the drugs commonly seen in the practice of psychology, including drugs of abuse and psychotropic medications. Discussion of the role of the psychologist in relationship to the use of these drugs.

Prerequisite: PSY 6116

Credit: 3 Units

PSY 6259 Psychopharmacology for Psychologists

The purpose of this is to provide an overview of psychopharmacological medications, their basic classification, indications, contraindications, and side-effects will be provided. The goal of this course is to introduce the students to the basic terminology and models of pharmacokinetics as they relate to clinical mental health counseling and pharmacological treatment.

Prerequisite: PSY 6116, 6240, 6242, 6245, 6256

Credit: 3 Units

PSY 6260 Integrated Methodology I

Studies the interface of scientific and religious knowledge through the development of integrative methodology between psychology and religion. Through the use of the case study method, the pastoral and psychological perspectives are identified and applied to clinical practice. Seminar repeated for a total of 3 Units

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6262 Consciousness and Spirituality

Examination of extraordinary states of consciousness from biological, psychological and phenomenological perspectives. Focus on both naturally occurring and induced states of awareness. Explores both traditional and contemporary spiritual aspects of the self in relation to higher levels of consciousness. Particular emphasis on the integration of the spiritual and psychological in the unfolding of the self.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6264 Stress and Tension Control Through Progressive Relaxation

Seminar in the principles of tension control and practice in progressive relaxation for meeting life's stresses. Psycho physiological control is acquired over cognitive as well as autonomic functions. Emphasis on prophylactic applications.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6266 Principles of Stress and Tension Control for the Clinician

Principles of progressive relaxation for controlling tension, especially as manifested in psychiatric and psychosomatic disorders. Specific clinical applications include phobias, anxiety states, insomnia and depression, gastro-intestinal disorders,

high blood pressure, headaches and bodily pains. Includes consideration of the prevention of stress-tension disorders.

Prerequisite: PSY 6264

Credit: 3 Units

PSY 6268 Psychological Practice in Gerontology

Examination of the psychology of gerontology including therapeutic techniques in dealing with elderly persons within the context of individual, group and family therapy. Also covers etiology of problems of the elderly, assessment, evaluation, and treatment approaches for elderly persons. Legal and ethical issues and community resources are discussed.

Prerequisite: PSY 6114

Credit: 3 Units

PSY 6270 Evaluation and Assessment of Elderly Persons

Examination of issues regarding the assessment of elderly persons. Course is designed to provide training in the assessment instruments used to diagnose psychological, neurological, and other problems common in the elderly population.

Prerequisite: PSY 6268

Credit: 3 Units

PSY 6306 Epistemology and History of MFT Theory

Examination of the historical development, epistemological, theoretical, foundations, and current conceptual directions of the field of marriage and family therapy. Focuses on cybernetics, general systems theory, postmodernism, and social constructionism and their impact on the field. The work of Gregory Bateson and other philosophical pioneers is covered, along with a general history of the field.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 2 Units

PSY 6308 Interviewing Techniques

An introduction to communication processes which

are fundamental to interviewing and psychotherapy of individuals, couples and families. Includes skills such as empathy, listening, question asking, probes, assessment of clients from an individual and systemic perspective, and treatment planning across the beginning, middle, and ending phases of therapy. Includes lectures, role-playing.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6310 Ethics, the Law, and MFT: Professional Issues

Reviews guidelines for APA, AAMFT and CAMFT in the practice of psychology and marriage and family therapy, including issues of: child and elder abuse assessment and reporting, privileged communication, confidentiality, patient's rights and involuntary commitment and concerns specific to the MFT profession.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6312 Theories of Marital and Family Therapy

Examination of the major models/ schools of family therapy theory: historical models such as intergenerational, multigenerational; structural-strategic; and cognitive-behavioral models. Also focuses on family systems theory and its unique theoretical assumptions.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6313 Family Therapy Techniques

Examination of the major techniques of family therapy, with lectures, observation and demonstrations. Includes a weekly lab of supervised videotaped training. Provides a systemic approach to the assessment, diagnosis and treatment of families.

Prerequisites: PSY 6308, 6312, 6312

Credit: 3 Units

PSY 6314 Theories and Techniques of Individual Psychotherapy

A critical survey of theoretical concepts, contributions, and specific techniques of various psychotherapeutic perspectives, including but not limited to the psycho-dynamic, gestalt, existential-humanistic, cognitive-behavioral and integrative models of change. Emphasis on case presentations, role-playing, and treatment options applied to the major behavioral disorders.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6315 Marital and Divorce Therapy

Exploration of various theories of marital relationships (e.g. psychoanalytic, cognitive-behavioral, structural-strategic, Bowen Theory, etc.) and related interventions for dealing with a variety of marital and divorce problems, e.g. dual-career, multicultural, violent, alcoholic, re marriage. Course includes assessment and intervention of spouse and partner abuse. Instruction through lecture, discussions, role-playing, and videotapes.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6316 Sex Therapy in Marriage and Family Therapy

This course is designed to give the student a basic introduction and understanding of sex therapy assessment, theory and intervention. Basic sexual dysfunctions and difficulties are covered along with major behavioral and systemic treatment approaches.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6317 Parent-Child Therapy Techniques

A survey, from a variety of models, of the current research, theory, and techniques of parent training and parent-child therapy. The emphasis is on viewing and working with children from a family systems perspective. The course

also exposes students to working with child abuse and family violence, developmental issues for children and families, and cultural influences in the realm of parenting.

Prerequisites: PSY 611, 6114

Credit: 3 Units

PSY 6319 Survey of Assessment Procedures

A survey of the major assessment techniques in clinical practice. Includes intellectual, personality, projective, and family assessment techniques. Emphasis on how to read and understand a psychological assessment report.

Prerequisite: PSY 6110

Credit: 3 Units

PSY 6320 MFT Assessment Procedures

A survey of the major assessment techniques in MFT clinical practice. Includes intellectual, personality, and couple and family assessment techniques. Emphasis on administering and interpreting major assessment instruments used by family therapists for identification of mental health problems in individuals, couples, and families.

Prerequisite: PSY 6319

Credit: 3 Units

PSY 6321 Psychology of Health and Illness

Focuses on the exploration and expansion of knowledge of concepts in psychology of health and illness. Normality and dysfunction within persons and families facing chronic illness will be covered. The role of ethnicity, cultural diversity, class, race, poverty and sexual orientation will be examined as it relates to health, illness and the medical system.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6322 Loss, Grief and Bereavement

Focuses on loss, several variations as both conceptualized and as manifested in dynamic practice and/ or larger community clinical settings. The course is primarily experimental, specifically, psychologist-in training studying key theories (Freud, Bowlby, Worden) and conceptualizing/ or applying the theory to casework with clients who are currently

experiencing loss in one of its many manifestations. The experimental element of the course will involve presentation of a case to the class that focuses on the loss history and the therapist's navigation with the client of the rough terrains of attachments, separation and grief. Special focus will be given to children's responses to loss and to consideration of multicultural issues round the grieving process.

Prerequisite: BA (Psychology) or PSY

1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6323 Health Education and Promotion

An examination of the knowledge, concepts, practices and current research in the major areas of health education and promotion. Specific trends, developmental issues and appropriate clinical applications will be discussed and demonstrated.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6324 Counseling With Medical Population

Provides an overview of counseling as it relates to health psychology, as well as discuss various issues related to counseling with individuals with a variety of health concerns. Clinical assessment approaches and interventions for specific illnesses will be explored.

Prerequisite: PSY 6321

Credit: 3 Units

PSY 6325 Behavioral Medicine Techniques

The goal of this class is to understand the theory and practical implementation of a variety of behavioral medicine techniques used to treat health related disorders. The course will also provide participants with an opportunity to obtain personal experience with the techniques that will help them to understand some of the possible outcomes. Familiarity with alternative forms of medicine, including practices of other cultures will be explored.

Prerequisite: PSY 6321

Credit: 3 Units

PSY 6329 Theories and Techniques of Individual Counseling

A critical survey of theoretical concepts, contributions, and specific techniques of various psychotherapeutic perspectives, including but not limited to the psycho-dynamic, gestalt, existential-humanistic, cognitive-behavioral and integrative models of change. Emphasis on case presentations, role-playing, and treatment options applied to the major behavioral disorders.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6330 Multicultural Issues of Counseling

The purpose of the course is to integrate multicultural issues within the psychotherapeutic context. It also covers multi-cultural counselor competencies and barriers to multicultural counselling.

The course will emphasize on multicultural counseling skills and an integration of counselling theories.

Ultimately, it empowers the student to understand, respect and appreciate the cultural backgrounds of clients.

Credit: 3 Units

PSY 6240 Therapy with the Chemically Dependent Family

Examines definitions of chemical dependency relative to the family. Discussion of etiology, medical aspects, evaluation of the family and treatment approaches, legal aspects, special populations, community resources and referral processes. Education and prevention relative to the family.

Prerequisite: PSY 6116

Credit: 3 Units

PSY 6242 Applied Psychotherapeutic Techniques in Chemical Dependency

Introduction to chemical dependency counseling. Includes assessment of patients and their needs, treatment planning, group and individual therapy techniques with the chemically dependent person.

Prerequisite: PSY 6116

Credit: 3 Units

PSY 6245 Substance Abuse in Diverse Populations

An examination of high-risk groups and groups with special needs in the treatment and prevention of chemical dependency. Includes perspectives of women, African Americans, Spanish-speaking Americans, adolescents and Native Americans.

Prerequisite: PSY 6242, 6116

Credit: 3 Units

PSY 6248 Counseling Practicum I

Observation and supervision of field work in a private or public agency, which includes face-to-face interaction with a supervisor and weekly class on campus. Requirements include assessment and intervention with individuals and groups; a total of 500 hours is required. Course must be taken twice for a total of 8 Units

Prerequisite: All core courses and 25 hours of Personal therapy

Credit: 3 Units

PSY 6249 Counseling Practicum II

Observation and supervision of field work in a private or public agency, which includes face-to-face interaction with a supervisor and weekly class on campus. Requirements include assessment and intervention with individuals and groups; a total of 500 hours is required. Course must be taken twice for a total of 8 Units

Prerequisite: All core courses and Personal therapy

Credit: 3 Units

PSY 6350 Marriage and Family Therapy Practicum

Observation and supervision of marital and family therapy in an approved clinic or public agency and a course involving case presentations, live and videotape supervision of therapy experiences. The practicum program requires 500 hours. Of direct client contact, 250 of which must be with couples or families; students receive 100 hours of individual and group supervision, at least 50 hours of which are based on direct observation, videotape or audiotape. Students must be enrolled in a practicum course until all requirements are complete. Course must be taken a minimum of 4 times for a minimum total of 12 Units

Prerequisite: PSY 6312, 6313

Credit: 3 Units

PSY 6255 Field Placement in Chemical Dependency

Placement of students in the chemical dependency concentration at treatment centres for alcoholism or drug treatment. Experience in intervention, research, education, and administration.

Prerequisite: PSY 6116

Credit: 3 Units

PSY 6257 Psychopharmacology and Biological Basis of Behavior

Presentation of the neurological system of the body. Consideration of the biological explication of mental processes, including learning, motivation and mental disorders. An examination of the drugs commonly seen in the practice of psychology, including drugs of abuse and psychotropic medications.

Discussion of the role of the psychologist in relationship to the use of these drugs.

Prerequisite: PSY 6116

Credit: 3 Units

PSY 6259 Psychopharmacology for Psychologists

The purpose of this is to provide an overview of psychopharmacological medications, their basic classification, indications, contraindications, and side-effects will be provided. The goal of this course is to introduce the students to the basic terminology and models of pharmacokinetics as they relate to clinical mental health counseling and pharmacological treatment.

Prerequisite: PSY 6116, 6240, 6242, 6245, 6256

Credit: 3 Units

PSY 6260 Integrated Methodology I

Studies the interface of scientific and religious knowledge through the development of integrative methodology between psychology and religion. Through the use of the case study method, the pastoral and psychological perspectives are identified and applied to clinical practice. Seminar

repeated for a total of 3 Units

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6262 Consciousness and Spirituality

Examination of extraordinary states of consciousness from biological, psychological and phenomenological perspectives. Focus on both naturally occurring and induced states of awareness. Explores both traditional and contemporary spiritual aspects of the self in relation to higher levels of consciousness. Particular emphasis on the integration of the spiritual and psychological in the unfolding of the self.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6264 Stress and Tension Control Through Progressive Relaxation

Seminar in the principles of tension control and practice in progressive relaxation for meeting life's stresses. Psycho physiological control is acquired over cognitive as well as autonomic functions. Emphasis on prophylactic applications.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6266 Principles of Stress and Tension Control for the Clinician

Principles of progressive relaxation for controlling tension, especially as manifested in psychiatric and psychosomatic disorders. Specific clinical applications include phobias, anxiety states, insomnia and depression, gastro-intestinal disorders, high blood pressure, headaches and bodily pains. Includes consideration of the prevention of stress-tension disorders.

Prerequisite: PSY 6264

Credit: 3 Units

PSY 6268 Psychological Practice in Gerontology

Examination of the psychology of gerontology including therapeutic techniques in dealing with elderly persons within the context of individual, group and family therapy. Also covers etiology of problems of the elderly, assessment, evaluation,

and treatment approaches for elderly persons. Legal and ethical issues and community resources are discussed.

Prerequisite: PSY 6114

Credit: 3 Units

PSY 6270 Evaluation and Assessment of Elderly Persons

Examination of issues regarding the assessment of elderly persons. Course is designed to provide training in the assessment instruments used to diagnose psychological, neurological, and other problems common in the elderly population.

Prerequisite: PSY 6268

Credit: 3 Units

PSY 6306 Epistemology and History of MFT Theory

Examination of the historical development, epistemological, theoretical, foundations, and current conceptual directions of the field of marriage and family therapy. Focuses on cybernetics, general systems theory, postmodernism, and social constructionism and their impact on the field. The work of Gregory Bateson and other philosophical pioneers is covered, along with a general history of the field.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 2 Units

PSY 6308 Interviewing Techniques

An introduction to communication processes which are fundamental to interviewing and psychotherapy of individuals, couples and families. Includes skills such as empathy, listening, question asking, probes, assessment of clients from an individual and systemic perspective, and treatment planning across the beginning, middle, and ending phases of therapy. Includes lectures, role-playing.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6310 Ethics, the Law, and MFT: Professional Issues

Reviews guidelines for APA, AAMFT and CAMFT

in the practice of psychology and marriage and family therapy, including issues of: child and elder abuse assessment and reporting, privileged communication, confidentiality, patient's rights and involuntary commitment and concerns specific to the MFT profession.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6312 Theories of Marital and Family Therapy

Examination of the major models/schools of family therapy theory: historical models such as intergenerational, multigenerational; structural-strategic; and cognitive-behavioral models. Also focuses on family systems theory and its unique theoretical assumptions.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6313 Family Therapy Techniques

Examination of the major techniques of family therapy, with lectures, observation and demonstrations. Includes a weekly lab of supervised videotaped training. Provides a systemic approach to the assessment, diagnosis and treatment of families.

Prerequisites: PSY 6308, 6312, 6312

Credit: 3 Units

PSY 6315 Marital and Divorce Therapy

Exploration of various theories of marital relationships (e. g. assessment and intervention of spouse and partner abuse. Instruction through lecture, discussions, role-playing, and videotapes.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6316 Sex Therapy in Marriage and Family Therapy

This course is designed to give the student a basic introduction and understanding of sex therapy assessment, theory and intervention. Basic sexual dysfunctions and difficulties are covered along with major behavioral and systemic treatment approaches.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6317 Parent-Child Therapy Techniques

A survey, from a variety of models, of the current research, theory, and techniques of parent training and parent-child therapy. The emphasis is on viewing and working with children from a family systems perspective. The course also exposes students to working with child abuse and family violence, developmental issues for children and families, and cultural influences in the realm of parenting.

Prerequisites: PSY 611, 6114

Credit: 3 Units

PSY 6319 Survey of Assessment Procedures

A survey of the major assessment techniques in clinical practice. Includes intellectual, personality, projective, and family assessment techniques. Emphasis on how to read and understand a psychological assessment report.

Prerequisite: PSY 6110

Credit: 3 Units

PSY 6320 MFT Assessment Procedures

A survey of the major assessment techniques in MFT clinical practice. Includes intellectual, personality, and couple and family assessment techniques. Emphasis is on administering and interpreting major assessment instruments used by family therapists for identification of mental health problems in individuals, couples, and families.

Prerequisite: PSY 6319

Credit: 3 Units

PSY 6321 Psychology of Health and Illness

Focuses on the exploration and expansion of knowledge of concepts in psychology of health and illness. Normality and dysfunction within persons and families facing chronic illness will be covered. The role of ethnicity, cultural diversity, class, race, poverty and sexual orientation will be examined as it relates to health, illness and the medical system.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6322 Loss, Grief and Bereavement

Focuses on loss, several variations as both conceptualized and as manifested in dynamic practice and/or larger community clinical settings. The course is primarily experimental, specifically, psychologist-in training studying key theories (Freud, Bowlby, Worden) and conceptualizing/or applying the theory to casework with clients who are currently experiencing loss in one of its many manifestations. The experimental element of the course will involve presentation of a case to the class that focuses on the loss history and the therapist's navigation with the client of the rough terrains of attachments, separation and grief. Special focus will be given to children's responses to loss and to consideration of multicultural issues round the grieving process.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6323 Health Education and Promotion

An examination of the knowledge, concepts, practices and current research in the major areas of health education and promotion. Specific trends, developmental issues and appropriate clinical applications will be discussed and demonstrated.

Prerequisite: PSY 5101, 5105, 5110, 5115

Credit: 3 Units

PSY 6324 Counseling With Medical Population

Provides an overview of counseling as it relates to health psychology, as well as discuss various issues related to counseling with individuals with a variety of health concerns. Clinical assessment approaches and interventions for specific illnesses will be explored.

Prerequisite: PSY 6321

Credit: 3 Units

PSY 6325 Behavioral Medicine Techniques

The goal of this class is to understand the theory and practical implementation of a variety of behavioral medicine techniques used to treat health related disorders. The course will also provide participants with an opportunity to obtain personal experience with the techniques that will help them to understand

some of the possible outcomes. Familiarity with alternative forms of medicine, including practices of other cultures will be explored.

Prerequisite: PSY 6321

Credit: 3 Units

PSY 6350 Marriage and Family Therapy Practicum

Observation and supervision of marital and family therapy in an approved clinic or public agency and a course involving case presentations, live and videotape supervision of therapy experiences. The practicum program requires 500 hours. Of direct client contact, 250 of which must be with couples or families; students receive 100 hours of individual and group supervision, at least 50 hours of which are based on direct observation, videotape or audiotape. Students must be enrolled in a practicum course until all requirements are complete. Course must be taken a minimum of 4 times for a minimum total of 12 Units *Prerequisite: PSY 6312, 6313*
Credit: 3 Units

PSY 6402 Organisational Behavior

Inquiry into individuals and groups within organisations; behaviors of organisations; goal setting, rewards, work, stress, leadership, power, influence, politics, organisational design and structure, decision making, creativity, communication, and organisational change; case studies; didactic and experiential approaches.
Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140
Credit: 3 Units

PSY 6404 Leadership Theory and Research

Survey of leadership theory and research; characteristics of leaders, theories of leadership origins, and psychological and social correlates.
Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140
Credit: 3 Units

PSY 6405 I/O Psychology: Basic Skills

This course has a dual focus, that being two of the

most basic requisite skill areas for the I/O Psychologist, job analysis and individual assessment. On the strength of these two informational bases rest many organisational programs and critical personnel decisions. Theoretical and conceptual grounding in, and practice in, job and task analysis using a variety of methods. Examination of measurement questions in an I/O setting, with exploration of reliability theory, commonly used test construction strategies, item analysis models, differential weighting procedures, and selection, use, and interpretation of appropriate methods for individual ability, aptitude, and vocational interest assessment.

Prerequisites: PSY 6006, PSY 6020, PSY 6408

Credit: 3 Units

PSY 6408 Industrial/Organisational Psychology

Examines the theoretical and conceptual roots of I/O Psychology, the significant persons and classics of I/O Psychology literature and the breadth of concerns. Includes an overview of methods, techniques, and instrumentation, ethical considerations, current issues, and future trends in research and practice.
Prerequisite: PSY 6401, 6402
Credit: 3 Units

PSY 6410 Ethics, the Law, and Industrial/Organisational Psychology

Case study approach to ethical and legal considerations, implications, and constraints on the practice of I/O Psychology, organisational development activities, and organisational consultation.
Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140, 6401, 6402
Credit: 3 Units

PSY 6412 Group Dynamics

Relevant psychological theories and research on group behavior. Attention to issues of leadership, authority, small groups, communication, interaction styles, change ameliorative factors. Includes extensive experiential exercises.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6414 Stress in the Human Experience

Review of individual, group, organisational and extra-organisational stressors. An integration of theories, research and practice from many disciplines into a framework that has relevance for those concerned with stress and work issues as well as with the implementation of stress management programs.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140

Credit: 3 Units

PSY 6415 Leadership and Decision- Making

Examination of decision-making as one of the most important recurrent human activities. Identifies steps in the decision-making process and how to acquire decision-making skills; it explores decision theory, and the leadership role in relation to prescriptive and normative decision-making.
Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140, 6402, 6404
Credit: 3 Units

PSY 6416 Personnel Selection

Introduction to selection models and their applications to business and industry. Performance criteria and predictive performance measures. Examination, critique, and validation of selection instruments. Development of an understanding of selection procedures and the use of selection instruments, including screening, interviewing, and decision making in selection.
Prerequisites: PSY 6002, 6014, 6408
Credit: 3 Units

PSY 6418 Team Building

Applied and theoretical aspects of improving performance of ongoing work groups and increasing interpersonal effectiveness. Attention to use of diagnostic questionnaires, team-development activities, and group-processing techniques. Highly

experiential.

Prerequisite: BA (Psychology) or PSY 1101, 1105, 1110, 3110, 3115, 3140, 6405, 6412

Credit: 3 Units

PSY 6420 Social Psychology of Negotiation and Bargaining

Examination of influence and negotiation concepts and central problems and processes in negotiation through actual practice and behavioral experimentation combined with training in effective diagnosis. Analysis of case studies of real-world problems to discover techniques applicable to problems involving interactive competitive decision components. Use of role-playing to handle strategic and tactical negotiation decisions.
Prerequisite: PSY 6212, 6418.
Credit: 3 Units

PSY 6424 Organisation Theory

Examination and comparison of alternative models of organisational systems. The movement from Weberian top-down rational models to those of loosely coupled systems. The effects in a multicultural and multiple stakeholder environments on organisational structure and function. Current research and future directions. *Prerequisite: PSY 6408*
Credit: 3 Units

PSY 6425 Organisational Development I

Overview of the field of organisational development, and the role of the internal or external consultant as a change agent. Exploration of the roots of OD, focusing on the contributions of various disciplines and key personalities. Individual readiness and preparation for the role of change agent. Presentation of taxonomy of OD interventions. Heavy emphasis on diagnosis and diagnostic techniques and instrumentation, with hands-on diagnostic activities, augmented by case studies and individual research. Central to the course is the OD Code of Ethics established by the Organisational Development Institute. *Prerequisite: PSY 6408*
Credit: 3 Units

PSY 6426 Organisational Development II

Continuation of study and practical experience in organisational development, with focus on techniques and methods used in post-diagnostic interventions. Examination of a variety of intervention models, and several established OD systems and their instrumentation. Case study of successful and unsuccessful OD interventions. Individual research and experiential exercises. Both the necessity for, and techniques of evaluation in OD are emphasized. Exploration of international practice, emerging issues, and the future directions of OD.

Prerequisite: PSY 6425

Credit: 3 Units

PSY 6430 Motivation and Productivity

Theory and research, including classical and contemporary literatures; design of incentive and reward systems; the role of central I/O Psychology concerns (e.g., selection, appraisal, job stress, job redesign), with respect to motivation; alternative perspectives on productivity; the relationship among productivity, performance, and job satisfaction; productivity improvement interventions; current crises and concerns in productivity, future outlook.

Prerequisite: PSY 6408

Credit: 3 Units

PSY 6440 Human Resource Development

Preparation for a key role of the psychologist in organisations; training and management development.

Focuses on the key elements in preparation, design, and delivery of training. Includes needs analysis and identification of training objectives, design considerations, and integration of training goals with learner needs.

Prerequisite: PSY 6408

Credit: 3 Units

PSY 6700 Workshop

Investigation of a particular topic, problem, or issue in psychology. Area selected for study varies each quarter.

Prerequisite: PSY 6002, Prerequisite: for the topic

selected.

Credit: 3 Units

PSY 6703 Neuropsychology and Biological Bases of Behavior

The purpose of this course is to review principles of neurotransmission, and investigate the role of pharmaceuticals in the treatment of mental disorders. Students will explore current research and psychopharmacological treatment of depression, anxiety, schizophrenia, insomnia, bi-polar disorder, attention-deficit disorder, and dementia.

Prerequisite: BA Psychology

Credit: 3 Units

PSY 6704: Clinical Psychopathology I: Assessment and Diagnoses

The purpose of this course is to examine the procedures of ethical assessment, diagnosis and treatment planning and includes ethical considerations for intellectual, personality, couple and family assessment techniques. Students will engage with topics such as: the processes of assessment, placement in the different levels of care, counseling sessions' treatment planning in varied modalities, community resources mobilization, multidisciplinary team case consultations and ethical documentation.

Prerequisite: BA Psychology

Credit: 3 Units

PSY 6707 History and Systems of Psychology

The purpose of this course is to explore the history and systems of psychology from its early origins in philosophy, religion, medicine, and physiology. Particular attention will be given to the contributions of psychoanalysis, structuralism, functionalism, behaviorism and gestalt psychotherapy and how these approaches have found expression in the current movements' psychology. Individual contributions of various psychologists and review of various historical eras will also be examined.

Prerequisites: BA Psychology

Credit: 3 Units

PSY 6710 Clinical: Psychopathology II: Case Conceptualization and Treatment

The purpose of this course is to provide an in-depth focus on the symptoms, diagnoses, and treatment planning, based on further developing case conceptualization skills. Identifying treatment modalities, treatment priorities, and treatment goals utilizing written treatment plans.

Prerequisite: BA Psychology, PSY 6704, PSY 6705

Credit: 3 Units

PSY 6003 Statistics for Behavioral Sciences.

The purpose of this course is to give a continuation in critical thinking in the synthesis of research studies, with a focus on empirical research in Psychology. Students will be exposed to topics to include: psychology research, nature of science, observational, experimental, and case study designs; formulating research questions; measurement strategies; scaling and coding; internal and external validity; naturalism in research; quasi-experiments; archival research; physical traces; data collection; interpreting results; program evaluation; professional writing; and ethics.

Prerequisite: BA Psychology, PSY 6002

Credit: 3 Units

PSY 6713 Process of Group Therapy

The purpose of this course is to provide a practical application of principles and applications of various effective process and content interventions in group psychotherapy. Learners will explore issues such as: group start up, stages in group formation, and cohesiveness; as well as common challenges and goals for the group therapist. The course will give the learners opportunities to engage in role play and intensive group participation will support the practical learning objectives to prepare for effective facilitation as a group therapist.

Prerequisite: BA Psychology, PSY 6220, PSY 6701, PSY 6704, PSY 6705

Credit: 3 Units

PSY 6716: Clinical Research Practicum and Course Project

This is a capstone course in completing a brief research

project on a topic within clinical psychology to provide practice in writing a research proposal and study based on use of archival data or a case study. The standard format of a five chapter document, reflecting the introduction, literature review, methodology, results and discussion sections, utilizing the APA style of writing with minimum of 3000 to 5000 words, or approximately 30 pages in length, will be required.

Prerequisite: PSY 6002, PSY 6711

Credit: 3 Units

PSY 6717 Psychological Trauma, Risk Assessment, Crisis Intervention, Partner and Family Violence

Students will examine the scientific evidence surrounding the impact of psychological trauma and violence upon the individual. The course provides insight into the processes of trauma; as well as an understanding of interventions in treatment. The impact of trauma due to violence for both perpetrators and victims in partner violence is also a focus of the course. Risk management and crisis intervention focuses on assessment of self-harm and suicide risk as well as risk of harm to others; including interventions in treatment.

Credit: 3 Units

PSY 6718 Clinical Psychotherapy Skills Lab

This course focuses on clinical psychotherapy skill development; including interviewing, diagnosis and treatment skills. Experiential training is the core methodology utilized, including video tape of simulated therapy sessions. Students will practice elements of initial psychotherapy sessions involved in establishing the therapeutic relationship. During role practice sessions, application of brief therapies including, cognitive behavioral therapy, as well as other effective interventions will be included.

Credit: 3 Units

PSY 6771 Clinical Practicum I

The purpose of this course is to support and instruct the student in gaining practical hands-on training and supervised experience in an approved therapy clinic/centre. The practicum program requires 200 off campus contact hours with individuals or groups

at an approved practicum site. Weekly group supervision and case presentations will be included in class.

Prerequisite: PSY 6220, PSY 6701, PSY 6703, PSY 6704, PSY 6705 PSY 6710 and completion of required 25 hours of personal therapy
Credit: 3 Units

PSY 6771A Clinical Practicum I

This is the first of a three-series class. These courses are only taught in sequence due to the material being covered and level of experience. Students are not allowed to skip any of the courses in the sequence and must take them in the order set. The purpose of this introductory course is to enable students gain knowledge in joining and rapport, consent and initiating sessions, and how to present cases by using the clinical language and procedures required. The students will learn how to write progress notes, maintain a client's chart all the while adhering to all AAMFT ethical and legal guidelines.

Credit: 3 Units

PSY 6772 Clinical Practicum II

The purpose of this course is to support and instruct the student in continuing to gain practical hands-on training and supervised experience in an approved therapy clinic/center. The practicum program requires 200 contact hours off campus with individuals or groups at an approved practicum site. Weekly group supervision and case presentations will be included in class.

Prerequisite: PSY 6771

Credit: 3 Units

PSY 6772A Clinical Practicum II

This is the second course in the practicum series of three. Students are not allowed to skip any of the courses in the sequence and must take them in the order set. The purpose of this course is to teach students how to focus on and work with different cultural aspects presented by clients and how to deal with them, as well as enable students actualize their selected theories and facilitate successful execution of their treatment plans.

In this course the students will have the opportunity of spending the summer semester abroad at the affiliate University of Houston Clear Lake (UHCL), thus allowing students to have their clinical training in a different culture, which also broadens their skillset and knowledge. The course instructor will accompany the students to UHCL or other identified university affiliate.

Prerequisite: PSY 6771A

Credit: 3 Units

PSY 6773 Clinical Practicum III

The purpose of this course is to support and instruct the student toward more advanced practical hands-on training and supervised experience in an approved therapy clinic/center.

The practicum program requires 200 contact hours off campus with individuals or groups at an approved practicum site. Weekly group supervision and case presentations will be included in class.

Prerequisite: PSY 6772

Credit: 3 Units

***Personal Therapy: 25 Hours of Personal Therapy are required prior to PSY 6771, Clinical Practicum I.**

PSY 6773A Clinical Practicum III

This is the third and final course in the practicum series. Students are not allowed to skip any of the courses in the sequence and must take them in the order set. The purpose of this course is to enable students gain knowledge on contextual issues, social issues including but not limited to social justice, gender, and power.

Prerequisite: PSY 6772A

Credit: 3 Units

PSY 6820 Research Practicum

Supervised experience conducting research in the area of Psychology and Family Studies. Provides opportunities for students to gain experience in designing research studies, data entry and analysis, and preparing research for a publication. Course may be repeated.

Prerequisite: PSY 6002, **Prerequisite: for the topic selected.**

Credit: 1-3 units

PSY 6990 Master's Thesis

The design implementation and analysis of a study or experiment in psychology under the supervision of a thesis committee.

Prerequisite: PSY 6002, **Prerequisite: for the topic selected.**

Credit: 3 Units

PSY 7701 Adult Psychopathology

The purpose of this course is to examine the major DSM- IV-TR disorders of adulthood, and to equip students with diagnostic, case conceptualization and psychological intervention skills for the different disorders affecting adulthood.

Prerequisites: PSY 6710

Credit: 3 Units

PSY 7703 Child and Adolescent Psychopathology

The purpose of this course is to provide an in-depth look at the major DSM- IV-TR disorders of infancy, childhood and adolescence, enabling students to practice diagnostic skills and case conceptualization through the use of case vignettes, as well as to apply models and techniques of psychological theories to cases, using both individual and group therapies. The course covers issues affecting vulnerable children, as well as pediatric populations, in addition to providing a focus on issues of attachment, physical, sexual, emotional abuse and neglect, as well as maladaptive and harmful behavior in children and adolescents. **Prerequisites:** PSY 6710

Credit: 3 Units

PSY 7708 Cognitive and Neuropsychological Assessments: Psychometric Lab II

The purpose of this course is to examine assessments of cognitive and neuropsychological strengths and weaknesses of children and adolescents, and cognitive deficits and cognitive functions that remained intact with young and older adults. It includes a competency-based laboratory component for administration, scoring, and

interpretation of intelligence and neuropsychological tests

Prerequisites: PSY 6710, PSY 7701, PSY 7706,

Credit: 4 Units

PSY 7709 Advanced Group Therapy

The purpose of this course is on group supervision and training students in developing skills to become effective group leaders, supervisors or facilitators. Students are trained in group supervision skills, to prepare them for practicum placement and career settings where they will utilize experiential training in observer roles with simulation group role play exercises in every class throughout the semester. The small class size allows for adequate time for increased practice in group therapy techniques and instructor feedback.

Prerequisites: PSY 6710, PSY 7701

Credit: 3 Units

PSY 7714 Trauma and Bereavement Interventions

The purpose of this course is to examine the specific application of assessment, intervention, and evaluation strategies to families and individuals confronting a major loss. Assessment and differential treatment selection within the context of various vulnerable populations will be explored. This course will focus on understanding the impact of anticipated and traumatic loss and grief on individuals, and the family system, and will look at the development of continuing bonds. Current theories of trauma and bereavement will be explored as they reflect more general social and psychological theories and social and political trends tasks of the grief process including anticipatory grief, symptoms of uncomplicated and complicated grief, the interface of trauma and grief, and associated risk will be explored.

Prerequisites: PSY 6710, PSY 7701

Credit: 3

PSY 7716 Community and Rural Psychology

The purpose of this course is to provide a critical look at the large and growing numbers of

underserved people in African society that are unable to access mental health services despite significant need, due to issues of extreme poverty, social exclusion, lack of psychological knowledge, ill health and discrimination. With the increasing focus on providing clinical psychology training in Kenya, and with the resultant increase in access to psychological therapies for those middle-income groups who can access private practice, the risk is that the gap between the different socio-economic groups will polarize even further. This course therefore raises attention to the important role of clinical psychologists within community and rural organisations/ charity sectors, providing both direct and indirect interventions with hard-to-reach groups within the community, through the provision of psychological therapies, as well as through providing training and supervision to other professionals working directly with those groups in order to increase psychological knowledge, prevention and sustainability.

Prerequisites: PSY 6709, PSY 6710

Credit: 3 Units

PSY 7717 Treatment Modalities

I: Brief, Behavioral and Other Therapies

This course focuses on treatment methods including a wide range of brief therapies. In addition the course provides a comprehensive review of behavioral modification, cognitive behavioral therapies, person centered therapy, and psycho-educational approaches utilized in treatment. Other pertinent treatment modalities may be included, as identified by the faculty. The course will include experiential training in role practice in developing treatment planning and role practice in application.

PSY 7718 Treatment Modalities II: Humanistic, Existential and Other Therapies

This course represents part II of treatment modalities. This course will focus on several treatment modalities including humanistic and existential treatment. In addition, Jungian, Psychodynamic, and other theoretical approaches will be included, as well as other pertinent treatment modalities

as identified by faculty. The course is designed to provide experiential training in role practice in developing treatment planning as well as role practice in appropriate application of the various types of treatment.

PSY 7719 Advanced Psychopathology I: Assessment and Diagnosis

This course is an experiential training in utilizing the DSM 5 diagnostic manual. Vignettes prepared by the students and instructor will provide basis for examining provisional diagnoses and differential diagnosis. The course will focus on a variety of diagnosis including depressive disorders, anxiety disorders, trauma related disorders, bipolar disorders, substance use disorders, psychotic disorders, and other areas of clinical focus. The student will gain competency skills in symptom identification and diagnosis of the major disorders commonly seen in clinical practice.

PSY 7720 Advanced Psychopathology II: Case Conceptualization and Treatment

This course is continuation from PSY 7720 Advanced Psychopathology I, with focus on developing conceptual framework and treatment planning. The course provides methodology for students to gain skills in writing case summaries, diagnosis and detailed treatment planning by utilizing experiential training. Students prepare and present simulated cases based on vignettes that are then discussed in class and critiqued for treatment of symptoms, treatment modality and treatment goals.

PSY 7721 Doctoral Practicum I

This is the first of three clinical practicum placements requiring 200 hours of training. During the practicum, hours are tracked and evaluations are completed by site supervisor and USIU-Africa faculty and monitored by the Clinical Training Coordinator. Weekly classes serve as group supervision, including case presentations and development of psychotherapeutic skills.

Prerequisites: PSY 6706, PSY 6709, PSY 6710, and verification of 25 hours of personal therapy

Credit: 3 Units

PSY 7722 Doctoral Practicum II

The purpose of this course is to increase skill acquisition and application in therapeutic practice. This is the second of three clinical practicum placements, requiring 200 hours of training. During the practicum, hours are tracked and evaluations are completed by site supervisor and USIU-Africa faculty and monitored by the Clinical Training Coordinator. Weekly classes serve as group supervision, including case presentations and development of psychotherapeutic skills.

Prerequisites: PSY 7721

Credit: 3 Units

PSY 7723 Doctoral Practicum III

This is the last of three clinical practicum placements, requiring 200 hours of training. During the practicum, hours are tracked and evaluations are completed by site supervisor and USIU-Africa faculty and monitored by the Clinical Training Coordinator. Weekly classes serve as group supervision, including case presentations and development of psychotherapeutic skills.

Prerequisite: PSY 7722

Credit: 3 Units

PSY 7724 Ethical Dilemmas in Clinical Psychology

This is an advanced experiential training course in applied ethical standards based on the American Psychological Association's standards in ethical practice. The use of simulated cases involving vignettes will provide a basis for experiential learning to result in student competency in prevention and resolution of difficult ethical conflicts.

PSY 7725 Neuropsychopathology

This course will cover a range of neuropsychopathological conditions which the clinical psychologists is likely to encounter will be covered in terms of pathology, neuropsychological presentation, course of disease, assessment and treatment. These will include head injury,

dementia, alcohol-related brain damage, epilepsy, cerebrovascular disease, anoxia; cerebral tumor; hydrocephalus; multiple sclerosis; AIDS infectious diseases and psychopathology. It will also cover clinical psychopathology disorders including: schizophrenia, depression, anxiety, PTSD, etc.

PSY 7726 Quantitative Research Methods and Statistics

The purpose of this course is to examine Quantitative Research methods used in psychological research. Quantitative methods emphasizes objective measurements and numerical analysis of data collected through polls, questionnaires or surveys. This course will focus on research design, data gathering methods, methods of data analysis and write up.

PSY 7727 Qualitative Research Methods and Analysis

This course focuses on qualitative research designs in the behavioral and the social sciences. It is intended to provide an overview of particular techniques in research design, data collection and data analysis most commonly associated with qualitative research. Part I starts with an introduction to qualitative methods. It begins with an overview of key perspectives on research, different types of studies, and the main differences between qualitative and quantitative traditions. In addition, understand how to think, write, critique, and argue about social science research is an important part of this section. Part II focuses on research design and data collection, including methods in semi-structured interviews, open interviews, observations, and focus groups.

PSY 7729 Psychopharmacology in Clinical Psychology

This course explores the neurological affects in ones anatomy, physiology and biology that would lend themselves to requiring actions of psychopharmacological agents that are currently in use. The indications for requiring prescriptions, the side effects, and the clinical considerations are

well explored in the course. The DSM-5 diagnostic manual will be used as the central organizing structure of the course.

PSY 7730 Personality and Behavioral in Clinical Psychology

This course includes experiential training in psychometric testing. Students will learn the testing procedures and ethical considerations when conducting projective, behavioral and personality testing, including writing of psychological evaluations reports.

PSY 7731 Dissertation I

This course prepares students to understand the content requirements of the dissertation proposal, utilizing the USIU-Africa Psy.D. Dissertation Handbook. The course informs on planning and writing of Chapter I- Introduction, Chapter 2- Literature Review and Chapter 3- Methodology, as well as requirements for the oral defense of the proposal. This course will emphasize ethical guidelines of APA in conducting research and APA writing style.

Prerequisites: All prior course work, successful passing of comprehensive examinations and confirmation letter of advancement to candidacy.
Credit: 3 Units

PSY 7732 Dissertation II

This is the second course in a required sequence of three dissertation courses, following PSY 7731 (Dissertation I). The course will provide standard content requirements in finalization of Chapters 1, 2, and 3 in the dissertation proposal, including requirements for the Institutional Review board and the Oral defense of the proposal. Data collection and related ethical standards are informed. Content requirements regarding data analysis and reporting of results for Chapter 4, as well as content

requirements for Chapter 5 will be also be covered.

Prerequisites: PSY 7731

Credit: 3 Units

PSY 7733 Dissertation III

This is the third course in a sequence of three dissertation courses, and follows PSY 7732, Dissertation II. The course follows up the standard content requirements in Chapter 4 and 5 and includes requirements for final oral defense. Publication process and procedures are reviewed. Students who do not complete the dissertation oral defense and library submission by the conclusion of this course will register for PSY 7735 Dissertation in Progress.

Prerequisites: PSY 7731, PSY 7732.

Credit: 3 Units

PSY 7734 Cultural Diversity in Clinical Psychology

Various patient and client populations may differ in presentation of symptoms, which can often be associated with cultural influences. This course explores cultural differences among various nationality and ethnic groups emphasizing the importance of competency in treating persons from cultures which differ from the psychologist's background.

PSY 7735 Doctoral Dissertation in Progress

Various patient and client population may differ in presentation and symptoms, which can often be associated with cultural influences. This course explores cultural differences among various nationality and ethnic groups emphasizing the importance of competence in treating persons from cultures which differ from the psychologist's background.

Prerequisites: PSY7733

Credit: 1 Unit

PSY 7736 Memory and Cognition

The purpose of this course is to examine the main components of human cognition, and how each affects human behaviour and interactions. Specifically, the focus will be on perception, attention, memory, and language processes. Final units will explore higher-level cognitive functions such as decision making, creativity, and cross-cultural influences on the cognitive system.

PSY 7737 Psychotherapy Lab

This is an experiential course with emphasis on role practice in psychotherapy. Students will practice clinical interview sessions to further develop skills in application of therapeutic interventions. The course may include video recordings to further enrich the student training and feedback. This is a Credit / No Credit course.

PSY 7741 Doctoral Internship I: Group Supervision

This course is the first of three internship courses including 500 hours of clinical field placement. Assessment of students during internship is completed by the individual internship site supervisors with mid and final student evaluations. A monthly assessment session is planned to culminate in an evaluation of student progress report each semester during the year of internship training. Successful completion of the internship hours and evaluations will be required to meet graduation requirements for the Doctoral degree. Students are also required to complete a weekly group supervision and debriefing course.

Prerequisites: Approval from the Clinical Training Coordinator

Credit: 3 Units

PSY 7742 Doctoral Internship II: Group Supervision

This course is the second of three internship courses including 500 hours of clinical field placement. Student increase skill acquisition in clinical practice and fine tune themselves as the instrument of therapy.

Prerequisites: PSY 7741, and approval from the Clinical Training Coordinator

Credit: 3 Units

PSY 7743 Doctoral Internship III: Group Supervision

This course is the third of a three part series requiring the last 500 hour clinical field placement. This course is the capstone experience of the professional psychology program. Assessment of students during internship is completed by the individual internship site supervisors with mid and final student evaluations. Students are also required to complete a weekly group supervision and debriefing course.

Prerequisites: PSY 7742 and approval from the Clinical Training Coordinator

Credit: 3 Units

PSY 7751 Program Evaluation

The course provides the tools to design and conduct practical program evaluation and develops skills in evaluation, needs assessment, information and data collection, management & analysis and report writing. It focuses on theoretical and strategic issues in designing and implementing formative or summative evaluations of clinical intervention programs including assessment of fidelity to a model and assessment of impact, with special attention to the effects of the socio-cultural context in which the intervention takes place.

Prerequisite: Approval of Psychology Department
Credit: 3 Units

PSY 7752 Advanced Clinical Practice in Gerontology

This course is an in-depth coverage of the conceptual and practical application of clinical psychology to working with older people. Specialist focus on the assessment, diagnosis and case conceptualization of mental health issues for older people and an overview of creative and adaptive psychotherapeutic approaches to working with older people (including both those with and without dementia).

Prerequisites: Approval of Psychology Department
Credit: 3 Units

PSY 7753 Parent-Child Therapy

This course examines various skills in dealing with the parent- child relationship. The learner will be taught various skills in assessment, diagnosis and intervention strategies for dealing with parents and various children age groups. The course also examines the impact of the marital relationship including triangulation, and ways of dealing with life stressors are explored.

Prerequisites: Approval of Psychology Department
Credit: 3 Units

PSY 7754 Adolescent Therapy

This course combines academic and clinical training experiences designed to prepare students for work with adolescent populations. Core knowledge in diagnosis, treatment and assessment of adolescents is solidified with a goal to train outstanding practitioner-scholars who can deliver and develop cutting-edge empirically- driven and validated multiculturally- based treatment for this unique population.

Prerequisites: Approval of Psychology Department
Credit: 3 Units

PSY 7755 Advanced Clinical Practice in Pediatrics

The purpose of this course is to address cognitive-behavioral, psychodynamic, systems, or narrative orientations with regard to specific issues of pediatric clinical practice. Students will be expected to be able to conceptualize their cases using a developmental framework, assessing both the child's and the family's level of development; assess the child and family on a number of dimensions, including emotional, cognitive, physical, and relational dimensions; apply a systems and ecosystemic perspective to a case, develop interventions that work at the individual, family, school, and community levels.

Prerequisites: Approval of Psychology Department
Credit: 3 Units

PSY 7756 Child Play Therapy

This course will cover elements of play therapy, including theoretical models to help children prevent or resolve psychosocial challenges and achieve optimal growth and development. The course is grounded in knowledge about trauma and will consist of play therapy models of intervention as well as guidelines for assessment and treatment. Expressive therapies such as art, play, and other nonverbal and symbolic techniques will be explored.

Prerequisites: PSY 6709, PSY 7703, PSY 7715
Credit: 3 Units

PSY 7757 Forensic Psychology

The purpose of this elective course is to provide the foundation necessary for students interested in pursuing more focused postdoctoral training in the professional practice of forensics as applied in Clinical Psychology. Clinical forensic psychology provides opportunities for diverse practice,

including employment through the adult or juvenile correctional system, consultancy to criminal or civil courts in the role of forensic examiner, expert witnessing, trial behaviour or litigation consultant or work with law enforcement agencies.

Prerequisite:
Credit: 3 Units

PSY 7760 Special Topics in Psychology

This course code and title are utilized for various elective course topics when the topic is not otherwise designated in the USIU-AFRICA catalog.

SOC: Sociology

SOC 2201 Introduction to Sociology

Dynamics of group life, social process, and social organisation; social institutions and systems (family, education, economics, politics, religion, health); fundamental theoretical concepts underlying sociology, their use in organizing and elucidating data on social phenomena, and relationship to contemporary social issues and problems.

Credit: 3 Units

SOC 2202 U.S. Diversity: Ethnicity, Class and Gender

Sociocultural heterogeneity of American life; summary of history of racial, ethnic, and gender relations; theories of inter-racial and inter-ethnic group relations; American culture and society as a case study illuminating ethnic diversity, social stratification, social class, and majority/minority relations.

Credit: 3 Units

SOC 2203 Social Stratification, Ethnicity and Gender in Africa

The course introduces the student to the concepts of social stratification, ethnicity and gender in African societies. It will cover roles, power, wealth, social class, nationality, tribe and religion. Status, gender roles, equal opportunity and socialization will also be covered.

Credit: 3 Units

SOC 2205 The Family in the U.S.

Historical roots and development of American kinship. Focuses on the structure, function, and changing dynamics of family life in the U.S. (WI)

Credit: 3 Units

SOC 2210 Sociology of Interpersonal Interactions

History of the study of human behavior: 1600 – present; examines individualistic and social models of human behavior, the psychological importance

of the human group, and perspectives and methodology used in micro-sociological analysis.

Credit: 3 Units

SOC 3301 Social Problems

Problems of deviance, social inequality, violence, crime, and delinquency in the U.S. and other countries; sociological causes and consequences; sociological definition and analysis of problems; special emphasis on exploring possible amelioration of the world's contemporary social problems.

Credit: 3 Units

SOC 3305 Deviant Behavior

Ways people violate norms and laws in their societies; social norms and value structures; theories of deviance and their relation to various social conditions: social inequality, sexual variation, substance abuse and chemical dependency, physical and mental illness, and disruptive or criminal activity.

Credit: 3 Units

SOC 3310 Family and Kinship in a Multicultural Context

Systems and practices of courtship, mate selection, marriage, parenting, and family life within a culturally diverse setting such as U.S. and other industrialized parts of the world; ethnic diversity and social inequality and kinship functions; bi-cultural marriages.

Credit: 3 Units

SOC 3315 Sociology of Intercultural Relations

Comparison of sociocultural institutions in various societies; focuses on dominant theoretical orientations: technological, economic, ideological, psychological, social structural, and environmental; processes of socialization and acculturation.

Credit: 3 Units

SOC 3500 Social Conflict and Resolution

Conflict at intrapsychic, interpersonal, social, organisational, national and international levels, focusing on the destructive as well as the constructive functions of individual and social conflict.

Credit: 3 Units

SOC 4010 Social Inequality in the U.S.

Social stratification, social status and resulting social inequalities; age, gender, health, race, and ethnicity as factors; possibilities for continued cultural pluralism or assimilation and amalgamation.

Credit: 3 Units

SOC 4015 The City in the U.S.: Problems and Solutions

Socio-historical analysis of urban America; field studies; urbanism as a way of life; inquiry into social problems and possible solutions.

Credit: 3 Units

SOC 4021 Collective Behavior in Diverse Contexts

The nature of collective behavior, specifically crowds, masses and mass communication, and social movements; focuses on methodologies in the study of collective behavior, both quantitative and field approaches.

Credit: 3 Units

SOC 4025 Perspectives on the Future of Human Society

Theories of social change and evolutionary, functional, and ecological orientations; the structure and dynamics of human society during the 21st century. (WI)

Prerequisite: ENG 1106

Credit: 3 Units

SPE: Speech

SPE 1101 Speech

Study of formal and informal oral communication: platform speaking, one-on-one communication, and group exchanges.

Credit: 3 Units

SPN: Spanish

SPN 1000 Beginning Spanish I

This first beginning course in a sequential series introduces students to the fundamental skills of oral, aural and written Spanish for everyday usage. Spanish culture and civilization will be introduced.

Prerequisite: The course is open to students who have no knowledge of Spanish

Credit: 3 Units

SPN 1001 Beginning Spanish II

This second beginning course builds on Spanish 1000. It ensures that students have a firm basis in basic Spanish by developing written and reading skills, with particular emphasis on listening and oral skills. Students will be taught more on Spanish culture and civilization.

Prerequisite: Spanish 1000

Credit: 3 Units

SPN 2000 Intermediate Spanish I

The course develops oral expression, listening comprehension, reading and writing skills. Students learn the finer points of grammar and are exposed to the active and passive voices, direct and indirect speech, the subjunctive and conditional moods and more specific Spanish culture. The course conducted in Spanish. It is intended for students who wish to either complement their language studies or begin the minor. It is the required lower level elective for the minor.

Prerequisite: Spanish 1001

Credit: 3 Units

SPN 2001 Intermediate Spanish II

The course completes Spanish 2000. It continues to develop oral expression, listening comprehension, reading and writing skills. It is conducted in Spanish.

Prerequisite: SPN 2000

Credit: 3 Units

SPN 2002 Business Spanish

The course places emphasis on spoken Spanish in the context of skills needed in the business world. This course is recommended for students pursuing degrees in international relations and business administration. It is a conversational course.

Prerequisite: Spanish 1001

Credit: 3 Units

SPN 2003 Tourist Spanish

The course places emphasis on spoken Spanish in the context of skills needed in the tourist world. The course is recommended not only for students pursuing degrees in journalism, hotel and restaurant management and tourism but also for students who wish to participate in the Windows to the World Program. It is a conversational course.

Prerequisite: The course is open to students who have satisfactorily completed Spanish 1001

Credit: 3 Units

SPN 2004 Conversational Spanish

The course complements SPN 2002 and SPN 2003 continuing to place emphasis on spoken Spanish in the contexts of today's modern world. It presents more dialogues and role playing and is focused towards the student's career goals

Prerequisite: Spanish 1001

Credit: 3 Units

SPN 3000 Advanced Grammar and Composition

The course advances and consolidates the grammar learnt thus far and enhances writing skills. The history and geography of Spain serves as a framework for writing. The course serves as a prelude for SPN 3001. It is a required upper level elective for the minor. It is conducted in both Spanish and English.

Prerequisite: Spanish 2000

Credit: 3 Units

SPN 3001 Spanish Culture and Civilization

This course is a survey of the geography, history, dance, architecture, art, fine arts, science, culture and customs of Spain. It explores as well historical, social, political, economic and cultural trends in the country. The course is conducted in Spanish. It may be taken as part of the Windows to the World Program. The course is conducted in Spanish

Prerequisite: Spanish 3000.

Credit: 3 Units

SPN 3002 Contemporary Spanish History

This course is a study of Spain from The Spanish-American War of 1898 to the present day Bourbon King, Juan Carlos. The Second Republic, The Spanish Civil War, the roles of Primo de Rivera and Francisco Franco, the birth of democracy, Spain's entry into NATO and EEC will be the highlights. The course is conducted in Spanish

Prerequisite: Spanish 3001

Credit: 3 Units

SPN 3003 Spanish Literature II

The course focuses on the analysis and interpretation of representative works of Spanish literature within their cultural context. Emphasis is placed on a literary study of the Middle Ages in Spain. Students are expected to read, write, analyze and discuss extensively. The course is conducted in Spanish.

Prerequisite: Spanish 3001.

Credit: 3 Units

SPN 3004 Spanish Literature II

The course comprises the analysis and interpretation of representative works of Spanish Literature within their cultural context. This course focuses on the literary study of the Golden Age in Spain. Students are expected to read, write, analyze and discuss extensively. The course is conducted in Spanish.

Prerequisite: Spanish 3001.

Credit: 3 Units

SPN 3005 Spanish Literature III

The course comprises the analysis and interpretation of representative works of Spanish Literature within their cultural context. This course focuses on the literary study of the modern and contemporary works in Spain. Students are expected to read, write, analyze and discuss extensively. The course is conducted in Spanish.

Prerequisite: Spanish 3001.

Credit: 3 Units

SPN 4000 Latin American Culture and Civilization

This course is a survey of the geography, history, dance architecture, art, fine arts, science, culture and customs of Latin America. It explores as well historical, social, political, economic and cultural trends in Latin America. The course is conducted in Spanish.

Prerequisite: Spanish 3001

Credit: 3 Units

SPN 4001 Contemporary Latin American History

This course is a study of Latin America from The Spanish-American War to the present day. The Mexican Revolution, the rise of Batista in Cuba, the Argentina of Perón, the Foundation of the OEA, Fidel Castro, The Alliance for Progress of John F. Kennedy, the Chile of Salvador Allende and Augusto Pinochet, the Falkland War with U.K., the drug wars in Colombia will be among the issues discussed. The course is conducted in Spanish.

Prerequisite: Spanish 4000.

Credit: 3 Units

SPN 4002 Latin American Literature I

This course comprises the analysis and interpretation of representative works of Latin America within their cultural context. Emphasis is placed on representative works of colonial literature and romanticism including Cristóbal Colón, Bartolomé de las Casas, Garcilaso de la Vega "El Inca", José María Heredia, Ricardo Palma, Jorge Isaacs amongst others. The course is conducted in Spanish.

Prerequisite: Spanish 4000.

Credit: 3 Units

SPN 4003 Latin American Literature II

This course comprises the analysis and interpretation of representative works of Latin America within their cultural context. Emphasis is placed on representative works of José Martí, Ruben Darío, Horacio Quiroga, Gabriela Mistral, Jorge Luis Borges, Pablo Neruda, Gabriel García Márquez amongst others. The course is conducted

SWA: Swahili

in Spanish.

Prerequisite: Spanish 4000.

Credit: 3 Units

SPN 4004 Spanish and Latin America Film

The course examines different aspects of Spanish and South American history and culture through films. Students are expected to discuss and present extensively.

Prerequisite: Spanish 3001 or 4000.

Credit: 3 Units

SWA 1000 Beginning Swahili I

An introduction to the origins, history, and spread of Swahili; basic greetings, pronunciation, stress; introduction to noun class system, verb structure, tenses, personal and possessive pronouns, adjectives, adverbs, numerals, sentence structure.

Credit: 3 Units

SWA 1001 Beginning Swahili II

Broaden vocabulary base; focus on the use of present, past, future verb tenses; introduction of -me- tense and the passive; introduction of possessives and negative verb formation, telling time, dates, days of the week, months, years; introduction to Swahili proverbs and food culture.

Prerequisite: SWA 1000

Credit: 3 Units

SWA 1002 Intensive Swahili

Course basically covering the contents of SWA 1000, but based on intensive learning (no less than 5 hours per week) in order to enhance practical use of the language. The course is recommended for exchange students coming to USIU-Africa for 1 semester.

Credit: 3 Units

SWA 2000 Intermediate Swahili I

Broaden vocabulary base; introduction of -a- tense, focus on irregular verb formations, further introduction of verbal extensions (reflexive, prepositional); locational suffixes and prepositions; object infixes; time relative -po-; specialized vocabulary (geography, nature, traditional cultures). It is required lower level elective for minor.

Prerequisite: SWA 1001

Credit: 3 Units

SWA 2001 Intermediate Swahili II

Broaden vocabulary base; further introduction of verbal extensions (stative, causative, subjunctive); conditional tenses (-nge-, -ngali-, -ki-, -sha-, -ja); introduction of relative pronouns and infixes; specialized vocabulary (social situations, lifestyles, professions, trades)

Prerequisite: SWA 2000

Credit: 3 Units

SWA 2002 Business Swahili

The course is an introduction of basic business terminology on different topics (local and foreign trade, trade of specific goods and agricultural products typical to east African countries) and its practical use in various situations.

Prerequisite: SWA 2000

Credit: 3 Units

SWA 2003 Tourist Swahili

This is a conversational course, modeling the most typical situations in travel (ticket/hotel reservation, entering the country, safari organisation, meals, market place, etc). It is recommended for students interested in participating in the Windows to the World Program.

Prerequisite: SWA 1001

Credit: 3 Units

SWA 3000 Advanced Grammar And Composition

Advanced grammar studies: introduction of ku- class, emphatics, impersonal verbal forms, compound tenses, modal verbs; specialized vocabulary (modern professions, modern culture, economy). It is required upper level elective for minor.

Prerequisite: SWA 2001

Credit: 3 Units

SWA 3001 Culture and Civilization of Swahili-speaking countries

The course involves the use of Swahili as the main language of instruction and communication. It covers such topics as: millennium of the Swahili civilization (9th – 19th centuries); colonial history of Eastern Africa; post-colonial history of Eastern Africa; classical and modern Swahili literature; Swahili music and performing arts. It may be taken as part of the Windows to the World Program.

Prerequisite: SWA 3000

Credit: 3 Units

SWA 4000 Classical and Modern Swahili Literature

Course for advanced learners, covering such aspects as the history and periodization of classical and modern literature in Swahili, survey of poetic genres

(tendi, mashairi, modern free verse poetry), classical and modern prose and modern drama. The course highlights the works of major classical and modern writers from Swahili-speaking areas of East Africa.

Prerequisite: SWA 3000

Credit: 3 Units

SWA 4001 Political Terminology

Course for advanced learners, covering such topics as UN political terminology - e.g. ozone layer depletion, ecology and natural resources, refugees and conflict resolution, international relations, governmental issues, etc.

Prerequisite: SWA 3000

Credit: 3 Units

School of Humanities and Social Sciences Faculty Profiles

Ahmed, Fatma

Associate Professor of International Relations

B.A. (International Relations), United States International University; M.A. (Peace, Conflict and Development Studies), PhD (Peace, Conflict and Development Studies), Universitat Jaume I, Castellón, Spain.

Specialty areas: Security Studies and Strategies, African International Relations, Regional Conflicts in Africa, Foreign Policy, Foundations of International Relations, World Crises and Transformational Politics, Gender and International Relations.

Aleksi, Ylonen

Professor of International Relations

B.A. (History), College of Charleston; M.A. (Peace, Conflict and Development Studies), Jaume I University; Ph.D. (International Relations and African Studies), Autonomous University of Madrid.

Specialty areas: International Politics; The State; Separatism & Interventionism; Armed Conflict and Peacebuilding; International and Regional Organisations; Greater Horn of Africa.

Arasa, Josephine

Associate Professor of Psychology

B.Ed (Science), M.Ed. (Educational Psychology), Ph.D (Educational Psychology), Kenyatta University. Advanced Post Graduate Diploma in Clinical Neuropsychology (NILLO MAKI Institute, Finland); Specialty area: Botany & Zoology; Educational Psychology

Awuor, Quin E.

Assistant Professor of Linguistics

B.Ed. Arts (English/Literature), University of Nairobi; M.A. (Applied Linguistics) Victoria University of Wellington, New- Zealand; Ph.D (Applied Linguistics) Kenyatta University; Specialty areas: Communication, Languages, Applied Linguistics;

Berh, Agnes Wanjiku

Assistant Professor, Diplomacy & Foreign Policy in International Relations

B.A. (Commerce), M.A. (International Studies), PhD International Relations; Specialty areas: Identity, Security, democratization and governance, development, Refugees studies, state borders and (in)securities, race and social problems, Terrorism, Counterterrorism, Violent Extremism, and Africa & the Great powers politics

Chang'orok Susan

Assistant Professor of Psychology

B.A. Psychology, M.A. Counseling Psychology, PhD Clinical Psychology; Specialty area: Human sexuality, Tests and assessments, psychology of personality, diagnosis, interpretation.

Gromov, Mikhail D.

Assistant Professor of Literature

M.A. (Philology), Ph.D. (Philology), Moscow Lomonosov State University. Specialty areas: Philosophy

Iraki, Frederick Kang'ethe

Professor of French

B.A. (Teaching of French as A Foreign Language), M.A. (French), University of Toulouse-le-Mirail; M.Phil (Linguistics), Ph.D. (Linguistics), University of Geneva. Specialty areas: French as a foreign language; cognitive linguistics; tense and aspect in Kiswahili;

Jaleha, Jefwa Judith Jai

Assistant Professor, Languages & Linguistics

B.Ed (English & Literature), M.A. (Literature), PhD Literature; Specialty area: Literature

Kaburu, Mercy

Assistant Professor of International Relations

B.Ed (Arts), Kenyatta University; M.A. (International Conflict Management), University of Nairobi; Ph.D (International Relations), United States International University-Africa.

Specialty areas: Theories of international relations, foreign policy analysis, peace & security, gender & development.

Karega-Munene, PhD.

Professor of History

Karume, Michelle W.

Assistant Professor of Psychology

B.A. (Psychology), M.A. (Marriage & Family Therapy), University of Houston; Ph.D (Marital & Family Therapy), Loma Linda University. Specialty areas: Marriage and Family Therapy, Medical Family Therapy and Program Development.

Khayundi, Francis

Assistant Professor, International Law

LLB, University of Fort Hare, LLM, Ph.D. (Law), Rhodes University.

Specialty Areas: International Law; International Human Rights Law; Global Governance; Electoral Governance, Climate Change Law and Policy

Kihara, Michael

Associate Professor of Psychology (Research)

B.Ed. (Mathematics), MEd. (Education/ Developmental Psychology), Kenyatta University; PhD (Cognitive Neuroscience/ Cognitive Psychology), Open University, UK.

Specialty areas: Developmental Psychology, cognitive neuroscience, psychometrics, statistics.

Kimathi, Caroline Kagwiria

Assistant Professor, Languages & Linguistics

B.Ed (English & Literature), M.A (Linguistics), PhD. Applied Linguistics

Specialty areas: Linguistics

Kioko, Angelina Nduku

Professor of English & Linguistics

B.Ed. (Linguistics), M.A., (Linguistics), University of Nairobi; Ph.D (Linguistics), Monash University, Australia.

Specialty areas: Theoretical linguistics, Bantu linguistics, language variation, English language teaching;

Magut, Zuhra

Lecturer, English

B.Ed (English), University of Eastern Africa, Baraton; M.Phil (Education Communication & Technology), Moi University.

Specialty areas: Essay writing, effective writing, communication skills.

Maiyo, Joshua K.

Assistant Professor, International Relations

B.Ed., Kenyatta University; M.Sc. (Political Science and International Relations), University of Amsterdam; M.Phil (African Studies), Leiden University; Ph.D (Social Sciences), University of Amsterdam;

Specialty Areas; Environment and Development; Development and Globalization; International Political Economy; Comparative Politics; Politics of Development; International Organisations; Non-Governmental Organisations and Development; Advanced Environmental Geography; Core Issues in International Development Studies; and Research Methods.

Mahmoud, Hussein Abdullahi

Dean, School of Humanities and Social Sciences and Associate Professor, International Relations

B.A. Geography & Economics (Egerton University,

Kenya), M.A. Geography (Egerton University, Kenya), PhD Anthropology (University of Kentucky, USA)
Specialty areas: Development Anthropology, Economic anthropology, political economy, geographies of citizenship, territoriality and conflict, pastoralism, Horn of Africa.

Mbugua, Peter

Lecturer, English

B.Ed (English Language & Literature), M.A. (Linguistics), University of Nairobi; M.A. (Media Studies), Daystar University. Specialty areas: English language & linguistics, communication skills and media studies.

Mbugua, Wanjiku

Lecturer, Chinese

B.A. (Language & Communication), University of Nairobi; M.A. (Linguistics & Applied Linguistics – Chinese), Tianjin Normal University.

Mkutu, Kennedy Agade

Professor, International Relations

Dip (Research Methods), B.A (Social Studies) M.A. (Public Administration), PhD (Peace Studies)
Specialty area: Peace and Conflict.

Mohamed, Hussein Abdi

Lecturer and Community Service Administrator

B.A. (Literature), Somali National University; MBA (Business Administration), MOD (Organisational Development), United States International University.

Muasya, Jane Nzisa

Assistant Professor of Spanish

B.A. (Linguistics), University of Nairobi; Ph.D (Linguistics), University of Valladolid, Spain. Specialty areas: Linguistics, Spanish as a foreign language, English and Kiswahili languages, and contrastive study of some speech acts in Spanish

and Kiswahili.

Muchemi, Joyce Karungari

Assistant Professor of Criminal Justice Studies

B.Ed. (Arts); M.A. (Project Planning and Management), University of Nairobi; M.Sc. (Security, Conflict and International Development), University of Leicester, UK; PhD (Peace Studies and Conflict Management), Masinde Muliro University of Science and Technology;
Specialty Areas: Advanced Seminar in Peace and Conflict Studies; Global Politics, Diplomacy and Foreign Policy; Human Rights and Democracy; Peace Paths in Modern Times; Advanced Research Methods;

Mulinge, Munyae M.

Professor of Sociology and Criminal Justice

B.A. (Sociology), M.A. (Urban and Regional Planning), University of Nairobi; Ph.D. (Sociology), University of Iowa, USA.
Specialty area: Sociology, Urban and Regional Planning.

Munene, Macharia

Professor of History

B.A (Political Science), M.A (International Affairs), Ph.D. (History),
Specialty areas: Diplomatic History, Africa in world History & Politics Conflict analysis, Kenyan History, politics & foreign relations.

Munyae, Margaret M.

Assistant Professor of Sociology and Criminal Justice

Associate Dean, General Education
B. A. (Sociology & French), M. A. (Sociology), University of Nairobi.; Ph.D (Sociology), Iowa State University, Ames, Iowa, USA.

Specialty areas: Sociology, French;

Munyi, Elijah Nyaga

Assistant Professor of International Relations

B.Ed. (Education), Kenyatta University; M.A. (International Relations), Yonsei University, South Korea; PhD (International Economic Relations), Aalborg University, Denmark; Specialty areas: African economic relations, Political economy of development, Regional integration and trade negotiations, WTO and international trade law, Negotiation theory and practice;

Munywoki, M. Vincent

Assistant Professor, Psychology

M.A. (Counseling Psychology) PhD (Counseling Psychology)
Specialty area: Counseling Psychology

Mutwiri, Marion

Lecturer (Marriage and Family Therapy)

B.A. Theology, M.A. (Counseling Psychology), PhD (Marriage and Family Therapy)
Specialty area: Children & Adolescents and Couple & Family Therapies, Clinical Supervisor

Mwangi, Peterson Kimiru

Assistant Professor of Psychology

B. Ed. (Arts, Honors); M. Ed. (Guidance and Counseling); Ph.D (Counselling Psychology), Kenyatta University;
Specialty areas: Counseling Psychology; Educational Psychology;

Nakamura, Katsuji

Lecturer, Japanese

B.A. (Japanese), Soka University; M.A. (Literature), University of Nairobi.
Specialty areas: Teaching methods and classroom

activities for Japanese; literature; Education in Kenya.

Ndanu, Josephine

Assistant Professor of Psychology

B.Ed. (Arts), M.A. (Philosophy and Religious Studies), M.A. (Counseling Psychology), Kenyatta University; Ph.D. (Clinical Psychology), Daystar University; Specialty areas: Human conflict; Psycho- trauma; Mental Health;

Newa, Elsie

Lecturer, Psychology

B. A. (Economics and Sociology), University of Nairobi; MBA (Business Administration), M.A. (Counseling Psychology), United States International University-Africa, PhD (Counseling Psychology), Kenyatta University

Ngarachu Fiona

Assistant Professor, International Relations

B.A. (International Relations), MA (Political Research), PhD. (Political Science)
Specialty areas: Political Science, Kenyan Politics, Youth, participatory research, African political thought.

Njoroge, Joseph

Lecturer, Psychology

B.A. (Counseling), Kenyatta University; MA (Counseling) Keele University (UK). Specialty areas: Trauma and Addiction Counseling.

Njoroge, Margaret

Assistant Professor of Psychology

B.A. (Counseling Psychology), University of Nairobi; M.A. (Counseling Psychology), Daystar University; Ph.D (Counseling Psychology), Egerton University; Specialty area: Trauma for Children

Njoroge, Simon Githaiga**Lecturer, International Relations**

B.A. (International Relations), M.A. (International Relations) United States International University-Africa;
Specialty Areas; Peace, Conflict/Security Studies

Nyagwencha, Stella**Assistant Professor, Psychology**

B.Ed. (Arts) Kenyatta University; M.A. (Counseling Psychology), PhD (Clinical Psychology), Daystar University;
Specialty Areas: Psychological Assessment, Counseling, Research

Nyarigoti, Naom**Assistant Professor of English & Linguistics**

B.Ed (English & Literature), Moi University; M.A. (Linguistics), PhD (Linguistics), University of Reading, UK.
Specialty areas: English Language teaching, Professional Development and Teacher Education, Multilingualism in Education.

Odhiambo, Terry**Lecturer, Criminal Justice**

B.A. (Criminal Justice), United States International University - Africa;
M.A. (Conflict Resolution, Dispute Resolution), University of Westminster, London, UK;
Specialty areas: Criminal Justice and Criminology

Oluoch-Suleh Everlyn**Assistant Professor, Languages & Linguistics**

B.Ed Arts (English & Literature), M.A, Linguistics, M.A (Intercultural Communication), PhD (African

Languages); Speciality areas: Linguistics, Teacher education and teaching methodology, conducting research, English language assessment.

Otieno, Elizabeth M.**Lecturer, Criminal Justice**

B.A. (LLB), Moi University; M.A. (LLM), University of the Witwatersrand
Specialty areas; International Law, Criminal Law/ International Criminal Law and Criminal Justice

Rono Ruthie**Professor, Psychology**

B.A. Psychology, M.A. Psychology, PhD. (Development Psychology)
Specialty area: Cognitive Development and Socialization

Sungi, Simeon**Associate Professor of Criminal Justice**

B.A. (LL.B), Open University of Tanzania;
M.A. (LL.M - International Human Rights Law), Indiana University School of Law;
M.A. (Criminal Justice & Criminology), Indiana State University; Ph.D (Criminal Justice), Indiana University.
Specialty areas: Law and Society, International Criminal Law, Criminology of International Crimes, Comparative Criminal Justice.

Waithima, Charity Wangui A**Assistant Professor of Psychology**

B.Ed. (Science) Kenyatta University; M.A. (Counseling Psychology), Daystar University; Ph.D (Clinical Psychology) Daystar University; Specialty areas: Biological Psychology

Wamai, Njoki**Assistant Professor of International Relations**

B.Sc. (Food Science and Technology); Post Graduate Diploma (Gender Studies), University of Nairobi; M.Sc. (Conflict, Security and Development), King's College, London, UK; Ph.D (Politics and International Studies), University of Cambridge, UK;
Specialty areas: Critical perspectives of international intervention and peacebuilding in Africa; transitional justice; African feminism; African political thought;

Wambalaba, Akosa E.**Lecturer, French**

B.Ed. (French Language and Literature, Linguistics and Geography), University of Nairobi; M.A. (French Literature and Education), Portland State University.
Specialty areas: Education, literature and development studies in Francophone and Anglophone Africa

The golden opportunity
you are seeking is in
yourself.

Orison Swett Marden

School of Pharmacy & Health Sciences

Vision Statement

The vision of the School of Pharmacy & Health Sciences is to be a center of excellence for the training of health professionals through provision of quality sought-after health programs, clinical education, research, scholarship, innovativeness and community service, by outstanding faculty and students; and using state-of-the-art education infrastructure.

Contact: Lilian Aleyo

Phone: (+254) 730 116 833

Location: 1st Floor, Science Center

E-Mail: laleyo@usiu.ac.ke

E-mail: sphsheldesk@usiu.ac.ke

Prof. Shital Maru

Dean, School of Pharmacy & Health Sciences

Phone: (+254) 730 116 822

Location: 1st Floor, Science Center

E-Mail: smaru@usiu.ac.ke

Yasodha Janapati

Chair, Department of Pharmaceutical Chemistry Pharmacology and Pharmacognosy

Phone: (+254) 730 116 718

Location: 1st Floor, Science Center

E-Mail: yjanapati@usiu.ac.ke

Dr. Betty Mbatia

Chair, Department of Pure and Biomedical Sciences.

Phone: (+254) 730 116 721

Location: 1st Floor, Science Center

E-Mail: bembatia@usiu.ac.ke

Dr. Calvin A. Omolo

Chair of Department, Pharmaceutics Pharmacy Practice, and Public Health

Phone: (+254) 730116 713

Location: 1st Floor, Science Center

E-Mail: comolo@usiu.ac.ke

Dr. Samuel Mungai

Chair of Department of Nursing

Phone: (+254) 730116 710

Location: 1st Floor, Science Center

E-Mail: samungai@usiu.ac.ke

The School of Pharmacy & Health Sciences is committed to providing high quality programs for students at Undergraduate level. It fulfills its mission by providing program approaches that are diverse, state of the art, rigorous and innovative to healthcare training, practice and research.

School Mission Statement

The Mission of the School of Pharmacy and Health Sciences is to provide diverse, state of the art, rigorous and innovative approaches to healthcare training, practice and research through the use of a holistic view of health, focus and commitment to excellence.

Our programs are set in the USIU-Africa tradition of academic freedom and well integrated mix of education, experience, research, clinical practice and community service.

We strive to disperse the benefits of our knowledge, research and innovations to the community for the achievement, maintenance and advancement of quality of human life.

We value and cultivate synergistic and collaborative relationships with our internal and external partners, and propagate in our staff and students knowledge, skills and attitudes that support lifelong learning and excellence in health care service.

Academic Programs

MAJORS

Undergraduate Programs

The School of Pharmacy & Health Sciences offers the following Undergraduate degrees:

1. Bachelor of Pharmacy
2. Bachelor of Science in Epidemiology and Biostatistics (Available Online) (on hold)
3. Bachelor of Science in Applied Biochemistry (BSc. Applied Biochemistry) (on hold)
4. Bachelor of Technology in Analytical Chemistry (B. Tech Analytical Chemistry) (on hold)
5. Bachelor of Nursing

Graduate Program

1. Master of Science in Clinical Pharmacology & Therapeutics

TheNote: For successful completion of a course in programs offered by the School of Pharmacy and Health Sciences, students must not only pass quizzes, mid-semester, and end-semester examinations but also actively participate in continuous practical sessions, as well as oral and practical examinations. Students who miss any of these assessments without a valid reason will be awarded an F grade, regardless of their cumulative marks in other assessments.

All students enrolled in the Bachelor of Pharmacy and other medical-related courses must receive three doses of the Hepatitis B vaccine over a six-month period at their own expense, unless they provide proof of previous vaccination. The School will organize the vaccination programs through the USIU-Africa Finance Department.

Course Descriptions

BCM: BIOCHEMISTRY

BCM: BIOCHEMISTRY

BCM 1223 Medical Biochemistry I

PREREQUISITES: none

CREDITS HOURS: 4.5

This course is designed to introduce learners to the structures and purposes of basic components of prokaryotic and eukaryotic cells, especially macromolecules, membranes, and organelles. They will also learn how these cellular components are used to generate and utilize energy in cells.

BCM 1233 Medical Biochemistry II

PREREQUISITE: BCM 1223 Medical Biochemistry I

CREDITS HOURS: 4.5

To equip the student with knowledge and skills on the breakdown, synthesis and metabolic transformations of carbohydrates, proteins and lipids. The students will also be introduced to the disorders of metabolism.

BCM 2216 Clinical Chemistry and Hematology

PREREQUISITES: BCM 1233 Medical Biochemistry II, MIC 1235 Immunology

CREDITS HOURS: 3

This course is designed to enable the learner to apply knowledge in hematology and clinical chemistry in the diagnosis and management of various disorders

BCM 1320 Laboratory Practice and Instrumentation 4.5

PREREQUISITES: None

CREDIT HOURS: 4.5

The purpose of the unit is to advance learners' knowledge of good laboratory practice skills, inform on laboratory safety, handling of various laboratory equipment used in measurements and enhance skills in preparation of various biochemical buffers and solutions.

BCM 1341 Cellular Biology 3.0

PREREQUISITES: None

CREDIT HOURS: 3

The Purpose of the course is to inform the learner on the structures and purposes of basic components of prokaryotic and eukaryotic cells, especially macromolecules, membranes, and organelles and to understand how these cellular components are used to generate and utilize energy in cells.

BCM 1342 Biochemistry of Biomolecules (Biochemistry II)

This course aims to teach the nature and chemistry of bio-molecules and macromolecules; the biochemical factors that commonly cause disease; the bases of biochemical disorders and the diagnosis of diseases.

Credit Units: 4.5

BCM 1343 Metabolic Processes & Disorders (Biochemistry III)

This course aims to teach the student the nature of biological forms, the mechanisms of life and the mechanisms of life processes in terms of chemistry and biology. The students will also acquire knowledge on the metabolic pathways of different bio-molecules in the body, list and explain the metabolic disorders of medical importance; perform some biochemical analyses and use this knowledge in the diagnosis of diseases.

Prerequisites: BCM 1341

Credit Units: 4.5

BCM 2344 Biochemistry of Specialized Tissues (Biochemistry IV)

This course aims to teach the student the nature of biological forms, the mechanisms of life and the mechanisms of life processes in terms of chemistry and biology of certain specialized tissues of the body. The students will perform some biochemical analyses and use this knowledge in the diagnosis

of diseases.

Prerequisites: BCM 1341, BCM1342

Credit Units: 4.5

BCM 1310 Structure and Function of Biomolecules 4.5

PRE-REQUISITES: BCM 1341, CHE 2303

CREDIT HOURS: 4.5

Course description

The purpose of the course unit is to equip students with knowledge on the structure and functions of the major biomolecules found in cells.

BCM 1330 Vitamins, Minerals and Trace Elements 3.0

PREREQUISITES: CHE 1100

CREDIT HOURS: 3

The purpose of the course is to introduce learners to the types of micronutrients and trace elements and their importance to cellular processes.

BCM 2105 Enzymology 3.0

PREREQUISITES: CHE 1310

CREDIT HOURS: 3

The purpose of the course is to equip learners with knowledge and skills on enzymes, their mechanisms of catalysis and the factors that affect their activities.

BCM 2120 Carbohydrate, Lipid Metabolism and Associated Disorders 4.5

PREREQUISITES: BCM 1310

CREDIT HOURS: 4.5

The purpose of the course is to equip the student with knowledge and skills on carbohydrate and lipid metabolism.

BCM 2110 Membrane Biochemistry and cellular signaling

PREREQUISITES: BCM 1310

CREDIT HOURS: 3.0

Course description

The purpose of the course is to equip the learner

with knowledge on molecular cell biology in relation to cellular signaling.

BCM 2140 Introduction to Plant Biochemistry

PREREQUISITES: BCM 1310

CREDIT HOURS: 3.0

The course will introduce students to the biochemical processes of plant metabolism and their commercial application.

MIC 2175 Bacteriology

PREREQUISITES: BCM 1341 Cellular Biology

CREDIT HOURS: 4.5

Course description

The purpose of the course is to provide students with knowledge on the role of microbiology in medicine and of bacteria in causing diseases.

BCM 2220 Immunochemistry and Hematology

PREREQUISITES: BCM 2250

CREDIT HOURS: 3.0

The purpose of the course is to equip students with knowledge on the principles and mechanisms of the body immune system in relation to disease.

BCM 2250 Protein biochemistry and Nitrogen metabolism and Associated Disorders

PREREQUISITES: BCM 1310

CREDIT HOURS: 4.5

The purpose of the course is to equip students with knowledge on protein synthesis, breakdown and the fate of the amino group.

BCM 2140 Introduction to Plant Biochemistry

PREREQUISITES: BCM 1310

CREDIT HOURS: 3.0

The course will introduce students to the biochemical processes of plant metabolism and their commercial application.

BCM 2220 Immunochemistry and Hematology*PREREQUISITES: BCM 2250**CREDIT HOURS: 3.0*

The purpose of the course is to equip students with knowledge on the principles and mechanisms of the body immune system in relation to disease.

BCM 2250 Protein biochemistry and Nitrogen metabolism and Associated Disorders*PREREQUISITES: BCM 1310**CREDIT HOURS: 4.5*

The purpose of the course is to equip students with knowledge on protein synthesis, breakdown and the fate of the amino group

BCM 2345 Enzymology (Biochemistry V)

This course aims to teach mechanisms of biochemical reactions; the nature and functions of enzymes; the role of enzymes in the metabolic pathways of different bio-molecules in the body; the enzymatic disorders of medical importance and their bases in the diagnosis of diseases.

*Prerequisites: BCM 1341**Credit Units: 3 Units***BCM 2346 Molecular Biology (Biochemistry VI)**

This course aims to teach the student the composition and life processes of cells at the molecular level, including the effects of drugs at that level. It will help the student to understand the principles of gene organisation, replication and expression in both prokaryotic and eukaryotic organisms; mechanisms of DNA damage and their repair; gene regulation and protein function including signal transduction and cell cycle control and relate properties of cancerous cells to mutational changes in gene function.

*Prerequisites: BCM 1331; PHY 2333**Credit Units: 3***BCM 2280 Molecular Biology***PREREQUISITES: BCM 1310**CREDIT HOURS: 4.5*

The purpose of the course is to provide students with knowledge and practical skills in molecular biology.

BCM 3347 Introduction to Pharmaceutical Biotechnology (Biochemistry VII)

The objective of this course is to provide the student with a working knowledge of the preparation, stability, formulation, Interpretation, analysis, quality control and regulation of biotechnology pharmaceutical products and also to evaluate different techniques for separation, purification, cell turnover, growth and cytotoxicity of cell type.

*Prerequisites: BCM 1331; BCM 1341; BCM 2346**Credit Units: 3***BCM 2325 Regulation and Integration of Metabolism***PREREQUISITES: BCM 2120, BCM 2250, BCM 2330**CREDIT HOURS: 3.0*

The purpose of the course is to equip the student with knowledge and understanding of how various metabolic process are regulated and integrated.

BCM 2330 Biochemical Endocrinology 3.0*PREREQUISITES: BCM 1310**CREDIT HOURS: 3*

The purpose of the course is to equip learners with basic knowledge on the concepts of the endocrine system, various hormones and their functions, their chemical messengers, synthesis, distribution, regulation and human disorders associated with the endocrine system.

BCM 2340 Genetics and Evolution*PREREQUISITES: BCM 1310**CREDIT HOURS: 3*

The purpose of the course is to equip the learner

with basic knowledge of calculating the frequency of genotypes, evolutionary forces and mating patterns affecting populations.

BCM 3325 Quality Control and Quality Analysis*PREREQUISITES: BCM 3120**CREDIT HOURS: 4.5*

The purpose of the course is to provide learners with fundamental knowledge and skills to detect, reduce, and correct deficiencies and/or inefficiencies in products and production processes

BCM 3110 Microbial Biochemistry*PREREQUISITES: MIC 2175, MIC 2380**CREDIT HOURS: 4.5*

The purpose of the course is to equip the students with knowledge on metabolism of microbes and its importance in their control.

BCM 3120 Basic Chemometrics*PRE-REQUISITES: None**CREDIT UNITS: 3.0*

The purpose of the course is to introduce learners to the basic concepts that govern measurements, their interconversions and data analysis.

BCM 3130 Nutritional Biochemistry*PREREQUISITES: BCM 2325**CREDIT HOURS: 3.0*

The purpose of the course is to equip students with knowledge on specific diseases linked to nutrition and the skills to carry out specific biochemical food analyses.

BCM 3140 Biochemistry of Plant Secondary Metabolism and Phytohormones*PREREQUISITES: BCM 2140**Credit hours: 3.0*

The purpose of the course is to equip students with knowledge on the basic biochemistry, functions and economic importance of plant secondary metabolites and Phytohormones.

BCM 3150 Bioethics and Biosafety in Biomedical Research 3.0**PREREQUISITES:** NONE**CREDIT HOURS:** 3.0

The purpose of the course is to equip the learners with knowledge on regulations in bioethics and biosafety.

BCM 3200 Medical Genetics**PREREQUISITES:** BCM 2340**CREDIT HOURS:** 3.0

The purpose of the course is to equip students with knowledge and skills on genetic disorders and their medical and/or economic importance.

BCM 3210 Gene Technology and Biotechnology**PREREQUISITES:** BCM 2280**CREDIT HOURS:** 4.5

The purpose of course is to equip students with knowledge and practical skills for use in bioprocessing.

BCM 3230 Industrial Biochemistry**PREREQUISITES:** BCM 3210**CREDIT HOURS:** 3.0

The purpose of the course is to equip students

with knowledge on the industrial applications of biochemical systems (microorganisms and their associated processes) to make products with commercial value.

BCM 3250 Principles of Bioinformatics**PREREQUISITE:** BCM 2280, BCM 2340**CREDITS HOURS:** 3

The purpose of the course is to introduce the learner to the application of web-based computational techniques in mining and analysis of information associated with biomolecules to predict gene function from DNA, RNA and protein sequences.

BCM 3260 Biochemistry of Specialized Organs and Tissues**PRE-REQUISITES:** BCM 2120; BCM 2250; BCM 2330**CREDIT HOURS:** 4.5

The purpose of the course is to equip the learner with knowledge on the nature of biological forms, the mechanisms of life and life processes in terms of chemistry and biology of certain specialized tissues of the body.

BCM 3300 Clinical Biochemistry 4.5**PREREQUISITES:** BCM 3260; BCM 3325**CREDIT HOURS:** 4.5

The purpose of the course is to equip students with knowledge and skills on chemical analyses carried out in a clinical chemistry laboratory.

PHT 3350 Principles of Pharmacognosy**PREREQUISITES:** BCM 3140**CREDIT HOURS:** 3

The purpose of the course is to equip students with basic knowledge of diverse plants with potential medicinal properties.

BCM 3330 Integrated Laboratory Skills Workshops**PREREQUISITES:** BCM 1320; BCM 2105; BCM 2220; BCM 2280; BCM 2380; BCM 3120; BCM 3150**CREDIT HOURS:** 9.0

The purpose of the course is to provide learners with exposure on the application of biochemical concepts in industrial, clinical, research and environmental set-ups.

BCM 3360 Comparative Biochemistry**PREREQUISITES:** BCM 3250**CREDIT HOURS:** 3.0

The purpose of the course is to enable the learner compare and contrast various aspects of metabolism and its control with an emphasis on fundamental similarities and distinctions between

microbial, plant and animal metabolism, and the key adaptations at the biochemical/metabolic level of biological organisation.

BCM 4100 Bioremediation and Waste Management**Prerequisites:** BCM 3210**CREDIT HOURS:** 3.0

The purpose of this course is to equip learners with knowledge on the application of biochemical approaches to green, self-sustainable solutions to manage waste and minimize environmental pollution.

BCM 4120 Principles of Forensic Biochemistry**PREREQUISITES:** BCM 3300; BCM 3110; BCM 3350**CREDIT HOURS:** 4.5

The purpose of the course is to equip learners with knowledge on modern tools and approaches of gathering and analyzing forensic materials.

BCM 4400 Research Project in Biochemistry**PREREQUISITE:** None**CREDIT HOURS:** 6

The purpose of the course is to allow students to apply the knowledge and skills acquired in class to resolve a research question.

BST: BIOSTATISTICS

BST 1010 Introduction to Biostatistics

The course will equip the learner with knowledge, skills and attitudes to be able to utilize the concepts and principles of biostatistics to design and conduct research.

Credits Units: 4.5

Prerequisite: MTH 1109 College Algebra

BST 1010 Introduction To Biostatistics

To introduce the learner to the basic concepts of biostatistics and probability and the application of basic principles and methodologies of statistical analysis in public health.

Pre-requisites: None

Credit Units: 4.5

BST 1020 Introduction to Statistical Computing

Pre-requisites: BST 1010

Credit Units: 4.5

BST 2010 Probability and Statistical Inference

This course is an intermediate level probability and statistics course with a focus on the theoretical foundations of statistical inference.

Pre-requisites: MTH 1109, BST 1531

Credit Units: 3

BST 3010 Regression Modelling

The aim of this course is to provide students with basic principles of regression analyses applicable to the health sciences so that they can understand and use appropriate statistical regression techniques for continuous and discrete data.

Pre-requisites: BST 2010

Credit Units: 3

BST 3020 Demographic Techniques

This course introduces the learner to sources of demographic data and basic techniques of demographic analysis.

Pre-requisite: BST 2010

Credit Units: 4.5

BST 4013 Research proposal

This course prepares students to design and conduct research.

Pre-requisites: DAN 2491; HSC 3492; HSC 4494

Credit Units: 3

BST 4050 Biostatistics Consultancy

This course examines the professional roles, responsibilities and analytic skills of the practicing Biostatistician as consultant and collaborator in health science research.

Pre-requisites: BUS 4090, DAN 2541, HSC 4494

Credit Units: 4.5

BST 4020 Mathematical Modelling of Infectious Diseases

This course aims to provide the quantitative approaches to infectious disease dynamics and control in humans or animals.

Pre-requisite: EPI 1010, BST 3010

Credit Units: 4.5

BST 4030 Spatial Statistics And Disease Mapping

This course is an introduction to Geographic Information System (GIS) and the collection, maintenance, and analysis of spatial data for health.

Pre-requisite: EPI 1010, BST 3535

Credit Units: 3

BST 4040 Statistical Genetics

This course is designed as a specialty within biostatistics, aiming to teach students the knowledge of genetics; the technological study of gene variability and expression in human populations; and specific statistical approaches used to analyze these data.

Pre-requisite: NSC 2205, PHT 3513

Credit Units: 3

BST 4060 Principles of Bioinformatics

The course introduces the learner to the application of computational techniques in analysis of information associated with biomolecules.

Pre-requisite: EPI 4020

Credit Units: 3

BOT: BOTANY

BOT 3352 Plant Anatomy and physiology

This course is meant to provide the students with an overview of natural products, especially ethnobotany and identification techniques for different types of natural products, their occurrence, structure, biosynthesis and properties. They will also be taught the use of natural products as starting materials for medicines.

Credit Units: 4.5

Prerequisites: BCM 1341; CHE 2303;

BOT 3353 General Plant Biochemistry and Toxicology

This course is meant to provide the students with an overview of natural products, especially ethnobotany and identification techniques for different types of natural products, their occurrence, structure, biosynthesis and properties. They will also be taught the use of natural products as starting materials for medicines.

Credit Units: 3

Prerequisites: BCM 1341; CHE 2303

CHE: CHEMISTRY

CHE 1100 Foundations of Chemistry

PREREQUISITES: None

CREDIT HOURS: 4.5

The unit will introduce the learner to the foundations of carbon chemistry. Knowledge of the structure, functionality, and reactivity of organic molecules is critical for the understanding of numerous and disparate phenomena, from biological and biochemical processes, to medicine and to the properties of materials (polymers).

CHE 1110 Chemistry of the Main Group Elements 3.0

PREREQUISITE: CHE 1100

CREDIT HOURS: 3

The purpose of this course is to learn more about the chemistry of the main group elements.

CHE 1305 Basic Inorganic Chemistry (Inorganic Chemistry I)

The objective of the Inorganic Chemistry Course is to introduce the student to the basic principles and methodologies of Chemistry, to create a sound starting point for the study and comprehension of the correlation between structure and the properties of materials which students will have to study in more detail in their years in pharmacy school.

Credit Units: 4.5

CHE 1200 Basic Qualitative and Quantitative Chemical Analysis

Pre-requisite: CHE 1100

CREDIT HOURS: 4.5

Course description

The purpose of this course is to provide the student with basic knowledge and understanding of the fundamental principles and procedures in analytical chemistry as well as an overview of basic qualitative and quantitative methods of analysis.

CHE 1300 Fundamentals of Organic Chemistry 4.5

PREREQUISITES: CHE 1100

CREDIT HOURS: 4.5

The purpose is to introduce the learner to the foundations of carbon chemistry. Knowledge of the structure, functionality, and reactivity of organic molecules is critical for the understanding of numerous and disparate phenomena, from biological and biochemical processes, to medicine and to the properties of materials (polymers).

CHE 1306 Atomic Structure and Chemical Bonding (Inorganic Chemistry II)

The objective of this course is to study the atomic structure and chemical bonding in details and study their application in pharmaceutical sciences. It includes the study and application of transition metal and coordination chemistry.

Credit Units: 3

CHE 1400 Fundamentals of Physical Chemistry

PREREQUISITES: none

CREDIT HOURS: 3.0

The purpose of this course is to present the study and principles of the laws that govern chemical reactions in physical chemistry, and that are applied to many areas of analytical chemistry research and development.

CHE 2200 Techniques in Analytical Separation

Pre-requisite: none

CREDIT HOURS: 4.5

CHE 2210 Analytical Spectroscopy

Pre-requisite: CHE 1300

CREDIT HOURS: 4.5

The purpose of this course is to equip students with knowledge of the basic instrumental methods of analysis and their applications. Each technique

will include a general overview, mode of operation, instrumentation, data interpretation and applications

CHE 2220 Basic Chemometrics

Pre-requisite: None

CREDIT HOURS: 3

The purpose of this course is to teach students how to use mathematical and statistical methods to design or select optimal procedures and experiments, and to provide maximum chemical information by analyzing chemical data.

CHE 2300 Carbonyl Compounds and Derivatives

Pre-requisite: CHE1300

CREDIT HOURS: 4.5

The purpose of this course unit is to introduce the learner to carbonyl group containing compounds and the reactions they undergo. Understanding both the physical and chemical properties of this group of compounds will lead to an understanding of a wide variety of organic reactions.

The purpose of this course is to equip the students with knowledge and skills in separation and purification techniques which include chromatographic and non-chromatographic methods.

CHE 2300 Carbonyl Compounds and Derivatives

PREREQUISITES: CHE 1300

CREDIT HOURS: 4.5

The purpose of this course is to introduce the learner to carbonyl group containing compounds and the reactions they undergo.

CHE 2303 Organic Chemistry

The aim of the course is to train the student on fundamentals of carbon chemistry, the classification, sources and uses of organic compounds, and also to provide knowledge on the structure, functionality, reactivity, synthetic methods, purify, estimate, assay

and identify important organic compounds.

Credit Units: 4.5

CHE 2304 Chromatographic & Voltametric Methods

This course aims is to introduces the student to principles and mechanisms of Chromatographic separations and Electro-analytical methods which study an analyte by measuring the potential (volts) and/or current (amperes) in an electrochemical cell containing the analyte. These methods are central in analysis and/or purification of organic compounds.

Prerequisites: CHE 2302; CHE 2303;

Credit Units: 4.5

CHE 2307 Physical Chemistry

The main objective of the course is to teach the student modern theories and techniques in physical and nuclear chemistry that are applied to many areas of pharmaceutical research and development.

Credit Units: 4.5

CHE 2308 Nuclear Chemistry

This course introduces students to nuclear chemistry and its related techniques and application to many areas of pharmaceutical research and development. Topic covered include theory and types of decay, radiation chemistry and radioactive decay process and the applications of radioisotopes.

Credit Units: 3

CHE 2500 Environmental and Water Chemistry

Pre-requisite: CHE 1200

CREDIT HOURS: 4.5

This course will provide a broad overview of many important environmental issues that focus primarily on the environment including sources, quality, pollution, sanitation, economic importance and legal frameworks regulating its management.

CHE 2100 Transition Metal and Coordination Chemistry*Pre-requisite: CHE 1110***CREDIT HOURS: 4.5**

This course equips the students with knowledge of inorganic reactions, chemical bonding, acidbase theories and the formation of complex ions in coordination compounds

CHE 2310 Aromatic Chemistry*Pre-requisite: CHE 1300***CREDIT HOURS: 4.5**

This course is designed to introduce the learner to the properties, preparations, reactions and applications of benzene and other aromatic compounds.

CHE 2320 Chemistry of Biomolecules*Pre-requisite: CHE 1300***CREDIT HOURS: 3**

The course unit is intended to equip students with knowledge on the structure and functions and chemistry of the major biomolecules found in cells, the basic unit of life. These are non-living molecules that are vital to sustenance of life as we know it

CHE 2400 Chemical Thermodynamics and Thermochemistry*Pre-requisite: CHE1400***CREDIT HOURS: 4.5****Course description**

This course introduces students to the study of the relationship between heat and other forms of energy involved in a chemical or physical process in order to predict the natural direction of a chemical reaction. The students will also be able to apply thermodynamic principles in the study of analytical chemistry

CHE 2410 Chemical Kinetics*Pre-requisite: CHE 1400***CREDIT HOURS: 4.5**

The purpose of this course is to equip students with

the concepts of chemical kinetics

CHE 2000 Practicum*Pre-requisite: None***CREDIT HOURS: 4.5**

This practicum will include internal laboratory attachment which will be an in-depth analytical chemistry laboratory course aimed to increase students' interest, independence, engagement, and critical thinking skills by using real-life applications.

CHE 3000 Research Methods: Capstone Experience*Pre-requisite: None***CREDIT HOURS: 3**

This course equips the students with knowledge to enable them to successfully carry out a research project. The knowledge learned will include how to formulate a research question, research objectives, hypothesis, writing a research paper and presentations

CHE 3200 Quality Control and Quality Assurance*Pre-requisite: None***CREDIT HOURS: 3**

The purpose of this course is to build concepts and skills in the design of quality systems for testing and accrediting laboratories, and provide basic information in all fields that are of interest for quality assurance in chemical measurement in both management as well as technical requirements

CHE 3210 Nanoscience and Nanotechnology*Pre-requisite: None***CREDIT HOURS: 3**

The purpose of this course is to introduce to the students the synthesis, analysis, and physical properties materials at nanoscale and covers the preparation, characterization, and application of such systems in analytical chemistry and science in general.

CHE 3300 Organic Spectroscopy*Pre-requisite: None***CREDIT HOURS: 4.5**

This course unit offers the learner the opportunity to learn how to use spectroscopic instruments: Ultraviolet-Visible (UV-Vis), Nuclear Magnetic Resonance (NMR), Infrared (IR), Mass Spectrometer (MS) in the determination of structures of organic compounds

CHE 3400 Principles of Electrochemistry*Pre-requisite: CHE 1400***CREDIT HOURS: 4.5**

The purpose of this course is to equip the students with basic principles of electrochemical processes and applications

CHE 3600 Industrial Chemistry*Pre-requisite: None***CREDIT HOURS: 4.5**

The purpose of this course is to equip the students with knowledge of pharmaceuticals and chemical analysis in the industry.

CHE 3001 Research Project in Analytical Chemistry*Pre-requisite: CHE 3000***CREDIT HOURS: 3**

Students will work with a faculty member to develop and defend a proposal for their Research Project. Students may start working on their research as soon as they have a proposal approved.

CHE 3220 Electroanalytical, Thermoanalytical and Radio Analytical Techniques*Pre-requisite: CHE 2220***CREDIT HOURS: 4.5**

The students are able to learn the electro-analytical, Thermo-analytical and Radio-analytical methods of analysis and understand their applications

CHE 3410 Phase Equilibria*Pre-requisite: CHE 2400***CREDIT HOURS: 4.5**

The students will learn how to apply the principles of chemical reaction equilibrium and phase equilibrium

to the calculation of complex separation processes.

CHE 3500 Computer Applications in Chemistry*Pre-requisite: None***CREDIT HOURS: 3**

This course introduces students to uses and applications of computers in chemistry. Automations of protocols, programming of experiments from computer consoles and predictions of feasibility of experiments are discussed in this course.

CHE 3700 Industrial Biochemistry*Pre-requisite: CHE 2320***CREDIT HOURS: 3**

This course will introduce students to Biotechnology, which is the application of the life sciences in industrial chemical synthesis. It will discuss the increasingly important role in the direct production of specialty chemicals via fermentation, and other uses of biotechnology.

CHE 3002 Research Project in Analytical Chemistry II*Pre-requisite: CHE 3001***CREDIT HOURS: 3**

This is a continuation of the research project in Analytical Chemistry I course. It gives an opportunity to student with interest in analytical chemistry to carry out actual independent research with guidance from principal investigators.

CHE 3250 Electronic Measurement and Signal Processing*Pre-requisite: None***CREDIT HOURS: 3**

This course enables students to understand the design and operation of modern instruments in data acquisition and processing, with emphasis given on use of integrated circuits, both analog and digital.

CHE 3260 Bioanalytical Techniques (Sensors and Biosensors)*Pre-requisite: None***CREDIT HOURS: 4.5**

This course will provide an introduction to common

chemical investigations used in research and public health practice. Emphasis will be placed on both the physiological and biochemical rationale for biochemical tests and on their analyses and interpretation

CHE 3270 Forensic Methods of Analysis

Pre-requisite: None

CREDIT HOURS: 4.5

This course introduces the student to the basics of forensic chemistry and the chemical methods used for such analysis. Familiarize the student with the methodologies involved in analyzing forensic samples.

CHE 4000 Industrial/Field Attachment

Pre-requisite: None

CREDIT HOURS: 3

The purpose of this course is to enable students apply what they have learned in the industry

CHE 1100 Foundations of Chemistry

PREREQUISITES: None

CREDIT HOURS: 4.5

The unit will introduce the learner to the foundations of carbon chemistry. Knowledge of the structure, functionality, and reactivity of organic molecules is critical for the understanding of numerous and disparate phenomena, from biological and biochemical processes, to medicine and to the properties of materials (polymers).

CHE 1110 Chemistry of the Main Group Elements 3.0

PREREQUISITE: CHE 1100

CREDIT HOURS: 3

The purpose of this course is to learn more about the chemistry of the main group elements.

CHE 1305 Basic Inorganic Chemistry (Inorganic Chemistry I)

The objective of the Inorganic Chemistry Course is to introduce the student to the basic principles and methodologies of Chemistry, to create a sound starting point for the study and comprehension of the correlation between structure and the properties of materials which students will have to study in more

detail in their years in pharmacy school.

Credit Units: 4.5

CHE 1200 Basic Qualitative and Quantitative Chemical Analysis

Pre-requisite: CHE 1100

CREDIT HOURS: 4.5

Course description

The purpose of this course is to provide the student with basic knowledge and understanding of the fundamental principles and procedures in analytical chemistry as well as an overview of basic qualitative and quantitative methods of analysis.

CHE 1300 Fundamentals of Organic Chemistry 4.5

PREREQUISITES: CHE 1100

CREDIT HOURS: 4.5

The purpose is to introduce the learner to the foundations of carbon chemistry. Knowledge of the structure, functionality, and reactivity of organic molecules is critical for the understanding of numerous and disparate phenomena, from biological and biochemical processes, to medicine and to the properties of materials (polymers).

CHE 1306 Atomic Structure and Chemical Bonding (Inorganic Chemistry II)

The objective of this course is to study the atomic structure and chemical bonding in details and study their application in pharmaceutical sciences. It includes the study and application of transition metal and coordination chemistry.

Credit Units: 3

CHE 1400 Fundamentals of Physical Chemistry

PREREQUISITES: none

CREDIT HOURS: 3.0

The purpose of this course is to present the study and principles of the laws that govern chemical reactions in physical chemistry, and that are applied to many areas of analytical chemistry research and development.

CHE 2200 Techniques in Analytical Separation

Pre-requisite: none

CREDIT HOURS: 4.5

CHE 2210 Analytical Spectroscopy

Pre-requisite: CHE 1300

CREDIT HOURS: 4.5

The purpose of this course is to equip students with knowledge of the basic instrumental methods of analysis and their applications. Each technique will include a general overview, mode of operation, instrumentation, data interpretation and applications

CHE 2220 Basic Chemometrics

Pre-requisite: None

CREDIT HOURS: 3

The purpose of this course is to teach students how to use mathematical and statistical methods to design or select optimal procedures and experiments, and to provide maximum chemical information by analyzing chemical data.

CHE 2300 Carbonyl Compounds and Derivatives

Pre-requisite: CHE 1300

CREDIT HOURS: 4.5

The purpose of this course unit is to introduce the learner to carbonyl group containing compounds and the reactions they undergo. Understanding both the physical and chemical properties of this group of compounds will lead to an understanding of a wide variety of organic reactions.

The purpose of this course is to equip the students with knowledge and skills in separation and purification techniques which include chromatographic and non-chromatographic methods.

CHE 2300 Carbonyl Compounds and Derivatives

PREREQUISITES: CHE 1300

CREDIT HOURS: 4.5

The purpose of this course is to introduce the learner to carbonyl group containing compounds and the reactions they undergo.

CHE 2303 Organic Chemistry

The aim of the course is to train the student on fundamentals of carbon chemistry, the classification, sources and uses of organic compounds, and also to provide knowledge on the structure, functionality, reactivity, synthetic methods, purify, estimate, assay and identify important organic compounds.

Credit Units: 4.5

CHE 2304 Chromatographic & Voltametric Methods

This course aims to introduce the student to principles and mechanisms of Chromatographic separations and Electro-analytical methods which study an analyte by measuring the potential (volts) and/or current (amperes) in an electrochemical cell containing the analyte. These methods are central in analysis and/or purification of organic compounds.

Prerequisites: CHE 2302; CHE 2303;

Credit Units: 4.5

CHE 2307 Physical Chemistry

The main objective of the course is to teach the student modern theories and techniques in physical and nuclear chemistry that are applied to many areas of pharmaceutical research and development.

Credit Units: 4.5

CHE 3700 Industrial Biochemistry

Pre-requisite: CHE 2320

CREDIT HOURS: 3

This course will introduce students to Biotechnology, which is the application of the life sciences in industrial chemical synthesis. It will discuss the increasingly important role in the direct production of specialty chemicals via fermentation, and other uses of biotechnology.

CHE 3002 Research Project in Analytical Chemistry II

Pre-requisite: CHE 3001

CREDIT HOURS: 3

This is a continuation of the research project in Analytical Chemistry I course. It gives an opportunity to student with interest in analytical chemistry to carry out actual independent research with guidance from principal investigators.

CHE 3250 Electronic Measurement and Signal Processing

Pre-requisite: None

CREDIT HOURS: 3

This course enables students to understand the design and operation of modern instruments in data acquisition and processing, with emphasis given on use of integrated circuits, both analog and digital.

CHE 3260 Bioanalytical Techniques (Sensors and Biosensors)*Pre-requisite: None***CREDIT HOURS: 4.5**

This course will provide an introduction to common chemical investigations used in research and public health practice. Emphasis will be placed on both the physiological and biochemical rationale for biochemical tests and on their analyses and interpretation

CHE 3270 Forensic Methods of Analysis*Pre-requisite: None***CREDIT HOURS: 4.5**

This course introduces the student to the basics of forensic chemistry and the chemical methods used for such analysis. Familiarize the student with the methodologies involved in analyzing forensic samples.

CHE 4000 Industrial/Field Attachment*Pre-requisite: None***CREDIT HOURS: 3**

The purpose of this course is to enable students apply what they have learned in the industry

CHE 1100 Foundations of Chemistry**PREREQUISITES: None****CREDIT HOURS: 4.5**

The unit will introduce the learner to the foundations of carbon chemistry. Knowledge of the structure, functionality, and reactivity of organic molecules is critical for the understanding of numerous and disparate phenomena, from biological and biochemical processes, to medicine and to the properties of materials (polymers).

Credit Units: 4.5

CNP: CLINICAL PRACTICUM

CNP 2331 Medical and Surgical clinical placement I

This course is designed to enhance the learner's clinical nursing skills as well as competences in management of patients with various medical surgical conditions through clinical practice.

Credits: 9.0 units

Pre-requisite: NUR 2313 Medical surgical Nursing I and NUR 2323 Medical Surgical Nursing II

CNP 2332 Midwifery clinical placement I

The course is meant to equip the learner with knowledge, skills and attitudes to be able to provide evidence-based care to women and infants across the reproductive spectrum.

Credits: 5.0 units

Pre-requisite: NUR2314 Midwifery I, NUR 2322 Community Health Nursing I, NUR 2324 Sexual & Reproductive Health

CNP 3321 Pediatric Ward Clinical placement

This course is meant to enhance the learner's clinical nursing skills as well as competences in management of children with various conditions through clinical practice.

Credits: 4.0 units

Pre-requisite: NUR 3314 Pediatric Nursing

CNP 3322 Medical Surgical clinical placement II

This course is designed to enhance the learner's competences through clinical practice to be able to provide nursing care to individuals with orthopedic and gynecological conditions.

Credits: 4.0 units

Pre-requisite: NUR 2313 Medical surgical Nursing I and NUR 2323 Medical Surgical Nursing II, CNP 2331 Medical and surgical clinical placement I

CNP 3323 Midwifery clinical placement II

The placement aims at equipping the learner with skills and attitudes to enable provision of skilled attendance during the peripartum period.

Credits: 4.5 units

Pre-requisite: NUR 3312 Midwifery III, CNP 2332 Midwifery Placement I

CNP 3331 Midwifery clinical placement III

The placement is designed to enable the learner acquire appropriate skills and attitudes in order to provide nursing care to postpartum women and sick and well babies after delivery.

Credits: 4.5 units

Pre-requisite: NUR 3312 Midwifery III, NUR 3314 Pediatric Nursing, CNP 2332 Midwifery Placement I

CNP 3332 Community health placement

This placement is designed to enable the learner to acquire the requisite skills and attitudes to enable provision of care to families and communities at low tier health facilities and in the community.

Credits: 8.0 units

Pre-requisite: NUR 3313 Community Health Nursing II

CNP 4321 Medical Surgical Specialties Clinical placement

This course is designed to enhance the learner's competences through clinical practice to be able to provide essential nursing care to individuals with ophthalmic, ENT, dental, renal, critical, trauma and emergency conditions as well as those requiring perioperative care.

Credits: 12.0 units

Pre-requisite: NUR 4311 Medical Surgical (specialties) I Special senses, NUR 4312 medical surgical specialties II Acute care; NUR 4313 Medical Surgical specialties III

CNP 4331 Teaching Practice

This course is designed to enhance the competences of the learner in curriculum and instruction through a practicum in nursing training institutions and an affiliated teaching hospital.

This will enable the learner to perform roles and functions of a nurse & health educator in health academic institutions and training hospitals.

Credits: 4.0 units

Pre-requisite: None

CNP 4332 Mental Health Nursing Clinical Placement

This course is designed to enhance the learner's clinical nursing skills as well as competences in management of patients with various mental health and psychiatric conditions through clinical practice in a mental and psychiatry ward and clinic.

Credits: 4.0 units

Pre-requisite: NUR 4314 Mental health and psychiatric Nursing

CNP 4333 Ward unit leadership Management and governance

The course is meant to enhance the learner's leadership and management competences through hands-on experience in a clinical setting.

Credits: 3.0 units

Pre-requisite: NUR 4315 Leadership and Management in Nursing

DAN: DATA ANALYSIS

DAN 3010 Multivariate Analysis

This course introduces students to statistical methods for describing and analyzing multivariate data.

Pre-requisite: BST 2010

Credit Units: 3

DAN 3020 Data Mining

This course offers a comprehensive coverage of the techniques most commonly employed in the analysis of large volumes of data, in the extraction of knowledge from this data, and in making decisions based on the knowledge acquired. Students will practice with appropriate software, tools and packages in the laboratory *Pre-requisites: DAN 2541*

Credit Units: 3

DAN 4010 Design and Management Of Clinical Trial

The purpose of this course is to introduce the main statistical concepts, methods and models used in the design and analysis of clinical trials.

Pre-requisites: BST 2010, BST 3010

Credit Units: 3

DAN 4015 Longitudinal Data Analysis

The aim of this course is to introduce the main statistical concepts, methods and models used in the analysis of longitudinal data.

Pre-requisite: DAN 3010, BST 3010

Credit Units: 3

DAN 4020 Survival Data Analysis

This course presents methods for various methods of analyzing categorical, longitudinal and survival data in public health, epidemiology, and medicine. The SPSS, R, and STATA statistical packages will be used to conduct analyses.

Pre-requisites: DAN 3010, HSC 4494

Credit Units: 4.5

DAN 4030 Time Series Analysis

This course aims to introduce a variety of statistical models for time series and cover the main methods for analyzing these models. In this course you will develop a sound understanding of the time domain properties and common models for stationary and non-stationary time series in discrete time, and will be able to use the R and SPSS statistical package to perform appropriate analyses.

Pre-requisite: DAN 3010, BST 3010

Credit Units: 3

ELECTIVES

Elective I (Choose 1 of the following)

CHE 3044 Polymer Processing

Pre-requisite:

CREDIT HOURS: 3

This course will introduce polymers as macromolecules with economic importance and will equip students with knowledge of petrochemical industries and polymer chemistry.

CHE 3110 Surface and Colloid Chemistry

Pre-requisite: none

CREDIT HOURS: 3

This course provides an introduction to surface and colloid science, with an overview of theoretical treatments of colloidal processes, experimental methods, and industrial applications.

Elective II (Choose 1 of the following)

CHE 3092 Industrial Processes and Environment

Pre-requisite: none

CREDIT HOURS: 3

Pre-requisite:

This course enables the student to learn the industrial processes and their impact on environment

CHE 3240 Chemical Processes and Equipment Design

Pre-requisite: none

CREDIT HOURS: 3

This course equips the students with knowledge in chemical processes and equipment design.

ENV: ENVIRONMENTAL STUDIES

ENV 2000 Introduction to Environmental Science

The Earth's physical resources (air, water, soil, and minerals) and human beings' impact upon them; pollution and depletion of resources; solid waste; methods of preventing, reducing, or eliminating problems. (WI)

Credit: 3 Units

ENV 2001 Sustainable Resource Management

The sustainable management of resources, agriculture, agro forestry, forestry, range lands, and fisheries. The economics environmental goals of improved management. Making things work, restoring previous damage, and improving the land. (WI)

Credit: 3 Units

ENV 2003 Environment Design

Shaping the world and being shaped by the world. The scientific foundations and principles of environmental design, implementation, and research. Psychology of design, ergonomics, materials, life cycle assessment, and methods for sustainability.

Credit: 3 Units

ENV 3100 Environmental Ethics in a Cross-Cultural Context

The ethical dimensions of environmental problems. Cultural tradition and the expanding circle. Interspecific justice, ecofeminism, theological, moral, and ethical aspects of endangered species.

Credit: 3 Units

ENV 3200 Water Use and Management

The limitations of world water resources and increased conflicts; critical importance of conservation. Emphasis on increasing efficiency of use and reuse. Use of case studies and applied problems to examine cultural conflicts and opportunities for cooperation in water resource management.

Credit: 3 Units

ENV 3288 Field Studies

The essential tools for the environmental professional fieldwork and field studies. Environmental restoration or research projects. Credit opportunities for field work at an established international program.

Credit: 3 Units

ENV 3300 Energy Use and Management

Energy sources both renewable and non-renewable; patterns of energy consumption; environmental impact of various energy sources; air pollution; energy allocation and distribution.

Credit: 3 Units

ENV 3500 Regional Environment

Environmental setting, history of land use, concepts and policy issues associated with renewable and non-renewable natural resource management, pollution, environmental protection and regulation.

Credit: 3 Units

ENV 3800 Environmental History

Explores the methodology and value of interpreting

the history of landscapes and resources. Reviews the importance of environmental history and environmental management by indigenous people in understanding the environmental setting of today. Uses case studies, like California environmental history 1600-2000, and emphasizes finding solutions for the future by understanding the past. (WI)

Credit: 3 Units

ENV 4000 Environmental Economics

Economics and environmental issues. Concepts and policy issues associated with renewable and non-renewable natural resource management, pollution, environmental protection, and regulation. Opportunities for green entrepreneurship are examined.

Credit: 3 Units

ENV 4100 Environmental Restoration

Scientific foundations and principles of environmental restoration, project design and implementation. Methods and techniques for restoring lands and waterways covered in class and field.

Credit: 3 Units

ENV 4200 Environmental Law

Laws, international agreements, environmental assessment, and agencies that provide for protection of the environment and their impact and effectiveness; future needs and directions.

Credit: 3 Units

EPI: EPIDEMIOLOGY

EPI 1000 Epidemiology and Demography

This course is designed to equip the learner with knowledge, skills and attitudes to be able to apply epidemiological methods and demographic data in disease prevention and control in the community.

Pre-requisite: None

Credit Units: 3

EPI 1010 Epidemiology Of Diseases

This course introduces students to the basic methods for infectious disease epidemiology and case studies of important disease syndromes and entities.

Pre-requisite: EPI 1000

Credit Units: 3

EPI 2010 Nutritional Epidemiology

This course introduces students to the methodologies of dietary assessment and their application to design, conduct, analysis, and interpretation of epidemiologic studies related to nutrition.

Pre-requisite: EPI 1010, MIC 2360

Credit Units: 3

EPI 3010 Advanced Epidemiology

This course explores advanced epidemiological techniques and builds upon the epidemiological knowledge and skills taught in EPI1010, Introduction to Epidemiology. The focus of the course is on the importance of epidemiological methods, and will give students a deeper understanding of design and sources of bias in epidemiological studies;

Effect Measure Modification, Advanced concepts in confounding.

Pre-requisite: EPI1010

Credit Units: 3

EPI 4020 Genetic And Molecular Epidemiology

This course will provide the student with an overview of basic methods in genetic epidemiology, with application to common complex diseases, application of epidemiologic techniques to human health problems. The students are expected to gain laboratory and informatics skills needed to incorporate genomic data into their research.

Pre-requisite: EPI 1521, EPI 1010

Credit Units: 3

EPI 4010 Exposure Assessment In Epidemiology

The course will acquaint students with the principles of exposure assessment and its role in occupational hygiene, epidemiology, and toxicology and risk assessment.

Pre-requisites: PHT 2010, BST 3010

Credit Units: 3

EPI 4030 Pharmacoepidemiology and Drug Safety

This course introduces students to the typical problems (e.g. confounding by indication, rare side effects) and approaches to deal with these problems in the practice of pharmacoepidemiology.

Pre-requisites: EPI 3010

Credit Units: 4.5

HAN: HUMAN ANATOMY

HAN 1321 Human Anatomy I

This course aims to teach the student historical perspectives of anatomy, the terminologies used and levels of the structural complexity of the body. This will involve the development, general organisation and gross features of cardiovascular, respiratory, musculoskeletal and lymphatic systems.

Credit Units: 3

HAN 1322 Human Anatomy II

The objective of the course is to teach the student the general organisation, development, histological features and gross features of digestive, reproductive and urinary systems.

Prerequisites: HAN 1321

Credit Units: 4.5

HAN 1323 Human Anatomy III

This course aims to teach the student the general organisation, development, histological features and gross features of the nervous system and special sensory organs.

Prerequisites: HAN 1321

Credit Units: 4.5

GNP: GLOBAL NURSING PROGRAM

HSC: HEALTH ECONOMICS

GNP 3333 Global nursing practice II

This course is designed to enable the learner to acquire knowledge, attitude and skills to be able to practice as a global nurse.

Credits: 3.0 units

Pre-requisite: GNP 2335 Global Nursing Practice I, CNP 3321 Pediatric Ward Clinical Placement, CNP 3322 Medical & Surgical Clinical Placement II, CNP 3323 Midwifery Clinical Placement II

HSC 1330 Calculus for Health Sciences

This course will introduce students to the fundamentals of differential and integral calculus as well as discrete modelling techniques in the context of the health sciences

Pre-requisites: MTH 1109, BST 2020

Credit Units: 3

HSC 1394 Introduction to Global Health

This course provides students with a broad overview of global health and insight into the challenges currently facing global health.

Pre-requisite: None

Credit Units: 3

HSC 2391 Principles of Health Economics

The course is designed to give students a basic grounding in the theory and practice of health economics.

Pre-requisite: None

Credit Units: 3

HSC 2391 Health Economics

The main objective of this course is to teach the students on health economics concepts, methods used in economic evaluations, health care priority setting, critical issues on health systems strengthening, expenditure tracking tools, and how to relate them to the evaluation of health care in an integrated and complex healthcare environment, and how these lead to effective policy and decision-making.

Credit Units: 3

HSC 3395 Environmental & Occupational Health

This course is designed to equip the learner with knowledge of environmental and occupational health to be able to address disease prevention, health promotion and maintenance of healthy environment and safety at work place.

Pre-requisite: None

Credit Units: 3

HSC 3492 Law and Bioethics in Research (ILI)

The course introduces students to bioethics as an inter-disciplinary inquiry into ethical issues in health care.

Pre-requisite: None

Credit Units: 3

HSC 3492 Law and Ethics in Research (OI)

The course involves different ethical issues, such as bias, fraud, plagiarism, conflicts of interest, falsification of research results, informed consent, and attribution of authorship and adequacy of peer review publication processes. The course intends to equip the students with the technical capacity to identify an ethical research project. Also assist students to manage and evaluate a research project, from design to publication, from an ethical standpoint and to regulate research activity.

Prerequisites: HSC 3492

Credit Units: 3

HSC 4010 Sociology for Health Sciences

This course gives students the foundation s a n d inter vention strategies for promoting the health of individuals, their families, workplaces and communities by taking a multi- level approach to the design of public healthcare. From a sociological context, this course contextualizes the social aspects of health and illness, examining the relationship between social factors and health outcomes.

It also examines the experience of illness, and outlines how to develop basic health promotion initiatives for populations across the ages (from children to elderly) in diverse settings globally.

Pre-requisite: SOC 2201

Credit Units: 3

HSC 4396 Fundamentals of Global Health

This course introduces students to international public health, especially of the developing world.

Pre-requisites: HSC 1394, PHT 3010

Credit Units: 3

HSC 4494 Practicum and Attachment

The purpose of the course is to provide students with a work-related experience designed to integrate epidemiological and biostatistical theory and practice in an applied setting under supervision.

Pre-requisites: HSC 4396

Co-requisites: HSC 4495

Credit Units: 8

HSC 4495 Project Planning and Proposal Development

This course is a practical introduction to the elements of proposal and grant writing. Students will be able to draft successful proposals for non-profit and business organisations.

Co-requisites: HSC 4494

Credit Units: 3

HSC 4496 Research Methods in Health Sciences

This subject introduces the principles of research methodology as relevant to the health sciences. It examines the context of research in professional practice in the healthcare field, and equips students with the basic research skills necessary for their continuing professional education.

Pre-requisites: HSC 3492

Credit Units: 3

MIC: MICROBIOLOGY

MIC 1224 Medical Bacteriology and Mycology

PREREQUISITES: None

CREDIT HOURS: 4.5

This course is meant to equip the learner with knowledge, skills and attitudes to be able to apply concepts and principles of microbiology to provide nursing care to patients and clients.

MIC 1234: Medical Parasitology and Entomology

PREREQUISITES: None

CREDIT HOURS: 4.5

This course is a survey of human protozoans and helminths and Entomology, using selected taxa to illustrate concepts and patterns of parasite/host evolution, systematics, physiology, morphology, life cycle, ecology, and behavior.

MIC 1235 Medical Virology and Immunology

PREREQUISITES: None

CREDIT HOURS: 3

This course is meant to equip the student with the necessary knowledge, skills and attitudes to be able to apply the concepts and principles of human immune mechanisms in provision of care to patients/clients.

MIC 2175 Bacteriology

PREREQUISITES: BCM 1341 Cellular Biology

CREDIT HOURS: 4.5

The purpose of the course is to provide students with knowledge on the role of microbiology in medicine and of bacteria in causing diseases.

MIC 2260 Introduction to Parasitology and Disease Vectors

PREREQUISITES: BCM 1341

CREDIT HOURS: 4.5

The purpose of the course is to equip the students

with knowledge and skills needed to identify different groups of parasites, isolate them and explain their medical and or economic importance.

MIC 2360 Introduction to Microbiology & Parasitology

The course provides an understanding of biology of microbial agents including bacteria, viruses, fungi, helminthic and protozoal parasites and various vectors that are that are important in agents of human and animal diseases.

Pre-requisites: None

Credit Units: 4.5

MIC 2365: Bacteriology (Medical Microbiology I)

The course aims to train the student on the relationship between microbes and disease, and how to use this knowledge to make diagnoses and manage diseases of microbial infections.

Prerequisites: BCM 1341

Credit Units: 4.5

MIC 2361 Bacteriology And Mycology (Medical Microbiology I)

This is an introductory course in Medical Microbiology that focuses on the structure, biology, and genetics of bacteria and fungi in relation to human diseases, the immune system and chemotherapeutic agents relevant for their treatment.

Prerequisites: BCM 1341

Credit Units: 4.5

MIC 2362 Parasitology and Entomology (Medical Microbiology II)

The objective of the course is to train the student on the different types of parasites and vectors; how to make diagnoses, mode of transmission, pathogenesis clinical signs and symptoms and complications of parasitic infections, treatment, prevention and how to manage the

diseases they cause.

Prerequisites: MIC2361

Credit Units: 4.5

MIC 2366: Virology and Mycology (Medical Microbiology III)

The course aims to train the student on the different types of viruses and how to diagnose and manage diseases they cause and also to familiarize the student with immune system and how it responds to infection.

Prerequisites: BCM 1341

Credit Units: 3

MIC 2367: Immunopathology

The course Introduces the principles of immunology including: development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex reactions and antigen presentation, T cell receptors (genetics, structure, selection), T cell activation and effector functions, anergy and apoptosis, cytokines, phagocytic cell function, immune responses to infectious organisms and tumors, autoimmune diseases, autoimmunity, allergies, and immune deficiencies.

Prerequisites: BCM1341, MIC2361, MIC 2362 AND MIC 23632)

Credit Units: 3

MIC 2380 Principles of Microbiology

PREREQUISITES: none

CREDIT HOURS: 4.5

The purpose of the course is to provide students with knowledge on the role of viruses and fungi in plant and animal health and also in the environment.

MTH: MATHEMATICS

MTH 1110 Applied Calculus

Pre-requisite: none

CREDIT HOURS: 3

Course description

The Purpose of the Course is to enable the student understand the fundamental concepts of differential and integral calculus, their techniques and applications

MTH 1111 Probability and Statistics

Pre-requisite: MTH 1110

CREDIT HOURS: 3

The purpose of this course is to enable the student understand the concepts of Probability and descriptive Statistics, and to introduce them to various measures and tools used in summary and analysis of data.

NSC: NATURAL SCIENCE NUR: NURSING

NSC 2205 Human Physiology

Functions of the systems of the human body and their relation to homeostasis; includes disease prevention and cure, health, wellness, and nutrition.

Credit: 3 Units

NSC 2212 Life, Environment and Society

For the non-science major; important scientific issues affecting society; topics include the origin of life, health issues, necessities of life, energy and environmental problems.

Credit: 3 Units

NSC 2215 Introduction to Physical Mechanics

Introduction to topics in physics for the non-science major: discusses the motion of objects and Newton's laws, temperature, electromagnetic waves and sound waves.

Credit: 3 Units

NSC 2216 Introduction to Earth Sciences

Introduction to topics from chemistry, geophysics, geology, and astronomy; discusses the structure of atoms, the periodic table, chemical reactions, earth's geophysical structure and earthquakes, and universe, galaxies and solar systems.

Credit: 3 Units

NSC 3304 Biology and the Environment

Introduction to biology that stresses the relationship of living things to their physical and biotic environments; biological molecules and processes, cell structure and function, evolution, heredity, and genetics; species, diversity of life forms, ecosystems, and the interdependence of ecosystem components. (WI)

Credit: 3 Units

NUR 1313 Professionalism and Nursing Theories

This course meant to introduce the learner to the fundamental concepts applicable to nursing and health sciences.

Credits: 3.0 units

NUR 1314 Communication and Counselling

This course is designed to enable the learner to acquire knowledge, skills and attitude to communicate effectively and provide counseling to clients and patients.

Credits: 3.0 units

NUR 1321 Fundamental of Nursing Practice

This course is intended to build the competence of the learner in performance of fundamental nursing procedures and in provision of first aid and basic life support to patients with various conditions and in varied settings.

Credits: 4.5 units

NUR 1322 Nutrition and Health

This course is designed to enable learners acquire competences in nutrition to be able to provide nursing care to individuals with various nutritional needs and disorders as well as promote community health through nutritional strategies.

Credits: 4.5 units

NUR 2311 Health Assessment

This course is designed to enable the learner to acquire knowledge, attitude and skills in performing health assessment of a client.

Credits: 4.5 units

Pre-requisite: SOS 2207 Medical sociology and Anthropology, NUR 1314 Counselling and communication, NUR 1321 Fundamental of nursing practice, HAN 1231 Human Anatomy III, PHY 1232 Medical Physiology III

NUR 2313 Medical surgical Nursing I

The course is designed to make the learner be competent in providing nursing care to adults

with various respiratory, cardiovascular and hematological systems conditions and disorders.

Credits: 6 units

Pre-requisite: HAN1211: Human Anatomy I; PHY1212: Medical Physiology I; NUR1313: Professionalism and Nursing theories; HAN1221: Human Anatomy II; PHY1222: Medical Physiology II; BCM1223: Medical Biochemistry I; MIC1224: Bacteriology and mycology; NUR1321: Fundamental of nursing practice; HAN1231: Human Anatomy III; PHY1232: Medical Physiology III; BCM1233: Medical Biochemistry II; MIC1234: Virology and Parasitology; MIC1235: Immunology

NUR 2314 Midwifery I (Introduction to Midwifery and Pregnancy)

The course is designed to provide knowledge, skills and attitudes to enable the learner gain competency in midwifery and management of a pregnant woman.

Credits: 5.0 units

Pre-requisite: HAN 1231 Human Anatomy III, PHY 1232 Medical Physiology III, NUR 1321 Fundamentals of Nursing Practice, NUR 1322 Nutrition and Health

NUR 2322 Community Health Nursing I

This course designed to enable the student to provide comprehensive community health nursing services to individuals, families and community across life cycle cohorts.

Credits: 3.0 units

Pre-requisite: NUR 1321 Fundamentals of Nursing Practice, NUR 1322 Nutrition & Health, NUR 2311 Health Assessment

NUR 2323 Medical surgical Nursing II

This course is meant to make the learner be competent in providing nursing care to individuals with various nervous, endocrine and digestive systems conditions and disorders.

Credits: 6 units

Pre-requisite: HAN1211: Human Anatomy I; PHY1212: Medical Physiology I; NUR1313: Professionalism and Nursing theories; HAN1221:

Human Anatomy II; PHY1222: Medical Physiology II; BCM1223: Medical Biochemistry I; MIC1224: Bacteriology and mycology; NUR1321: Fundamental of nursing practice; HAN1231: Human Anatomy III; PHY1232: Medical Physiology III; BCM1233: Medical Biochemistry II; MIC1234: Virology and Parasitology; MIC1235: Immunology

NUR 2324 Sexual and reproductive health

The course is designed to enable the learner acquire knowledge, attitude and skills to demonstrate competence in providing reproductive health to women across the lifespan.

Credits: 5.5 units

Pre-requisite: NUR 2311 Health Assessment, NUR 2312 Clinical Pharmacology II, NUR 2314 Midwifery I

NUR 2326 Midwifery II (Labour, Delivery, and Obstetric emergencies)

The course will equip the learner with knowledge, skills and attitudes to be able to apply the concept of obstetrics and midwifery in managing labor and obstetric emergencies.

Credits: 5.0 units

Pre-requisite: NUR 2311 Health Assessment, PHM 2312 Clinical Pharmacology II, NUR 2314 Midwifery I, NUR 2323 Medical-Surgical Nursing II

NUR 3311 Communicable and vector borne diseases

This course is designed to equip the learner with knowledge, skills and attitudes necessary for recognizing, preventing and providing care to individuals, families and communities suffering from communicable and vector borne diseases (CVBDs).

Credits: 3.0 units

Prerequisite: MIC 1224 Bacteriology and mycology, MIC 1234 Virology and parasitology

NUR 3312 Midwifery III (Puerperium and Newborn)

The unit will equip the learner with knowledge, skills and attitudes to be able to apply the concept of

obstetrics and midwifery in evidence-based nursing management of maternal and newborn health issues during the puerperium period.

Credits: 5.0 units

Pre-requisite: NUR 2311 Health Assessment, PHM 2312 Clinical Pharmacology II, NUR 2314 Midwifery I, NUR 2323 Medical-Surgical Nursing II, NUR 2324 Sexual & Reproductive Health

NUR 3313 Community Health Nursing II

This course designed to enable the student to provide comprehensive community health nursing services to individuals, families and community across life cycle cohorts.

Credits: 3.0 units

Pre-requisite: NUR 2322 Community Health Nursing I, EPI 1000 Epidemiology & Demography

NUR 3314 Pediatric Nursing

This course is designed to equip the learner with knowledge, skills and attitudes to be able to provide nursing care to children with various conditions and disorders.

Credits: 6.0 units

Pre-requisite: HAN1211: Human Anatomy I ; PHY1212: Medical Physiology I : NUR1313: Professionalism and Nursing theories; HAN1221: Human Anatomy II ; PHY1222: Medical Physiology II; BCM1223: Medical Biochemistry I; MIC1224: Bacteriology and mycology; NUR1321: Fundamental of nursing practice ; HAN1231: Human Anatomy III ; PHY1232: Medical Physiology III ; BCM1233: Medical Biochemistry II; MIC1234: Virology and Parasitology; MIC1235: Immunology NUR2313: Medical surgical Nursing I; NUR2323: Medical surgical Nursing II; NUR3317: Medical Surgical Nursing III

NUR 3316 Gynecological Nursing

The course is designed to equip the learner with knowledge, skills and attitudes to provide evidence-based care of gynaecological disorders to individuals, families and communities across the lifespan.

Credits: 3.0 units

Pre-requisite: NUR 2311 Health Assessment, PHM 2312 Clinical Pharmacology II, NUR 2323 Medical-Surgical Nursing II, NUR 2324 Sexual & Reproductive Health

NUR 3317 Medical surgical Nursing III

This course is intended to make the learner be competent in providing nursing management to patients with integumentary, musculoskeletal, urinary and male reproductive systems conditions and disorders.

Credits: 3.0 units

Pre-requisite: HAN1211: Human Anatomy I; PHY1212: Medical Physiology I: NUR1313: Professionalism and Nursing theories; HAN1221: Human Anatomy II; PHY1222: Medical Physiology II; BCM1223: Medical Biochemistry I; MIC1224: Bacteriology and mycology; NUR1321: Fundamental of nursing practice; HAN1231: Human Anatomy III; PHY1232: Medical Physiology III; BCM1233: Medical Biochemistry II; MIC1234: Virology and Parasitology; MIC1235: Immunology

NUR 4311 Medical surgical (specialties) I (special senses)

This course is intended to enable the learner be able to provide nursing care to individuals with ophthalmic, ENT and dental conditions.

Credits: 6.0 units

Pre-requisite: HAN1211: Human Anatomy I; PHY1212: Medical Physiology I: NUR1313: Professionalism and Nursing theories; HAN1221: Human Anatomy II; PHY1222: Medical Physiology II; BCM1223: Medical Biochemistry I; MIC1224: Bacteriology and mycology; NUR1321: Fundamental of nursing practice; HAN1231: Human Anatomy III; PHY1232: Medical Physiology III; BCM1233: Medical Biochemistry II; MIC1234: Virology and Parasitology; MIC1235: Immunology

NUR 4312 Medical surgical (specialties) II (Acute care)

This course is designed to equip the learner with knowledge, skills and attitudes to be able to provide nursing care to individuals with renal impairments, critical conditions, trauma & emergency conditions and those requiring peri-operative care.

Credits: 4.0 units

Pre-requisite: HAN1211: Human Anatomy I; PHY1212: Medical Physiology I : NUR1313: Professionalism and Nursing theories; HAN1221: Human Anatomy II ; PHY1222: Medical Physiology

II; BCM1223: Medical Biochemistry I; MIC1224: Bacteriology and mycology; NUR1321: Fundamental of nursing practice ; HAN1231: Human Anatomy III ; PHY1232: Medical Physiology III ; BCM1233: Medical Biochemistry II; MIC1234: Virology and Parasitology; MIC1235: Immunology

NUR 4313 Medical surgical (specialties) III (Palliative, Oncology, gerontology and forensic Nursing)

The course is meant to enable the learner obtain knowledge, skills and attitudes to enable him/her provide palliative, oncology, gerontological and forensic nursing care to individuals, families and communities.

Credits: 4.0 units

Pre-requisite: HAN1211: Human Anatomy I; PHY1212: Medical Physiology I: NUR1313: Professionalism and Nursing theories; HAN1221: Human Anatomy II; PHY1222: Medical Physiology II; BCM1223: Medical Biochemistry I; MIC1224: Bacteriology and mycology; NUR1321: Fundamental of nursing practice; HAN1231: Human Anatomy III; PHY1232: Medical Physiology III; BCM1233: Medical Biochemistry II; MIC1234: Virology and Parasitology; MIC1235: Immunology

NUR 4314 Mental Health and Psychiatric Nursing

This course is designed to equip the learner with knowledge, skills and attitudes in order to provide mental health and psychiatric nursing care in varied settings.

Credits: 3.0 units

Pre-requisite: HAN1211: Human Anatomy I; PHY1212: Medical Physiology I: NUR1313: Professionalism and Nursing theories; HAN1221: Human Anatomy II ; PHY1222: Medical Physiology II; BCM1223: Medical Biochemistry I; MIC1224: Bacteriology and mycology; NUR1321: Fundamental of nursing practice ; HAN1231: Human Anatomy III ; PHY1232: Medical Physiology III ; BCM1233: Medical Biochemistry II; MIC1234: Virology and Parasitology; MIC1235: Immunology

NUR 4315 Leadership and Management in Nursing

This course is designed to enable the learner acquire competences in leadership, management and governance to be able to manage health systems

and institutions.

Credits: 4.5 units

NUR 4316 Curriculum and Instruction in Nursing

This course is designed equip the learner with competences in curriculum and instruction to be able to perform roles and functions of a nurse & health educator in health academic institutions and training hospitals.

Credits: 3.0 units

NUR 4317 Research Proposal

The course is meant to enhance the competence of the learner through a practical approach to enable him/her be able to design and develop research proposals.

Credits: 3.0 units

Pre-requisite: GRM 2000 Introduction to Research methods; BST 1010 Introduction to biostatistics

NUR 4322 Research Report

The course is meant to enhance the competence of the learner through a practical approach to enable him/her be able to implement, disseminate and utilize scientific research.

Credits: 3.0 units

Pre-requisite: GRM 2000 Introduction to Research methods; BST 1010 Introduction to biostatistics; NUR 4317 Research Proposal

NUR 4323 Nursing Informatics

This course introduces nursing students to the field of nursing informatics, emphasizing the integration of nursing science, information science, and computer technology to enhance patient care. This course introduces students to the principles and applications of nursing informatics, technology support for clinical decision-making, patient care, and healthcare administration.

Credits : 4.5 units

PAT: PATHOLOGY

PAT 2215 Human Pathology

This course is meant to enable the learner apply concepts and principles of human pathology in order to effectively provide nursing care to patients/clients.

Pre-requisite: BCM 1233 Medical Biochemistry II, MIC 1235 Immunology

Credit Units: 3

PAT 3371 General Pathology (Human Pathology I)

The main objective of the course is to introduce the students to the etiology, pathogenesis, morphologic changes and functional derangements and clinical significance of diseases.

Prerequisites: HAN 1323; PHY 2336; BCM 2344; MIC 2363

Credit Units: 3

PAT 3372 Haematology (Human Pathology II) WI

To train the student on the importance of blood and how its components are used in the diagnosis, treatment and monitoring of diseases, teach students different components of blood, clinical significance of blood transfusion. Students also to learn the role of homeostasis, identify the etiology and pathogenesis of fluid, electrolyte, and acid/base imbalances.

Prerequisites: PAT 3371

Credit Units: 4.5

PAT 3373 Clinical Chemistry (Human Pathology III) OI

To train the student on how the serum levels of hormones, fluids and electrolytes are used for diagnosis pathogenesis of fluid, acid/base imbalances and to monitor treatment of diseases

Prerequisites: PAT 3371

Credit Units: 4.5

PHM: PHARMACY

PHM 1336 Clinical Pharmacology I

This course is meant to equip the student with the concepts and principles of clinical pharmacology to be able to provide treatment and other forms of nursing care to patients/clients.

Pre-requisite: HAN 1221 Human Anatomy II; PHY 1212 Medical Physiology I

Credits Units: 3

PHM 2312 Clinical Pharmacology II

This course is meant to equip the student with the concepts and principles of clinical pharmacology to be able to provide treatment and other forms of nursing care to patients/clients.

Pre-requisite: PHM 1336 Clinical Pharmacology I

Credits Units: 3

PHM 3401 Introduction to Analytical Chemistry

The main objective of this course is to teach the student to the common techniques used in contemporary analytical chemistry and covers the science of chemical separation, identification, and measurement. The student will learn the principles and applications of analytical methods, with emphasis on advanced separation science, dynamic electrochemistry, spectroscopy and mass spectrometry. *Prerequisites:* CHE 2302; CHE 2303; PHY 2333; CHE 2304

Credit Units: 3

PHM 3402 Instrumental Methods of Analysis

The aim of the course is to introduce the student to basic laboratory techniques in analytical chemistry, spectroscopy, explain solutions conductivity, fundamentals of conductometric analysis, methods of electrochemical analysis, their classification and instrumentation, potentiometric analysis, instrumentation and electrode types, classify amperometric methods and explain their fundamentals, the principles of coulometric and electrogravimetric methods.

Prerequisites: CHE 2302; CHE 2303; PHY 2333

Credit Units: 4.5

PHM 3403 Medicinal Chemistry I

This course focuses on the fundamental aspects and current methodologies involved in the drug discovery process. These include the chemical structure, design, synthesis, development process and physicochemical characterization of thermodynamically active molecules. This course will contribute significantly to the professional pharmacy curricula.

Prerequisites: CHE 2302; CHE 2303; BCM 1342; PHM 3351; PHM 3471

Credit Units: 7.5

PHM 3404 Drug Discovery and Development

As an introduction to drug discovery and development, this course focuses on the fundamentals of the chemistry, biochemistry, pharmacology and metabolism of clinically important drug molecules that are used as chemotherapeutic agents.

Credit Units: 4.5

PHM 3405 Medicinal Chemistry of Pharmacodynamics Drugs

At the end of this course, the students are expected to have knowledge regarding the relationship between the chemical structures and the drug pharmacodynamics of various chemotherapeutic, semisynthetic and natural product agents

Credit Units: 3

PHM 3411 Introduction to Pharmacy (Pharmaceutics I)

Pharmacy is the art and science of preparing and dispensing medications and the provision of drug related information to the public. This course will cover the history of pharmacy and the scientific domain, applied realm and subject's connection of the following subjects: human biology, plant biology, pharmacology, pharmaceutical chemistry, pharmaceutical analysis, pharmaceutics, biopharmaceutics, pharmaceutical administration, pharmaco-economics, medicine and forensic pharmacy. It will also give an overview of the role in society and the employment opportunities for the

pharmacist.

Prerequisites: PHY 2336, BCM 2346, CHE 2303, MIC 2362

Credit Units: 3

PHM 3412 Biopharmaceutics (Pharmaceutics II)

This course aims to teach the student the routes of drug administration, distribution, metabolism, elimination and also outline the zero, first order and second order kinetics. He/she will also learn the application of this knowledge in designing drug therapy especially in chronic illness, pediatrics and geriatrics and in people with liver or kidney disease.

Prerequisites: PHM 3411

Credit Units: 3

PHM 3413 Physical Pharmaceutics (Pharmaceutics III)

This course aims to teach the student the laws and factors that affect flow and mixing of liquids. He/she will learn about the physical and chemical properties of fluids that affect formulation and the laws that govern mixing of fluids in drug formulations.

Prerequisites: PHM 3411

Credit Units: 4.5

PHM 3451 General Pharmacognosy

This course is meant to provide the students with an overview of the field of natural product chemistry, especially identification of different types of natural products, their occurrence, structure, extraction and isolation, biosynthesis and properties. They will learn the set up of and record keeping in a herbarium; and plant metabolites and toxicity. They will also be taught the use of natural products as starting materials for synthesis of medicines.

Prerequisites: BCM 1341; CHE 2302; CHE 2303;

Credit Units: 4.5

PHM 3471 Basic Pharmacology & Toxicology (Pharmacology I)

The objective of this course is to train the student on how drugs enter the body, get distributed, act and eventually get eliminated. Specifically, the student will learn potential targets of drug action, their mechanisms of action and effects on disease processes, the concepts of drug-receptor interactions and poisoning and its management.

Prerequisites: PHY 1331; BCM 2344;

Credit Units: 3

PHM 3472 Anti-Infective Drugs (Pharmacology II)

This course aims to provide the student with the knowledge of the properties, effects, and therapeutic values of anti-infective agents. He/she will learn the classification, modes of action, indications, dose, formulations, adverse effects, contraindications and interactions of anti-infective drugs. The student will also learn to identify trade and generic names of the major anti-infective drugs.

Prerequisites: PHM 3471

Credit Units: 6

PHM 3473 Respiratory and Gastrointestinal Pharmacology (Pharmacology III)

This course is a continuation of the study of properties, effects, and therapeutic values of the major systemic pharmacological agents. In particular, the student will learn the activities, clinical applications and side effects of drugs for respiratory and gastrointestinal diseases.

Prerequisites: PHM 3471;

Credit Units: 4.5

PHM 3481 Introduction to Clinical Pharmacy

This course aims to give the students an understanding of the intricacies of the hospital and community pharmacy practice environments. He/she will learn how to formulate a pharmaceutical care plan, identify the components of rational prescribing, and manage poisoned patients. He/she will also learn how to set up and manage hospital and community pharmacy practice.

Prerequisites: PAT 3371; PHM 3471;

Credit Units: 3

PHM 3483 Respiratory and Gastrointestinal Disorders

This course aims to give the students an understanding

of how to manage respiratory and gastrointestinal diseases in the hospital and community pharmacy practice settings. He/she will learn how to formulate a pharmaceutical care plan and identify the components of rational prescribing for respiratory and gastrointestinal diseases.

Prerequisites: PAT 3371; PHM 3471;

Credit Units: 4.5

PHM 3485 Clinical Management of Bacterial and Viral Diseases

This course gives the students an understanding of the functions of clinical pharmacy and the hospital and community pharmacy practice in management of Bacterial and Viral diseases.

Credit Units: 3

PHM 3486 Clinical Management of Fungal, Parasitic and Protozoa Diseases

This course gives the students an understanding of the functions of clinical pharmacy and the hospital and community pharmacy practice in management of Fungal, Parasitic and Protozoal diseases.

Credit Units: 4.5

PHM 4404 Medicinal Chemistry II

This course focuses on the fundamental aspects and current methodologies involved in the drug discovery process. The fundamental aspects include the design, synthesis, development process, Identification, assay, and physicochemical characterization of Chemotherapeutic agents and related molecules. This course will contribute significantly to the professional pharmacy curricula.

Prerequisites: MIC 2361; PHM 3403

Credit Units: 7.5

PHM 4405 Pharmaceutical Analysis I

The aim of this course is to introduce the student to the analysis (both qualitative and quantitative) of pharmaceutical agents and metabolites as well as the fundamental techniques used for patient testing in clinical laboratories. *Prerequisites:* PHM 3402; PHM 3401; PHM 4404

Credit Units: 4.5

PHM 4406 Pharmaceutical Analysis II

This course aims to give the students deeper and more comprehensive knowledge in technical aspects of dosage form design, basic dosage

forms and their therapeutic applications. It focuses on dispensing techniques, dosage regimens and document retrieval

Prerequisites: PHM 4405;

Credit Units: 6

PHM 4414 Unit Operations (Pharmaceutics IV) ILI

This course aims to teach the student regulatory and pre-marketing steps that determine the degree of success for every new drug in the market. It also covers different methods of extraction.

Prerequisites: PHM 3411

Credit Units: 4.5

PHM 4415 Powder Technology (Pharmaceutics V)

The objective of the course is to teach the student the properties, methods of measuring particle size and surface area of powders and methods used when preparing them.

Prerequisites: PHM 3411

Credit Units: 3

PHM 4416 Dispensing and Pharmacy Practice (Pharmaceutics VI)

This course aims to give the students deeper and more comprehensive knowledge in technical aspects of dosage form design, basic dosage forms and their therapeutic applications. It focuses on dispensing techniques, dosage regimens and document retrieval. Specifically, the students will learn the steps involved in dispensing, packaging materials, appropriate labeling of medicines and calculation of dosages.

Prerequisites: PHM 3411;

Credit Units: 4.5

PHM 4425 Pharmaceutical Analysis I

The aim of this course is to introduce the student to the analysis (both qualitative and quantitative) of pharmaceutical agents and metabolites as well as the fundamental techniques used for patient testing in clinical laboratories. *Prerequisites:* PHM 3402; PHM 3401; PHM 4404

Credit Units: 4.5

PHM 4426 Pharmaceutical Analysis II

This course aims to give the students deeper and more comprehensive knowledge in technical

aspects of dosage form design, basic dosage forms and their therapeutic applications. It focuses on dispensing techniques, dosage regimens and document retrieval

Prerequisites: PHM 4405

Credit Units: 4.5

PHM 4452 Complementary and alternative medicine

This course is designed to enable students to describe classification of complementary alternative medicine, identify natural products used as complementary medicines, state the integration of complementary alternative medicine and to demonstrate on how to create a herbal product and integrate it into the current pharmaceutical market.

Prerequisites: PHM 3451

PHM 4451: Fundamentals of Phytochemistry

The course is to focus on the fundamentals of phytochemicals as therapeutic agents. Insights into the biosynthetic processes of plants to generate secondary metabolites shall be covered with the ultimate evaluation of the typical natural products that generate efficacious phytochemicals. The principles of extraction, isolation and identification techniques for typical groups of phytochemicals profiling from a given sample is to be covered.

Prerequisites: PHM 3451

Credit Units: 4.5

PHM 4454: Elements of Other Therapeutic Natural Products

This course aims to give the student an overview of the field of natural product chemistry in relation to extraction of active compounds from herbs, their cleaning, isolation, and chemical analysis (using sublimation, distillation, fractional crystallization, chromatographic and spectrometric methods) but also biogenetical investigations and biosynthesis of main primary and secondary metabolites (enzymes, carbohydrates, fats and fatty acids, aromatic compounds, amino acids, peptides and proteins, isoprenoids).

Prerequisites: PHM 3451

Credit Units: 3

PHM 4474 Cardiovascular and Renal Pharmacology (Pharmacology IV) OI

This course is a continuation of the study of

properties, effects, and therapeutic values of the major systemic pharmacological agents; drugs for cardiovascular and renal diseases. The course also involves mechanism of action of drugs that act on cardiovascular and renal systems to identify trade and generic names of the cardiovascular and renal drugs.

Prerequisites: PHM 3471;
Credit Units: 4.5

PHM 4475 Endocrine and Reproductive Pharmacology (Pharmacology V)

This course is a continuation of the study of properties, effects, and therapeutic values of the major systemic pharmacological agents; drugs for endocrine and reproductive diseases. The course will involve the mechanism of action of drugs that act on endocrine and reproductive systems, to identify trade and generic names of the endocrine and reproductive drugs.

Prerequisites: PHM 3471;
Credit Units: 4.5

PHM 4510 Fundamentals of Pharmacometrics

Fundamentals of Pharmacometrics (Modelling and Simulation) will expose the student to cutting-edge tools and techniques used to answer complicated problems in drug development and utilization. It leverages information and knowledge from biomedical and pharmaceutical courses together with mathematical modelling and simulation, and clinical data from patients or published in the literature.

Pre-requisites: HSC 4496; BST 4020; EPI 4030
Credit Units: 3

PHM 5476 Nervous and Musculoskeletal Pharmacology (Pharmacology VI)

This course is a continuation of the study of properties, effects, and therapeutic values of the major systemic pharmacological agents; drugs for nervous and musculoskeletal diseases. He/she will learn the classification, modes of action, indications, dose, formulations, adverse effects, contraindications and interactions of drugs that are used to treat these conditions.

Prerequisites: PHM 3471;
Credit Units: 4.5

PHM 4484 Cardiovascular and Renal System Disorders (Clinical Pharmacy IV)

This course aims to give the students an understanding of how to manage cardiovascular and renal systems disorders in the hospital and community pharmacy practice settings. He/she will learn how formulate a pharmaceutical care plan and identify the components of rational prescribing for cardiovascular and renal system disorders.

Prerequisites: PAT 3371; PHM 3471;
Credit Units: 3

PHM 4485 Endocrine and Reproductive System Disorders

This course aims to give the students an understanding of how to manage endocrine and reproductive systems disorders in the hospital and community pharmacy practice settings. He/she will learn how formulate a pharmaceutical care plan and identify the components of rational prescribing for endocrine and reproductive systems disorders.

Prerequisites: PAT 3371; PHM 3471;
Credit Units: 4.5

PHM 5486 Nervous And Musculoskeletal Disorders

This course aims to give the students an understanding of how to manage nervous and musculoskeletal systems disorders in the hospital and community pharmacy practice settings. He/she will learn how formulate a pharmaceutical care plan and identify the components of rational prescribing for nervous and musculoskeletal systems disorders.

Prerequisites: PAT 3371; PHM 3471;
Credit Units: 4.5

PHM 4491 Social and Behavioral Pharmacy

This course gives students the foundations and intervention strategies for promoting the health of individuals, their families, workplaces and communities by taking a multi-level approach to the design of public healthcare. Students learn how to address a range of health and social issues and how to develop basic health promotion initiatives for populations across the ages (from children to elderly) in diverse settings globally. The students will learn to find, understand, analyze, evaluate, and synthesize Health information. This will prepare them for patient counseling roles.

Prerequisites: HSC 3493
Credit Units: 6

PHM 4492 Introduction to social and behavioral Pharmacy

Social and Behavioral Aspects of Pharmacy Practice evolves around the field of medical sociology, with a more specific focus on the psychosocial aspects of medication use. With updated research findings included, a plethora of cases and theory applications allows the reader to learn modern day, real-time, pharmaceutical concepts. From analyzing perspectives on health behaviors to how pharmacy practice has fully evolved.

Credit Units: 3

PHM 4493: Applied social and Behavioral pharmacy (WI)

This course teaches the student how societal and individual behaviors intersect with health and illness behaviors. They will explore different systems and personal experiences when engaging in a variety of treatment options and consider how the pharmacy practice has evolved and the factors affecting the delivery of specific pharmacy services. It explains contributing factors to the structure and function of medication-use processes and approaches to Resolving Health Problems. This course also looks at treatment Planning and Participation and evaluating Patient Medication Use and Behavior.

It is target Care of Specific Patients System- Level Topics Involving Pharmacy Practice

Credit Units: 3

PHM 5477 Cancer, Ocular and Skin Pharmacology (Pharmacology VII)

This course introduces the student to a collection of concepts including: Cancer, Ocular and Dermatological therapies; Peripartum, Pediatric and Geriatric pharmacologies; Drug development. He/she will learn the classification, modes of action, indications, dose, formulations, adverse effects, contraindications and interactions of drugs that are used to treat these conditions. The student will also be taught the pharmacology of radiopharmaceuticals and the adverse effects of polypharmacy.

Prerequisites: PHM 3471;
Credit Units: 3

PHM 5478 Veterinary Pharmacology (Pharmacology VIII)

This course aims to provide the student with an overview of the drugs used to treat animal infections and pesticides used in the control of animal diseases. Specifically, the student will learn the classification, indications, doses, formulations, adverse effects, contraindications and interactions of drugs that are used to treat infections in animals. He/she will also learn the classification, mechanisms of action, indications, adverse effects, contraindications and toxicity of pesticides used in animals.

Prerequisites: PHM 3471;
Credit Units: 3

PHM 5407 Pharmaceutical Quality Control

This course is designed to be a continuation of PHM 4406 but which offers the student a real chance in the laboratory to learn the expertise of operating a Quality Control / Assurance laboratory. He/she will be trained on how to develop and implement Standard Operating Procedures for all the critical steps in the operations of a Quality Assurance/Control Laboratory. He/she will also learn the principles and values of Good Manufacturing Practices and Good Laboratory Practices.

Prerequisites: PHM 4406;
Credit Units: 3

PHM 5417 Dosage Forms (Pharmaceutics VII)

This course aims to teach the student the properties, ingredients, process of preparing and also outline the methods of controlling the process of preparing dosage forms.

Prerequisites: PHM 3411
Credit Units: 4.5

PHM 5418 Pharmaceutical Microbiology (Pharmaceutics VIII)

This course introduces the students to the concepts of sterile products and formulations. The content includes introduction to sterile products; facilities, garb and equipment; aseptic calculations; properties of sterile products; aseptic techniques; sterile product preparations such as total parenteral nutrition (TPN). They will be taught how to formulate, handle, admix and reconstitute sterile products. They will also learn the principles and application of

solubility, stability, and shelf life of sterile products.

Prerequisites: MIC 2361; PHM 3411

Credit Units: 4.5

PHM 5487 Neoplastic Disorders (Clinical Pharmacy VII)

This course aims to give the students an understanding of the functions of clinical pharmacy, formulation of pharmaceutical care plan for management, manage patients poisoned with drugs for treatment, and describe rational use of drugs for neoplastic disorders in paediatrics and geriatrics.

Prerequisites: PAT 3371; PHM 3471;

Credit Units: 4.5

PHM 5488 Ocular, Ear and Skin Disorders (Clinical Pharmacy VIII)

The objective of course is to teach the students the functions of clinical pharmacy and the hospital and community pharmacy practice in management of ocular, ear and skin disorders.

Prerequisites: PAT 3371; PHM 3471;

Credit Units: 4.5

PHM 5492 Pharmaceutical Marketing Management

This course provides the student with an overview of marketing activities and players in pharmaceutical industry. It describes the need for marketing, the types of marketing positions and the role of marketers, as well as how they interact with other internal and external stakeholders to achieve their goals. It also defines how promotional materials are created for various segments and the regulatory rules that govern marketing, plus how to measure

success in marketing

Prerequisites: None

Credit Units: 3

PHM 5493 Pharmacy Management

The objective of this course is to train the student on basic managerial skills essential for effective pharmacy practice. The student will learn the basic principles of management, the functions of human resource departments, drug supply cycle, basic financial management and how to effect change in an organisation.

Prerequisites: HSC 2391

Credit Units: 3

PHM 5494 Elective Industrial & Hospital Attachment (WI)

This course has two components that will provide the student with an overview of the operations of the main practice areas of pharmacy. The Hospital & Pharmacy Practice component will prepare students with the clinical skills and attitudes required to deliver effective patient care within the healthcare sector, sound knowledge to compound ex temporaneous preparations, practical dispensing skills, and to provide an understanding of healthcare systems. The Industrial Pharmacy will provide students with a strong foundation in the practice and application of current Good Manufacturing Practice and Good Laboratory Practice in the pharmaceutical industry.

Prerequisites: PHM 4416

Credit Units: 8

PHM 5497 Research Proposal (WI and OI)

This focuses on teaching the students on how to formulate research topics, how articulate how the

research should be performed and why, convey your understanding of why its needed, use of the existing literature, and clearly define research questions and approaches to answering them.

Prerequisites: HSC 3492; HSC 3493

Credit Units: 3

PHM 5498: Research Project and Thesis ((WI & OI).

The major focus of this course is to provide students with a strong research focus, training and skills in order to prepare them for careers in academia, industrial, community and clinical pharmacy research in or public/private institutions.

Pre-requisite PHM 5497

Credit Units: 3

PHM 5496 Pharmacy Law & Ethics (ILI)

This course focuses on the application of per tinent ethics, laws, rules, and regulations to the practice of pharmacy. Students will learn: where to find information regarding pharmacy law that they will continue to use through their professional life; the Kenyan laws that impact the practice of pharmacy, while emphasizing the legal and ethical principles applied by pharmacists in their daily decision-making; the governmental framework within which pharmacy is practiced, normative principles in the ethical tradition of Pharmacy, as well as acquire an understanding of the laws, regulations, and the ethical responsibilities applicable to pharmacists so that they will be able to protect the public and ensure patients' wellbeing.

Prerequisites: HSC 3493, PHM 5494

Credit Units: 3

PHM 6511: Molecular Pharmacology and pharmacokinetics

This course is designed to enable students to apply molecular biology principles in understanding the pathogenesis of disease process and use the same for reverse pharmacology drug discovery. In addition, the course will equip students with the basic genetic mechanisms, genome and genomic architecture, genomic variations, and regulatory mechanisms of the genome, global copy number variation assessment, genome sequencing, intracellular protein transport and trafficking, drug-receptor interaction, theories of receptors and molecular structures of receptors.

Credits: 3 units

Pre-requisite: None

PHM 6512: Clinical and Forensic Toxicology

This course deals with various toxicological aspects of the most commonly used drugs and toxic agents on human. These aspects include laboratory tests, mechanisms of toxicity, prognosis, complications and diagnosis and management principles. This course also deals with the study of the theoretical and practical aspects of the techniques used in the evaluation of the acute and chronic toxicity of drugs and other chemicals.

Credits: 3 units

Pre-requisite: None

PHM 6513: Applied pharmacometrics and clinical pharmacokinetics

This course aims to equip students with the necessary skills to apply principles of pharmacometrics and clinical pharmacokinetics. It covers a wide range of topics, including but not limited to physiological concepts related to kinetics, intravenous and extravascular dosing, dose regimen determination, concentration monitoring, the clinical relevance of drug metabolism, mathematical descriptions of pharmacokinetic/pharmacodynamic models and dose adjustment based on patients clinical and over all condition.

Credits: 3 units

Pre-requisite: None

PHM 6422: Vaccine Development and Bioassay methods in drug discovery research

This course is designed to equip students with the

knowledge and skill on vaccine development and on different experimental and bioassay methods for assaying the biological activities of natural products.

Credits: 4.5 units

Pre-requisite: None

PHM 6521: Computational pharmacology and toxicology

This course offers a comprehensive exploration of applying computer modelling and simulation approaches in medicine, pharmaceuticals, drug development, and drug discovery. Students will learn to use computational models and simulations to analyze drug behavior, evaluate pharmacokinetics and pharmacodynamics, and optimize dosing regimens. They will also gain insights into in silico clinical trials, artificial intelligence methods for understanding drug-pathophysiology relationships, and the role of quantitative system pharmacology. The course covers a wide range of activity areas, enabling students to develop practical skills and knowledge in using modelling and simulation techniques to describe and analyze phenomena in the field of pharmaceutical sciences.

Credits: 3 units

Pre-requisite: None

PHM 6522: Advanced Pharmacology and Integrated Therapeutics I

This course is designed to provide students with advanced knowledge and skills in pharmacology and integrated therapeutics for the treatment of nervous system, respiratory, and cardiovascular disorders. Students will delve into in-depth studies on the pharmacological mechanisms of drugs used to manage these disorders, as well as explore the integrated approach to their therapeutic applications.

Credits: 3 units

Pre-requisite: PHM 6511

PHM 6523: Pharmacogenomics and Pharmacovigilance

This course provides a comprehensive overview of pharmacogenomic testing, focusing on the science and practical application of utilizing genetic biomarkers to personalize drug therapy and optimize treatment outcomes. Students will learn about the principles of pharmacogenomics and how to interpret genetic test results to guide dose modifications and medication selection. Additionally, the course equips students with the necessary knowledge and skills to detect, assess, and report adverse drug reactions, as well as effectively manage and mitigate these reactions.

Credits: 3 units

Prerequisite: None

PHM 6531: Advanced Pharmacology and Integrated therapeutics II

This course is designed to provide students with advanced knowledge and skills in pharmacology and integrated therapeutics for the treatment of gastrointestinal, endocrine & reproductive system, and neoplastic disorders. Students will delve into in-depth studies on the pharmacological mechanisms of drugs used to manage these disorders, as well as explore the integrated approach to their therapeutic applications.

Credits: 3 units

Pre-requisite: PHM 6511

PHM 6432: Clinical trials, Research methods and Biostatistics

Course deals with the basics of clinical trial operations and preclinical drug development concepts. In addition, this course is designed to enable graduates formulate and test scientific hypotheses, design experiments, as well as interpret data and make statistical inferences. It equips graduates with basic statistical concepts; data graphics; principles of statistical probability; and sampling techniques.

Credits: 3 units

Pre-requisite: None

PHM 6433: Health Assessment and Clinical Services

This course is designed to enable the learner to acquire knowledge, attitude and skills in performing health assessment of a client. The course lays the groundwork for how a clinical Pharmacologist should think about the rational use of drugs in caring for patients.

Credits: 4.5 units

Pre-requisites: PHM 6512, PHM 6513, PHM 6522, PHM 6523

PHM 6542: Attachment (Research Centers, Hospitals, and forensic toxicology lab)

This course offers students a well-structured and supervised program that involves active participation in various aspects of research in drug discovery, clinical trials, clinical pharmacology, clinical pharmacokinetics, and pharmacogenomics practices within a hospital setting. This course offers experiential learning opportunities for students. It involves a 4-week attachment at research institution, 2-week attachment at forensic toxicology laboratory and an 8-week attachment in a hospital setting.

Credits: 6 units

Pre-requisite: Completion of all year one courses

PHM 6541: Research Project I (Proposal)

The purpose of the course is to equip students with knowledge and skills to write a research proposal.

Credits : 6 units

Prerequisite: PHM 6432

PHM 6551: Research Project II (Data collection/ Experimentation)

This course is a progression of PHM 6441 and provides the student an avenue to develop the proposed solution to the identified problem or need as was articulated in the research proposal (PHM 6441). Consequently, the course will focus on project experimentation or laboratory work. Having successfully completed this course, students will be better prepared to undertake PHM 6461 research project III (Thesis Writing and defense) and apply their research findings in an industry context or in solving societal problem.

Credits: 6 units

Pre-requisite: PHM 6541

PHT: PUBLIC HEALTH

PHM 6561: Research Project III (Thesis writing and defense)

This course is a progression of research project two and provides the student an avenue to document and present proposed solution. The course enables a student to clearly communicate their research in presentations and in a publication. The student will be required to present their research work in faculty and in a conference presentation or write one peer reviewed journal article.

Credits: 6 units

Prerequisite: PHM 6551

PHM 6543: Global Tour

Students will be required participate in a global tour or research attachment programme in the developed world for purposes of experiential learning in order to synchronize theory and practice in the areas of pharmacology and toxicology.

Credits: 3 units

Pre-requisite: Completed all year one courses

PHM 6544: Seminar on advances in drug research

This course is designed to enable graduates assimilate information on recent advances in drug research, analyze the information and synthesize a scientific review literature. It gives the learners opportunity to practice scientific writing and familiarize themselves with important components of scientific writing.

Credits: 3 units

Pre-requisite: Completed all year one courses

PHT 2010 Disease Prevention & Health Promotion

This course prepares our students to be leaders in the field of disease prevention and health promotion.

Pre-requisites: EPI 1010, MIC 2360

Credit Units: 3

PHT 2020 Control And Prevention of Infectious Diseases

This course will enable students to understand the mechanisms of infectious disease transmission, use specific preventive methodologies in the control of particular diseases and communicate the rationale for the various control methods.

Pre-requisites: EPI 1010, PHT 2010

Credit Units: 3

PHT 3010 Contemporary Community Health Issues

This course exposes students to current health issues that define community health.

Pre-requisites: HSC 1394, EPI 1521

Credit Units: 3

PHT 4010 Public Health Epidemiology

This course presents to the student a public health practice that provides information for infectious/non-infectious disease prevention and control. It gives an over view of epidemiological methods that address disease patterns in community and clinic-based populations.

Pre-requisites: HSC 1394 and EPI 1010

Credit Units: 3

PHT 4020 Monitoring and Evaluation of Health Programs

This course aims to teach the students the fundamentals of collecting, storing, analyzing and finally transforming data into strategic information so it can be used to make informed decisions for program management and improvement, policy formulation, and advocacy.

Pre-requisites: HSC 1394, EPI 1521

Credit Units: 3

systems and also outline the role of the liver and pancrease.

Pre-requisites: PHY 1331

Credit Units: 4.5

PHY 2334 Cardiovascular and Renal Physiology (Human Physiology IV)

The objective of this course is to teach the student the organisation and functions of cardiovascular and renal systems. He/she will learn the composition, functions of blood and blood grouping and also to discuss shock, edema and hemorrhage.

Pre-requisites: PHY 1331

Credit Units: 4.5

PHY 2335 Endocrine and Reproductive Physiology (Human Physiology V)

This course aims to teach the student the role of hormones, discuss gestation, parturition, lactation and the aging process. And also teach the organisation and functions of endocrine and reproductive systems.

Pre-requisites: PHY 1331

Credit Units: 3

PHY: PHYSIOLOGY

PHY 1331 Introduction to Medical Physiology (Human Physiology I)

The aim of this course is to teach the student to understand the human body, the composition of a cell, communication within a cell and how the normal internal body environment is maintained.

Prerequisites: PHY 1331

Credit Units: 4.5

PHY 1332 Muscle and Sensory Physiology (Human Physiology II)

The aim of this course is to teach the student the composition, outline transmission of impulses in the body and describe reflexes and their importance of muscles and neurons. *Prerequisites: PHY 1331*

Credit Units: 4.5

PHY 1333 Respiratory and Gastrointestinal Physiology (Human Physiology III)

This course aims to teach the student the organisation and functions of respiratory and gastrointestinal

PHY 2334 Cardiovascular and Renal Physiology (Human Physiology IV)

The objective of this course is to teach the student the organisation and functions of cardiovascular and renal systems. He/she will learn the composition, functions of blood and blood grouping and also to

discuss shock, edema and hemorrhage.

Prerequisites: PHY 1331

Credit Units: 4.5

PHY 2335 Endocrine and Reproductive Physiology (Human Physiology V)

This course aims to teach the student the role of hormones, discuss gestation, parturition, lactation and the aging process. And also teach the organisation and functions of endocrine and reproductive systems.

Prerequisites: PHY 1331

Credit Units: 3

PHY 2336 Nervous System Physiology (Human Physiology VI)

This course is a combination of cellular neurophysiology and receptor physiology. It is designed to provide students with a deeper understanding of organisation and functions of the nervous system; electrical and chemical signaling in the nervous system; and molecular and cellular aspects of receptor mechanisms, signaling pathways, effector systems, and chemotherapeutic approaches.

Prerequisites: HAN 1321; PHY 1331; BCM 1341

Credit Units: 4.5

PHYS: PHYSICS SOC: SOCIOLOGY

PHYS 1001 Physical Mechanics

Pre-requisite: none

CREDIT HOURS: 3

Course description

The Purpose of the Course is to present the students with clear and logical concepts and the principles of physical mechanics. It will help students with problem solving methodology and actively involve them in Theory and practical aspects of analytical chemistry.

PHYS 1002 Elements of Physics

Pre-requisite: none

CREDIT HOURS: 3

Course description

The purpose of this course is to present the students with clear and logical concepts and the principles of elements of physics. It will help students with problem solving methodology and actively involve them in Theory and practical aspects of analytical chemistry.

SOC 2207 Medical Sociology and anthropology

Pre-requisite: none

CREDIT HOURS: 3

Course description

This course will equip the learner with knowledge, skills and attitudes on sociology and anthropology in order to apply them in nursing practice.

School of Pharmacy & Health Sciences Faculty Profiles

Amuhaya, Edith K.

Assistant Professor of Organic Chemistry

B.Sc. Chemistry, University of Nairobi, Kenya; PhD Synthetic Organic Chemistry, Louisiana State University, Baton Rouge, USA.
Specialty Areas: Synthesis and analysis of porphyrins and porphyrin-like molecules for use in photodynamic therapy and photo dynamic antimicrobial therapy

Angwa, Linet Musungu

Assistant Professor of Epidemiology & Biostatistics

PhD., Harbin Medical University
Specialty Areas: Epidemiology & Biostatistics

Defersha, Amsalu Degu

Assistant Professor of Clinical Pharmacy

B. Pharmacy, Jimma University, Ethiopia; M. Pharmacy (Clinical Pharmacy), University of Nairobi; M.Sc. (Pharmacology) Addis Ababa University, Ethiopia;
Specialty Areas: Clinical Pharmacy, Pharmacology;

Ermias Mergia Terefe

Assistant Professor Pharmacology

Diploma in Pharmacy, B. Pharm, Jimma University, Ethiopia; M.Sc. (Pharmacology), Addis Ababa University, Ethiopia; Post- Graduate Diploma in Curriculum Design and Development, Open University of Tanzania; Specialty Areas: Pharmacology, Natural Products and their Bioactivity, Infectious Pharmacology;

Kahiri, Caroline

Assistant Professor of Human Physiology

B.Ed. (Sc), M.Sc., University of Nairobi; Ph.D. University of Western Ontario, Canada; Specialty Areas: Reproductive Physiology, Endocrinology;

Kimani, Larry

Assistant Professor of Pharmacy

B.Pharmacy, M.Pharmacy (Clinical Pharmacy), University of Nairobi;

Mbatia, Betty N.

Associate Professor of Biochemistry and Biotechnology

B.Sc. Biochemistry, MSc. Biochemistry, University of Nairobi, Kenya; PhD Industrial Biotechnology, Lund University, Sweden; Specialty Areas: molecular biology, enzyme technology, Separations biotechnology, bioanalytical chemistry and chromatographic analysis, lipid modifications in aqueous and organic media, biofuel production technology;

Muniafu, Maina

Associate Professor of Natural Sciences

B.Ed. (Sciences), M.Sc., Ph.D., University of Nairobi, Kenya;
Specialty Areas: sustainable utilization and development of resources and general environment sciences.

Mwangi, Jonathan

Assistant Professor of Medical Biochemistry

B.Sc. Biochemistry, Egerton University; PhD Infection and Immunity
University of Glasgow, United Kingdom Specialty Areas: Medical biochemistry, genomics, molecular biology, parasitology, infection genetics, genetic crosses, host-parasite interactions, transmission epidemiology, co-infections, quantitative trait locus analysis, setting up reference laboratories.

Shital Maru

Associate Professor of Pharmaceutics and Pharmacy Practice

Bachelor of Pharmacy, Master of Pharmacy, master of business administration, , Ph. D (Pharmaceutics),

Noah, Naumih

Associate Professor of Analytical/ Bioanalytical Chemistry

B.Sc. (Chemistry), University of Nairobi; M.Sc. (Chemistry), University of the Ryukyus, Japan; Ph.D. (Chemistry), State University of New York at Binghamton, USA

Specialty Areas: Analytical/Bioanalytical Chemistry, Nanochemistry, Biosensors, Nanotechnology in Health Care.

Ndung'u Tabitha

Assistant Professor, Pharmaceutics

M.A., Counseling Psychology, United States International University – Africa
Specialty Area: Chemical Dependency

Obila, James Onyango

Lecturer of Microbiology

B.Sc. Medical Microbiology, Jomo Kenyatta University of Agriculture & Technology; M. Sc. Medical Microbiology, University of Nairobi; Specialty Areas: Virology, Immunology;

Omolo, Calvin Andeve

Associate Professor of Pharmaceutics

B. Pharm, St John's University of Tanzania; M. Pharm.; Ph. D (Pharmaceutics), University of KwaZulu-Natal, South Africa;
Specialty Areas: Pharmaceutics, Polymer Science, Biomaterials and Material Synthesis for Drug Delivery, Transdermal and Nano Drug Delivery, Nano medicine;

Samuel Mungai

Assistant Professor of Epidemiology and Biostatistics

B.Sc. Nursing. ; M.Sc. Community Nursing, PhD Epidemiology and Biostatistics
& Biostatistics, Ph.D., London School of Hygiene and Tropical Medicine, University of London, UK;
Specialty Areas: Public Health Epidemiology

Yasodha Janapati

Associate Professor of Pharmaceutical Sciences

B. Pharmacy, 2003. (First class with Distinction) Jawaharlal Technological University – Hyderabad, A.P. India. M. Pharmacy (Pharmaceutical Chemistry), 2005. School of Pharmaceutical Sciences, Rajeev Gandhi Proudhyogiki Vishwavidyalaya (RGPV), Jawaharlal Technological University Anantapur,

Anantapur, A.P. India

Njoroge, Gladys Gakenia

Assistant Professor Biostatistics

B.ED, Special Education: Mathematics and Learning Disabilities, Kenyatta University MSc. - Mathematics (Statistics), Kenyatta University, PhD in Biostatistics, Moi University, Specialty Area: Biostatistics

Mwenda, Catherine Syombua Mutunga, PhD., MPSK

Associate Professor of Nursing

Maina, Evah Mumbi, PhD., MPSK

Assistant Professor of Nursing

Mwangi, Ann Wairimu, PhD., MPSK

Assistant Professor of Anatomy

Machuki, Jeremiah Ong'achwa, PhD., MPSK

Assistant Professor of Physiology

Opwoko, Dennis Jack, PhD., MPSK

Assistant Professor of Pharmacology

School of Science and Technology

Mission Statement

The mission of the School of Science and Technology (SST) is to build and sustain high quality and broad-based teaching and research programs in science, communication and technology; to prepare graduates by equipping them with knowledge, skills, and attitudes relevant for professional success in science, communications, and technology related careers; and to provide exemplary service to the community. Further, the School is committed to promoting the generation, dissemination and application of knowledge of science, communication and technology in order to create a better world.

Phone: (+254) 730 116 733
E-mail: sst@usiu.ac.ke

Dr. Gabriel Okello
Dean, School of Science and Technology
Phone: (+254) 730 116 733/705
Location: 1st Floor, Science Center

Dr. Gabriel Okello
Chair, Department of Data Science and Analytics
Phone: (+254) 730 116 738
Email: gokello@usiu.ac.ke

The School of Science and Technology is committed to providing high quality programs for students at both the Undergraduate and Graduate level. It fulfils its mission by providing programs with an international perspective and by emphasizing the importance of science, technology and communication skills to the global community.

Learning Outcomes

1. Develop competence in critical thinking, creative skills, use of technology, creativity and good communication skills, including a thorough grounding in multicultural and global perspectives
2. Provide service to the community: acquire practical working experience through participation and contribution to positive community and societal causes.
3. Demonstrate preparedness for career and lifelong learning in their chosen disciplines as well as understanding of and appreciation for the interdisciplinary nature of knowledge.
4. Demonstrate the use of qualitative and quantitative research skills in Communication and Information technology.
5. Apply theories, concepts, and principles found in other disciplines to computer-based problem solving.
6. Demonstrate a thorough understanding of effective, efficient professional and ethical leadership.

Core Values

1. That we integrate and maintain the highest ethical, legal, and professional standards— that is, integrity in everything we do. This is to ensure that every decision we make, every action we take must be in the best interest of those we are chartered to serve.
2. That the development, application, and effective management of technology are fundamental elements of modern society.
3. That shared and reciprocal efforts of individuals, disciplines, organisations and communities are an effective means of meeting the diverse needs of our various constituencies.
4. That commitment to excellence and integrity in our professional practices involves lifelong learning, adherence to our code of ethics, and the development and support of instructional programs based upon defined competencies.
5. That research is a fundamental tool of inquiry to guide our practices and interventions, and strengthen and promote our profession.

Professionals In technology have a responsibility to maintain a current understanding of research findings and participate in research that examines our older as well as contemporary practices.

6. That all our work, teaching, learning, research, practice & development are aimed at providing a safe and healthy environment.
7. That we actively contribute to and participate in enriching our various communities for posterity.

Majors

Undergraduate Programs

1. Bachelor of Science in Information Systems Technology (B.Sc.)
2. Bachelor of Science in Applied Computer Technology (B.Sc.)
3. Bachelor of Science in Data Science and Analytics (B.Sc.) – Available online
4. Bachelor of Science in Software Engineering (B.Sc.)
5. Bachelor of Science in Artificial Intelligence (AI) & Robotics (B.Sc.)

Graduate Programs

1. Master of Science in Information Systems & Technology (MSc.)
2. Master of Science in Information Security (MSc.)
3. Master of Science in Data Science & Analytics (M.Sc.) (Online Only)

Doctoral program

1. Doctor of Philosophy Information Systems & Technology (Ph.D.)

Course Descriptions

AIR: Artificial Intelligence & Robotics

AIR 1050: Principles of Electrical & Electronic Engineering

This course equips students with the necessary foundation on electrical circuit analysis. Students will learn to apply techniques in analysing the behaviours of basic circuit elements (resistors, capacitors and inductors) with Direct Current (DC) and Alternating Current (AC) power sources in electrical circuits. The unit aims to provide students with a sound knowledge of electrical circuits, circuit analysis techniques, transformers, motors, generators as well as digital electronic circuits. The unit covers fundamentals of Electrical and Electronic Engineering for students studying a Robotics degree program.

Pre-requisites: NCS 2215

Credit: 3 units

AIR 2030: Digital Signal Processing

The aim of the course is to introduce the principles, techniques, and applications of digital signal processing and to motivate and prepare students to apply them for robotics control design and for research projects. Signal processing plays an extremely important and continually growing role in a wide variety of engineering systems. The course covers theory and methods for digital signal processing including basic principles governing the analysis and design of discrete-time systems as signal processing devices. The course reviews discrete-time linear, time-invariant systems, Fourier transforms and z-transforms. Topics include sampling, impulse response, frequency response, finite and infinite impulse response systems, linear phase systems, digital filter design and implementation, discrete-time Fourier transforms, discrete Fourier transform, and the fast Fourier transform algorithms. Through this course learners are able

to know the behavior of any signal and its impact on a specific system.

Pre-requisite: AIR 1050

Credit: 3 units

AIR 2010: Introduction to Robotics

The purpose of this course is to introduce students to the basics of modelling, design, planning, and control of robot systems. The course introduces the basics of modeling, design, planning, and control of robot systems. Relevant concepts from geometry, kinematics, statics, dynamics, and control are revisited.

Prerequisite: APT 3010

Co-requisite MTH 2025

Credit: 3 units

AIR 2040: Real-Time Software Engineering

This course equips the students with knowledge in embedded real-time systems and real-time software development, particularly on how software engineering approaches assist real-time software development. The knowledge unit for this course area emphasizes the following topics; real-time concepts, embedded real-time development methodologies, real-time operating systems, embedded real-time hardware fundamentals, and real-time analysis. The objective of this course is to introduce students to key software engineering practices in real-time software development and give practical experience to the students in developing embedded real-time software using appropriate software methods and tools.

Pre-requisites: IST 1025, APT 3040

Credit: 3 units

AIR 3010: Design of Real-Time Systems

Real-time embedded systems pervade many aspects of modern life ranging from household appliances, transportation, and motion control systems, medical systems and devices, robotics, multimedia and mobile communications, video-games, energy generation/ distribution/ management, to aerospace and defense systems. A real-time system is subject to important temporal constraints. This course is about understanding where processing time is spent and what a designer can do in order to achieve real-time processing systems. Some solutions are Multiprocessors, accelerators, custom instructions, and specialized hardware. This course explores the use of a processor as a crucial component in real-time system design. Using Field Programmable Gate Arrays (FPGA), this subject explores the process of real-time system development, from original conception through to co-design development, and finally implementation and debugging.

Pre-requisites: AIR 1050, APT 2030

Credit: 3 units

AIR 3060: Robotics Applications Programming

This module will address increasing expectations from the industry for automating devices by introducing programming languages for robotic applications, conventions for calculating forward and inverse kinematics and force/torques, Trajectory and path planning, area mapping and localization techniques (e.g. Simultaneous Location and Mapping-SLAM), Coordination in multi-robot systems, software architectures for robot systems and simulators, programming robots with middleware (e.g. ROS or YARP),

practical exercises in programming robots, research topics in robotics, and the future implications of robotic applications (ethical considerations).

Pre-requisite: AIR 2010

Credit: 3 units

AIR 3080: Artificial Intelligence and Robotics Practicum

The content aims to delve into the foundational principles of robotic manipulator kinematics and construction. Through hands-on experience, students will utilize 3D printing and servo motors for robot actuation and programming. The practicum encourages collaborative research and teamwork, culminating in a project encompassing diverse facets of Artificial Intelligence or Robotics.

Pre-requisites: AIR 2010 & APT 2030

Co-requisite AIS 3060

Credit: 3 units

AIR 4010: Deep Learning and Computer Vision

This course is designed to introduce learners to deep learning, a subfield of machine learning that uses deep neural networks, that is, neural networks made up of many layers, to model complex relationships between inputs and outputs and use those models to make predictions, for instance, in image classification.

Pre-requisite: APT 3025

Credit: 3 units

AIR 4020: Human-Robot Interaction

This course delves into the expansive realm of human-robot interaction (HRI), unveiling the intricate dynamics between humans and robots. Beyond the conventional perception of robots

as mechanical tools, HRI explores the fusion of technology and human psychology, forging robots that seamlessly integrate into our lives. This unit illuminates the profound implications of HRI, where robots transcend mere functionality to become empathetic companions, educators, and collaborators. As robots shift from the periphery to become integral parts of our daily existence, the course assumes a pivotal role in unraveling the art and science of crafting robots that harmoniously coexist with humans.

Pre-requisite: AIR 2010

Credit: 3 units

AIR 4040: Reinforcement Learning for Robotics

The aim of this course is to provide a solid introduction to reinforcement learning (RL), a very active sub-field of machine learning. Reinforcement learning is an area of machine learning where an agent learns how to behave in an environment by performing actions and assessing the results.

Pre-requisite: APT 3025

Credit: 3 units

AIR 4050: Intelligent Multi-Agent Systems

Many real computing applications involve computational problems for which no generally efficient algorithms are known. These problems often involve relatively small inputs, but astronomically-sized search spaces in which solutions may be well hidden. Developing practical software for solving these problems is challenging and costly. This course examines methods for automatically solving these problems based on high-level specifications, much as we use a query language rather than low-level algorithms to answer complex questions about a large data set. This course provides the basic theoretical knowledge applied in designing systems that solve problems under constrained environments, search for the best paths and perform optimization, deal with uncertainty, and learn from experience. The emphasis on solving real world problems that are difficult to express using the traditional algorithmic approach,

Internet of Things.

Pre-requisite: APT 3010

Credit: 3 units

AIR 4060: Engineering and Informatics Ethics and Law

The purpose of this course is to expose students to ethical problems that engineers and computer scientists face, the codes of ethics of professional societies, legal issues involved, and the social implications of computers, computing, and other digital technologies.

Pre-requisite: None

Credit: 3 units

AIR 4070: Robotics Design

This course enables students to explore relevant aspects of autonomous robotic systems. These include the implementation of functions such as selecting, understanding, and installing the sensing capabilities of the robot, processing of the sensor measurements for performing perception, and applying low- and high-level control processes to enable the robotic platform to operate in complex contexts. Students are expected to enhance their programming skills using Matlab.

Pre-requisites: AIR 2010, AIR 3080

Credit: 3 units

AIR 4080: Industrial Automation and Robotics

The course delves into the realms of robotics, automation, wide area sensing, artificial intelligence, and data transmission. It encompasses the integration of autonomous and robotic systems, emphasizing data flow, control, and design. Students will adeptly address challenges in safety, operations, inspection, maintenance, security, and compliance inherent in these systems, as well as understand human-robot interaction. Through comprehensive learning, students will grasp the nuanced terminology, assess requirements, and discern between implementations, fostering an ability to make informed decisions and effectively contribute to the evolving landscape of industrial

automation and robotics.

Pre-requisite: APT 3025

Credit: 3 units

AIR 4090: Speech and Language Processing

This course is designed to introduce learners to the processing of natural language in both its written and spoken forms.

Pre-requisite: APT 3025

Credit: 3 units

AIR 4900: Artificial Intelligence and Robotics Design Science Research Project

The purpose of this course is to give students the opportunity to integrate the knowledge that they have gained across the curriculum. Students learn how to work in teams, identify a problem, develop a project proposal outlining an approach to the problem's solution, implement the proposed solution, and test or evaluate the results.

Pre-requisite: AIR 4080

Credit: 3 units

AIR 4910: Artificial Intelligence and Robotics Internship

This course provides the student with an opportunity to explore career interests while applying knowledge and skills learned in the classroom in a work setting. The experience also helps students gain a clearer sense of what they still need to learn in software development and provides an opportunity to build professional skills.

Pre-requisite: AIR 4080

Credit: 3 units

APT 3025: Applied Machine Learning

This course is designed to give the learner a thorough grounding in machine learning methodologies, technologies, mathematics, algorithms and applications.

Pre-requisite: APT 3010

Credit: 3 units

APP: Applications

APP 4035 Web Application Development Frameworks

This course explores various architectural and design factors that have to be taken into consideration when building complex web applications. Students will get to appreciate the importance of having web applications designed in accordance with industry best practices. To implement these best practices, suitable web development frameworks will be put to use. A web application will typically use more than one framework, forming a stack of frameworks that cover both the front-end and the back-end. This course only seeks to cover the most prevalent framework stack at a given point in time.

Prerequisite: IST 4035

APP 4040 Data Structures and Algorithms

Introduction to design and analysis of algorithms. Design techniques: divide-and-conquer, greedy method, dynamic programming; selection of prototypical algorithms; choice of data structures and representations; complexity measures: time, space, upper, lower bounds, asymptotic complexity; NP-completeness. Algorithms and their performance. Data abstraction, queues, linked lists, stacks, trees, graphs, and associated algorithms. Sorting and searching. Implementation of algorithms and data

structures in the C++ programming language.

Prerequisites: IST 4070

Credit: 3 Units

APP 4050 Internet Applications and Development

Review of LAN and WAN technologies. In-depth study of internetworking concepts, architectures, and protocols. The Internet protocol (IP) and the transport control protocol (TCP). Client-server interaction and the socket interface. Network programming. Application layer protocols of the TCP/IP protocol suite. Creating static, dynamic, and active World Wide Web (WWW) documents. Study of different Web programming and scripting languages, including Java, VB, CGI, ASP, VBScript, CSS, HTML, XML, Jscript, and Perl. Three tier systems: user interface, business logic and data base tiers. Students will be expected to build a simple web-based information system using a 3-tier solution.

Prerequisite: IST 4060

Credit: 3 Units

APP 4070 Advanced Linux Programming

Explores advanced concepts of Linux/ UNIX shell scripting languages. Various versions of Linux/UNIX shells will be discussed, including the Bourne, Korn,

and bash shells as well as an introduction to Perl, Tk/Tcl, and CGI. Students will write shell programs in AIX and Linux environments. Emphasis will be placed on writing scripts to support system and network configuration, interfaces for system utilities, and user programs. This course is taught in a combination of lecture and hands-on environment.

Prerequisites: IST3020

Credit: 3 Units

APP 4080 Collaborative (Team Work in) Software Development

This course recognizes that one of the greatest overheads in software development is communication. This course focuses on how software developers can collaboratively work together, and with other teams, to produce quality software in the most efficient manner possible. The course takes a look at the collaboration of teams from both technical and cultural perspectives. Some of the technical aspects the course covers include: Version Control Systems (VCSs), Git, source code reviews, automated testing and deployment, system integration, and flexible scaling. The overarching theme throughout this course is a push to break down information silos and promote streamlined collaboration among teams and team members.

APT: Applied Computer Technology

APT 1030: Fundamentals of Programming Languages

This course acts as a guide to understanding computer languages design in general. This course presents concepts and structures governing the design and implementation of modern programming languages, run-time representations of traditional block structured languages, typing systems, abstraction and procedure mechanisms, and storage management. It also introduces language design issues and language translators. Course also provides fundamental introduction to computer programming theory and concepts to students with little or no previous experience. Students learn structure, syntax, logic, and the difference between object-oriented and procedural systems methodologies. Students are introduced to structured programming OOP as well as machine organisation. A high level language such Visual Basic is suggested as introductory language but other languages such as C/C++ may be used with justification.

Prerequisite: APT1020

Credit: 3 Units

APT1040: Introduction to Web Design and Applications

This course is designed to introduce students to an understanding of how information and information technology can be applied across the many different types of information systems and information environments.

Credit: 4.5 Credits

Prerequisite: IST1020

APT1050: Database Systems

The course aims at introducing the basic concepts of database design and manipulations. It provides a solid foundation not only for the later study of advanced database systems, but also for the study of other advanced areas in information systems, including data warehousing, data mining, information security among others.

Credit: 4.5 Credits

Prerequisite: APT1020

APT2010: Systems Analysis and Design

This course introduces the fundamentals of information systems analysis and design by covering a variety of current methods, tools, and techniques. The course will cover system development activities in the context of when they typically occur. Most of the course will be devoted to learning and practicing the techniques and processes used by the systems analyst at each phase within the systems development cycle and to working as a team to create a system solution for a client.

Credit: 4.5 Credits

Prerequisite: SWE2030

APT 2020: Computer Organisation

The course outlines the fundamental way in which a computer works: starting with simple logic and progressing to a simple model of a microprocessor. This is followed by an appreciation of low-level programming leading to a clear understanding of the key points of machine performance.

Prerequisites: APT 1020

Credit: 3 Units

APT 2022: Introduction to Assembly Programming

Fundamentals of assembly language programming concepts and techniques. Topics include internal representation of data, arithmetic operations, logic statements, and general assembly language commands. Introduce low level language architecture including low level programming and debugging techniques assemblers, linkage editors, and loaders. Computer architecture, input/output programming, interfacing I/O, subroutine linkage, interrupts, and memory caching. Programming assignments using C/C++ and assembly language will be used to reinforce these concepts.

Prerequisites: APT1030

Credit: 3 Units

APT2030: Digital Electronics

This is an introductory course in Digital Circuits and Logic Design. It gives students the foundation in Boolean algebra and logic design necessary for courses in computer architecture, VLSI circuits and Digital integrated circuits.

Credit: 4.5 Credits

Prerequisite: MTH 2215

APT 2040: Operating Systems

The course covers the concepts and architecture of a stored program digital computer system and provides an understanding of the characteristics and the operating principles of the main hardware components of a computer system. In addition, the course covers the concepts and fundamentals of the operating systems. These fundamentals include process management, memory management, and device management and file management. This course enables students to understand how the interface between users and machine is achieved through system utilities and programs. Development of operating systems is also discussed.

Prerequisites: APT2020

Credit: 3 Units

APT2050: Computer Network and Telecommunication

This course provides students with an overview of the concepts and fundamentals of data communication and computer networks. It introduces students to the techniques and tools required to interconnect systems. Students get hands on exposure to the process of setting up networks and network configuration settings. The emphasis of the course is towards the various components and software required to make a network operational.

Credit: 4.5 Credits

Prerequisite: IST2010

APT 2055: Hardware and Software Practicum

The general objectives of this course is to ensure that the successful students will have the important knowledge and skills necessary to manage, maintain, troubleshoot, install, operate and configure office computing equipment, describe computing technologies, basic principles, adhere to professional standards, and use testing tools.

The course covers PC hardware and peripherals, mobile device hardware, networking and troubleshooting hardware and network connectivity issues, installing and configuring operating systems including Windows and Linux. It also addresses

security, software troubleshooting and operational procedures.

Prerequisite: IST 2045

Credit: 3 Units

APT 2060: Data Structures and Algorithms

This is the introductory course on data structures and algorithms as used in problem solving. The course introduces the basic data structures arrays, records, strings, linked lists, stacks, and queues. Trees, graphs, Searching & Sort techniques and the algorithms for manipulating the data structures including analysis of Big O notations. Hash technique. While data structures are seen as a method of collecting and organizing large amounts of data, algorithms are the means by which the computer efficiently manipulates the data structures. Since some implementation and testing of programs are important part of algorithms, computer code has to be exhibited. Therefore, some amounts of programming will be necessary, especially in C/C++/Java

Prerequisites: APT 1030; MTH 2215

Credit: 3 Units

APT2080: Introduction to Software Engineering

The course introduces the fundamentals of analyzing a problem and then implementing a solution as a computer software system.

Credit: 3 Credits

Prerequisite: APT1020

APT 2090 Computer Graphics

This course is an introduction to some of the aspects of computer graphics through the use of OpenGL and associated libraries. The course will look at many of the aspects of generating and manipulating 3 Dimensional scenes. Other topics we will cover are the human visual system, perception, virtual reality, and visualization. Please note this is NOT a Photoshop or image manipulation course. We will be looking at the matrix algebra, calculus, and algorithms associated with 3D Graphics and will be mathematically oriented.

Prerequisites: APT 2060

Credit: 3 Units

APT3010 Introduction to Artificial Intelligence (AI)

The purpose of this course is to provide the most fundamental knowledge to the students so that they can understand AI; beginning from historical and philosophical perspectives, progressing through a number of core topics from classical AI, and then dealing extensively with various areas of machine learning.

Credit: 4.5 Credits

Prerequisite: APT1020

APT3020 Knowledge-Based Systems

This course aims to enable students to design a knowledge structure integrated with production planning, quality control and other subsystems of an industrial organisation. The course will also enable students to apply AI techniques to the problem of acquisition and representation of expert knowledge for problem solving in the expert's domain.

Credit: 4.5 Credits

Prerequisite: APT3010

APT3040 APT 3025 - Applied Machine Learning

This course gives an introduction to machine learning techniques and theory, with a focus on its use in practical applications. A selection of topics will be covered in supervised learning, including linear models for regression and classification, and nonlinear models, including decision trees and neural networks. The use cases and limitations of these algorithms will be discussed, and their implementation will be investigated in programming assignments. Evaluation of machine learning systems will also be discussed, as well as some of the ethical questions that can arise when applying machine learning technologies. Practical work will be done using a suitable technology combination, including Python, Jupyter, Scikit-Learn, Tensorflow and Keras.

APT3040 Object Oriented Design and Programme

This course will provide students with two important skills in order to have a better understanding of large software development and practical techniques that

support real-time 3D graphics.

Credit: 4.5 Credits

Prerequisite: APT1020

APT3060: Mobile Programme

This course involves a careful examination of mobile device programme. Emphasis are on developing applications as a community that run on the Android platform. This course will also give students insight to today's common procedures for getting their mobile application work academically published.

Credit: 4.5 Credits

Prerequisite: APT 3040

APT 3065 Mid-Term Project

Students will undertake an individual ICT project in the early part of their third year. This will enable students to employ the tools and techniques learned so far to solve a real world problem. The knowledge, tools and techniques will include amongst others programming, database technology, networking, systems analysis / software engineering, networking, web applications development, mobile computing and project management.

Students will write a project proposal based on either a problem domain given by the instructor or identified by the student. The project will be supervised by the instructor to ensure timelines, quality and student engagement. The deliverable will be a software/hardware product that will be demonstrated at the end of the semester and a project report. The grade will be based on the product demonstration and project report. The supervisor may require progress reports during execution of the project. (WI)

Prerequisite: IST4075 or APT 3060

Credit: 3 Units

APT3080: Management Information Systems

The purpose of this course is to provide real-world understanding of management information systems for students of Software Engineering. It provides a firm foundation in business-related information technology on which they can build successful careers.

Credit: 3 Credits

Prerequisite: APT1050

APT 3090 Cryptography and Network Security

The course introduces the core techniques of cryptography around which security and trust can be constructed, and highlights the implications of using such techniques. It also looks at the entire key management lifecycle, and examines the differing requirements and methodologies for managing cryptographic keys of different types. The course ends by looking at how these techniques are applied in various applications and standards, from VPNs to secure email. The applications and techniques described are accompanied by a description of their strengths and limitations and the necessary supporting infrastructure.

Prerequisite APT 2050

Credit: 3 Units

APT 3095 Cloud Computing and Virtualization

This course discusses the current practices in cloud computing. Students will learn how virtualization results in cloud infrastructure, virtualization and containers, (Docker, JVM, and Kubernetes).

Credit: 4.5 Credits

Prerequisite: APT2050

APT 4900: Applied Computer Technology Project

This project course utilizes teams and/ or individuals working from problem requirements and specifications to produce a solution. This requires exploration of suitable information technologies to produce a solution that improves the problem situation. Students/teams will analyze, plan, and report on the project and implement a prototype. Students are responsible for developing a project proposal from inception to completion in conjunction with the assigned instructor. Preference is given to software projects.(WI)

Pre-requisite: Last semester of Senior year;

Completed coursework

Credit: 3 Units

APT 4910: Applied Computer Technology Internship

This 10-week internship/Industrial/ Attachment links the students' learning with the real world experience to provide exposure to the practical and daily operations of an information technology office, support team, or equivalent. Students are placed within a private firm, government institution or agency, corporation, industrial/ commercial organisations so that that they can relate what they have learnt in the classrooms with actual work situations.

Pre-requisite: Last semester of Senior year;

Completed coursework

Credit: 3 Units

APT 3025: Applied Machine Learning

This course will provide students with skills to apply machine learning algorithms on real applications. Applied Machine Learning aims to cover some of the issues that may arise in the practical application of machine learning in real-world problems. In addition, the course will cover some of the mathematics and techniques behind basic data analysis methods for both static and time-series data.

Pre-requisites: CSI 2020: Principle of Machine Learning

Credit Hours: 3

BIS: Business Information Systems

BIS6120 Knowledge Management Systems

This course provides an understanding of the process of managing generation, acquiring, capturing, sharing, and using of corporate knowledge in order to enhance learning and performance in organisations. An integrated view has been adopted in this course that incorporates managerial, organisational and technological perspectives of KM. Special attention will be given to the role that humans play, and the interactions they get involved, within the above KM processes and supporting technologies.

Credit: 3 Units

BIS6130 Management and Economics of E-Business

This module combines taught material with teamwork and independent research to give students the opportunity to understand the key business, economic, social, and technical implications of e-business, and to investigate and report on a particular topic within the general area of e-business by working in Special Interest Groups (SIGs). 'Business' is understood broadly, to include not-for-profit enterprises. The emphasis is on bringing

together technical developments in this area with organisational responses and initiatives, both through the course content and in the students' collaborative investigations.

Credit: 3 Units

BIS6150 Enterprise Systems

This course is designed to provide an advanced introduction to the management of enterprise information systems EIS - with a specific focus on issues related to the interaction between organisation design and the design of enterprise information systems. We will explore the relationship between the strategic intents of firms and their design of the enterprise information infrastructure. The course will be executed with an instructor guided self-learning philosophy, and by design, attempts to strike a balance between conceptual learning and exposure to practical issues through a case-based pedagogy.

Prerequisites: MIS6140 3

Credit Units

DSA: Data Science

DSA 1060: Introduction to Data Science

The aim of the course is to provide an overview of the practice of data science with an emphasis on data cleaning, the data life cycle and data processing.

Pre-requisites: IST 1020: Introduction to Information Systems

Credit Hours: 3

DSA 2020: Principles of Machine Learning

This course will serve as a comprehensive introduction to various topics in machine learning.

Pre-requisites: APT 1050: Database Systems

Credit Hours: 3

DSA 2040: Data Mining and Analytics

This course gives an introduction to methods and theory for development of data warehouses and data analysis using data mining.

Pre-requisites: APT 2060: Data Structures and Algorithms

Credit Hours: 3

DSA 3030: Big Data Analytics

This course will provide the fundamental knowledge to equip students being able to handle those challenges of Big Data. The course will also provide a conceptual overview of technical aspects of big data analysis. The course introduces the students to the concept and challenges of big data and also how to apply skills and tools to manage and analyze big data.

Pre-requisites: DSA 2040: Data Mining and Analytics

Credit Hours: 3

DSA 3050: Big Data Security

The purpose of this course is to introduce students to the emerging trends and issues in security and privacy in current web and

mobile services. Students will also learn how to identify security and privacy issues to be tackled, how to choose and apply appropriate approaches, tools and technology, and how to evaluate the security and privacy of a solution. The course will equip students with skills of to uncover potential data breaches as they occur with focus on the field of fraud detection and communication monitoring. This course will enable students to learn about the inherent threats and vulnerabilities of web applications, and the corresponding counter-measures based on industry best practices.

Pre-requisites: DSA 3030: Big Data Analytics

Credit Hours: 3

DSA 3070: Advanced Programming for Data Science

The course teaches students how to start looking at data with the lens of a data scientist by applying efficient, well-known mining models in order to unearth useful intelligence, using Python and R, one of the popular languages for Data Scientists.

Pre-requisites: DSA 2040: Data Mining and Analytics

Credit Hours: 3

DSA 3900: Applied Project in Data Science 1

In this course, students will complete a medium-scale data science project. It will involve evaluating, selecting and applying relevant data science techniques, principles and theory to a data science problem. Working with a real-world dataset, students will hone their data science skills and knowledge and demonstrate autonomy, initiative and accountability. Students will be required to reflect on the nature of their data and identify

any social and ethical concerns and identify appropriate ethical frameworks for data management. As part of the course, students will deliver a written and oral presentation of their project design, plan, methodologies, and outcomes. The aim is to apply data science and big data analytic tools to develop domain-specific applications. This course will guide students to work in groups on individualized projects in interest areas.

Pre-requisites: DSA 2050: Fundamental of Artificial Intelligence; DSA 3070: Advanced programming for Data Science
Credit Hours: 3

DSA 4010: Advanced Databases and Query Language

The course aims to broaden student's database capabilities by including advanced design, a comprehensive introduction to T-SQL programming, XML, a review of SQL Server's business intelligence capabilities, server architecture, administration and advanced querying.

Pre-requisites: DSA 3040: Knowledge Based systems
Credit Hours: 3

DSA 4030: Designing Intelligent Agents

This course will introduce the students to the key issues of interaction of multiple self-interested parties (a.k.a. agents) and gives a broad survey of topics at the interface of theoretical computer science and game theory dealing with such interactions. The course will also provide students with the theoretical background and practical tools to solve problems arising in settings with self-interested participants, to predict possible behavior and outcomes, and finally, to design multi-agent systems that would incentivize

desirable behavior.

Pre-requisites: DSA 3060: Applied Machine Learning
Credit Hours: 3

DSA 4910: Data Science Internship

This course will enable students to develop practical knowledge and hands-on experience through a supervised internship in any applicable industry as a data scientist.

Pre-requisites: DSA 4900: Applied Project in Data Science 2
Credit Hours: 3

DSA 4900: Applied Project in Data Science 2

The aim of this course is to give students an opportunity to manage a project from beginning to end under the guidance of an individual supervisor. Projects are offered by academic members of staff and cover a wide range of topics from computer science and electronic engineering. Professional development elements such as risk analysis, project management, ethics and intellectual Property (IP) are embedded in the project structure. Individual students will work under a project supervisor to produce a final product starting from a project description provided by the supervisor.

Pre-requisites: DSA 3900: Project in Data Science I

Credit Hours: 3

DST: Distributed Systems and Mobile Computing

DST4010 Distributed Systems

The course aims to provide an understanding of the principles on which the Internet and other distributed systems are based; their architecture, algorithms and how they meet the demands of contemporary distributed applications.

Credit: 4.5 Credits

Prerequisite: APT 2050

DST 4020 Mobile Computing

In the next decade, we will see the emergence of small, mobile devices with some computational and communication capabilities. These devices include (but not limited to) sensors for detecting movement of goods and people, devices that will be put in appliances, PDAs and cell- phones. These devices and the wired infrastructure will be interconnected and able to interact to provide applications that seamlessly provide services and data to users. The purpose of this course is to understand the state of the art, the infrastructure needed and the research problems that must be solved.

Prerequisite: APT 3060 & DST4010

Credit: 3 Units

DST 4030 Parallel Computing

This course covers the architecture and enabling technologies of parallel computing systems and its innovative applications. The goal of the course is to introduce the students to the aspects of parallel computing: architecture, programming paradigms, algorithms and standards. Both traditional computer science algorithms (e.g. sorting, searching, and dynamic programming algorithms) as well as scientific computing algorithms (e.g. matrix computations) will be covered. Students learn how to apply the most widely used standards for writing parallel programs (MPI, Pthreads, and OpenMP) and to thoroughly quantify the performance of parallel programs by means of metrics for scalability.

Prerequisite: DST4010

Credit Units: 3 Units

DST 4040 Digital Wireless Communication and Networks

This course introduces the students to the applied topic of Wireless Networks, focusing on applied methods, tools and technologies, as well as practical experience in designing & implementing wireless networks. Topics include hardware, software, data,

applications, communication, design & installation of wireless networks, together with the implementation, performance, security and limitations of such systems. The first part of the course explains about structure of cellular networks, telephone services, short-range wireless networks, and fixed wireless technology. The second part of the course deals with the concepts, architecture, design, and performance evaluation of personal area networks protocols and applications. At the conclusion of this course the student will have an understanding of these principles and be capable of implementing network, protocols and applications for personal pervasive systems.

Prerequisites: DST4010

Credit: 3 Units

DST 4050: Embedded Real Time Systems

The course introduces the concepts of distributed real time systems, queuing systems, issues of embedded hardware design.

Prerequisites: DST 4010

Credit: 3 Units

FIC: Forensic Information Technology and Cybercrime

FIC 4010 Information System Security

This course covers fundamental issues and first principles of security and information assurance. The course will look at the security policies, models and mechanisms related to confidentiality, integrity, authentication, identification, and availability issues related to information and information systems. Other topics covered include basics of cryptography (e.g., digital signatures) and network security (e.g., intrusion detection and prevention), risk management, security assurance and secure design principles, as well as e-commerce security. Issues such as organisational security policy, legal and ethical issues in security, standards and methodologies for security evaluation and certification will also be covered.

Prerequisite: IST3050 or APT3090

Credit: 3 Units

FIC 4020 Forensic Accounting and Fraud Investigation

This is a course in Forensic Accounting and Fraud Investigation. The course will cover aspect of legal, psychological and social implications of fraud and white collar crime in business organisations. The student will gain an understanding of the various types of fraud as well as how to detect and prevent these frauds. It will explore methods of concealment and discuss various ways of uncovering accounting fraud and detecting creative accounting. It will provide an understanding of how to use trend analysis of financial statements to uncover certain types of fraud and the

role of internal audit assessments.

Prerequisite: FIC 4010

Credit: 3 Units

FIC 4030: Information System Security

This course covers fundamental issues and first principles of security and information assurance. The course will look at the security policies, models and mechanisms related to confidentiality, integrity, authentication, identification, and availability issues related to information and information systems. Other topics covered include basics of cryptography (e.g., digital signatures) and network security (e.g., intrusion detection and prevention), risk management, security assurance and secure design principles, as well as e-commerce security. Issues such as organisational security policy, legal and ethical issues in security, standards and methodologies for security evaluation and certification will also be covered.

Prerequisite: FIC 4010

Credit: 3 Units

FIC 4040: Information Technology and Cybercrime

Cybercrime' course examines how the online world has borne new crimes and law enforcement responses, as well as investigates how the computer has become both a target of attack and a tool for criminal activity. 'Cybercrime' explores a number of emerging cybercrimes (cyber-stalking, hacking, and attacks to critical infrastructure), and also explores

how old crimes are affected in new mediums (organized crime, electronic theft, pornography, child abuse materials, and peer-to-peer file-sharing systems). How do nation-states regulate criminal activity of those persons and organisations located abroad? How is law enforcement shifting from traditional mechanisms to new regulatory regimes and technological solutions? Additional topics include cyber-terrorism, hactivism, information warfare, and digital forensics.

Prerequisite: FIC 4010

Credit: 3 Units

FIC 4050: Computer Forensics and Investigation

The Computer Forensics program provides its participants with a comprehensive understanding of computer forensics and investigation tools and techniques. All major personal computer operating system architectures and disk structures will be discussed. Participants will learn about the most relevant software and hardware tools, the importance of digital evidence controls, and how to process crime and incident scenes. Participants can also look forward to in-depth coverage of key areas like data acquisition, computer forensic analysis, e-mail investigations, image file recovery, and investigative report writing.

Prerequisite: FIC 4010

Credit: 3 Units

ISC: Internet Security and Cybercrime

ISC 6110 Network Security and Management

This course covers the principles and foundations of computer and network security. It aims at providing students with understanding the goals, issues, technologies, algorithms and protocols used in securing computer networks and associated systems. It also provides an understanding of possible security breaches, security risk analysis and mechanisms to protect computer and network communication systems. It also studies an in-depth review of commonly-used security mechanisms and techniques, security threats and network-based attacks.

Prerequisites: MIS6040

Credit: 3 Units

ISC 6125 Intrusion Detection and Prevention

This course introduces students to the tools, methods and resources to help identify, assess, report and prevent unauthorized or unapproved network activity. It aims at providing students with understanding on how to design and implement event logging, network sensors and taps and data collection. The course also covers various intrusion detection tools and techniques used to analyze data from various sources to identify intrusions and configure prevention responses.

Prerequisite: None

Credit: 3 Credits

ISC 6130 Computer Forensics and Cybercrime

This course is intended to provide students with greater depth of study in a number of key topics in the area of computer security in society: cybercrime, computer and network forensics, and financial forensics. The course also involves significant practical work involving the development and use of forensics analysis tools.

Pre-requisite MIS6010, MIS6130

Credit: 3 Units

ISC 6140 IT Security Techniques and Incident Handling

This course introduces students to hacking tools and incident handling. Areas of instruction include various tools and vulnerabilities of operating

systems, software and networks used by hackers to access unauthorized information. This course also addresses incident handling methods used when information security is compromised. Identify and analyze ongoing attack precursors and incidents affecting various information system components and students will learn how to build and plan for incidence response, disaster recovery and business continuity capability through well developed and tested policy, teams, tools and resources.

Prerequisite: None

Credit: 3 Credits

ISC 6210 Software Security

The purpose of this course is to analyze the role of security from the perspective of business software and how to integrate security as a core component within an application architecture. Upon completion of the course, the learner will be able to analyse a variety of security attacks targeted at software systems including but not limited to those targeting: system software, application software, web applications and web apps. Prescribe ways of integrating security into the software development lifecycle and evaluate secure coding practices that reduce or eliminate software flaws and vulnerabilities.

Prerequisites: ISC 6110

Credit: 4.5 Credits

ISC 6220 Advanced Cryptography

This course covers modern cryptographic algorithms. It aims at providing students with skills to analyze the central aspects of symmetric and asymmetric cryptography and to apply cryptographic techniques to establish security in modern information and communication systems. The course also covers various techniques to Implement encryption algorithms using conventional and public key cryptography as well as hash functions and key establishment protocols using object oriented programming.

Prerequisites: ISC 6110

Credit: 3 Credits

ISC 6230 Information Security Auditing and Compliance

This course is designed to develop students the ability to apply information security and audit knowledge, skills, techniques and tools to create solutions to practical problems in organisations. Upon completion of the course, the learner will be able to perform information security risk assessments relating to existing information systems and proposed projects and initiatives. Conduct audits on various information system components, Evaluate organisational compliance to relevant legislation, regulatory frameworks and industry standards. The students will also learn how to document audit results in reports that communicate clearly to the business areas of concern.

Prerequisites: ISC 6110

Credit: 3 Credits

ISC 6310 Digital Forensics

This course provides students with knowledge and skills to conduct comprehensive digital forensics and cybercrime investigations. Students will learn how to conduct effective live, operating system, file system, network, e-mail and mobile device forensic investigations. This course also addresses laws, scientific process and procedures associated with identifying, acquiring, examining, preserving and presenting digital evidence. Students will also learn how to write digital forensic reports and the process of providing expert witness testimony in court.

Prerequisites: ISC 6110

Credit: 4.5 Credits

ISC 6320 Ethical Issues in Information Security

The course will give an insight into the development and need for issues regarding social, legal, privacy and the application of computer ethics to information technology. This course will also equip students with the necessary knowledge and skills to write information security policies to guide people on acceptable security practices, and prepare them to apply rational, coherent and consistent approaches to making moral decisions in the IT field. The course also covers relevant international, regional and

national legal and regulatory frameworks that shape information security practices, data protection, right to privacy, intellectual property, and cybercrime investigations.

Prerequisites: None

Credit: 3 Credits

ISR 6410 Research Methods in Computer Science

This course aims to develop students' ability to conduct research in broad areas of Computer Science. Upon completion of the course, the learner will be able to formulate research hypotheses, review, compare, contrast research outcomes. Students will also learn how to associate different types of research to computational problems in various domains.

Prerequisites: None

Credit: 3 Credits

ISR 6420 Modern Issues in Information Security (Special Topics Course)

This course introduces students to the emerging issues and concepts in Information Security and provide a forum for students to discuss and generate ideas on issues related to research. Upon completion of the course, the learner will be able to analyze Information security frameworks and standards, contrast theories of information security and to critical analysis and write and journal articles in information security.

Prerequisites: ISC 6110, ISC 6140, ISC 6340, ISC 6330

Credit: 3 Credits

ISC 6330 Information Security Governance and Management

This course provides students with the knowledge and skills to protect information within an organisation through the identification and implementation of effective information security governance, information security concepts and strategies. Upon completion of the course, the learner will be able to apply the principles, philosophies and best practises which underlie successful information security governance.

Prerequisites: ISC 6110

Credit: 3 Credits

ISC 6430 Security architecture for cloud computing

The purpose of the course is to master key concepts of cloud computing and apply the various skills in the design and management of cloud computing implementations. The course then moves into cloud architecture and security design, both for building new architectures and for adapting tried-and-true security tools and processes to the cloud. Upon completion of the course, the learner will be able to evaluate the core issues of cloud computing such as security, privacy, interoperability. Students will also learn how to design and implement appropriate cloud computing technologies.

Prerequisites: ISC 6110

Credit: 3 Credits

ISE 6440 Reverse Engineering and Malware Analysis

This course aims to provide students' will learn reverse engineering concepts and how malware interacts with the underlying Operating System. Students will gain an understanding of the components of a malware analysis toolbox and to discover each component that contributes to either behavioral or code analysis techniques. Upon completion of the course, the learner will be able to examine and reverse engineer malicious programs and to analyze key characteristics of malware discovered during forensic examination.

Prerequisites: ISC 6210

Credit: 4.5 Credits

ISE 6450 Vulnerability Assessment and Penetration Testing

This course provides students with the knowledge and skills for identifying security weaknesses and exploiting the security loopholes in order to evaluate and mitigate the security risks. Upon completion of the course, the learner will be able to Identify and analyze network security risks associated with hacking and other exploits, perform a network penetration testing on own deployment and evaluate network security threats and possible exploits.

Prerequisites: ISC 6210

Credit: 4.5 Credits

ISR: Research Methods in Computer Science

ISR 6410 Research Methods in Computer Science

This course aims to develop students' ability to conduct research in broad areas of Computer Science. Upon completion of the course, the learner will be able to formulate research hypotheses, review, compare, contrast research outcomes. Students will also learn how to associate different types of research to computational problems in various domains.

Prerequisites: None

Credit: 3 Credits

ISR 6420 Modern Issues in Information Security (Special Topics Course)

This course introduces students to the emerging issues and concepts in Information Security and provide a forum for students to discuss and generate ideas on issues related to research. Upon completion of the course, the learner will be able to analyze Information security frameworks and standards, contrast theories of information security and to critical analysis and write and journal articles in information security.

Prerequisites: ISC 6110, ISC 6140, ISC 6340, ISC 6330

Credit: 3 Credits

ISR 6890 Research Thesis I (Proposal Stage)

The purpose of the course is to equip students with knowledge and skills to write a research proposal. Upon completion of the course, the learner will be able to identify a suitable research topic within the domain of information security, describe the research problem supported by current literature, select an appropriate research methodology. Students will write research proposal that will form the basis of the research project

Credit: 3 Credits

ISR 6892 Research Thesis II (Experimentation/field)

This course is a progression of ISR 6890 and provides the student an avenue to develop the proposed solution

to the identified problem or need as was articulated in the research proposal (ISR 6890). Consequently, the course will focus on project experimentation or field work. Having successfully completed this course, students will be better prepared to undertake ISR 6894 research project (Thesis Writing and defense) and apply their research experimentation skills in an industry context.

Prerequisites: ISR 6890

Credit: 3 Credits

ISR 6894 Research Thesis III (Thesis writing and defense)

This course is a progression of research project two (ISR 6892) and provides the student an avenue to document and present proposed solution. The course enables a student to clearly communicate their research in presentations and in a publication. The student will be required to present their research work in faculty and in a conference presentation or write one peer reviewed journal article.

Prerequisites: ISR 6892

Credit: 3 Credits

IST: Information Systems and Technology

IST 0999 Computer Competency

The objective of the course is to ensure a minimum level of computer usage proficiency. This will include the use of a word processor, and a spreadsheet as well as basic computer concepts.

Credit: 1 unit

IST 1010 Introduction to Information Systems

Overview of the basic components of processing systems, namely environment, software, hardware, people, behavior, tasks, and connectivity. Review of various application programs such as word processing, spreadsheets, databases and graphics, and an operating system.

Prerequisite: Pass IST 0999 or pass the Computer Competency Test.

Credit: 3 Units

IST 1020 Introduction to Computers and Information Systems

(IST1010 repacked for IST and APT majors) Emphasis should be on advance features of Word, Excel, Access and Power-point. An introduction to computer concepts, applications, and information systems. Topics include the use of software, such as Ms windows, spreadsheet, database management, graphics, word processing and computer communications via the Internet. Students develop beginning level skills with common applications in order to use a computer as a tool, make informed decisions concerning computer-generated information, and obtain basic information systems concepts and terminology. Students will have substantial hands-on time in both dedicated classrooms/labs and open lab environments. This is a general computer literacy course.

Prerequisites: IST0999 or Pass in Placement Test

Credit: 3 Units

IST2010 Computer Organisation and Programme

The purpose of this course is to introduce students to the functional units of a computer (hardware), the flow (buses) and storage (memory management) of information, the representation and manipulation of numbers in binary form, and the five to seven

levels around which any computer is designed. The also course provides students with a foundation on assembly language programming as a basis for Computer Architecture.

Credit: 4.5 Credits

Prerequisite: IST 1020

IST 1025: Introduction to Programming

The course introduces the fundamental concepts of procedural programming.

Pre-requisites: IST 1020: Introduction to Information Systems

Credit Hours: 3

IST2040 Information Technology and Applications

End- user systems verses organisation information systems: analysis of knowledge work and its requirements. Software functionality to support group productivity. Access to organisation data and external data. Designing and implementing a user interface using package software. Developing and using small information systems for individuals and groups using database and expert systems software.

Prerequisite: IST1010

Credit: 3 Units

IST 2030 Fundamentals of Programming Languages

This course acts as a guide to understanding computer languages design in general. This course presents concepts and structures governing the design and implementation of modern programming languages, run-time representations of traditional block structured languages, typing systems, abstraction and procedure mechanisms, and storage management. It also introduces language design issues and language translators. The course provides more thorough understanding of why certain programming language features provide more support for the production of reliable programs.

Prerequisite: IST1020

Credit: 3 Units

IST 2045 Introduction to Computer Networks

This course is a gateway to entry- level networking jobs and IT careers. The course covers, introduction

to networks, Local Area Networks, internetworking and transport layers focusing primarily on TCP/IP, IPv4 and IPv6, routing and switching essentials, Scaling Net works, Connecting Networks, and an introduction to Quality of Service. The student will develop a working knowledge of routing, switching, network applications, protocols, and services. The students will practice what they learn on both real equipment and a network configuration simulation tool.

Pre-requisite: IST 2230 or APT1030

Credit: 3 Units

IST 2050 Electronic Business Strategy, Architecture and Design

Course focuses on organisational strategy and networked information technologies to implement a rich variety of business models connecting individuals, businesses, governments and other organisations to each other. The course provides an introduction to e-business strategy, and the development and architecture of e-business solutions and their components. Topics will include: e-commerce economics, business models, value chain analysis, technology architectures for e-business, design of solutions for the internet, site design, intranets and extranets, EDI, payment systems, support for inbound and outbound logistics. Transborder data flows, legal and ethical issues, disaster planning and recovery.

Prerequisite: IST2010, IST2020

Credit: 3 Units

IST 2060 Introduction to Data Structures

This course introduces abstract data types, and presents algorithms and data structures for implementing several ADT's. It emphasizes the efficiency of algorithms as evaluated by asymptotic analysis of running time. Topics include linear ADTs, hash tables, heaps, trees, graphs; sorting, as well as algorithm design techniques. The programming assignments will be given in the C++ language.

Prerequisite: IST2010, IST2030

Credit: 3 Units

IST 2070 Introduction to Computer Hardware and Maintenance

This course provides advanced knowledge and competencies in computer hardware maintenance and troubleshooting. Emphasis is on configuring and upgrading; diagnosis and troubleshooting; as well as preventive maintenance of hardware and system software.

Prerequisite: IST2010

Credit: 3 Units

IST 2230 Introduction to Computer Fundamentals and Programming

This course will put emphasis on fundamentals of programming and control structures. The course also introduces programming in C. Topics include introduction of rudimentary concepts about computers, and the fundamental methodologies and approaches to computer programming in the C/C++ programming languages. The topics covered include the general characteristics of computers, techniques of problem solving using the computer, informal methods to designing algorithms, the C/C++ programming language, and writing, debugging and testing computer programs. In-depth problem solving and programming methodologies using C/C++, considerable emphasis is put on algorithm design as well as on programming in C/C++. Design of algorithms before you can write programs in C/C++ is emphasized.

Prerequisite: IST1020

Credit: 3 Units

IST 3005 Application of Social Media for Business

Students will learn how to apply social media for business and online marketing for the business owners, manager or entrepreneur, how to boost social networking IQ, and equip students with sustainable tactics and savvy communications proven to deliver higher levels of customer engagement including strategies that drive social media results in a business environment.

Credit: 3 Units

IST 3015 Business Data Analytics

This course introduces market-leading techniques that help to identify and manage key data from business processes. It covers the process of formulating business objectives, data selection, preparation, and partition to successfully design, build, evaluate and implement predictive models for a variety of practical business applications. Development of exploratory and predictive models for managers and business decision-makers. Emphasis is on analyzing data using statistical software, visualizing and interpreting the results of those analyses and translating results into clear and simple insights to aid managerial decision making.

Prerequisite: MTH 2010

Credit: 3 Units

IST3020 Principles of Operating Systems

This enables students to understand the functions of operating system components and their interactions, to be able to exploit operating system facilities to improve the functionality and efficiency of programmes, and be able to evaluate the suitability of a given operating system for a given task.

Credit: 4.5 Credits

Prerequisite: IST2010

IST 3030 Computer Programming for Business

Course focuses on organisational strategy and networked information technologies to implement a rich variety of business models connecting individuals, businesses, governments and other organisations to each other. The course provides an introduction to e-business strategy, and the development and architecture of e-business solutions and their components. Topics will include: e-commerce economics, business models, value chain analysis, technology architectures for e-business, design of solutions for the internet, site design, intranets and extranets, EDI, payment systems, support for inbound and outbound logistics. Transborder data flows, legal and ethical issues, disaster planning and recovery. Creating static dynamic and active World Wide Web (WWW) documents. Study of different Web programming and

scripting languages, including Java. Students will be expected to build a simple web-based information system.

Prerequisite: IST2010

Credit: 3 Units

IST3040 Digital Lab

The course teaches students to assemble/setup and upgrade personal computer systems; diagnose and isolate faulty components; optimize system performance; and install/ connect peripherals. In addition the students will be able use development kits such as Raspberry Pie and Arduino boards for programming simple interfaces.

Prerequisite: IST2010; IST3020

Credit: 3 Units

IST 3050 Introduction to Security Systems

This introductory course covers fundamental issues and first principles of security and information assurance. The course looks at the security policies, models and mechanisms related to confidentiality, integrity, authentication, identification, and availability issues related to information and information systems. Other topics covered include basics of cryptography (e.g., digital signatures) and network security (e.g., intrusion detection and prevention), risk management, security assurance and secure design principles, as well as e-commerce security. Issues such as organisational security policy, legal and ethical issues in security, standards and methodologies for security evaluation and certification are also covered. (ILI)

Prerequisite: IST2010

Credit: 3 Units

IST 4010 Advanced Information Systems

Overview of executive information systems, expert systems, and distributed systems at the operational, tactical and strategic levels; includes user/system interaction, systems planning, hardware and software, management, maintenance, security, and evaluation.

Prerequisite: IST 2040

Credit: 3 Units

IST 4020 Systems Analysis and Design

Concepts, philosophies, and trends in systems analysis and design; systems development life cycle; process modeling and prototyping; computer support for systems development / methodologies; system implementation and its relationship to the construction and delivery phases of the life cycle. (OI)

Prerequisites: IST3020

Credit: 3 Units

IST 4030 Data management systems

Data structures and file organisation; data description languages. Integration of disk access time, block size, file structure, normal forms, linked lists, query types, tree structures, and performance specifications into the data base; design of relational database management systems, characteristics of vendor supplied database software packages. (OI)

Prerequisites: IST 4020

Credit: 3 Units

IST 4035 Advanced Web Design and Applications

This Module embraces a broad spectrum of ideas and techniques associated with information systems and information management on the world wide web. Students are taken from an introduction to the basic principles of how the www works and the basic technologies and ideas underpinning it through to discussions of what the implications are for working practices and the organisation of information. The background and development of the World Wide Web from a sociotechnical perspective; its significance from an operational perspective. The development of client-server computing architectures and the parallel developments in wide area networking. Current and ongoing developments; e.g. the 'Wireless Web', MBone (Multicast Backbone). Protocols and languages including tcp/ip, http, https, html, xml, xhtml. Appreciation of the role of Open DataBase Connect and Java DataBase Connect drivers; Common Object Request Broker Architecture. The variety of processing styles available: Common Gateway Interface, Active Server Pages, Client- and Server-side processing. The three - tier paradigm: Data, Business and User services. Mapping Information System

requirements onto WBIS. Appropriate object oriented development methodologies. Web- page and Web-site development tools.

Third party enhancements to WBIS: e-commerce, cybercars. Web based IS in organisations: implications for working practices and the organisation of work. (OI)

Prerequisite: APT1040

Credit: 3 Units

IST 4040 Decision Analysis

Characterization of decision models under risk and uncertainty; analysis of transportation, allocation, and distribution problems with mathematical programming; queuing and simulation models; decision support systems for quantitative analysis of manufacturing and service operations; fundamentals of expert systems and intelligent decision support systems.

Prerequisite: MTH 2010

Credit: 3 Units

IST4050 Global Information Systems

Overview of trans-national telecommunications, teleprocessing, data communications and distributed information systems at operational, tactical and strategic levels; distributed systems, hardware, software, design, management, security and evaluation.

Prerequisite: IST2040

Credit: 3 Units

IST 4060: Telecommunications and Networks

Overviews of telecommunications fundamentals, including the structure of local and international telephone networks, data networks and integrated services digital networks. In-depth study of layered communication architectures in local area networks (LANs) and wide area networks (WANs). International telecommunication standards and standards organisations. Installation, configuration, integration, and management of networks and will be practiced.

Prerequisites: IST 4020

Credit: 3 Units

IST 4070 Object-Oriented Programming

Introduction to advanced data structures and algorithms - arrays, records, lists, and trees, and associated methods for data manipulations. In-depth study of object-oriented programming: definition of objects and classes and methods. Graphic classes and graphical user interface components. Files and streams.

Prerequisites: IST 2060 and IST3020

Credit: 3 Units

IST4072 Object-Oriented Analysis and Design

Object oriented analysis and design course presents an introduction to the design and construction of software systems using techniques that view a system as a set of objects that work together to realize the system's functionality. The course emphasis on deeper investigation into object-oriented principles, object identification and analysis, design patterns and metrics for object-oriented systems. The course examine the fundamental object-oriented analysis, unified modeling language (UML) and design techniques and show how decisions made during analysis and design impact the implementation of software systems.

Prerequisites: IST 4020

Credit: 3 Units

IST 4075 Mobile Applications Development

Today's applications are increasingly mobile. Computers are no longer confined to desks and laps but instead live in our pockets and hands. This course teaches students how to build mobile apps for Android, iOS, and Windows 8, the trinity that is today's mobile operating platforms. Students learn to write both web apps and native apps for Android using Eclipse and the Android SDK, to write native apps for iPhones, iPod Touches, and iPads using Xcode and the iOS SDK, and to write web apps for both platforms. The course also touches on Windows 8 application programming, so as to provide students with a stepping stone for application development in the mobile operating system of their choice. Additional topics covered include application deployment and availability on the corresponding

app stores and markets, application security, efficient power management, and mobile device security.

Credit: 3 Units

IST4080 Backend Databases and Structured Query Language

The purpose of this course is to impart database administration skills to student to enable them manage databases. The Structured Query Language (SQL) is used at an advanced level with emphasis on administrative tasks.

Credit: 4.5 Credits

Prerequisite: APT1050

IST 4900 Information Systems Project

Contemporary developments in the presentation of managerial information. Trends in relational database systems and the applications development tools. Independent business application development project including requirements analysis, design and implementation, and presentation (oral and written). (WI)

Prerequisite: IST 4060 and IST 4070

Credits: 3 Units

IST 4910 Information Systems Internship

Internship in a IS/IT related department in an organisation like Internet Service Providers, computers companies, parastatals, research organisations, business organisations, banks, universities, Schools, NGO or any other organisation approved by faculty department chair or Dean. A minimum of 120 hours is required.

(Grading is credit/ no credit)

Prerequisite: IST 4060 and IST 4070

Credits: 3 Units

IST 6000 Information Systems Management

Managing the Digital Firm. Information Systems in the Enterprise; Information Systems, Organisations, Management, and Strategy; the Digital Firm: Electronic Commerce and Electronic Business. Managing Hardware Assets; Managing Software Assets; Managing Data Resources. Telecommunications and Networks; the Internet and the New Information Technology Infrastructure.

Redesigning the Organisation with Information Systems; Understanding the Business Value of Systems and Managing Change. Managing Knowledge: Knowledge Work and Artificial Intelligence. Enhancing Management Decision Making. Information Systems Security and Control. Ethical and Social Impact of Information Systems; Managing International Information Systems.

Prerequisite: BUS 5080

Credit: 3 Units

IST 6020 Data and Information Services Management

This course discusses the utilization and development of computer systems to manage data assets of the organisation. Issues in harnessing data repositories, database resources, internal and external information feeds will be discussed.

Prerequisite: IST 6000

Credit: 3 Units

IST 6030 Telecommunications and Network Applications

Students will be exposed to review of LAN and WAN technologies, local and international networks and telecommunication standards. Course will include discussions on significance of network management on business operations and decision making.

Prerequisite: IST 6000

Credit: 3 Units

IST 6060 Managing Electronic Business

Introduction to e-Business and e-Commerce, Internet and World Wide Web Development, e-Business and e-Commerce Overview, eBusiness Models, Building an e-Business: Design, Development and Management. Online Monetary Transactions: Credit-Card Transactions. Digital Currency. e-Wallets. Peer-to-Peer Payments. Micro payments. Business - to - Business (B2B) Transactions. e-Billing. Developing Payment Standards. Internet Hardware, Software and Communications. Internet Security. Internet Marketing: Branding. Internet Marketing Research, e-Business Advertising, e-Business Public Relations. Business - to - Business (B2B) Marketing on the Web. Search Engines. Affiliate Programs.

e-Customer Relationship Management. Legal Issues: Privacy on the Internet. Cybercrime. Internet Taxation. Regulating the Internet on an International Level.

Prerequisite: IST 6000, IST 6030

Credit: 3 Units

IST 6710 Informational and Technology Management Internship

Directed internship in a private firm or not-for-profit organisation, or a government agency for experience in the practical application of information and technology.

Prerequisite: BUS 6220

Credit: 3 Units

IST 6850 Information and Technology Management Project

Independent study under the direction of a faculty supervisor. Projects may include library or empirical research or analysis and written report on an appropriate information and/or technology organisation (private firm, not-for-profit organisation, or government agency).

Prerequisite: BUS 6220

Credit: 3 Units

Success is not final,
failure is not fatal: It is the
courage to continue that
counts.

Winston Churchill

MDA:

MDA 6130: Time Series Analysis and Forecasting

The time series analysis and forecasting course will introduce a variety of statistical models for time series and cover the main methods for analyzing these models.

Pre-requisite: STA 6110

Credit: 3 Hours

MDA 6210: Data Visualization and Communication

Data visualization and communication course will equip learners with concepts, and approaches in the design and analysis of data visualization systems plus communicating with data.

Pre-requisite: MTH 6120

Credit: 3 Hours

MDA 6310: Cybersecurity Analytics

The purpose of the course is to equip learners with intelligence and data analysis techniques and skills that will help businesses improve their detection and response to cybersecurity attacks.

Pre-requisite: MDA 62120

Credit: 3 Hours

MDA 6320: Data Governance and Ethics in AI

The data governance and ethics in AI course will equip learners with the knowledge, frameworks, and critical thinking skills necessary to navigate the complex ethical, legal, and organizational challenges posed by artificial intelligence and data-driven technologies.

Pre-requisite: MDA 6310

Credit: 3 Hours

MDA 6330: Data Science Seminar

The data science seminar course will provide a platform for students to explore, present, and critique contemporary research and innovations in data science.

Pre-requisites: STA 6110, MDA 6210, and MDA 6320

Credit: 3 Hours

MDA 6570: Project Proposal

The project proposal stage is the foundational step in preparing students for their final research project by

shaping a clear, feasible, and academically rigorous plan for a meaningful investigation or innovation.

Pre-requisite: MDA 6330

Credit: 3 Hours

MDA 6610: Project Report/ Dissertation

The project report/ dissertation allows students to present their preliminary project findings and final project.

Pre-requisite: MDA 6570

Credit: 6 Hours

MDA 6410: Advanced Machine Learning

This advanced machine learning course is designed to give the learner a thorough grounding in current/ future machine learning methodologies, technologies, mathematics, algorithms and applications.

Pre-requisite: MTH 6120

Credit: 3 Hours

MDA 6450: DevOps

The DevOps course is designed to provide learners with a deep understanding of the principles, practices, and tools that enable seamless collaboration between software development and IT operations.

Pre-requisite: MDA 6320

Credit: 3 Hours

MDA 6530: Software Design and Architecture

The software design and architecture course will introduce students to software design as a key requirement for the development of quality products. Learners will evaluate and select design alternatives to achieve quality attributes.

Pre-requisite: MDA 6450

Credit: 3 Hours

MDA 6430: Data Mining and Warehousing

The data mining and warehousing course will provide learners with a comprehensive understanding of how to extract meaningful insights from large datasets and efficiently manage data storage systems.

Pre-requisite: MDA 6410

Credit: 3 Hours

MDA 6460: Business Analytics

The business analytics course will equip students with the analytical, technical, and strategic skills needed to transform data into actionable business insights through hands-on experience with industry-standard tools - R, Python, and Power BI.

Pre-requisite: MDA 6210

Credit: 3 Hours

MDA 6470: Fraud Detection Analytics

The fraud detection analytics course will provide students with a comprehensive investigation of fraud detection methodologies and techniques, as well as the knowledge and abilities to recognize and neutralize fraudulent actions across several domains.

Pre-requisites: MDA 6310, MDA 6320

Credit: 3 Hours

MDA 6480: Text Analytics

The text analytics course will focus on how to extract insights, patterns, and information from unstructured text data using natural language processing, machine learning, and data mining.

Pre-requisite: MDA 6210

Credit: 3 Hours

MDA 6550: Finance and Risk Management Analytics

The finance and risk analytics course will provide students with a comprehensive exploration of how analytics and data-driven approaches are applied in the field of finance and risk management.

Pre-requisite: MDA 6470

Credit: 3 Hours

MDA 6560: Geo-intelligence/ Spatial Analytics

The geo-intelligence/ spatial analytics course will introduce students to the world of geo-intelligence and spatial analytics, preparing them to extract important insights from geographic data.

Pre-requisite: MDA 6460

Credit: 3 Hours

MIS: Management Information Systems

MIS 5010 Data Structures & Algorithms

This course leads to the understanding of the Stacking, Queuing to go for Arrays and linked lists. It leads to learn relevant applications of data structure, algorithms, and evaluations of data structure against criteria and gives proper approach to learn dynamical algorithms, minimum spanning tree and overview of Huffman encoding.

This is the introductory course on data structures and algorithms as used in problem solving. The course introduces the basic data structures arrays, records, strings, linked lists, stacks, and queues B-Trees, graphs, Searching & Sort techniques and the algorithms for manipulating the data structures including analysis of BIG O notations. Hash technique. While data structures are seen as a method of collecting and organizing large amounts of data, algorithms are the means by which the computer efficiently manipulates the data structures. Since some implementation and testing of programs are important part of algorithms, computer code has to be exhibited. Therefore, some amounts of programming will be necessary, especially in C/C++/Java

Prerequisites: None

Credit: 3 Units

MIS 5020 Fundamentals of Programming Languages

This course acts as a guide to understanding computer languages design in general. This course presents concepts and structures governing the design and implementation of modern programming languages, run-time representations of traditional block structured languages, typing systems, abstraction and procedure mechanisms, and storage management. It also introduces language design issues and language translators.

The course also provides fundamental introduction to computer programming theory and concepts to students with little or no previous experience. Students learn structure, syntax, logic, and the difference between object-oriented and procedural systems methodologies. Students are introduced to structured programming OOP as well as machine organisation. A high level language such Visual Basic is suggested as

introductory language but other languages such as C/C++ may be used with justification.

Prerequisite: None

Credit: 3 Units

MIS 5030 Concepts of Operating Systems

The course covers the concepts and architecture of a stored program digital computer system and provides an understanding of the characteristics and the operating principles of the main hardware components of a computer system. In addition, the course covers the concepts and fundamentals of the operating systems. These fundamentals include process management, memory management, and device management and file management. This course enables students to understand how the interface between users and machine is achieved through system utilities and programs. Development of operating systems is also discussed.

Credit: 3 Units

MIS 6010 IT Infrastructure

This course is a study of the evolution of computer architecture and the factors influencing the design of hardware and software elements of computer systems. Topics may include: instruction set design; processor micro-architecture and pipelining; cache and virtual memory organisations; protection and sharing; I/O and interrupts; in-order and out-of-order superscalar architectures; VLIW machines; vector supercomputers; multithreaded architectures; symmetric multiprocessors; memory models and synchronization; embedded systems; and parallel computers.

Credit: 3 Units

MIS 6020 Application Domains of Information Technology

This course will study the characteristics of a digital firm including how business relationships with customers, suppliers, and employees are digitally enabled and mediated; The course is designed to enable students develop a critical view of how Information Technology is implemented and used within different organisations and 'application domains' as well as understand various ethical issues raised from a local and global

perspective. The term 'domain' is used to signify areas of use of IT and the term 'application' to signify focus on how it is applied in specific contexts. In addition, the course introduces Information systems' students to the concepts and practices of technology entrepreneurial thinking and entrepreneurship by teaching life skills in entrepreneurial thought and action that students can utilize in starting technology companies.

Prerequisites: or Co-requisite: MIS6010

Credit: 3 Units

MIS 6030 Applications Development

The syntax of Java is largely derived from C++ but unlike C++, which combines the syntax for structured, generic, and object-oriented programming, Java was built almost exclusively as an object-oriented language. All code is written inside a class, and everything is an object, with the exception of the primitive data types (integers, floating-point numbers, Boolean values, and characters). The course teaches student how to create, compile, and execute a Java program using an SDK. It describes Java's built-in data types for manipulating strings, integers, real numbers, and Booleans. It then introduces Java structures for control flow, including if-else statements, while loops, and for loops. It then considers the array data structure for organizing large quantities of data, then moves to discuss input and output abstractions (from command-line input and standard output) to include standard input, standard drawing, and standard audio. More advanced concepts like event driven programming, swing components, inheritance, encapsulation, file handling, web and database programming are introduced in a progressive manner. The course will use balanced examples and explanatory discussion, with numerous additional programming projects.

The course explains concepts and techniques and uses several code examples as a pedagogical tool.

Prerequisites: MIS5010

Credit: 3 Units

MIS 6040 Networking and Wireless Communications

Computer networks are collections of autonomous computers, for example the Internet. These networks

have a variety of applications including business, home and mobile users. Companies use networks and computers for resource sharing and communication with the client-server model, email, VOIP and e-commerce. Homes contain many networked devices, including computers and TVs connected to the Internet by cable, DSL, wireless amongst others. Home users communicate via social networks, consume content like video and transactionline, and may use applications based on the peer-to-peer model in which there are no fixed clients and servers. Some application use the peer-to-peer model in which there are no fixed clients and servers. For mobile users, tablets, laptops, and smart phones are popular devices which use WiFi hotspots and 3G cellular for wireless connectivity. Mobile users communicate using voice and texts, consume content including video and Web, and use sensors like the GPS. All these applications raise social issues like network neutrality, privacy, cybercrime, theft, Anonymity, censorship. This course addresses the key issues underlying the technical aspects of creating networks with a special treatment for wireless networks. It also addresses network security issues.

Prerequisites: MIS6010

Credit: 3 Units

MIS 6050 Database Development Technology

Course covers relational database technology and focuses on design of database applications to solve business problems. Database systems, design techniques and their use in organisations. It makes use of case studies to illustrate database systems use for strategic and operational decision making. Emerging technologies and their applications will be covered. Students will get hands-on experience with state-of-the-art commercial relational and object-oriented database technology and learn to use SQL.

Prerequisite: MIS6020

Credit: 3 Units

MIS 6060 Distributed Computing & Internet Technology

Knowledge of, the principles and practice underlying the design of distributed systems, both Internet-based

and other wise. Students would learn distributed systems techniques developed over the last two to three decades, such as inter process communication and remote invocation, distributed naming, cryptographic security, distributed file systems, data Replication and distributed transaction mechanisms, provide the run-time, infrastructure supporting today's networked computer applications. Background and history of networking and the Internet, network architectures. It also covers the range of specializations within distributed computing such as Networks and protocols, networked multimedia systems, Mobile and wireless computing. Exploration of the web as a true client/server and distributed computing environment would assist in the understanding of concepts and their applications to real world problems. Remote procedure calls (RPC), lightweight distributed objects, and security issues in distributed computing are also to be covered.

Credit: 3 Units

MIS 6070 Web-Based Information Systems

This course will cover the latest techniques for building scalable Internet systems such as search engines and electronic commerce systems. Lectures cover material drawn from various books and research papers in the field of client-server programming, Internet-database connectivity, data mining and information retrieval. Students will complete projects that build functional web sites with advanced functions. Most projects are done using Java servlet enterprise computing platforms.

Prerequisites: MIS6030, MIS6050

Credit: 3 Units

MIS 6120 Mobile Computing

This module develops an understanding of the principal ways in which a mobile computer, or device, can access a network and includes practical laboratory work. Specifically, it aims to develop an understanding of the design, characteristics and operation of a number of networks supporting mobility. The course focuses upon Wireless Local Area networks in the home, hotspots and business, and mobile computing. A central theme is the associated protocols including

use of the Internet Protocol in mobile scenarios. The use of GSM and 3G, 4G and 5G cellular networks to interconnect mobile computing devices is explained. The module includes descriptions of radio propagation and antennas related to wireless networking.

Prerequisite: MIS6030

Credit: 3 Units

MIS 6130 Information Systems Security, Control and Audit

This unit covers the basic principles and techniques used to protect information. The areas covered are: defining, identifying and classifying information as a resource, access control, information risk analysis, contingency planning, information technology systems, threats to information systems security, data security legislation, database systems and associated security, procedures for secure information flow, classification systems, document and record storage, case studies of information technology systems and abuse including fraud, industrial espionage, confidentiality and privacy breaches, data protection and copyright, and ethical issues associated with information security.

Prerequisite: MIS6040

Credit: 3 Units

MIS 6140 Information Systems Strategy and Management

This course approaches information systems from the executive and operational management perspective. It assumes a familiarity with the fundamentals of business and information systems from a technological point of view, as would be covered in a foundation course in this area. The emphasis of the course will be on understanding concepts, characteristics and factors, particularly from technological and non-technological perspectives, that are likely to impact the effectiveness and success of information systems in business environments. The aim of the course is therefore to provide students with a balanced view and deeper understanding of developing information systems strategy and managing information systems from organisational and technical perspectives so that they have a theoretically sound, but nevertheless practically oriented foundation, from which to successfully

tackle information systems projects, initiatives and implementations.

Credit: 3 Units

MIS 6160 I.T. Project Management

This course covers the factors necessary for successful management of information systems development or enhancement projects. Both technical and behavioral aspects of project management are applied within the context of an information systems development project. Various topics will be covered and will include: Managing the system life cycle, system and database integration issues, network management, project tracking, metrics, system performance evaluation, managing expectations of managers, clients, team members, and others, determining skill requirements and staffing, cost-effectiveness analysis, reporting and presentation techniques, risk management, management of behavioral and technical aspects of the project, change management, software tools for project tracking and monitoring and team collaboration techniques and tools.

Credit: 3 Units

MIS 6170 Object Oriented Techniques

Introduction: Object oriented concepts: Objects; Class; Abstraction; Encapsulation; Polymorphism; Inheritance; Dynamic binding; Message passing; Arrays; Methods Advanced Java programming concepts and tools for electronic commerce and enterprise applications. Servlets, Java server pages, and XML for web server systems. Enterprise JavaBeans for session and entity management. Client side applets, JDBC database manipulation, security, and other advanced topics.

Credit: 3 Units

MIS 6171 Information Technology Ethics and Entrepreneurship

The course will give an insight into the development and need for issues regarding social, legal, privacy and the application of computer ethics to information technology. Also some ethical theories as well as moral problems within informatics are discussed from a global point of view.

In addition, the course introduces Information systems' students to the concepts and practices of technology

entrepreneurial thinking and entrepreneurship by teaching life skills in entrepreneurial thought and action that students can utilize in starting technology companies or executing R&D projects in large companies.

Credit: 3 Units

MIS 6220 Research Methods

The course is designed to review research methodology associated with various types of projects and statistical analysis. Examines research planning and implementation process including identification of research problem and formulation of research questions, literature review, data collection and data analysis methods, and dissemination of research findings. Also included is an emphasis on the use of appropriate statistical package to analyze descriptive and inferential statistics. The major objective is to develop a project proposal on a relevant IST topic.

Prerequisite: MIS6020

Credit: 3 Units

MIS 6850 Dissertation/Project (Information Systems)

The purpose of this course is to guide students in developing their thesis proposals and strategies for appropriate and productive critical research, prior to the formal thesis. The course assumes that formulating a topic, planning research, doing research and designing are all activities that inform each other on an ongoing basis, that the relationship between these activities is iterative rather than linear. The course will thus initiate students to all aspects of the thesis project simultaneously and seamlessly.

Credit: 3 Units

MIS 6851 Information Systems Project I

The purpose of this course is to guide students in developing their research proposals and strategies so as to carry out productive research and is a follow up to MIS6220 (Research Methods). The course assumes that formulating a topic, planning research, doing research and designing are all activities that inform each other on an ongoing basis, that the relationship between these activities is iterative rather than linear. The course will thus initiate students to all aspects of

MTH: Mathematics

the project seamlessly. Consequently, the course will cover the following sections of the student's project: Chapter 1 (Introduction); Chapter 2 (Literature Review) and Chapter 3 (Methodology). *Prerequisites: MIS6220 & MIS6160*

Credit: 3 Units

MIS 6852 Information Systems Project II

This course is a progression of MIS 6851 and provides the student an avenue to develop the proposed solution to the identified problem or need as was articulated in the final product of MIS 6851. Consequently, the course will focus on the following sections of the student's project: Chapter 4 (System Implementation / Model), Chapter 5 (Results and Findings) and Chapter 6 (Discussions, Conclusions and Recommendations).

Prerequisites: MIS6851

Credit: 3 Units

MTH 1025 Calculus I

The purpose of the course is to introduce the student to the principles of calculus and their applications.

Pre-requisite: MTH 1109

Credit: 3 Units

MTH 1040 Linear Algebra

The course will provide students with an understanding of matrices and vector spaces for later modules to build on and to teach students practical techniques and algorithms for fundamental matrix operations and solving linear equations.

Pre-requisites: MTH 1109

Credit: 3 Units

MTH 1050: Differential Equations

The course will introduce students to the theory and methods of ordinary differential equations.

Pre-requisite: MTH 1030: Calculus

Credit: 3 Units

MTH 1060 Analytical and Computational Foundation

The course will provide extensive coverage of numerical linear algebra, focusing on algorithms and capabilities that are incorporated into MatLab.

Pre-requisite: MTH 1040: Linear Algebra

Credit: 3 Units

MTH 1110 Calculus

The purpose of the course is to introduce the student to the principles of differential and integral Calculus and their applications.

Pre-requisite: None

Credit: 3 Units

MTH 2020 Optimization Techniques

The course intends to introduce the fundamental concepts of Optimization Techniques, and make the learners aware of the importance of optimizations in real scenarios. The course will also provide the concepts of various classical and modern methods of constrained and unconstrained problems in both single and multivariable.

Pre-requisites: MTH 1030: Calculus, MTH 1050

Differential Equations

Credit: 3 Units

MTH 2025 Calculus II

This course seeks to develop practical skills in integral calculus and to illustrate various applications of calculus to technical problems.

Pre-requisites: MTH 1050, MTH 1040

Credit: 3 Units

MTH 2030 Numerical Analysis

This course introduces numerical methods for solving mathematical problems that in science, engineering, and data science. The course focuses on developing efficient algorithms for computing precise numerical values for mathematical equations. The course emphasizes practical applications using programming tools such as Python, MATLAB, or R.

Prerequisite: MTH 1110, MTH1040

Credit: 3 Units

MTH 3010: Mathematical Finance

The course aims to equip students with knowledge and skills that involves active and practical use of mathematics in finance.

Pre-requisites: MTH 2020: Optimization Techniques

Credit: 3 Units

MTH 1105 Algebra in Practical Context

Study of various topics in algebra including properties of real numbers, linear equations, and inequalities; polynomials, rational expressions, exponentials and roots, quadratics equations, systems of linear equations; applications of algebra to everyday problems.

Credit: 3 Units

MTH 1109 College Algebra

Concepts and theories in modern algebra with emphasis on functions, graphical methods, and theory of equations; includes study of quadratic equations, complex variables, systems of equations and inequalities, polynomial functions, logarithmic and exponential functions, arithmetic and geometric

progressions.

Prerequisite: MTH 1105 or pass Mathematics Placement Examination.

Credit: 3 Units

MTH 2010 Probability and Statistics

Population and sample sizes, classification of data, data tabulation, and graphical representation. Data aggregation measures: mean, median, mode, spread range, variances and co variances. Quartiles, percentiles, standard deviation. Definition of probability. Sample spaces and events. Conditional probability. Random variables, Poisson, exponential, and normal distributions. Markov and Chebychev inequalities. Limit theorems. Bi-variate distributions, correlation and regression.

Prerequisite: MTH1109

Credit 3units

MTH 2210 Introduction to Applied Statistics

Descriptive statistics, measures of central tendency and dispersion, skewness, moments and kurtosis, and correlation.

Prerequisite: MTH1109

Credit: 3 Units

MTH 2215: Discrete Mathematics

The purpose of this course is to understand and use (abstract) discrete structures that are backbones of computer science. In particular, the course introduces logic, proofs, sets, relations, functions, counting, and probability, with an emphasis on applications in computer science.

Credit: 3 Units

Prerequisite: MTH1109

MTH 6120: Mathematics for Machine Learning

The mathematics for machine learning course is to provide students with a solid background in the mathematical thinking required for understanding and using machine-learning techniques.

Pre-requisite: None

Credit: 3 Hours

NET: Networking

MTH 6420: Graph Analytics

The graph analytics course is to equip students with the theoretical foundations and practical skills needed to analyze complex networks and graph-structured data.

Pre-requisite: MTH 6120

Credit: 3 Hours

MTH 6520: Optimization and Simulation Methods for Analytics

The optimization and simulation methods for analytics course will equip learners with in-depth knowledge and practical skills to model, analyze, and solve complex business and engineering problems using optimization and simulation methods.

Pre-requisite: STA 6220, MTH 6420

Credit: 3 Hours

NET 4010 Client-Server and Distributed Systems

Review of the strategic perspective for implementing client-server computing. Survey of client-server database servers. Database programming languages and tools for developing client-server applications. Distributed databases, distributed systems hardware, software, design, management, security and evaluation.

Prerequisite: IST4060 or APT 2050

Credit: 3 Units

NET 4020 Network Management

Review of LAN and WAN technologies. Network organisation. Managing of telecommunication networks, cost-benefit analysis, and evaluation of different network options. Managing the Internet. Simple Network Management Protocol. Web-based network management. Network management software and network monitoring tools.

Prerequisites: NET 4010

Credit: 3 Units

NET 4030 Internet Architecture and Protocols

In-depth study of internetworking concepts, architectures, and protocols. The Internet protocol (IP) and the transport control protocol (TCP). Client-server interaction and the socket interface. Application layer protocols of the TCP/IP protocol

suite. Creating static dynamic and active World Wide Web (WWW) documents. Study of different Web programming and scripting languages, including Java. Students will be expected to build a simple web-based information system.

Prerequisites: NET 4010

Credit: 3 Units

NET 4040 Telecommunication Applications

Review of: modulation techniques and bandwidth. Noise, attenuation, and crosstalk. Guided transmission media. Unguided transmission media. Traditional telephone services. Telephone network data services. Digital transmission systems. Telecommunications connections. Physical topology. Telecommunications transmission methods. Telecommunications signal compression. Telecommunications and television services. The race for television services. Television technology. Video recorders and players. Cable television. Digital television. High-speed data services. Packet switching and internet access. Internet protocols and connectivity. Broadband services with local loops. Broadband services with coaxial cable. Broadband services with db satellite. Virtual private networking. X.25 services. Frame relay services. Frame relay and x.25 comparisons. VPNs for small business.

Prerequisite: NET 4010

Credit: 3 Units

NET 4050 Sensor Networks and Internet of Things

Review of: modulation techniques and We are living in a world where everyday objects, such as smartphones, cars, TVs, and even refrigerators, are becoming smarter and constantly connected to each other to build, operate, and manage the physical world. This emerging paradigm, namely the Internet of Things (IoT), has great potential to impact how individuals live, communicate and work. As such, today, smart grid, smart manufacturing, smart homes, smart water networks and intelligent transportation are infrastructure systems that connect our world more than we ever thought possible. While IoT does not assume a specific communication technology, wireless communication technologies will play a major role in the roll-out of the IoT. Hence, with rapid advances in sensors technology and the need for mobility, wireless sensor networks are at the core of IoT. This course therefore introduces students into this interesting field of an interconnected society, where any smart object can be easily integrated into a system for data collection, monitoring and analysis.

Prerequisite: DST4010

SFE: Software Engineering

SFE4010 Human Computer Interaction

This course aims to provide students with knowledge and skills in human factors with respect to interactive software, characteristics of design processes, principles and guidelines of interface design, virtual environments with respect to interfaces, corporate and business aspects of human computer interaction, interface aspects of response times and presentation, interaction devices.

Credit: 4.5 Credits

Prerequisite: APT2080

SFE4015 Software Configuration Management

This course introduces the concepts and methods required for effective and efficient software configuration management and the key problems that can arise from configuration management failures.

Credit: 4.5 Credits

Prerequisite: SWE3050

SFE 4010 Human Computer Interaction

The emphasis of this course is on fundamentals of human-machine interfaces, both cognitive and physical. Learning styles and effects of short-term memory on cognition and reaction will affect hardware and software development. Students will design a prototype interface. This course covers: Introduction to the interdisciplinary area of Human Computer Interaction (HCI); the underlying principles of psychology, computer science and ergonomics that influence theory and practice of HCI design

and usage; specific topics will include: models of human information processing, organisational structures and socio-technical approaches to information system design; design principles for dialogue management; issues of systems usability; hypertext; natural language processing; virtual reality and multimedia applications

Prerequisite: APT 2080

Credit: 3 Units

SFE 4020 Software Design and Architecture

Study of fundamental design concepts, design notations, and architectural design methods for large-scale software systems. Several design methods are presented and compared, with examples of their use. Concepts such as information hiding, data abstraction, concurrency, and object-oriented software construction are discussed in depth. Students participate in a group project on software design.

Prerequisite: SFE 4010

Credit: 3 Units

SFE 4030 Software Testing and Quality Assurance

Topics include methods of testing, verification and validation, quality assurance processes and techniques, methods and types of testing, and ISO 9000/SEI CMM process evaluation.

Prerequisite: SFE 4010

Credit: 3 Units

SFE 4040 Software Requirements and Estimation

The course covers essential aspects of software requirements; elicitation technique, requirements analysis; software quality attributes; software requirements management principles and practices. Software estimation components, size estimation. Effort, schedule and Cost Estimation models. Tools for Requirements Management and Estimation Requirements Management Tools

Prerequisite: SFE 4010

Credit: 3 Units

SFE 4050 Software Process and Project Management

The course addresses the aspects of software process and project management. Topics include: Software Process Maturity Software maturity Framework; Process Reference Models Capability Maturity Model; Software Project Management Renaissance Conventional Software Management; Project Planning Software Life Cycle Models; Project Tracking and Control issues.

Prerequisite: SFE 4010

Credit: 3 Units units

SWE: Software Development

SWE1020 Data Structure Analysis and Algorithms

The purpose of this course is to provide the students with solid foundations in the basic concepts of programme: data structures and algorithms.

Credit: 4.5 Credits

Prerequisite: APT1020, STA2010

SWE2020 Machine Learning and Big Data

This course is an introduction to machine learning algorithms and Big Data analytics. The student will develop a basic understanding of the principles of machine learning and Big Data and examine why algorithms play an essential role in machine learning and Big Data analysis.

Credit: 4.5 Credits

Prerequisite: APT3010

SWE2030 Software Requirements Engineering

This course equips students with knowledge and skills to capture software requirements and handle difficult situations in gathering data to build systems. Special emphasis is given to working with clients and to learning about the needs of users who interact with a system.

Credit: 4.5 Credits

Prerequisite: APT2080

SWE2040 Programming with Frameworks

The course provides the necessary tools for conducting advanced programming and information for finding, evaluating, selecting and using an application framework for solving complex real world problems. It explains the benefits of frameworks and component technologies, specifically in relation to web application development.

Credit: 4.5 Credits

Prerequisite: APT 3040

SWE3020 Software Quality Assurance and Safety

This course aims to equip software engineers with start of the art skills and acumen of software quality assurance technology and tools.

Credit: 4.5 Credits

Prerequisite: SWE3050

SWE3030 Software Costing and Estimation

To introduce students to techniques used when estimating all types of software projects, including "fresh" development, re-engineering, and maintenance.

Credit: 4.5 Credits

Prerequisite: SWE3050

SWE3050 Software Verification, Validation and Testing

This course gives an in-depth knowledge in the fundamentals of verification, validation and testing of software systems. The student will be made aware of both the state of art in research and state of practice in industry.

Credit: 4.5 Credits

Prerequisite: SWE2030

SWE3090 Software Engineering Project I

This course gives students the opportunity to develop a considerable software system following a rigorous software development process. Students develop applications following standard software engineering approaches and implement using programme languages of their choice.

Credit: 4.5 Credits

Prerequisite: SWE3050

SWE3010 Security and Business Continuity

This course aims to equip learners with essential business continuity skills as external and internal

attacks emerge.

Credit: 3 Credits

Prerequisite: APT2050

SWE3040 Software Engineering Process

The purpose of this course is to learn software engineering methods, both formal and informal, and to practice their use in designing, building, and validating (verifying, testing) practical software systems.

Credit: 4.5 Credits

Prerequisite: SWE3050

SWE4040 Software Construction and Development

This will ensure that students are able to develop large real life usable software with thousands of lines of code.

Credit: 4.5 Credits

Prerequisite: SWE3050

SWE4060 Software Project Planning and Management

This course describes the key aspects of a software project and then addresses those topics germane to successful software project management. The course introduces leadership and management skills and techniques to enable the student to overcome challenges associated with software projects and to successfully lead such projects and programmes in today's complex systems environment.

Credit: 4.5 Credits

Prerequisite: SWE3050

SWE4070 Advanced Web-Based Systems Development

The course introduces the basic concepts of the World Wide Web (Web), and the principles and tools used to develop web applications.

Credit: 4.5 Credits

Prerequisite: APT1040

SWE4080 Computer and Network Security

This course aims to equip learners with required skills to understand security architectures required in deployment of software applications implement security controls, operating systems security mechanisms, telecommunications security, disaster recovery and implementation of cryptosystems techniques.

Credit: 4.5 Credits

Prerequisite: SWE3010

SWE4090 Enterprise Resource Planning Systems

This course will enhance students' understanding of issues and decisions that must be made when embarking upon a ERP selection and implementation journey. In the process, students will become familiar with the forces and organisational conditions leading to the acquisition of such enterprise wide systems.

Credit: 4.5 Credits

Prerequisite: SWE3010

SWE4900 Software Engineering Capstone Project II

The purpose of this course is to give students the opportunity to integrate the knowledge that they have gained across the curriculum. Students learn how to work in teams, identify a problem, develop a project proposal outlining an approach to the problem's solution, implement the proposed solution, and test or evaluate the results. The course also imparts skills on how to document their work in the form of written reports and oral presentations.

Credit: 4.5 Credits

Prerequisite: SWE3090

SWE4910 Software Engineering Internship

This course provides the student with an opportunity to explore career interests while applying knowledge and skills learned in the classroom in a work setting. The experience also helps students gain a clearer sense of what they still need to learn in software development and provides an opportunity to build professional skills.

Credit: 3 Credits

Prerequisite: SWE3090

SWE6110 Principles of Software Engineering

The purpose of this course is to present a broad perspective of software engineering, focusing on the processes and techniques fundamental to the creation of reliable, software systems. It covers agile methods and software reuse, alongside 'traditional' plan-driven software engineering. It also gives students the most up-to-date view of the field currently available. Practical case studies, a full set of easy-to-access supplements, and extensive web resources facilitate delivery of the course content and at the end of the course, students ought to emerge equipped to lead a programming project and deliver software products on time and within budget.

Credit: 3 Credits

Pre-requisites: MIS6030 Applications Development

SWE6120 Human Computer Interface

The purpose of this course is to provide students with a comprehensive introduction to the dynamic field of HCI. Students will learn practical principles and guidelines needed to develop high quality interface designs which users can understand, predict, and control. The course covers theoretical foundations, and design processes such as expert reviews and usability testing.

The course includes current HCI topics with balanced emphasis on mobile devices, Web, and desktop

platforms. It addresses the profound changes brought by user-generated content of text, photo, music, and video and the raised expectations for compelling user experiences.

Credit: 3 Credits

Prerequisites: MIS6030 Applications Development

SWE6130 Mobile Applications Development

The purpose of this course is to arm students from various backgrounds: graphic design, programming and interaction design with the techniques for building applications that adapt to the ways in which mobile applications differ from traditional desktop or Web-based applications: constrained resources, small screen sizes, varying display resolutions, intermittent network connectivity, specialized sensors, security restrictions, and so forth. The course also aims to address best practice for ensuring that mobile application development has the depth and breadth that encompasses: using HTML5/XML-based layouts, managing multimedia, storing user data, networking via Bluetooth and Wi-Fi, determining device location and orientation, deploying applications, and gracefully handling shutdowns and restarts to applications.

Credit: 3 Credits

Prerequisites: MIS6030 Applications Development, MIS6070 Web Based Information Systems, MIS 6170 Object Oriented Techniques, & MIS6120 Mobile Computing.

SWE6140 Group Work in Large Scale Software Development

The purpose of this course is to get students to explore and gain practice of real software development for a large project by group work. It aims at simulating the demands of a real world development situation. The course will be instructor led, with the instructor acting in the roles of Managing Director, Client and User to

provide guidance. Students will work in groups, and will be supplied with a minimal specification by the course instructor who will act as a customer/client. The students will be provided with guidance on a range of suitable techniques appropriate for gaining an understanding of the problem and undertaking the systems development task.

Credit: 3 Credits

Pre-requisites: SWE6110 Principles of Software Engineering, MIS6160 IT Project Management

STA: Statistics

STA 1020: Probability and Statistics I

The course will introduce students to the basic concepts of statistics and probability theory and their application to real life situations.

Pre-requisite: DSA 1060

Credit: 3 Units

STA 1040: Statistical Computing

The course will enable students to learn programming concepts and be able to conduct their independent data analysis. The course aims to equip learners with skills to effectively analyze data and confidently answer key business questions. Students will gain the knowledge and skills needed to import, pre-process, mine, and evaluate from the core of the necessary data analysis for big data. This course introduces learners to statistical computation in R environment

Pre-requisite: STA 1020

Credit: 3 Units

STA 2010: Probability & Statistics II

The course will introduce the student to the concepts of multivariate statistical methods, random sampling and resulting sampling distributions.

Pre-requisite: STA 1020

Credit: 3 Units

STA 2030: Statistical Inference

The purpose of the course is to introduce the student to statistical inferential methods of estimation and hypotheses testing for decision making and developing their theoretical framework.

Pre-requisite: STA 2010

Credit: 3 Units

STA 2060: Stochastic Processes

This course introduces the theory and applications of random processes needed in various disciplines of applications.

Pre-requisite: MTH 1060, STA 2010

Credit: 3 Units

STA 3010: Statistical Modelling

This course introduces statistical methods for regression analysis and model building for studying relationships between variables. Students will gain insights on how the methods are developed and gain ability to perform regression analysis and model building with appropriate methods.

Pre-requisite: STA 2030

Credit: 3 Units

STA 3020: Multivariate Statistical Analysis

This course introduces applied multivariate analysis with applications in various areas of interest.

Pre-requisite: STA 2030

Credit: 3 Units

STA 3040: Mathematical Modeling and Simulation

The aim of this course is to teach students how to mathematically model different systems and use computer tools to solve the resulting mathematical models. To teach students a range of fundamental skills in modelling and simulation methodology, numerical methods, algorithms and software usage that will help them to achieve ambitious careers in industry or academia. The goal is to introduce students to basic simulation methods and tools for modelling and simulation of continuous, discrete and combined systems.

Pre-requisites: MTH1060, STA 2060

Credit: 3 Units

STA 3050: Time Series Analysis and Forecasting

The purpose of this course is to introduce a variety of statistical models for time series and cover the main methods for analyzing these models.

Pre-requisite: STA 3010

Credit: 3 Units

STA 4030: Bayesian Inference and Decision Theory

The course introduces decision theory and relationship to Bayesian statistical inference.

Pre-requisites: STA 3050

Credit: 3 Units

STA 6110: Linear and Nonlinear Models

The linear and nonlinear models' course will provide students with an in-depth investigation of linear and nonlinear modeling approaches, allowing them to comprehend and apply variety of statistical models to a variety of datasets.

Pre-requisite: None

Credit: 3 Hours

STA 6220: Computational Statistics

The computational statistics course will equip learners with knowledge on how to design and organize algorithms for function optimization, integration and simulation of distributions and how to solve statistical computing problems with help of statistical software.

Pre-requisite: MDA 6110

Credit: 3 Hours

STA 6230: Bayesian Statistics

The Bayesian statistics course will provide students with a deep understanding of probabilistic reasoning and statistical inference through the lens of Bayesian methodology.

Pre-requisite: None

Credit: 3 hours

STA 6510: Multivariate Methods

The multivariate methods course will provide learners with a rigorous foundation in multivariate statistical techniques essential for analyzing complex, high-dimensional data in business contexts.

Pre-requisite: MDA 6220

Credit: 3 Hours

TMC: Telecommunications and Mobile Computing (on hold)

TMC 6110 Broadband Network Architectures and Protocols

The fundamental operation of computer networks and communication protocols. Local and large scale networks. Principles and practice of computer networking, with an emphasis on data communications and local area network technologies and design. Wireless and mobile communication systems, protocols and associated technologies. Local and large area networks. The overall aims of course are the advanced education of students intending to develop a rich knowledge of modern electronic communication systems, from devices, to systems, networks, protocols and their security and the development of expertise which will enable to handle problems in modern digital era.

The course teaches the operational principles of optical fiber communication systems and examines how optical networks are used to provide the next generation broadband infrastructure.

Credit: 3 Units

TMC 6120 Digital Mobile Communications

This course introduces the principles and techniques of mobile communications with particular emphasis on GSM networks. It covers infrastructure, protocols, multiplexing technologies, signaling, call set-up, data structures, system design and environmental considerations. It also covers 3G high speed mobile communications, which offer services such as mobile internet and video in addition to voice and message/data communications.

Credit: 3 Units

TMC 6130 Cloud Computing and Virtualization

This graduate-level course covers advanced topics on cloud computing and data centers, with emphases on data center networking and virtualization. Homework assignments and a project

assignment will be given to help student develop a better understanding of data center networking technologies, and practice Virtual Machine (VM) creation, configuration and programming.

Prerequisites: MIS6040

Credits: 3 Units

TMC 6140 Cryptography and Network Security

In this age of universal electronic connectivity, viruses and hackers, electronic eavesdropping, and electronic fraud, security is paramount. This course provides a practical approach of network security applications and standards, with an emphasis on the Internet and for corporate networks. The course teaches an up-to-date survey of cryptography, authentication, and digital signatures which gives the students a solid yet concise overview of the fundamental algorithms and techniques underlying network security.

This course provides a practical survey of network security applications and standards, with an emphasis on applications that are widely used on the Internet and for corporate networks. The course teaches an up-to-date survey of cryptography, authentication, and digital signatures which gives the students a solid yet concise overview of the fundamental algorithms and techniques underlying network security. It includes an Integrated, comprehensive, up-to-date coverage of Internet-based security tools and applications. It includes a unified, comprehensive treatment of mutual trust topics - Key management and user authentication which are fundamental to the successful use of cryptographic services. Comprehensive, up-to-date coverage of IP Security. IPSec is one of the most complex, and important new network security standards. The course covers wireless network Security and PGP and S/MIME for electronic mail security. Other topics include federated identity, HTTPS, Secure Shell (SSH), wireless network security, IPsec, legal and ethical issues and SNMP security;

Credit: 3 Units

PhD COURSES

PIS8110 Advances in Cloud Computing

Prerequisite: None

Contact Hours: 45

The purpose of this course is to prepare students who may wish to conduct research in cloud computing or wish to create innovative artifacts using this computing paradigm. The course addresses current and emerging issues in cloud computing and points to open questions in cloud computing. Students will review journal articles in this area to understand current and future trends.

PIS8120 Problem Solving Paradigms in Information Systems

Contact Hours: 45

Pre-requisite – None

This course highlights the two problem solving paradigms in Information Systems and Technology: behavioral science and design science. The behavioral science paradigm seeks to develop and verify theories that explain or predict human or organisational behavior. The design-science paradigm seeks to extend the boundaries of human and organisational capabilities by creating new and innovative artifacts. Both paradigms are foundational to the IS discipline, positioned as it is at the confluence of people, organisations, and technology. In the design-science paradigm, knowledge and understanding of a problem domain and its solution are achieved in the building and application of the designed artifact.

PIS8130 Computing Research Methods I

Prerequisite: None

Contact Hours: 45

The course is designed to provide students with research skills, knowledge and understandings that will enable them to conduct their own research in a rigorous manner. The course will encourage critical understanding of qualitative and quantitative approaches in research and explore the research process.

PIS8140 Advanced Topics in Cryptography and Block Chains

Prerequisite: None

Contact Hours: 45

The purpose of this course is to equip students with advanced knowledge and skills in cryptographic algorithms for secure communications as well as their use in block chain distributed applications.

PIS8150 Research Seminar

Prerequisite: PIS8130

Contact Hours: 45

This course will enable students to acquire skills in developing research proposals, making and justifying methodological choices, writing quality research manuscripts, and understanding the rigor and standards required to publish information systems research in top-tier journals.

PIS8160 Information Systems Theories

Prerequisite: None

Contact Hours: 45

The purpose of this course is to ground students in the analysis of information systems phenomena within broader sociological and political theories of social order and social change, thereby revealing the shifting significance of the information systems environment in a globalizing knowledge society.

PIS8170 Advances in Machine Learning

Prerequisite: None

Contact Hours: 45

The purpose of this course is to prepare students who may wish to conduct research in machine learning or wish to create innovative artifacts using this computing paradigm.

PIS8180 Advanced Statistical Techniques

Prerequisite: PIS8130

Contact Hours: 45

This course introduces advanced statistical techniques and illustrates their applications in solving day to day problems. The goal is to select and apply an appropriate multivariate statistical methodology, to a selected research question.

PIS8190: Computing Research Methods II

Prerequisite: PIS8130

Contact Hours: 45

This course introduces students to use of experiments in Information Systems. Among the topics to be discussed are the strengths (and weaknesses) of experiments, the role of experiments in a multiple methods arsenal, how experiments are presently being used in different areas in Information Systems, and how one could use an experimental approach to Information Systems issues they are interested in.

PIS8210 Information and Communications Technologies for Development

Prerequisite: None

Contact Hours: 45

This course exposes students to Information and Communication Technology for Development (ICT4D) with a focus on the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development comprising state of the art technologies involving mobile, social media, cloud hosting, and various others.

PIS8220: Qualitative and Quantitative Research Methods

Prerequisite: PIS8190

Contact Hours: 45

This course provides students with the knowledge and skills in different qualitative and quantitative research methodologies and philosophical approaches that are available to carry out research in information systems.

PIS8230 Information Security Governance

Credits: 3

Prerequisite: None

This course provides students with the knowledge and skills to protect information within an organisation through the identification and implementation of effective information security governance, information security concepts and strategies.

School of Science & Technology Faculty Profiles

Adema, Valerie P.

Professor of Genetics

B.Sc. (Biology) Egerton University, Kenya; MPhil. (Plant Pathology), MBA (Strategic Management), Moi University; Ph.D., (Applied Biosciences), Hiroshima Prefecture University, Japan; Specialty Areas: Gene Science, Mushroom Science, Microbiology

Chege, Gerald W.

Assistant Professor of Information Systems

B.Sc., M.Sc., University of Nairobi; Ph.D., University of York. Specialty Areas: systems development, database systems and computer networks.

Kariuki, Veronica

PhD Mathematics (Statistics Option), Pan-African University Institute for Basic Sciences, Technology and Innovation (PAUSTI)-2024
Lecturer in Statistics and Data Science
MSc Statistics, Egerton University- 2015
BSc Science, Egerton University- 2012

Gachanga, Esther

Assistant Professor Software Engineering

PhD in Information Technology, Jomo Kenyatta University of Agriculture and Technology,
M.Sc. in Information Technology University of East London,
Bachelor of Arts in Economics and Sociology, Egerton University.

Githinji, Stanley M.

Assistant Information Security and Forensics

B.Sc. (Applied Computer Science) Daystar University; M.Sc. (Information Technology- Security and Audit) Strathmore University; Ph. D. (Information Systems), University of South Africa; Specialty Areas: Information Security and forensics; Electronic Security Integration and Distributed Systems

Macharia, Jimmy K. N.

Professor of Information Systems and Technology

B.Ed., M.Sc. (Mathematics), Kenyatta University; M.Sc. (Computer Science) University of Adelaide. Ph.D., North West University. Specialty Areas: Computer networks and data transmission, information systems management, ICT diffusion & infusion, evaluation of information systems, ICT applications for SMEs, computer & information security, knowledge management, capacity building, e-health and e-learning.

Machoka, Phillip Gichaba

Assistant Professor of Information Systems

B.Sc. (Management Information Systems), MBA, United States International University - Africa; PhD. in Information Systems at the University of Cape Town
Specialty Areas: Information Systems

Mbogho, Audrey Julia Waleghwa

Dean, School of Science and Technology

Associate Professor of Machine Learning
B.Sc. (Computer Science), M.Sc. (Computer Science), City College of the City University of New York, USA; Ph.D (Computer Science) City University of New York;
Specialty Areas: Machine Learning; Natural Language Processing, Human Computer Interaction

Mutanu, Leah Mwaura

Assistant Professor of Software Engineering

B.Ed. (Science) Egerton University.
M.Sc. (Management Information Systems), University of Nairobi.
Ph.D. (Computer Science), Lancaster University
Specialty Areas: Software Engineering and Data Analytics

Musuva, Paula M.W

Assistant Professor of Information Systems and Technology

BSc. Computer Science (1st Class Honors) from Jomo Kenyatta University of Agriculture and Technology (JKUAT)
MSc. Network Systems (Distinction) from University of Sunderland, United Kingdom
PhD. Information Systems at University of Nairobi, KENYA
Specialty Areas: Digital Forensics, Cybercrime, Information Security, Systems Audit, Governance, Risk and Compliance.

Ondiek, Collins Oduor

Assistant Professor- Information systems

BSc. Computer Science with Education- Kampala International University, Master Degree MBA - Management Information System- University of Nairobi and PhD - PhD Information Systems – University of Nairobi
Specialty Areas: Design Science, Behavioral science, Social Media Applications, ICT Adoption, Information systems, ICT4D, distributed systems and parallel systems

Ndiege, Joshua Rumo

Assistant Professor, Information Systems B. Commerce, M. E- Commerce,

Dr. B. R. Ambedkar University; M Commerce (Information Systems), Ph.D. (Information Systems) University of Fort Hare, South Africa; Specialty Areas: Informatics, ICT4D, ICT Adoption;

Ndirangu, Dalton K.

Assistant Professor, Information Systems and Technology

B.Sc. University of Nairobi; M.Sc. (Computer Science) National University of Science and Technology, PhD- Jomo Kenyatta University Information Technology (Machine Learning).
Specialty Area: software engineering

Nyagwencha, Justus Nyamweya

Assistant Professor of Software Engineering

Civil Engineering (Jomo Kenyatta University of Agriculture & Technology);
BSc. (IT), MSc. (Computer Science), Jackson State University, USA; Ph.D., (Computer Science & Software Engineering), Auburn University, USA; Specialty Areas: (Human Computer Interaction, Cloud Computing- Computer Collaborative Work, Software Process and Information Assurance)

Okanda, M. Paul

Associate Professor of Computer Science

B.Sc. (Computer Science) Egerton University. M.Phil. (Computer Science), Lancaster University, UK.
Ph.D. (Distributed Systems), Lancaster University, UK. Specialty Areas: Distributed Systems, Cloud Computing, Sensor Networks and e-Learning.

Okello, Gabriel O.

Assistant Professor of Statistics and Data Science,

B Ed. (Science), Egerton University, M.Sc. (Biometry), University of Nairobi;
M.Sc. (Research Methods), Jomo Kenyatta University of Agriculture and Technology; M.Sc. Management and Organisational Development, USIU-Africa; Ph.D. (Biostatistics), Moi University; Specialty Areas: (Bio) Statistics, Mathematical Modelling, Data Science and Data Analytics

Ombui, Edward

Assistant Professor- Computer Science

BSc. Computer Science - Africa Nazarene University (ANU), PGD Pedagogy - ANU
MSc Applied Computer Science- University of Nairobi
PhD Computer Science –University of Nairobi
Specialty Areas: Artificial Intelligence, Machine Learning, Natural Language Processing, Big Data Analytics

Otiende, Verrah

Assistant Professor of Statistics and Data Science

B.Sc. (Mathematics (Statistics option) and Computer Science) Jomo Kenyatta University of Agriculture and Technology; MSc (Research Methodology), Jomo Kenyatta University of Agriculture and Technology; Ph.D. (Mathematical Statistics), Pan African University Institute of Basic Sciences, Technology and Innovation; Speciality Areas: Mathematical Modeling, Spatial Modeling, Agent Based Modeling, Social Network Analysis, and Decision Modeling

Rao, Jonnalagadda Venkateswara

Professor of Mathematics

B.Sc. (Maths) - Nagarjuna University; M.Sc. (Maths) - Andhra University; M.Phil. (Maths) - Alagappa University; PhD - Nagarjuna University; Specialty Areas: Universal Algebra, Graph Theory and related Fields of Algebra.

Wamuyu, Patrick Kanyi

Associate Professor of Information Technology

B.A (Mathematics & Economics), University of Nairobi
M.Sc. (Computer Applications), Kenyatta University
Ph.D. (Information Systems and Technology), University of KwaZulu-Natal, South Africa
Postdoc: Indian Institute of Information Technology-Allahabad; Freie Universität, Berlin
Specialty Areas: ICT4D, Wireless Sensor Networks, Social Media Use, Consumption and Analytics, Databases and E-Business Infrastructures.

Wafula, Maurine Maraka

Assistant Professor of Mathematics and Data Science

B. Ed Science, Kenyatta University.
B.Sc. (Applied Mathematics) Jomo Kenyatta University of Agriculture and Technology;
Ph.D. (Mathematics- Computational option), Pan African University Institute of Basic Sciences, Technology and Innovation. Post Graduate program in data Science and Business Analytics-University of Texas at Austin
Specialty Areas: Fluid Dynamics, Computational Mathematics, Data Science and Data analytics

School of Graduate Studies

Mission Statement

The mission of the School is to cultivate a vibrant and intellectually stimulating learning and research environment that empowers graduate students to achieve academic excellence, complete their studies successfully and on time, and ultimately emerge as impactful global leaders in their chosen fields.

Dr. Patrick Kanyi Wamuyu
Associate Dean, School of Graduate Studies
Phone: +254 730 116 166
E-mail: pwamuyu@usiu.ac.ke

Ms. Lynnette Nzioki
Graduate Students' Success & Retention Coordinator
Phone: +254 730 116 433
E-mail: lynzioki@usiu.ac.ke

Marura Nyambu
Graduate Academic Advisor
E-mail: mnyambu@usiu.ac.ke

Vision:

To foster a dynamic and intellectually stimulating learning environment that empowers postgraduate students to achieve timely graduation and equip them with the requisite knowledge, skills, and resilience to maximize their potential and emerge as impactful global leaders within their chosen fields.

The School of Graduate Studies (SGS) provides university-level administrative oversight for all postgraduate academic programs, ensuring quality and integrity while also advocating for the advancement of graduate studies at USIU-Africa. This oversight includes the implementation of relevant guidelines, regulations, and policies pertaining to admissions, student academic progress, examinations, and quality assurance. Furthermore, the School actively fosters a supportive research environment for postgraduate students by providing guidance, support, and robust monitoring mechanisms for all postgraduate research activities, encompassing supervision, mentorship, and ensuring adherence to ethical research principles.

Building upon USIU-Africa's esteemed tradition of transformative teaching, learning, and research, the School cultivates a vibrant academic environment that fosters bold knowledge production and inspires our graduate students to become leaders of positive change. We are committed to empowering our

students to contribute significantly to a brighter future through rigorous academic pursuits and impactful research endeavors. The School actively organizes and conducts a diverse range of research workshops and professional development opportunities. These initiatives aim to equip graduate students and faculty with the necessary skills and knowledge to effectively conduct and disseminate high-quality research. Student pursuing their postgraduate studies are encouraged to actively explore and leverage the wealth of resources available to support their academic, professional, and personal endeavors.

The School of Graduate Studies is guided by the following core values:

1. Advocacy
2. Collaboration
3. Inclusion
4. Innovation
5. Scholarship
6. Student-focused

The School of Graduate Studies (SGS) serves the university community by providing comprehensive services and information resources to facilitate the achievement of our postgraduate teaching, learning, research, and community engagement goals. The SGS offers a foundational level of support, while individual schools provide discipline-specific resources to cater to the specialized needs of postgraduate students.

SGS Seven Focus Areas:

- Enhancing the Postgraduate Learning Experience: Building a supportive and stimulating academic environment.
- Excellence in Postgraduate Supervision: Elevating mentorship quality and supervisory best practices.
- Empowering Postgraduate Research: Strengthening resources, training, and guidance for impactful research.
- Building a Connected Postgraduate Community: Fostering collaboration, networking, and peer support.
- Expanding Research Collaborations: Partnering with innovation labs and research centers for cutting-edge opportunities.
- Bridging Academia and Industry: Strengthening industry partnerships for real-world research and career pathways.
- Streamlining Admissions and Career Success: Optimizing postgraduate recruitment and professional placements.

Faculty Mentorship Support

1. Effective Postgraduate Supervision: Core Principles and Best Practices
2. Effective Postgraduate Supervision: Ethics, Assessment, and Emerging Challenges
3. Integrating Information Literacy in Research Methods Classes

Postgraduate Research Recognition

1. Doctoral Research Colloquium
2. Graduate Research Conference and Exhibition
3. Postgraduate Research Publishing Intensive Bootcamp
4. Excellence in Thesis Research Awards
5. Postgraduate Research Thesis Showcase Competitions
6. 3 Minutes Thesis Competition
7. Visualize Your Thesis Competition

Building a Thriving Postgraduate Community

1. Postgraduate Coffee Meetups and Connections
2. Collaborative Team-Building for Postgrads
3. Mental Health and Wellbeing Support for Graduate Students
4. Postgrad Open Forums and Community Barazas
5. Gender Inclusion and Awareness Workshops for Graduate Students
